ICE, AND REFRIGERATORS FOR preserving Ice and cooling Wine, Butter, Cream, Water, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY (now removed to 140 Strand, W.C.), of the best make and at the lowest cash prices. No agents are appointed in London for the sale of the Company's Ice or Refrigerators. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2s 6d, 5s, 9s, and upwards, forwarded any distance into the country by "goods" train, without perceptible waste. Wine-coolers, ice-cream machines, ice planes for sherry-cobblers, freezers, moulds, &c. Detailed printed particulars may be had, by post, on application to the Wenham Lake Ice Company, 140 Strand, London, W.C

RUPTURES.—BY ROYAL LETTERS PATENT
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer,
Mr WHITE, 228 Piccadilly London.
Price of a single Truss, 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London

TO THE NERVOUS AND DEBILITATED
Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By J. L. CURTIS, 15 Albemarle street, Piccadilly, London.
CONTENTS.
INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.
CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.
CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.
CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.
CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.
The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.
MR CURTIS, author of the above Medical Treatise, may be consulted as usual. The efficacy and harmless nature of the remedies employed by MR CURTIS having been demonstrated by a successful practice extending over a period of 20 years nervous sufferers have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Consultations from 10 till 12 3, and 6 till 8. Sundays from 10 till 1.

A FINE HEAD OF HAIR. Whiskers or Moustache permanently obtained by OLDRIDGE'S BALM of COLUMBIA, which prevents the hair turning grey, and the first application causes it to curl beautifully, frees it from scurf, stops it from falling off, and if bald soon restores it again, and promotes the growth of new hair. Price 3s 6d, 6s, and 11s per bottle.—Ask for "Oldridge's Balm," No. 22 Wellington street, Strand, W.C.

NATURE'S GREAT REMEDIES, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c. Dr BUCHAN'S celebrated DOMESTIC MEDICINE consists of the PATENT SUGAR-COATED VEGETABLE PILLS, UNIVERSAL VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, never-failing remedies, affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Just published, gratis, or post free for one stamp, Extracts from Dr Buchan's Work, entitled Buchan's Domestic Medicine, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay and Sons, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay and Co., 63 Oxford street; Butler and Crispe, 4 Cheapside; Bartlett Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout and Harsant, 229 Strand; Darby and Gorden, 140 Leadenhall street, London.

SHIRTS.—FORD'S EUREKAS.—Patterns of the new coloured Shirtings to select from, on receipt of Six Stamps.
The Illustrated Catalogue, free per post.
Richard Ford, 38 Poultry, London.

SHIRTS.—FORD'S EUREKAS.—Coloured, Six for One Guinea. Upwards of 100 various designs to select from. Many patterns can be sent by post on receipt of Four Penny Stamps.
Richard Ford, 38 Poultry, London.

SHIRTS.—FORD'S EUREKAS.—The best quality, Six for Forty-two Shillings.
The Illustrated Price List, containing every particular and mode of self-measurement, post free.
Richard Ford, 38 Poultry, London.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

HARVEY'S FISH SAUCE.—Notice of Injunction.—The admirers of this celebrated Fish Sauce are particularly requested to observe that none is genuine but that which bears the back label with the name of WILLIAM LAZENBY, as well as the front label signed "Elizabeth Lazenby," and that for futher security, on the neck of every bottle of the Genuine Sauce will henceforward appear an additional label, printed in green and red, as follows:—"This notice will be affixed to Lazenby's Harvey's Sauce, prepared at the original warehouse, in addition to the well-known labels, which are protected against imitation by a perpetual injunction in Chancery of 9th July, 1858."
6 Edwards street. Portman square, London.

SEQUELIN'S OIL.—This vegetable preparation is most successful as an instantaneous restorative, strengthening weak hair, opening pores of the skin, most effectual in the growth of hair, eyebrows, whiskers, and moustaches, &c., preventing its falling off, giving also brightness, softness, and keeping its natural colour, and checking the most obstinate baldness in two months. One bottle is sufficient. Price, 6s and 10s. The money returned if not effectual. Sold by the Inventor, Sequelin, 40 Wharton street, Lloyd square, W.C., London.

SOYER'S SULTANA SAUCE Relish, Succulante, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

LONDON	61 King William st. City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.
The Brewery, Burton-on-Trent, April 30, 1860.

HOLLOWAY'S PILLS.—Exercise, Pure Air.—In numerous occupations in which persons are daily occupied, these essentials to perfect health cannot possibly be enjoyed. Hence the many maladies which afflict the student, clerk, and artisan. Let all so suffering try these purifying Pills. They will quicken the languid circulation, rouse any secretions which are sluggish, expel all vitiated humours, improve the digestion, act as mild aperients, and regulate the whole animal economy. These Pills prevent want of exercise and impure air exerting their deleterious influence over both mind and body. Holloway's Pills are admirably well adapted to cure all cases of dyspepsia, hypochondriasis, and nervous disorders, which make life a misery. By expelling all impurities, they secure sound health and cheerfulness.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

PIESSE AND LUBIN'S SWEET SCENTS.—FRANGIPANNI, KISS-ME-QUICK, WHITE-ROSE, and others from every flower that breathes a fragrance; in bottles 2s 6d each, or three in a case 7s. Sold by every Fashionable Druggist and Perfumer in all parts of the world.
Laboratory of Flowers, 2 New Bond street, London.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.
And as some unprincipal Parties are now making and offering for Sale an Imitation of the
GLENFIELD STARCH,
we bereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

ENGRAVING AND PRINTING.

HENRY BRADBURY AND CO.,

BANK-NOTE MANUFACTURERS,

FOREIGN, ENGLISH, AND COLONIAL;

Designers, Engravers, and Printers of Bonds, Coupons, Bills of Exchange Cheques, Certificates, Drafts, Shares, &c.

MERCHANTS and BANKERS are respectfully informed by HENRY BRADBURY (late of Whitefriars), that the Business of BANK-NOTE ENGRAVING and PRINTING, which, under his personal direction, has hitherto been carried on by Messrs BRADBURY and EVANS, is now conducted by a separate Firm under the title of HENRY BRADBURY and CO.

"TIMES' City Article, January 28, 1860:—"A Series of Specimens of Bank-Note Engraving of a very remarkable character has just been issued by Mr Henry Bradbury, who has spent some years in perfecting that art. Apart from their beauty of design and finish, they present the essential advantage of being producible only by machinery so costly and so complex as to prevent all chance of successful forgery."

*** The above Specimens may be had upon application.

OFFICES: 12 and 13 FETTER LANE, FLEET STREET, E. C. (Facing Her Majesty's Record Office.)

They also negotiate approved Drafts on the Australian Colonies, forward Bills for Collection, and transact every description of banking business with Australia, on the most favourable terms, through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.

EDWIN BRETT, Manager.

No. 33 Cornhill, London, E.C., July, 1860.

NATIONAL DISCOUNT COMPANY

(LIMITED), 35 Cornhill, London. Subscribed Capital, £2,000,000. Paid up, £385,345.

Approved mercantile bills discounted for parties properly introduced.

Money received at interest on deposit, repayable on call or at fixed periods.—By order of the Board,

RICHARD PRICE, Secretary.

Cornhill, August, 1860.

THE TRUST AND LOAN COMPANY of UPPER CANADA.

Incorporated by Royal Charter. Capital £1,000,000.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

William Chapman, Esq., Deputy Chairman.

James Hutchinson, Esq.	Matthew Uzielli, Esq.
Charles Morrison, Esq.	T. M. Weguelin, Esq.
William G. Thomson, Esq.	

BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

65 Moorgate street, London.

FREDERICK DENT,

Chronometer, Watch and Clock Maker to the Queen and Prince Consort, and the maker of the Great Clock of the Houses of Parliament, 61 Strand, and 34 Royal Exchange. No connection with 33 Cockspur street.

MODERATE PRICES WITH GENERAL EXCELLENCE.

E. MOSES AND SON

can confidently assert, that they possess advantages and facilities which are quite beyond the reach of any other House in the Trade, and are thereby enabled to offer a REALLY GOOD ARTICLE AT A VERY LOW PRICE. The most skilful Cutters are employed, and durability of material and workmanship may be relied on.

The BESPOKE TAILORING DEPARTMENT is almost daily replenished from the best Home and Foreign Markets.

The READY-MADE CLOTHING DEPARTMENTS are furnished with an immense assortment of goods for all classes, and all occupations. Also, a great variety of Clothing for Juveniles of all ages.

The HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE DEPARTMENTS, contain a carefully selected stock of the best and newest Manufactures.

N.B.—Should any article not be approved of, it will be exchanged, or the money returned.

Corner of MINORIES and ALDGATE, and Corner of NEW OXFORD STREET and HART STREET.

THE "INDISPENSABLE" SUIT,

made in various colours and patterns, and particularly adapted for WALKING, RIDING, TRAVELLING, and BUSINESS. This is universally acknowledged to be the most comfortable and serviceable suit ever introduced. Price from 35s. To be obtained of

E. MOSES and SON,

Corner of MINORIES and ALDGATE, and Corner of NEW OXFORD STREET and HART STREET.

Also Bradford and Sheffield, Yorkshire.

TOURISTS AND EXCURSIONISTS

are specially provided for at

E. MOSES and SON'S,

MERCHANT TAILORS, HATTERS, HOSIERS, BOOTMAKERS, &c.,

Corner of MINORIES and ALDGATE, and Corner of NEW OXFORD STREET and HART STREET.

And Bradford and Sheffield, Yorkshire.

CLOTHING FOR JUVENILES

of all ages, and in every style and material, at

E. MOSES and SON'S,

Corner of MINORIES and ALDGATE, and Corner of NEW OXFORD STREET, and HART STREET.

Also Bradford and Sheffield, Yorkshire.

GRATIS ON APPLICATION OR POST FREE.

E. MOSES AND SON'S

Book for the present Season, containing "The Growth of an Important Branch of British Industry," with rules for Self-measurement, and list of prices. Also (just published), an elaborate plan of their City Premises.

Corner of MINORIES and ALDGATE, and Corner of NEW OXFORD STREET and HART STREET.

Also Bradford and Sheffield, Yorkshire.

THE PECULIARITIES OF THIS AUTUMN.

THE STATE OF THE COUNTRY.

THE circumstances of the country at the present time naturally cause some anxiety as to our prospects for a part of next year and for the coming autumn. The singular features of the season are too conspicuous to have been overlooked by any one, and they have inevitably occasioned some apprehension. We propose, partly in this article and partly in a future one, to inquire how far such forebodings of danger are justified by the facts, and how far they are not.

In the first place, it is certain that the harvest here will be seriously deficient, and it is equally certain that there will not be a famine. Free trade and the steady character of our foreign provision trade make the latter calamity far more improbable than it used to be. Foreign nations now calculate upon this country as one of their markets. We imported in—

	1857.		1858.		1859.
	£		£		£
Wheat...to the value of	9,503,039	...	9,050,467	...	8,713,532
Other kinds of corn ..	7,851,167	...	7,908,268	...	6,934,760
Flour.....	1,963,622	...	3,189,636	...	2,392,295
	19,377,888		20,148,371		18,040,587

Our market is now a regular and businesslike, not an extraordinary and speculative one, as it once was. It is true that a bad harvest at home is still a great calamity. There is a sudden diminution in our productive power. Instead of having our usual crop, we have a much less quantity, and we are as a country so much the worse. No extension of foreign commerce can alter this. We shall be poorer, because we shall have to buy from abroad that which we hoped to have grown at home. Free trade enables us to buy it, but it does not do more. This year it will, we hope, enable us to buy it on fair terms. The harvest in America and Russia is excellent, and we may hope for immense supplies from thence. France, indeed, appears to feel the necessity of competing with us for the food of the world. By a decree, of which a copy will be found in the letter of our Paris Correspondent, the whole sliding scale of French duties is suspended with reference to grain and flour, and exemptions are likewise given to vessels importing them. On the whole, however, we need not fear even this competition. The harvest of the world is this year amply sufficient for the world. The reasonable probability is, that at a moderate rate we shall obtain all the supplies we require.

What, then, will be the effect of our having to pay for the food we want? It might be thought—indeed it is often said—that the large imports of gold from Australia will give us a facility in paying for our corn. But we must consider that we are using them already for other purposes. We have imported of gold bullion and specie—

	£
In 1858.....	22,793,126
1859.....	22,297,698

besides large sums in the present year; but both the total bullion and the reserve in the Banking Department show a diminution :—

	Reserve in Banking Department.		Bullion.
	£		£
1858—August.....	11,766,851	.....	17,654,506
1859—August.....	9,678,320	.....	16,877,255
1860—August..... ..	8,795,260	.....	15,680,840

We can only pay for a deficient harvest out of the store of gold which we retain against sudden emergencies, and as we see that store has not increased. This year the demand upon it will be considerable. The supplies which have arrived are large, and the orders sent out are very much larger. We shall be far beyond the reach of famine, but we shall have indisputably a considerable demand on our available resources. An intelligent correspondent asks why in these times of free trade the money market is so much agitated at the bare idea of a deficient harvest. The answer is that some persons are anxious as to the effect of the impending calls upon our reserve of capital,—upon the bullion in the Bank.

Some persons expected that the Bank rate of discount would have been raised this week, but there was no occasion to do so. The drain has not begun yet. Some parcels of gold have this week been taken to the Bank, and, what is more to the purpose, we are still the dearest country in Europe as far as money goes, except Russia and Austria. The rate of interest at Hamburg is much less, and that at Paris less than in London. This appears from the table which we publish regularly in our City article.

	Bank Rate. Per cent.		Open Market. Per cent.
Amsterdam.....	3	.....	3
Berlin	4	.....	4
Brussels	3	.....	3
Frankfort	2	.....	1½
Hamburg.....	No Bank rate	.....	1½
London	4	.....	4
Paris.....	3½	.....	3
St Petersburg.....	5	.....	5 to 5½
Vienna.....	5	....	4

The Bank were, therefore, not called on to raise their rate last week, and they would have aggravated apprehensions, already perhaps too great, if they had thought fit to do so.

Several circumstances of more or less weight are alleged to justify this apprehension. The recent failures in the leather trade are especially dwelt upon. It is said that other branches of trade may be in the same state now as the leather trade was a short time since. We do not know that they are so, but neither did we know that it was so. Whether this is true or not nothing but time can show. It is certainly probable that some degree of unsoundness may exist in some branches of commerce. There is always some unsoundness in trade, and there are peculiar circumstances at the present moment which render it likely that this unsoundness is some

what above the average. The severe competition for money between the bill-brokers and the joint stock banks may have led one or both of them to take questionable bills rather than allow money which they had paid dearly for to lie unused. We are far from saying that such is the case, but a severe competition among money-dealers for money certainly has a tendency to foster that evil. On this subject, however, we propose to write at length on this day week, and, therefore, we need only say now that it affords reason for care and caution, though not for panic or irrational apprehension.

Again, it is said with undoubted truth that the stock of cotton at Liverpool is very large. It will be seen from our table this week that

	bales.
The stock of cotton in Liverpool on August 24th, 1859, was	655,000
— — August 23rd, 1860, was	1,127,770

showing a difference of nearly 500,000 bales and many millions sterling in the capital employed. And of course this large accumulation is a grave circumstance which is well deserving of serious consideration. But it is not for a moment to be confounded with the facts which have been disclosed to us by the failures in the leather trade. At the worst, the unusual import of cotton is an extra supply of a valuable article. In the leather trade there was an enormous creation of bills *without any articles at all*. It is true that much of the cotton now on hand in Liverpool is held, in one way or in another upon borrowed money,—and, in the event of a very large crop in the United States next year and of a great fall in price, the nominal holders will suffer a very heavy loss. It is not necessary to point out that if a person imports 100,000*l* worth of goods,—25,000*l* with his own capital and 75,000*l* with advances from others,—a fall of 20*l* per cent. on all he has imported is to him a very serious matter; it is a deduction of 20,000*l* from his own capital of 25,000*l*. But though it is possible that a considerable loss may ultimately fall on the holders of cotton in Liverpool, this remains to be proved, and in the worst event the bad consequences of the excessive supply of a particular article are not to be compared with those which are produced by an accumulation of accommodation bills that represent nothing and are paid by nobody.

Again the import of some articles paying duty seems to have outstripped the home consumption, but the remarks we have just made on the import of cotton are applicable in this case also, and in relation to the whole commerce of the country the amount is but trifling.

Lastly, some persons are apprehensive as to the effect of the increase of our national expenditure upon the money market. But in so doing they frequently overlook an obvious and very important distinction. The effect of a large expenditure by the English Government in a distant country —say in China—is an immediate demand on the money market here, and to the extent of the pecuniary operations necessary for the Chinese expedition we shall have a call on the immediate funds of the country, which we should not have had otherwise But the other portions of an augmented expenditure will not have any such *immediate* effect. Ultimately no doubt additional sums paid to the State may be considered as so much subtracted from the productive capital of the country. Capital employed in making a steam-engine yields a return; capital employed in making a cannon yields no return. But the momentary effect on the money market of the two investments is not very different. It is some time before the capital employed on the steam-engine begins to yield a return, and until that time the effect on the money market is exactly the same as if it never would yield any. In consequence we do not consider any part of our augmented national expenditure as very important with reference to the monetary phenomena of the present moment, save that which may be spent in foreign countries at a great distance.

We think, therefore, that the state of the country is one which should occasion serious caution, though not very extreme apprehension. The crop is reasonably good, if we could but get weather to reap it. The circumstances of the country, apart from the harvest, though not all that we could desire, are fair. If they have often been much better than they now are, they have often been much worse. The only facts which should cause serious anxiety are those which we propose to discuss next week in an article on the state of Lombard street.

THE POLITICAL SITUATION OF GARIBALDI.

The strange prudential exhortation addressed the other day by the *Times* to Garibaldi, that he should at once make known that his aims do not include the liberation of Venetia, but stop short of any attempt which would bring other than Italian troops into the field against him, is one of those worldly-wise suggestions which show that the writer has never deeply considered the causes of Garibaldi's marvellous and unbroken success. We do not mean for a moment to say that it is Garibaldi's duty to contemplate such a step at the present time when he has only just begun to climb the arduous path of which that undertaking would be the last and most arduous achievement. Even now he is only in Calabria with a handful of troops,—a Neapolitan garrison is still undislodged from an almost impregnable fortress in the island he has left,—a powerful Neapolitan army, whose political leanings are as yet by no means adequately tested, is in the field before him, and a Papal army behind it, commanded by an able and experienced French officer. In a position such as this Garibaldi has not even time to think of the situation of Venetia, and it would be foolish indeed to pledge himself now to any course with regard to events still so remote. But it would be still more foolish to adopt the advice so kindly offered by the *Times*, and pledge himself *not* to undertake that last effort for the complete liberation of Italy. In an enterprise such as his almost everything depends on the contagion of the lofty purpose by which he is actuated. It is the complete trust which all Italy reposes in Garibaldi's aims,—the absolute certainty which is felt that he has consecrated his great powers to one noble and sacred endeavour, that draws over opponents wherever he goes to his side, and disarms all but the worst tools of the infamous tyranny in his path. Who would not feel that the nobleness and singleness of his great aim was vitally injured by any such manœuvre as that which the *Times* has advised? It might indeed somewhat disarm Austrian jealousy, and allay the nervous apprehensions of Prussia, to pledge the faith of such a man as Garibaldi, that if successful in the South, he would leave Venetia without rescue in the North. But how can the advantage of appeasing Austrian apprehension, or even of effectually allaying Prussian fears, be compared for a moment with the importance of keeping alive the faith of Italy in the purity, simplicity, and integrity of Garibaldi's aims? Were it once known that he had pledged himself, while delivering Italy from her native despots, to leave her foreign oppressor unharmed, who can doubt for a moment that the justly enthusiastic sentiment of the Italians towards Garibaldi would lose half its reality and vigour? They would feel that he could not have that faith in the holiness of his *cause* which has hitherto enabled him to accomplish such marvels, if he needlessly bartered away a single chance of entire success for the sake of slightly diminishing the difficulty of a portion of his task. The almost magical effect of his name and enterprise would vanish at once,—Neapolitan soldiers would no longer feel it almost an act of sacrilege to fight against the man who had already struck a compromise with Austria,—and the charm which causes the ignorant Italian people to place almost a superstitious trust in him would be dispelled for ever. The suggestion of the *Times*, worldly-wise as it seems, is one of the least truly wise we have yet heard. Fortunately Garibaldi is in no danger of adopting it. But it is, perhaps, not quite so certain that our English rulers may not be eager to press such a pseudo-prudential policy on the Italian leader's followers and friends; and therefore only we are anxious to expose its real unsoundness.

It would, indeed, be a gratuitous step for Garibaldi to forfeit the greater part of the sympathy which his enterprise must excite in Northern Italy by repudiating at once all designs of liberating Venetia. It may be, and no doubt is true, that the Neapolitan Government is the worst in Italy,—worse even than the Austrian Government in Venetia. But it is also true that of all the States of Italy, Venetia is, next to Piedmont, the most deserving of freedom,—the one where at the present moment the prevalent tyranny blights the best political material, excepting that in Piedmont, which Italy can show,—the one where self-government was the most sober, temperate, patriotic, and successful in 1849, and where the foreign yoke is the most galling and the least deserved. Also it

is, if we may trust the latest accounts, the State in which at the present moment by far the most crushing tyranny is felt, and concerning which, therefore, the immediate Italian feeling of the hour is perhaps the strongest. For the present, even the King of Naples is trying the expedient of a liberal administration and a gentle rule. Though every one knows that in case of Garibaldi's failure, the constitutional experiment of a popular election, which has been now twice postponed—from July to 26th August, and recently from 26th August to 20th September,—would at once and for ever be abandoned,—yet at least for the present many respectable Italians amuse themselves with the hope that Francis II. intends to keep faith with his subjects like Victor Emmanuel. There are, therefore, some even genuine liberals who do not accept Garibaldi as the true deliverer of Naples, nor share his hopes for the unity of Italy. But there is not an Italian anywhere who does not burn with indignation to read the account of the Austrian cruelties at Venice, and eagerly desire the permanent expulsion of the German invaders from the soil they have so long burdened. The taxation in Venice is now stated to take 60 per cent. from the incomes of all the Venetian citizens: the most terrible and cruel espionage surrounds every Italian family: temporary absentees from the State are recalled under penalty of the absolute confiscation of their property: men of all classes are arrested even in bed, torn from their families, kept in prison on mere suspicion, and their dependent wives and children left to absolute beggary. In short there is no kind of oppression—except, perhaps, the infamous torture which disgraced the Neapolitan and Sicilian prisons—which is not now at its height in Venetia, and thousands of Venetian exiles have taken refuge in Piedmont.

With such things everywhere known, and nowhere felt so keenly and constantly as in the North,—it would only widen irreparably the breach which has unfortunately arisen between the great revolutionary leader and the Constitutional party in Piedmont, were he openly to renounce the crowning enterprise in which Piedmont naturally feels the most lively interest. It is still matter of great doubt in Sardinia whether a political union with Naples is possible or advisable,—whether it may not be better to have a constitutional ally in the South, rather than to grasp at the whole. But it is by no means matter of doubt whether Venetia could or could not be safely annexed to Piedmont. The Sardinian statesmen well know that there can be no durable peace till that event takes place. While the Venetian people are smarting under the most painful of yokes, and the powerful army of Austria occupies the quadrilateral, Piedmont can never be secure either against revolutionary agitation from within, or attacks from without. And yet the one political end which of all others Piedmont is most anxious to gain cannot even be attempted at present without Garibaldi's convenient and irresponsible aid. The Sardinian Ministers are under obligations to France,—and in relations even with England and Prussia,—which would render it pure madness in them to assume the offensive against Venetia. Garibaldi, if he succeed in the South, may do for them what they could not for a long series of years do for themselves,—and if he were hastily to renounce all intention of such an end, he would voluntarily sacrifice even that measure of reluctant sympathy which the fettered statesmen of Sardinia are unable to withhold.

From all considerations alike, therefore, we argue that the single aim which the great Italian leader is known to have at heart, should be still pursued in all its integrity as offering by far the best chance that it will ever be realised. The mutilation of that aim which has been suggested to Garibaldi would not be less fatal to his plans even in the coldest and most prudential view that can be taken of them, than it would be to the very springs of his magic influence over his countrymen.

THE NEW ZEALAND NATIVE QUESTION.

There are no more difficult problems for the Imperial Government to solve than those which affect the relations between the Colonial Governments of our various colonies and the indigenous native races which still linger on the unsettled lands. The New Zealand Bill, which was this week withdrawn, was an unsuccessful attempt to solve this difficulty for New Zealand at the present moment. The Imperial Government have always and justly declined to delegate to the Colonial Legislature, which only represents the interests of the settlers, the power to treat native questions with the same paramount authority with which they are permitted to legislate for themselves. This would be to give them *not* the power of self-government, but an absolute despotism over an unrepresented race. On the other hand, the difficulty of withdrawing native questions entirely from the consideration of the Colonial Legislature and submitting them to a special body appointed by the Crown,—*i.e.*, in other words, by Her Majesty's Imperial advisers, as was contemplated in the Duke of Newcastle's Bill,—would assuredly be productive of all the jealousies which spring from the creation of rival but co-ordinated authorities, at the same time that it would probably be very injudicious as a provision for the interests of the natives themselves. In short, we can conceive of no measure less likely to meet adequately the end in view than the institution of such a Council. What would be its necessary result? Clearly that individuals who had gained the reputation of being advocates of the rights of the aborigines,—whose bias lay towards the side of the native interest, such, for instance, as the most distinguished members of the ecclesiastical or missionary body of the colony,—would be placed on the Council, and would involve that Council in a continual conflict with the Legislative Assembly of the colony wherever settlers' interests and native interests could come into collision. In the present case, indeed, the New Zealand Bill had evidently sprung from this source. The Blue Book which has just appeared sufficiently proves that the Duke of Newcastle prepared his measure at the suggestion of the Governor of New Zealand, in accordance with recommendations transmitted by the able and earnest but one-sided Bishop of New Zealand and his partisans. Though we cordially agree that it is the first duty of Her Majesty's Government vigilantly to watch, and wherever it appears, to restrain the natural bias of English settlers to encroach on and make light of native rights, yet we can imagine no machinery less likely to provide against this danger than the machinery of the proposed Council. We believe it would, in fact, tend to give birth to quarrels and collisions where none would otherwise have arisen,—to manufacture a hundred petty questions and disputes which, without the incentive of such a special organisation, would never come to the surface at all,—in fact to put in evidence, irritate and exaggerate all the points of difference between the settlers and the aborigines.

It seems clear to us that what is wanted, so long as the natives and the settlers have interests completely at issue as at present, is not an ostensible representative of each party without any authority competent to arbitrate satisfactorily between the two,—but an authority competent at once to mediate between the two, and to make his influence felt with both,—whose honour and reputation is involved alike in the prosperity and equitable treatment of both,—and who should be responsible for the exercise of his authority to the Home Government alone. Such an authority the Governor of New Zealand has always possessed and generally wielded with quite sufficient anxiety for the interests of the native race. Nor are we liable in his case to any of that one-sided advocacy which must inevitably have resulted from the Duke of Newcastle's unfortunate Bill. Though it is the Governor's honourable prerogative to guard the interests of the natives, and keep unstained the honour and faith of the British Crown, it is not and cannot be his wish to thwart unnecessarily the views of his "responsible" advisers. No doubt he generally will and ought to have a decided preference for such advisers as seem to him most willing and competent to adopt a humane, liberal, and far-sighted native policy, and he will naturally make concessions to such advisers which he would never make to the advocates of a narrow "settler" party. But he is in a position which renders it needful for him to reconcile rather than to set at enmity the native and colonial parties,—to attain his ends by firmness, judgment, and address, rather than by triumphant advocacy,—in short, by making the least instead of the most of any disputes which may arise. And this is as it should be. No possible definition of departmental duties can practically draw a clear line of division between native questions and colonists' questions; and so long as the interests of the one ever come into collision with the

interests of the other, it will be impossible to include colonist questions and native questions in distinct and rival jurisdictions without leading to a trial of strength between the two. And, therefore, it is most important that the check which ought to be exerted by the Imperial Government on the impatience of the English colonists should be exerted through the Governor, whose desire it must be to reduce the jealousies which exist, rather than through a body whose *esprit de corps* would ensure their multiplication and exaggeration.

These remarks have an immediate and practical application to the present state of New Zealand parties. On the one hand, the Bishop of New Zealand and the missionary party represent the exclusive native interest, and the scheme of a Council appointed by the Crown to settle the native land titles and to arrange for the transfer of the surplus land to the settlers is due to their influence with the Governor. The extreme section of this party is represented by Archdeacon Hadfield, of Kapite, in New Zealand, who has just published a pamphlet, in which he denounces the conduct which has led to the war in Taranaki in unmeasured terms, and accuses the Governor of wilful and gross injustice to the native chief W. Kingi, whose resistance to the sale of the Waitara block caused the war. On the other side stand almost the whole mass of English colonists, who, with few exceptions, desire to draw all the native questions within the jurisdiction of their exclusively English Legislature, and to have the power of legislating for men whose interests are entirely unrepresented in the Legislature, and in great measure adverse to their own. Between the two stands the Governor of New Zealand, who, till a comparatively recent period, inclined much more strongly to the native party than to that of the settlers, and probably still does, though he has adopted the advice of his present moderate and able Ministry with regard to the policy which led to the present native outbreak. The whole conduct of Governor Browne proves conclusively that he is determined to protect the natives against every unfair assault on their interests and rights; and in this determination, though not without drawing upon themselves a good deal of odium amongst the colonists, the Cabinet of which Mr Richmond is the head has generally supported him. They have resisted the policy of immediate and complete subjection of the Maori people to English laws and institutions, and have striven in every way to accommodate the vast change which the presence of the English has inaugurated, so as to render it advantageous as well as palatable to the Maori race. But they have found it necessary to make a stand somewhere against the obstinate *political* dislike of the native chiefs to the alienation of the land by its native owners. The present war is, if we may trust the best authority within our reach, the result of such a stand made by the Governor in a case where the right to sell his land was clearly established by the native vendor, and where, therefore, the Government could not in justice to the colonists refuse to purchase. We think we can see in the pamphlet just put forth by Archdeacon Hadfield,—supposing, as with the evidence now before us we can hardly help doing, that the Government have been in the right,—how disastrous would have been the result of investing a special Council with the sole right of dealing with the native land questions. It could not but have ended in a Government divided against itself,—indeed in open conflict with itself,—the one section of it constantly accusing the other of gross injustice, and lodging appeals on the most complicated questions to the Colonial Office in England against its decisions.

THE MERCHANT'S FUNCTION.

In our last week's impression we commented upon the strange assault made by Mr Ruskin on the doctrines of political economy, in a paper published in the August number of the "Cornhill Magazine." But we were then unable, from want of space, to do justice to the whole of the writer's speculations; and as the latter portion of his article opens a rather curious question and proposes a still more curious solution of it, we recur to it once more.

Mr Ruskin asks why it is that a merchant—in which word, we may observe once for all, he means to include the manufacturer also, the producer, as well as the bringer and distributor of commodities—is less honoured and respected than the soldier, the lawyer, the clergyman, or the physician? He is no less necessary to the State; his profession requires no less sagacity, diligence, resolution, and integrity;—still, socially, he ranks lower and is less regarded. "The soldier's "function is to defend the community; the pastor's, to teach "it; the lawyer's, to enforce justice in it; the physician's, "to keep it in health; the merchant's, to provide for it." To feed and clothe a nation would seem at first sight at least as useful, as indispensable, and as creditable an occupation as to physic it, to control it, to preach to it, or to fight for it:—why is it by general consent considered as less dignified and honourable?—and how is this general estimate to be corrected?

The fact cannot be disputed; but Mr Ruskin's explanation of it cannot be accepted—not, at least, without considerable modification. His explanation is that all the other professions are believed to *act unselfishly:* the merchant alone is assumed to be selfish in every action of his life, in a word to have self and self-aggrandisement as the central and constantly operating motive of his functions. The soldier is always (in theory) ready to die for his country; the lawyer prefers justice to emolument, and, when a judge, would die rather than take a bribe or give a corrupt decision; the physician would die rather than use his science for wicked purposes or than desert his patients from dread of infection; and the clergyman is supposed to think of nothing but the cure of souls committed to his charge, and to be willing to die rather than teach bad doctrine for hire. If the merchant or the manufacturer wishes to be equally esteemed and honoured, nothing more is requsite than that he, like them, should think only of providing for the community, and not of making money out of that provision; should be willing to die rather than not provide always the best article at the cheapest possible price; and in bad times should not only share the losses and distress of his workpeople, but should shield them and take the largest portion of the common sufferings, even to his own ruin;—just as the captain of a ship is the last to leave it in case of shipwreck or of danger.

We incline to adopt a somewhat different explanation from Mr Ruskin's—less recondite, and on the whole less flattering to humanity. We admit to a great extent the truth of one difference between the several professions which Mr Ruskin notices. With rare exceptions, each man chooses his profession as a means of livelihood—not perhaps exactly *for the sake* of the emolument attached to it, but because there is emolument attached to it; and because he prefers to seek the emolument necessary to his subsistence in that particular profession rather than in any other. But, his profession once chosen, the special actions, the details of every day's professional life, are not regulated or inspired by constant refereoce to that emolument in the case of the soldier, the clergyman, or the physician, and only partially so in the case of the lawyer;—whereas they are so in the case of the merchant and the manufacturer, for a reason which will presently appear. The soldier and the clergyman enter on their life because they need the stipend and the pay: once entered, they hope for and seek, indeed, richer livings and more highly-paid grades, but they do not do this or that—do not fight this battle, venture on that bastion, preach that sermon, for the distinct sake of the remuneration. One reason no doubt is that (as a manufacturer would express it) they are not *on piece-work:* they are paid by the day (or year)—not by the job. The lawyer and the physician *are* paid by the job, and their aim is, naturally and quite legitimately, to get as many jobs as they can. They do not, however, except in rare cases—and it is always more or less disreputable if they do—turn from one piece of work or duty to another because the latter is better paid, or go about seeking the well-paid jobs and eschewing the ill-paid ones. But this is, probably, because, on an average, all are paid alike, and their profits depend on quantity more than on selection. In the case of the merchant, the course of proceeding is somewhat different. He has to live by providing for the community, just as the judge has to live by administering justice and the soldier by providing security;—but he does not, like them, receive a fixed salary for performing his function, whether he performs it well or ill. He makes a profit or incurs a loss out of *each transaction* connected with the discharge of his function—a profit if he discharges it well, a loss if he discharges it ill; and he is, therefore, compelled to

consider the remunerative issue of each transaction. If the physician were paid only in case he cured his patient, and were paid in proportion to the difficulty of the case and the completeness of the cure,—would not the *idea of pay* be as constantly present to him as it is now to the merchant? And would there not be great danger lest he should neglect the more trivial cases, and actually refuse to undertake the incurable ones? If a soldier received large rewards if he gained the battle and none at all if he lost it, we do not say that he would fight harder, but would not the idea of pay be uppermost in his mind? Would he not *fight for pay* much more distinctly than he now does? Has the prospect of prize money no existence in the vision of the sailor as he chases a convoy, or of the storming soldier as he mounts the breach? If the barrister had no fee in case he failed to gain his cause, and a very large one if the case was knotty and bad but still gainable,—would there be no risk lest he should decline the hopeless cases and seek the questionable ones?

The true explanation of the fact that the merchant and manufacturer are held in less honour than the other professions—a fact which is generally undeniable and very generally irrational and indefensible—is we believe in a great degree *historical*, and in some degree *intellectual*. In the early days of all nations soldiers were the ruling class: they conquered and they governed; they did not toil. They did not work: they seized and lived upon the work of others: they were respected, therefore, *as the representatives of force*—a respect which belongs to barbarism,—and the remains of which, still traceable in the preference of the military to the mercantile life, are a relic of barbarism. In violent and lawless times—in all times, indeed, but the most civilised—birds of prey always had the advantage over beasts of burden, both in comfort and in estimation. Courage and strength were the valuable qualities then, and were respected accordingly:—and that respect, reasonable then, has come down in a modified form to our own day. Still Mr Ruskin is so far right, that whatever superior respect and honour are paid to the soldier among wise and good men, may be traced to the reflection that his life is always professionally held at the service of his country: other men are called to toil for their country; the military man is called to die for it. He is supposed, also, to be more courageous than other men; and courage is always, and deservedly, a virtue held in high esteem.

In the case of the three other—usually called the liberal—professions, the explanation is somewhat different. They receive paramount consideration, mainly because a much higher culture and wider knowledge are assumed to be needed in them than in the mercantile profession. The clergyman stands apart:—he is supposed, however dull, to be peculiarly correct and pure in conduct, and to have a special mission from on high;—and accordingly from the earliest ages he has been, and if he be worthy of his calling, he deserves to be, the object of peculiar respect. But even here a little reflection might have shown Mr Ruskin that other considerations creep in. The dissenting minister is just as much bound to teach truth, often quite as much qualified to teach it, usually (we might say always) as resolute to die rather than not teach it, invariably as firm at his post in times and scenes of misery and terror, as the beneficed clergyman of the Established Church. Yet *does* the dissenting minister, in social estimation and honour, stand higher than the merchant and the manufacturer?—or as high? And if not, must we not assign a great portion of the respect now actually felt for the clergyman's profession to the fact that it is, or is supposed to be, recruited from the upper, if not precisely the wealthier, classes of the community? The priest in Ireland, the *curé* in France, the minister of the gospel in Protestant Germany, do not take precedence of the merchant in the social hierarchy. These considerations may suggest that the explanation of the fact on which we are commenting is not altogether as dignified or as worthy as Mr Ruskin may imagine.

As to the lawyer and the physician, we may observe that the social estimation in which they are held is partly of modern date, and is subject to considerable exceptions and deductions. In the middle ages and till a comparatively recent date, they were the objects of the fiercest and most contemptuous sarcasms. The pettifogger, the "vile attorney," and the "lean apothecary" were the special butts of Shakespeare, Molière, Beaumarchais, and Goldsmith. Even now questionable practitioners of medicine can be found, solicitors do not always enjoy the purest reputation, and the practices of barristers still furnish a standing theme of doubt and declamation to the moralist. But in all these cases, the respectable members of the profession are honoured and the mean and grasping are despised, just as in the case of merchants;—and the two professions, as well as the mercantile profession, are rising in general esteem, as the moral tone and the standard of intellectual requirements demanded of their votaries improve and expand. Still, it is natural that we should both expect more qualifications from, and give more honour to, the man to whom we trust our health and the man to whom we confide our property, than the man who merely has to clothe us, to feed us, and to house us.

Underneath all these reasons, however, it is more than probable there lies another, of which we are only dimly conscious, and which, though strongly operative, is scarcely logical or worthy. In England at least, next to the worship of rank comes the worship of wealth. A man who *has* money with us stands higher than a man who *has to make* money. It is tacitly assumed that a merchant's object in life is to make money, and that if he *had* money he would not devote himself to making it. Now, herein lies a fallacy. We must distinguish between a man's *function* and his *object*. A soldier's function is to defend his country—his object in undertaking that function is to gain a living. A lawyer's function is to administer justice—his object in undertaking that function is to rise high and amass a fortune. A physician's function is to heal diseases—his object in undertaking that function is to grow rich and provide for his children. In like manner a merchant's function is to provide for the community—though his object in undertaking and performing that function is to make profits. Only, in his case the connection between the performance of his function and its remuneration is more close and obvious than in the other cases: his profits depend upon his doing it well—they are the measure of his success and deserts:—in proportion as he supplies the community with what it wants, at the time it wants it, and at the price it is willing to give for it, does he make money. To make money and perform his social duty, therefore, become, as a rule, synonymous terms. He knows that the degree in which he does the former, is the measure of the perfection in which he discharges the latter. Perhaps there may be cases in which he best performs the *function* of providing for the community by foregoing the *object* of making profits. Mr Ruskin thinks there are. And this brings us to his remedy for the supposed low estimation in which the mercantile body is held.

The merchant or manufacturer (says Mr Ruskin) must be as ready to die, to be martyrised—*i.e.*, to lose money and be ruined—rather than fail in performing his function, as is the soldier, the physician, or the preacher. In other words—for Mr Ruskin, being out of his depth, here grows somewhat misty and general—he must provide for the community at a loss when he cannot do so at a profit; and he must continue to employ his workmen even when he cannot sell his goods, or when he has no profits out of which to pay wages.

Now, in the first place, this last act of martyrdom *is* habitually performed by the manufacturer in all periods of commercial crisis and distress, to a much greater extent than is generally known or than Mr Ruskin would readily believe. It is performed partly from the necessity of the case, and partly as a matter of benevolence. Take the case of a cotton-spinner, for example. His large fixed capital renders it an affair of prudence, if not of absolute necessity, to go on producing long after he is able to sell his productions at profit prices—nay, until the loss in so selling exceeds that which would ensue from allowing his money to lie without interest and his machinery to grow rusty from inaction. During all this period he is bearing the whole loss, and his workmen are bearing none. He is being "martyrised" for their sake. But when this point has been reached and passed—when it would be less ruinous to him to stop his works than to keep them going, he constantly, almost habitually, prefers the latter course rather than turn his workpeople adrift;—and it is only when his losses have become very heavy and very prolonged that he asks his operatives to share them by reduced wages or "short time." The martyrdom and unsel-

fishness, therefore, which Mr Ruskin preaches, are already largely practised.

But further than this, Mr Ruskin appears to think that the merchant or manufacturer ought to sell his goods at a loss, when the community is in such distress that it cannot pay him prices that will yield a profit. Our reply is that, by the laws of political economy—or, to speak more correctly, by those laws of nature of which political ecomony is only the interpreter and exponent—he *cannot help* doing this. His profits *must* fall as the consumers become less able to buy; and when they become quite unable to buy he must let his goods rot, or actually give them away—*i.e.*, dispose of them for less than cost price. But we argue that he never ought to—as we are sure he never will—do this if he can help it. He ought not to sell except at a profit,—simply because his profits are the only means he has of carrying on his business,—that is, of "performing his function" of providing for the community. If merchants were called upon, or tried, to provide for the community *gratis* or below cost price, the community obviously must soon cease to be provided for at all. Mr Ruskin preaches that merchants must provide for the community as cheaply and as well as they can, and at as moderate profits as will remunerate them. We reply that political economy, so much decried by him, takes care of this and effectually secures it; for if one merchant exacts too large profits or sells a bad article, another merchant is sure to undersell him and bring him down to moderate prices and profits. As to the *quality* of the article sold, if it be defective, the community generally is in fault. The merchant's function is to provide *what the community wants*—to supply the article demanded—at as cheap a rate as he can. If the public insist upon an article at a lower price than it can be provided for, it virtually, knowingly or unknowingly—generally the latter—demands an inferior or spurious article—and obtains it. Mr Ruskin's plan, of expecting the merchant to supply the public demand with no profit or a very small one, is precisely the cause and origin of the adulteration, substitution, and deterioration, so much complained of.

As to this supposed duty of the merchant, when hard times require it, to sell his goods unprofitably—*i.e.*, to "perform his functions" at a sacrifice—let us take the crucial case of the corn-dealer in a scarcity. He often makes larger profits in those times than in any others. Ought he not to do so? Mr Ruskin says "No: he ought to sell as low as possible and forego all profit." On the contrary, we say he ought to sell at the highest prices he can obtain, and he will best serve the public and most effectually perform his "function" of providing for them by doing so;—for these high prices, and these only, will enable him to procure the largest possible supplies of corn, and at the same time most surely and easily to economise consumption. Let him contribute largely, if he pleases, to public charities, and aid the poor to buy food;—but if he really wishes to be a benefactor and not a curse to his country, let him laugh to scorn Mr Ruskin's exhortation. If he were weak enough and mischievous enough to follow it, and sell his corn at plenty prices in famine times, the first effect would be that consumption would increase; the second, that supply would diminish; and the third, that the merchant, whose function is "to provide for the community," would be ruined, and thenceforth be unable to discharge his function. So much for the poetical view of the duties of the mercantile profession. The only sound and practical view is that, in this case as in every other, the very desire and efforts of the merchant to make money will be the best security for the due discharge of his function, and secure the amplest provision for the community.

THE PRESENT LAWS OF WARFARE AT SEA.

The following citation from the Report of the Select Committee on Merchant Shipping will be interesting to our readers, as it gives the sanction of the Committee to the estimate of the effect of the present rules of warfare at sea upon the interests of England, formerly advocated by the ECONOMIST:—

"BELLIGERENT RIGHTS AT SEA.

"The question of belligerent rights at sea, with reference to merchant shipping, affects alike the British shipowner in the prosecution of his business, and the general interests of Great Britain, and, therefore, the evidence given on the subject has received from your Committee that attention which its gravity demands.

"Great Britain formerly asserted principles of the law of nations, with reference to the rights of belligerents and neutrals, though other nations defended maxims in some points differing from our own.

"But in the war with Russia in 1854, England having formed an alliance with France, both nations waived their rights to confiscate enemy's goods on board neutral ships, as also neutral goods, in either case, not contraband of war, found on board an enemy's ship. This mutual but provisional waiver of belligerent rights placed the allies in harmonious action, and practically countenanced the principle that 'free ships make free goods.' Upon the return of peace, the Declaration of Paris of April, 1856, signed by Austria, France, Great Britain, Prussia, Russia, Sardinia, and Turkey, gave a formal sanction to this principle. Privateering was also abolished.

"America was invited to be a party to this general international agreement, but demurred, and coupled at first her assent to the abolition of privateering, with the condition that private property at sea should no longer be subject to capture. Finally, she refused to be a party to a convention whereby she would be precluded from resorting to her merchant marine for privateering purposes in case she became a belligerent. But this is not surprising, for the United States has obtained a recognition of the rights of neutrals for which she contended throughout a former period of hostilities; and Great Britain has surrendered her rights without any equivalent from the United States. Our shipowners will thereby be placed at an immense disadvantage in the event of a war breaking out with any important European Power. In fact, should the Declaration of Paris remain in force, during a period of hostilities, the whole of our carrying trade would be inevitably transferred to American and other neutral bottoms.

"From the evidence given by various witnesses, it appears that at a recent period, upon a mere rumour of war in Europe, in which it was apprehended that Great Britain might be involved, American and other neutral ships received a decided preference in being selected to carry produce from distant parts of the world to ports in Europe, whereby even in a period of peace British shipowners were seriously prejudiced. It seems, therefore, that the state of international law, with reference to belligerent rights affecting merchant shipping, cannot remain in its present state; for whilst England may be involved in any great European war, the United States is almost certain to be neutral; and thus our great maritime rival would supplant us in the carrying trade.

"We must therefore either secure the general consent of all nations to establish the immunity of merchant ships and their cargoes from the depredations of both privateers and armed national cruisers during hostilities; or we must revert to the maintenance of our ancient rights, whereby relying upon our maritime superiority, we may not merely hope to guard unmolested our merchant shipping in the prosecution of their business, but may capture enemies' goods in neutral ships, and thus prevent other nations from seizing the carrying trade of the kingdom during a state of hostilities.

"Your Committee consider it their duty to call the attention of your Honourable House to the great importance of this question, which, if not solved during a period of peace, may cause incalculable embarrassment at the outbreak of a war. It is doubtless the prerogative of the Crown to initiate proper measures to maintain the honour and guard the interests of the country in this respect. Your Committee, however, cannot but express their opinion that a compact, like the Declaration of Paris, to which a great maritime Power has refused to be a party, may, in the event of hostilities, produce complications highly disastrous to British interests. As matters stand, England is under all the disadvantages of the want of reciprocal pledges on the part of the United States to refrain from privateering, or from the attempt to break a blockade, which, as heretofore, a sense of self-preservation might compel Great Britain to establish; while Powers so unpledged, urged by every motive of self-interest, would be in a position to inflict the

deepest injury upon British interests, under the same unjustifiable pretences as were put forth during the war at the commencement of the present century.

"Your Committee have thought it their duty thus briefly to point out to your Honourable House the present unsatisfactory position of this question as it immediately affects British merchant shipping. They have done so in the confidence that the whole subject will receive due attention in that quarter, where the responsibility rests of taking such measures, in concurrence with foreign Powers, as may place the present international regulations on a better footing. Your Committee are aware that grave objections have been urged by high authorities against any further step in advance; but they cannot close this brief comment on so important a question without expressing a hope that your Honourable House will agree with them in the opinion that, in the progress of civilisation and in the cause of humanity, the time had arrived when all private property, not contraband of war, should be exempt from capture at sea. Your Committee are of opinion that Great Britain is deeply interested in the adoption of this course. This country has at all times a much larger amount of property afloat than any other nation, and consequently requires a very large naval force to protect her merchant shipping, perhaps at a time when the whole of our ships of war may be urgently wanted to defend our shores."

Agriculture.

THE RAINFALL AND TEMPERATURE.

Every week the prospects of the harvest assume a more serious character, and old farmers refer to the disastrous season of 1816, when, in some districts, the harvest lasted eleven weeks, and, amongst other places in the neighbourhood of Cambridge, "wheat was carried out of the field in several instances while water stood ankle deep in the furrows, and barley was carted in the middle of November after being covered with snow." In some parts of the West of England beans remained in the field till near Christmas. And some persons who remember that year say that the weather then down to the end of August was not so bad as during the present season. We all live in hope that the weather may even yet take a more favourable turn, for there is yet time for getting in our grain crops—such as they are—without serious damage, provided we have a month or six weeks of fine weather. The first three days of the present week were dry, but on Wednesday from an early hour in the morning drenching rain fell till late in the afternoon without cessation, and a complete stop has again been put to farming operations; and Thursday and Friday have been very wet.

Some comparison with former seasons will show the extent of the rainfall and the very low range of temperature we have suffered under this year. The monthly agricultural report of the *Mark Lane Express* from the Isle of Ely states that the register of the sluice-keeper at the Ortwell sluice part of the middle level drainage works shows the rainfalls there in the months of May and June of the present, as compared with the two preceding years, were as follows:—

	1858.	1859.	1860.
	Inches.	Inches.	Inches.
May	2.55	3.08	5.85
June	1.82	2.77	5.32
	4.37	5.85	11.17

The average yearly fall in that district being about 26 inches, it will be seen how much in excess the rain has been this year. So Mr E. J. Lowe, of the Highfield House Observatory (Nottinghamshire), says, that to the 19th Aug. instant the rainfall had been nearly an inch beyond the average of the whole month, and that of the 40 days preceding the 19th of August 35 had been rainy. The effect of such constant additions of moisture to the soil is, that on all strong lands very little vegetation takes place, and mangold wurtzel especially is suffering from the unusually low temperature of the soil.

And the general lowness of the temperature has been as remarkable as the excess of rain. Thus we learn from Mr Lowe, that in June, 1859, there were 20 days in which the temperature in the shade rose to 70 deg.; but there were only 7 on which that heat was attained in June, 1860. In July, 1859, 75 deg. of heat were reached on 28 days, but in July of this year only on 6 days. And in July of last year 80 deg. of heat were marked on 14 days, and 85 on 5 days, while in July of 1860 there was no day when the thermometer marked 80 deg. In August of 1859 the heat was 70 deg. on 25 days, and 80 deg. on 6 days, but during the present month 70 deg. were only reached on 2 days; there has been no greater heat. In the present year during the month of June the temperature fell to within 2-5 deg. of the freezing point; in July to within 4-5 deg., and in August to within 9 deg. of the freezing point.

It has been a point in our favour that the grain, and especially the wheat crops, have ripened very slowly, but in spite of all obstacles they are now approaching maturity, so that in another week from this time farmers will generally feel obliged to commence cutting. The weather in Ireland has been worse than in England, and the potato crops in both countries are generally affected by disease. The state of our crops at this time is altogether very critical.

STOCK PRIZES.

POINTS OF THE SHORTHORN.

Nothing is more uncertain than an award of prizes amongst stock of considerable merit and in good condition, and of late some dissatisfaction has been felt with many of the adjudications at several of the principal stock shows. At all events there must be much scope for the diversities of individual judgment, for we find Shorthorns which took first and second prizes at Canterbury, reduced to third places or mere commendations at subsequent exhibitions, while in other places prize cattle have not even been commended, the prizes having been taken sometimes by their formerly unsuccessful competitors and sometimes by new animals. All this will forcibly strike those who peruse attentively the reports of the prize lists at the different agricultural shows. As regards Shorthorns, many of the prize animals travel from show to show and compete again and again like race-horses, while the feeding them for exhibition has obtained the designation of "training" for prizes. Of course all this indicates an active trade in breeding cattle, for the main object of prize-taking is to obtain celebrity for the herd left at home. But we are by no means sure that prize-taking is not unduly estimated. Occasionally a prize animal is indisputably the best, but more often the ordinary stock-keeper is somewhat puzzled to ascertain why the prize beast has been placed before another or others in the same class. At one of the Yorkshire horse shows of the present season a somewhat ludicrous practical illustration of the value of prize awards occurred. The first prize four-year-old hunting colt was purchased after the show by one of our principal horse-dealers for 50 guineas, and the same dealer also bought the colt which obtained only the second prize at 110 guineas! We have no doubt that the shrewd horse-dealer's decision, aided as it was by his own commercial sense of self-interest, was the most correct. The task of a judge is not however an easy one, though it would be desirable, especially as regards cattle, that some defined and recognised rules should, if practicable, be adopted for testing the merits of competing animals. In the Channel Islands, the stock-breeders have adopted a certain scale of points by which they judge the cattle exhibited at their local shows. Something of the kind has often been suggested for the use of our judges of Shorthorns. No doubt the different judges have in their minds something of that sort, but then one set of judges gives more prominence to certain points than another set does, and thus the uncertainties and variations in the Shorthorn awards, to which we refer, have probably arisen.

It appears that Mr Chrisp, whose able lecture on the Origin of the Shorthorn, delivered at the Newcastle Farmers' Club, we lately noticed, has in a supplemental paper sketched a series of rules which he calls a rough draft, to be offered to the breeding community for consideration. It will be seen that there is some vagueness in many of the points. He introduced the rules by a preliminary sketch of "an ideal Shorthorn, possessing all those perfect points which breeders prize so much." This is the description of his ideal animal:—"The Shorthorn bull must have a symmetrical form, of medium size; body (including quarters and neck) rather long than short; bones fine, legs short; all choice parts well covered with gelatinous flesh, and fat mixed, not patchy; skin medium thickness, mellow to touch; hair fine, silky, thick set, long in winter, not wiry; head well set on to neck; scalp wide; face dished a little, rather long than short, fine muzzle, open nostrils, horns medium size, fine, clear, and waxy, free from black stains; the eyes prominent, bright, but placid; the neck a little elongated and arched, well set on to the shoulders, which ought to slope backwards, be broad and level, deep, with fine shoulder points; brisket deep, prominent, and broad between the fore legs; ribs round, back strait, quarters long, full-fleshed thighs, deep and full at twist, arms full above, fine at knee, flanks deep and full, tail well set on, at right angles with back, and not thick or coarse; colours, roan, red, white, or flecked—black, or shadings of black on skin, hair, horns, or hoofs objectionable. Altogether, the animal ought to have a gay and 'stylish' appearance in gait as well as in form, which breeders consider as betokening high blood, and which most animals of the Shorthorn tribe have more or less. The same characters will, with allowances for the more feminine appearance, answer for the cow, though I should add full development of udder, not fleshy, well-set teats, good milk veins, and perhaps a

hereditary character for good milking qualities." And these are the proposed rules:—

	No. of Points.	What constitutes Goodness.
"Head	4	Moderate length, wide, and rather dished, with clear horns, and flesh-coloured nose—not black.
Neck	1	Being well sprung from shoulders, and slightly arched
Neck vein	2	Prominent and full.
Shoulder and crops ...	6	Former being well thrown back and wide at top, 'points' well covered, and not prominent. Crops being very full.
Breast...	2	Coming well forward, wide, and full.
Back	3	Breadth and levelness.
Loin	4	Breadth and being well covered, not low.
Hocks.....	2	Breadth, and being at right angles with back bone.
Rumps	2	Not being drooped.
Quarter	2	Length, levelness, and being well filled up.
Thigh.....	2	Length and fineness, and being well beefed inwards.
Twists	3	Coming well down.
Hook	1	Being well bent, and not turned in.
Flank.....	3	— full and coming well forward.
Back ribs	3	— well sprung from back, and round.
Fore ribs	3	Round, and coming well down.
Quality and hair	4	Skin not being too thin, but soft and mellow, hair long and silky.
Colour	1	Roans and reds.
Udder and milk vessel	3	Well formed teats and udder, large milk veins."

And he suggests to the members of the Club, that if they would take the trouble of trying the prize animals at the local shows by these rules and reporting the results, some advance towards a practical conclusion would be made.

Some differences were, however, at once suggested. Thus, Mr Atkinson, agreeing with most of the points named, thought "too much stress was laid on a long head. Nor was he in favour of a very long breast, for it indicated a deficiency of weight." Mr Hedley thought "a few points should be given to elegance and style. No matter how well an animal might be formed, if it had a lowering gait it never looked well." To these objections Mr Chrisp answered that "shape should give style, but that he had no objection to voting a few points for that; he did not advocate a long head, but a short head was also objectionable." The Club will resume the subject at a future day, when it has been more matured.

The Jersey scale for bulls comprises 33 points, and no prize is awarded to a bull unless he has 25 of such points. If he has 23 points he is allowed to be branded, which constitutes him a "pedigreed" animal. The points of a cow are 36, and no prize is awarded to a cow with less than 29 points, nor to a heifer with less than 26 points. And a cow or heifer without pedigree is branded at 27 and 24 points respectively.

Literature.

British Association for the Advancement of Science, Oxford, 1860. A Paper on the Lost Polar Expedition and Possible Recovery of its Scientific Documents, read on Thursday, June 28, before the Geographical and Ethnological Section. By W. Parker Snow. With an Introduction and Supplementary Remarks, containing an Analysis and Critical Examination of Facts and Opinions on the Subject, demonstrating the Probability of Survivors yet being found. London: Edward Stanford.

When last year it was announced in the columns of the newspapers that the steam yacht Fox, Captain M'Clintock, had returned in safety from the Arctic regions, bringing positive information as to the fate of the lost Franklin Expedition, the interest excited not only in this country but throughout the civilised world was deep and universal. A perusal of the report made by the gallant leader of the expedition to the Admiralty of his proceedings, while it secured general admiration for the enterprise and perseverance which had accomplished so much, left, however, on the minds of some a rather strong feeling of disappointment at the unsatisfactory state in which the question was after all left. This feeling with the reflecting few assumed a still more decided character on the publication of Sir Leopold M'Clintock's book at the commencement of this year, in which the author so elaborately tries to persuade his readers that all is accomplished that can ever be done towards elucidating the fate of the companions of Franklin, and that it is utterly impossible that there are any survivors of the hundred and five who (according to the record found by Captain M'Clintock) left on the 25th of April, 1848, for Back's Fish River, under the command of Captain Crozier. The mass of the English public no doubt acquiesced in the authority rather than the reasoning of an officer who had so good a right to be heard on the subject; but it appeared to some that, in Captain M'Clintock's arguments, assertion and theory were made too much to take the place of a critical examination of facts.

One officer, Captain Snow, of the mercantile marine, ventured to maintain openly the unsatisfactory character of the information obtained, and to hint at further efforts being called for in the interests alike of science and humanity; but he was pooh-poohed in a rather too peremptory manner by those who had themselves protested before the equipment of the Fox against the hasty "finality" assumptions which would have deprived us even of the little information which we now possess. But, notwithstanding, Captain Snow has persevered in keeping the subject before the public, and at last appears to have succeeded in gaining the ear of the British Association, and converting several of his opponents to the views which he then propounded. Sir John Richardson, indeed, still maintains that the men of the lost expedition must have all perished through scurvy, the provisions having been all bad; that, in his opinion, no remains of a vessel would be found; that no white men could live for any length of time there; that the records would have been destroyed by bears; and that the navigation of the North coast of the American continent is not to be depended on. But he appears to be contradicted in these statements by his own deliberate declarations on previous occasions, and by the facts themselves as far as they have actually been elucidated. Captain Ommanney, while agreeing with Sir John Richardson in other points, does not think the provisions were all so bad, or they would never have gone on instead of returning; and a similar argument is very effectively urged by Captain Snow as to the improbability of men enfeebled as Sir John Richardson supposes them to have been, undertaking the long march to Back's River instead of the far shorter route to the stores at Fury Beach. Sir Edward Belcher, on the other hand, expressed himself "in favour of renewed efforts as proposed by Captain Snow, who had the Arctic officers rather with than against him on the subject." Dr Rae, whose report (derived from the Esquimaux) it was which was first declared to be final and sufficient as to the fate of Franklin, stated his belief that "the lost crews had visited the Fish River to hunt, but not to travel overland home; finding the hunt not successful, *no doubt many wandered elsewhere*, and *the rest* perished. With regard to Captain Snow's plan, he quite agreed with it as practicable, and especially in a small vessel." Captain Ommanney had just protested against the use of a small vessel. "A small vessel and small crew," continued Dr Rae, "were decidedly the best; and a new attempt should be made as Captain Snow proposed. He believed that the records could be found, though he had no faith in any of the lost party being alive. A good summer search was to be strongly commended." Captain Kennedy and Dr King have both previously expressed still more decided opinions in favour of the expediency of another search such as Captain Snow proposes. The object of that gallant seaman is to go as far as he can in a small vessel along the American coast up to King William Island, and then search in summer time by boat, and not at all to depend upon mere land journeys; and, after the contrariety of views by Arctic men which the project has elicited, the public will scarcely lay much stress on the dogmatic assertions by which it was at first met. Sir Roderick Murchison announced from the chair of the section of the British Association, at which the paper was read, that a subscription had been opened in Oxford at the Old Bank, and in London subscriptions are received by Messrs Biddulph, Cocks, and Co., 43 Charing cross, to the credit of "Snow's Renewed Arctic Search." The Committee are Sir W. C. Trevelyan, Bart., Dr Norton Shaw, Secretary of the Royal Geographical Society, Dr Hodgkin, Foreign Secretary to the same, and Mr John Barrow; and several subscribers are already announced, among whom the name of Captain Collinson is prominent.

In the supplement and notes to the little publication before us, Captain Snow enters on a full critical examination of the facts which we already possess as to the fate of the expedition, and we think few can rise from the perusal of these pages without a feeling in favour of the project. Some very curious points are brought out by this examination. The statement by the Esquimaux as to the position in which they saw and visited one of the ships, is brought into striking contrast with the fact that no Esquimaux had visited the West side of the island, as evidenced by the undisturbed state of the stores and articles found there; and a strong presumption is raised that the ship drifted onwards and came ashore at quite a different point, near where the Esquimaux were found during the last expedition in possession of such numerous articles. The reiteration of the supposed mistake as to the date of the winter at Beechy Island in two distinct documents—one of which had been again perused without any correction being made by those who added the additional facts as to the Fish River expedition, gives rise to a query as to whether the second winter was not really passed at Beechy Island. The absence from the record of all complaints of distress or starvation, taken along with the various reports of the Esquimaux which bring down the existence of survivors of the expedition to a very much later date, are facts not very favourable to the theory of Captain M'Clintock as to their deplorable condition. There are many other facts—such as the absence of all graves or bones at Montreal Island, where a party of the crews are said by the Esquimaux to have died, and the statements as to the existence of white men on the neighbouring coasts of America, which are to be found in several of the Arctic Blue Books—which seem to point to one solution, viz., that the

Esquimaux are far better acquainted with the fate of the expedition than they choose to admit, and that there is a possibility that some few of the crews may be still living among them unable to escape, and accommodating themselves to the life of the natives. On this point we may give as an example the case formerly dwelt upon by Miss Cracroft, Lady Franklin's niece :—

It is not generally known that when Captain M'Clure in the Investigator touched in 1850 at Cape Warren, a little to the end of the Mackenzie river, his communication with the shore was opposed with every hostile demonstration by the natives, who were assembled in considerable numbers. He, however, effected a landing, upon which the whole body took to their haiders, carrying with them their most valuable possessions: two or three only remained, viz., an old chief with his son who was suffering from a diseased foot, and could not be moved.

The first object which arrested the attention of the landing party—of whom one was the Moravian missionary and interpreter, who accompanied the Expedition—was a grave which they confidently believed to be that of a European, but their approach to it was prevented by the violent demonstrations of the natives. On the departure of these people, communication was easily effected with the old chief, who informed them that it *was* the grave of one of a party of whites who had arrived in two boats, and who had built themselves a hut near the spot where they were; but on being asked when this happened, he answered with the usual vagueness of these people, "it might have been last year, or it might have been when I was a child." After the murder of one of the party the rest had gone away, and the chief added, that the murderer had decamped on seeing the ship, believing that it had come to revenge the death of the white man. The chief, who had a brass button in his ear, which he said he had got from one of the boat party, offered to accompany Captain M'Clure to the grave, and also to the hut where the white men had lived, but the offer was declined. Captain M'Clure writes in his published despatches that the weather became foggy, and he therefore returned to the ship! The next day an attempt was made to find the hut spoken of by the chief. Two huts were found standing together and were examined, but there appears to be no certainty that the right spot had been found, as the chief spoke of *one* hut. The grave was never visited, nor were the services of the chief sought for, as a guide to the hut.

The above narrative is rendered still more painfully unsatisfactory by a disclosure made by several of the officers of the Investigator, viz., that a man dressed in European clothing was distinctly seen among the natives on the shore. He fled with the rest. The fact was openly spoken of in the ship at the time, but was allowed to pass unheeded.

There is nothing to explain away the above circumstances (recorded in the despatches of Captain M'Clure, and in the journal of Dr Armstrong, Surgeon of the Investigator), though efforts have been made to represent them as unimportant and referable to the movements of former Expeditions. But even if it *were* possible to weaken their force, by throwing doubt upon the inevitable supposition that they referred to the Franklin Expedition, is there any one who can feel satisfied with mere theory when the means of ascertaining the truth are so obvious?

We need not dwell on the importance to science of the recovery of the records of the expedition. It is matter of serious consideration what may not be produced by careful search—conducted not early in the year as Captain M'Clintock's was, *but in the summer time when the snow is melted*, and within a certain ascertained area. But of the grounds on which Captain Snow's appeal is founded, his pages themselves can alone give an adequate idea, and we recommend them to the careful attention of our readers.

FILIPPO STROZZI: A History of the Last Days of the Old Italian Liberty. By T. ADOLPHUS TROLLOPE. Chapman and Hall, 193 Piccadilly.

A FAVOURITE employment of many writers just now is the "rehabilitation" of the less popular characters of history. Some subject of peculiarly unpromising appearance is selected, and his reputation defended from the aspersions of a contemporary and the too easy credulity of succeeding generations. The stronger the popular belief in his demerits, the greater the glory of the resuscitation,—the more decidedly black he has been heretofore painted, the more creditable it is to see him emerge from this new fulling process in shining garments, and walk saint-like through the pages of history, where he has been accustomed to appear in a wholly different guise. From Henry the Eighth and Freidrich Wilhelm to the venal mistress of a profligate French King, characters of all sorts have been passed with more or less success through this process, until from under the benevolent white-washing of a benevolent age we may expect to see Nero emerge as a wise and gracious ruler, and Titus Oates resume his place in history as a true protestant patriot.

To this class of historians Mr T. Adolphus Trollope decidedly does not belong. He shows no danger of hero-worship, or of over-estimating the virtues of those whose life he is examining. So far from disclosing hidden merits in his subject, he does not in the least scruple to "draw his frailties from their dread abode." He seems, indeed, to be endowed with a particularly keen eye for the weak points of human nature in general, and for the especial failings of those more immediately under his notice. Of this he has given us proof already in his "Decade of Italian Women," and in his "Girlhood of Catherine dei Medici"; and here, in his latest work, "Filippo Strozzi, the magnanimous assertor of the liberties of his country," according to a former authority, is "shorn of his beams," and appears, in what we must say we believe to be his true nature, as a sagacious trimmer and assiduous time-server, intent through all the death-throes of liberty that convulsed his native town upon his own ultimate advantage, turning and changing with every winding of the political current, and gaining by a too fortunate, but on his part far from desired death, a name for patriotism that his life had done little to deserve.

That he was a man of great and various abilities there is no doubt; nor that he was from his vast wealth, his talent for affairs, his far-sighted prudence, his activity of temperament and intellect, and his position as head of one of the first families in Florence, one of the most notable men of his day. But he was in no sense of the word a great man. That he can be at all justly looked upon as a representative man, as he is styled by his present biographer, shows conclusively the degeneracy of the times in which he lived; times in which patriotism was used simply as a cloak for ambition, in which prudence was the highest virtue and self the only god. There were undoubtedly to be found in Italy and in Florence men more bloodthirsty, violent, and openly hurtful to their country than Strozzi, who appears to have been of a placable disposition and averse to extreme measures; but few were more thoroughly unprincipled in public and private life, or contributed more by their conduct and example to the demoralisation, personal and political, of their countrymen.

The quiet and prosperous days of the Republic (for so it was still called) under Lorenzo the Magnificent were drawing to a close, when a third son was added to the family of the wealthy banker Strozzi, the same who has handed down a token of his wealth and family pride in the lordly palace that still bears his name in Florence. The stormy elements, long held in check by the genius, moderation, and popularity of Lorenzo, burst out and speedily overwhelmed his weaker and more rashly ambitious son. The Medici were in exile while Filippo grew up, and assumed that position as head of the powerful Strozzi family, which, though as we have seen he was a younger son, was freely accorded to him in after life. While still a youth he had, with a prudent eye to the future, entered into an alliance with the exiled house of Medici. His marriage with Clarice dei Medici is a curious bit of Italian diplomacy, showing at once the subtle nature of the man, and the degree of liberty with which the free citizens of a free city were forced to be content. It was not long before the policy of this alliance was proved by the return of the banished family. Filippo formed one of the band of citizens who went out to welcome them as they approached the city; but, with his accustomed prudence, he declined any open show of authority, while he enjoyed the reality of power by his influence over his brother-in-law and constant companion Lorenzo, the new ruler of Florence. He was urged to accept an estate in the Duchy of Urbino lately wrested by Pope Leo the Tenth from its rightful owner, and presented to his nephew Lorenzo, but this Filippo firmly declined, "foreseeing that such new greatness might very likely be of short duration, and declaring that he would not embark in a mode and style of life which he might by any accident of fortune be compelled, to his great mortification, to give up afterwards." "And thus adhering to his accustomed mode of dress, name, style of living, and citizen-like habits," says his biographer, "he was not obliged, when Lorenzo died, to put down so much as a single servant, which was a matter of infinite self-congratulation to him and of praise on the part of his fellow-citizens."

On the death of Lorenzo, commonly called Duke of Urbino, the government of Florence devolved upon the Cardinal Giulio, afterwards Clement the Seventh; and when he was called from Florence to assume the Pontifical robes, it was made over to the Cardinal of Cortona till such time as the young scions of the house of Medici, Ippolito and Allessandro, should be ready to take the reins in hand. Florence, however, was in no passive mood. The differences between Clement and Charles the Fifth and the consequent sack of Rome were opportunities too favourable to be lost. The citizens rose and demanded the expulsion of the Medici. Filippo Strozzi's prudence did not desert him at this crisis. Although smarting from the recent treachery of the Pope, who, after inducing him to give himself up to Spain as a hostage for the performance of conditions on which he was himself liberated, coolly left him to his fate, with the assurance that it was impossible the conditions should be fulfilled, through which Reynard-like device Strozzi narrowly escaped the gallows; yet he would not put himself in open collision with the Pope and his nephews. In this difficulty he had recourse to his wife. She, as a Medici, might say what would not come well from him; and if all did not go well he could, according to his brother's account, "excuse himself to the Pope by throwing all the blame upon his wife," who, as the historian Segni says, was "a woman high-minded beyond what was prudent." A most amusing scene is given from the same historian, in which the Lady Clarice gives free vent to her "great power of tongue" within the palace, while her husband awaits the result without. "The Cardinal and the two lads were," says Segni, "so 'overwhelmed by such words so spoken by such a woman,' that they at once professed their willingness to go; only imploring Filippo to see them safe out of the town"—which Filippo did, "with many expressions of courtesy and regret," for "he had little trust in the constancy of Florentine popular sentiment, and much in the constancy of Medicean ambition."

Faction and pestilence, not liberty and peace, were the lot of unhappy Florence after she had thrown off her ambitious rulers,—faction and pestilence, followed by war, a long and hopeless but gallantly supported siege, and the reimposing of the former rule in a more hateful and oppressive form. During all these events Strozzi held himself carefully aloof. "Not choosing," says his brother and biographer, "to incur danger either to his life or to his property, he went under cover of his mercantile affairs to Lyons," and only returned to his native city when she was once more bridled, in order to take office under the new rule to carry out Pope Clement's vengeance, and to become the partner of Duke Allessandro's debaucheries, as he had been of Lorenzo's. The friendship of a bad man, bought by bad means, soon turned to the most cordial hatred. Strozzi was too powerful and rich not to be feared by Allessandro,—too superior in intellect, and, in spite of his vices, in general character, to be wholly subservient to such a master, and accordingly Allessandro from henceforth unceasingly pursued the life of his friend. Florence was no longer safe to him; his wife was dead; his sons embroiled him by their headstrong passions; one of his daughters was poisoned at a feast, it was believed by order of the Duke; his property was confiscated on every side at each turn of the political wheel; poor Filippo found that he had given too many hostages to fortune, who was now ruthlessly calling them all in. At length, driven to despair, he embarked his fortunes with those of the other exiles; and when the assassination of Allessandro was followed by the accession of his cousin Cosmo to the Ducal power, he concerted with them the last desperate and fatal effort to gain, as Charles the Fifth well expressed it, "not the liberty of their country, but their own greatness." With two or three companions he ventured into an insecure fortress within reach of the enemy; the treachery of a friend finished what his own unusual imprudence had begun; he was seized by Cosmo's troops, carried prisoner to Florence, and cast into the very tower he had by his wealth enabled Allessandro to erect for the permanent enslavement of the city. After an imprisonment of more than a year he died, how is not exactly known; but it is believed by some, and was very generally believed at the time, that he died by his own hand to avoid a repetition of tortures that might induce him to accuse others, and to shun the ignominy of a public execution. He left behind him two epitaphs so significant of the vain-glorious but generous character of their writer, that we will transcribe them here—

Philippo Strozzæ.
Satis hoc; cætera norunt omnes.

To Filippo Strozzi, by far the most illustrious of all Tuscans in nobility, learning, and wealth; who, when Rome was sacked by the Imperial forces, and Pope Clement was besieged there, restored to liberty his country then reduced to a base slavery. When ten years afterwards he was again opposing resuscitated despotism, being taken prisoner at the castle of Monte Murlo, he was soon after cruelly put to death. His seven surviving sons placed this monument to his memory amid the tears of all good men. The tyrant did not blush to buy his head at a vast price; for he could find no means of remaining in security while so powerful an enemy lived. But Liberty, knowing well that all her hopes fell together with him, willed to be buried in the same tomb. Pour forth then, stranger, abundant tears if the Florentine Republic is aught to thee; for thou wilt never have to weep the loss of a greater citizen. He lived forty-eight years —— months —— days. His last words were, "It is sweet to die by whatsoever death for one's country."

"None the less for this, however, is it true," says the historian Segni, in commenting upon his free-thinking tendencies and his scoffs at the prevailing religion, "that Filippo possessed rare qualities worthy of an illustrious and highly-honoured citizen. In point of wealth he stood alone, and not to be compared to any other man whatsoever in Italy. For at his death he was found to be worth 300,000 crowns of ready cash, and 200,000 crowns in estates, jewels, and other property." In this wealth lay much of the secret of Filippo Strozzi's greatness, and one great cause of his destruction. As the head and main spring of large banking concerns, he showed great abilities and immense powers of application. As a master, he was just and generous; in his home relations, kind and indulgent; but he was one of the most dissipated men of a city at that time noted for its luxury; and if he waged no open war against the liberty of his fellow-citizens, we cannot endorse the statement of a late historian, that he died a "devoted victim to the cause of freedom."

A few words, in conclusion, on the mode in which Mr Trollope has performed a task for which his wide researches in Italian literature has well qualified him. That his work is interesting, that it shows marks of diligent inquiry and real interest in the subject it has in hand, we freely own. It succeeds too in giving us a lively picture of the life of the period of which it treats; but the tone in which it is written, the vulgar jocularity, the forced liveliness, the knowing air as of one who has seen life and is not to be imposed upon, the careless grammar and misty crude philosophy in which it abounds, are most unpleasant. They are not only unbefitting the "dignity of history," they are unbefitting any writer who writes for an educated public, and must tend to degrade the writer who indulges in such slovenly disarray of thought and expression, both in himself and in the ranks of the profession he takes no pains to adorn.

THE FIFTY YEARS' STRUGGLE OF THE SCOTTISH COVENANTERS, 1638-1688. By JAMES DODDS. Edinburgh: Edmonston and Douglas, Princes street. London: Hamilton, Adams, and Co. 1860.

THIS interesting volume, "originally prepared as a course of lectures," is not put forth as "an exhaustive history of the period," but as "a series of descriptive *sketches*, meant to represent in outline the successive phases of the Covenanting struggle." That struggle was "one branch of that war for right and justice which the British people waged with the House of Stuart," and it "may be said to have continued, with more or less of intensity, and more or less of vicissitude, from the Swearing of the National Covenant in 1638, to the deliverance accomplished in the Revolution of 1688."

The main features of this period are of course well known, and the new matter which Mr Dodds has culled from the State Paper Office, though curious and worth reading, does little more than amplify our previous knowledge. The value of the book consists in its being a good popular *resumé* of one of those important episodes of history, well worthy of a separate presentation, in which the full significance of a long past arrives at its culminating point, and takes a form that determines the future character of the nation. On the scale which the author has adopted, he has well executed his task, though, as he himself observes, the subject is deserving of a yet completer treatment.

Mr Dodds begins by showing that while in England, subsequent to the Reformation, "the Parliament was always the people's organ in their pursuit of constitutional government," and the Church was "from its birth a creature of the Court,"—the case was precisely the reverse in Scotland. There, "the Parliament, from radical defects in its structure, was either the mere echo of the Court, or the instrument of some dominant faction of barons," while the *Kirk* "was the true organ of the Scottish people." A significant Article in the "Confession of Faith and Doctrine believed and professed by the Protestants of Scotland" (which was confirmed and adopted in 1567 by the first Parliament of James VI.), runs thus:—"We most constantly believe, that from the beginning there has been, and now is, and to the end of the world shall be, a Kirk; that is to say, a company and multitude of men, chosen by God, who rightly worship and embrace Him, by true faith in Christ Jesus, *who is the only head of the same Kirk.*" This latter clause, striking as it did at the roots of all State dictation in ecclesiastical affairs, was the fundamental point on which the whole Covenanting struggle turned.

Under such a régime as that of the Stuarts, however, no free movement of national life, although apparently religious only, could attain completeness without becoming political also. That distinction between obedience in things lawful and submission to things arbitrary, which constitutional subjects endeavour to observe towards despotic monarchs, is probably regarded by the latter as the most irritating of all modes of resistance. The Covenanters tried it long before they discovered the utter impossibility of ever impressing it upon the House of Stuart. After the death of Charles I., they crowned his son as a constitutional King, and it took twenty years of his horrible dragonnades (1660-1680) to drive these patient and generous remonstrants into deliberate rebellion against the civil power as such. But when at last the time came, it came decisively. Long persecution had thinned the Covenanting body of all timid or time-serving members, and those who remained were equal to the work that lay before them. There is nothing finer in the whole history of the Covenanting struggle than the record of these last eight years, from 1680 to 1688, when the United Societies, popularly called the Cameronians, apprehending clearly the position to which they were driven, took it up before God and man with rare completeness, blending the zeal of the Hebrew with the cool sagacity of the Anglo-Saxon, enriched too, in the leaders of the party, with intellectual culture of no mean order. The following passages will show the manner in which our author sketches this period:—

But Cameron was not merely the preacher of the persecuted remnant. He was the champion that was first to proclaim, that the House of Stuart had forfeited the British throne. It was now necessary, in the evolution of circumstances, that the tie which had so long attracted the Scottish people to their native dynasty should be gradually loosening; and Cameron commenced this dissolving power amongst the strict Covenenters.

In one of his earliest sermons, after his return from Holland, he thus expounds his views:—"The most part of the land cry out, We will have no other king but Cæsar, no other king but King Charles. We must cry, We will have no other king but Christ. *What, say ye, are ye against monarchical government? We are not much taken up with that, if God let pure government be established, that is most for the advantage of civil and ecclesiastical society.....*If ye would have God be for you, you must cut off this King, and these magistrates, and make able men be rulers; men endowed with suitable qualifications, both of body and mind .....If ever ye see good days in Scotland without disowning the

present King, then believe me no more.....I know not if this generation will be honoured to cast off these rulers; but those that the Lord makes instruments to bring back Christ, and to recover our liberties, civil and ecclesiastical, shall be such as shall disown this King and the magistrates under him.....Let them take heed to themselves; for though they should take us to scaffolds, or kill us in the fields, the Lord will yet raise up a party who will be avenged upon them.....We had rather die than live in the same country with them, and outlive the glory of God departing altogether from these lands.

In 1680, this was *Treason*: in 1688, it became the *Revolution Settlement*.

On the 22nd of June (the anniversary of Bothwell), the ancient burgh of Sanquhar was startled, in the midst of its black and desolate hills, by the appearance of twenty armed men on horseback, who rode slowly up the main street. On arriving at the market place, two dismounted and went to the cross, whilst the rest formed a circle round them at a little distance, and the inhabitants flocked to the spot. The two who dismounted were Richard Cameron and his brother Michael. A psalm was sung; a prayer offered; after which Michael read a paper, amid the strange and breathless silence of the gathered multitude. It was the *Sanquhar Declaration*:—"We do by these presents disown Charles Stuart, that has been reigning, or rather tyrannising on the throne of Britain these years bygone, as having any right, title to, or interest in the crown of Scotland, for government,—as forfeited several years since, by his perjury and breach of covenant both to God and His Kirk, and by his tyranny, and breach of the very *leges regnandi* (the very essential conditions of government), in matters civil.....We do declare a war with such a tyrant and usurper, and all the men of his practices.....And we hope after this, none will blame us for, or offend at our rewarding those that are against us as they have done to us, as the Lord gives opportunity." After a concluding prayer, those twenty armed horsemen formed again in rank, and sternly and silently rode away into the pathless deserts from which they had come.

There were now in Scotland two kingdoms, the Stuart monarchy and the Cameronian theocracy. The latter was but a cloud the size of a man's hand, yet in eight years it overspread the whole sky, and descended in a hurricane of ruin on the "Bloody House." Amid much that is sectarian in their phraseology, the real matter of fact for which they are contending was just the old claim of the Covenanters—a Free Parliament and a Free Assembly.

.....What gross injustice has been done to them by the romancers who make mirth out of their sufferings, and madness out of their grave, heroic wisdom! We are to believe them to have been a mere howling jumble of Macbriars, and Kettledrummles, and Mause Headriggs, only saved from utter contempt by a certain kind of earnest, enraptured nonsense. Never was there a more baseless libel. Read, but read with proper understanding and information beforehand,—read the treatises of the men who really led them,—read, above all, the minutes of their Society meetings from 1681 to 1691, and you will be struck with the prudence, sobriety, and calmness with which they transacted all their business, and encountered all emergencies, and considered all the difficult and trying questions that came before them. This very question of resistance to the ruling power, which, as we have said, was then a novel and perplexing question, they discuss with a depth, precision, and completeness, which has not been exceeded by any of the jurists or statists who have since reasoned on the subject. There is not a finer or more comprehensive statement of the proposition than that which is contained in the Society's letter to friends in Ireland, dated 2nd March, 1687:—"In things civil, though we do not say that every tyrannical act makes a tyrant, yet we hold that habitual, obstinate, and declared opposition to, and overturning of religion, laws, and liberties, and making void all contracts with the subjects, intercepting and interdicting all redress by supplications or otherwise, doth sufficiently invalidate his right and relation of magistracy, and warrant subjects.....to revolt from under, and disown allegiance to such a power. Yet they may not lawfully arrogate to themselves that authority which the tyrant has forfeited, or act judicially either in civil or criminal courts. Only, they may do that which is necessary for securing themselves, liberty, and religion." * *

Such, then, was the principle upon which the Cameronians took up their position at the period of which we are now speaking.....They formed into a separate community—armed, drilled, organised—and eight years before any other party, when the rest of the nation were supine and overawed, when other people, "as in the days that were before the flood, were eating and drinking, marrying and giving in marriage," they foresaw that a great convulsion must take place, and they prepared steadily and methodically for it; would be drawn aside into no rash or sectional movement (such as that of Monmouth and Argyle), but waited on and suffered patiently until the decisive hour came; and when the hour came they knew it, and rose in their thousands of armed and disciplined men—the sole volunteers for their country—and bore a glorious part in accomplishing the Revolution of 1688.

That Revolution justified their whole resistance.....And those who have studied the protests and papers of the Cameronians will bear witness, that these documents set forth the same grievances, and require substantially the same alterations of government, as were embodied in the "Claim of Right" of 1689, on which William of Orange was crowned King of Scotland; and on the tenure of which, in effect, our Kings and Queens have held the crown of Britain ever since.

Mr Dodds clearly sees the exclusive and narrow element in the Covenanters' faith, but he pleads, and we think justly, that the vital substance of that faith was essentially noble and universal. Of this he gives most interesting evidence. The extracts from the sermons of Cameron and Peden, and the whole life of James Renwick, are full of those vital utterances which belong to the sacred history of the race. The character of Renwick, indeed, seems to have been of a much finer grain than that of any of the Covenanters of whom we have a full account. In his childhood, he was most unhealthily precocious in intellect, and during his student life he was troubled by the darkest religious doubts, but he passed through all these disadvantages without injury to the vigour or the bloom of his mind. For five years he was the chief leader of the Cameronians, giving coherence to their principles and dignity to their proceedings, and elevating them by his own large-hearted tolerance, and pure, generous sympathies; and when, at the early age of twenty-six, he ended his days on the scaffold, he had lived a richer life and done a nobler work than far longer terms of existence are often permitted to accomplish.

It is to be regretted that our author should sometimes spoil the effect of the noble things he is narrating, by interpolating rhetorical remarks which sadly jar on the reader's feelings. Yet Mr Dodds can write vigorously when he likes, and his narrative is told throughout with clearness and spirit. Although avowedly sympathising with the Covenanters, he sincerely aims to be impartial, and his judgments both of the men and of the time are sensible and liberal. It only remains to add, that the book contains that useful feature, an alphabetical index.

UNIVERSAL HISTORY ON THE BASIS OF GEOGRAPHY, for the Use of Families and Schools. By PETER PARLEY. Seventh Edition. London: Tegg. 1860.

THE wide sale of Peter Parley's books is probably owing to the large amount of entertaining information which he has furnished on a great variety of subjects; but it is one of those instances in which popularity rather attests the urgency of the demand than the goodness of the supply. There is something extremely disagreeable in Parley's slip-shod style, and it can nowhere be more unsuitable than when he professes to teach "Universal History." Any child who is capable of understanding the facts here given would be benefited by receiving them in better language. We may add that the author's views on the main questions of history are essentially common-place, and his narrative is by no means free from inaccuracies of detail. The best portions of the book are the sketches of manners and customs.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

An important decree appears in the *Moniteur* of to-day. It enacts that grain and flour imported by land or by sea, in French or foreign vessels, shall, wherever they may come from, only pay up to the 30th of September, 1861, the minimum of duties fixed by the law of the 15th of April, 1832; also that vessels laden with grain and flour shall be exempt from tonnage dues; and, finally, that vessels so laden leaving any foreign port at any date previous to the said 30th of September, 1861, shall only pay the said minimum duties, and shall be free from tonnage dues. The minimum referred to is 25c the hectolitre (about 2¾ bushels). Thus the sliding scale is once again virtually suspended; and let us hope that this time it is definitively so.

Another batch of the reports of the evidence received by the Superior Council of Commerce on the subject of the commercial treaty has been kindly communicated to me. They refer to the spinning of flax and hemp, and the weaving of the yarn. The representatives of these branches of manufactures told substantially the same tale as the Council had heard from the representatives others; namely, that as the English have greater capital, cheaper fuel and machinery, better conveyance, more skilful workpeople, more experience, larger markets, &c., than the French, the latter ought to receive ample protection. As to the precise amount of the protection the witnesses differed; but, on the whole, the rate of 30 per cent. *ad valorem* seemed to be acceptable:—on certain articles, however, some of them had the modesty to demand from 80 to 124 per cent. One spinner, M. Dickson, of Dunkirk, admitted on his part that 16 per cent. on flax and hemp yarn would, in his opinion, be sufficient; and an Irish witness, Mr Mulholland, of Belfast, was of opinion that if the French got 10 per cent. they ought to be satisfied. As to whether the duties should be specific or *ad valorem*, perfect unanimity of opinion did not prevail. The Chamber of Commerce of Kinoutiers pronounced for the former.

M. Dickson, in his evidence, mentioned a curious fact bearing on the paper trade: he is not allowed by law to export the waste of his materials, which are reserved for the paper-makers; but the price these people give him is just one-half of what he could get in England, and besides certain things which are used in England are not employed in this country. The consequence is, that by being prevented from exporting, M. Dickson is subjected to a loss which he estimates at 8,400f a year. This is actually more than

the taxes he pays the Government! "Is it fair," he asked, "that I should be taxed 8,400f for the benefit of the paper-makers, when I only pay the Government 6,522f?"

The newspapers announce that the Government has entered into an arrangement with the Messageries Imperiales for establishing direct postal communication between France and India, *via* the Isthmus of Suez and the Red Sea. Considering that English mails to and from India pass through France almost every week, and take up and leave letters, the need of the proposed exclusively French communication does not appear; but perhaps the object is to increase political influence, particularly in Egypt. It will, however, be some time before the new line comes into operation, as the steamers destined to ply on it are, with the exception of one, not yet constructed.

Imperial decrees abolish the import duties on capillary roots and plants, and on certain articles of wool and silk made in Algeria; they also reduce to 6f 25c the hectolitre the duty on alcoholic liqueurs from that colony; and, finally, make reductions of duties on goods conveyed by canals and rivers in France.

On the Bourse, during the past week, business has again been very inactive; but *escomptes* to an unusually high figure have been called for, to the great annoyance of speculators. The following are the quotations:—

	Thursday, Aug. 16.	Thursday, Aug. 23.

The Customs returns for July have been brought out. They show that the amount of the import duties for that month were 10,205,000f, whilst in the corresponding month of last year they were 17,555,770f, and in that of 1858, 20,258,188f; also that for the first seven months of the present year the duties were 79,387,000f, whilst in the corresponding period of 1859 they were 112,762,373f, and in that of 1858, 113,260,592f. The falling off at first glance will appear rather startling; but it was inevitable from the recent important commercial reforms, and has been duly calculated on and provided for. The principal articles on which in the months of July of the three years the decline took place were these:—

	July, 1860. f	July, 1859. f	July, 1858. f
Coffee	1555779	2029471	2856663
Cotton	14975	2068143	1493620
Indigo	3834	63062	52716
Wool	65032	1093738	882562
Cast iron	4110	185321	175334
Foreign sugar	1032651	1713812	2158808
Colonial sugar	3519445	6533301	8046822

On all these articles, except cast iron, the import duties have been reduced; but it will be seen from the table below, that though the duties decline, the *quantities* imported (sugar excepted) increase, which is the very object the reductions were intended to attain:—

	First seven months of 1860.	First seven months of 1859.	First seven months of 1858.
Oxen and sheep ....head	267732	217974	192404

Subjoined is an account of the markets:—

FLOUR.—Owing to the long continued bad weather, the price at *Paris* has risen considerably: yesterday the quotation was 66f to 70f the sack of 159 kilogs, according to quality; and the four marks were 68f 50c to 92f for the present month; September, 69f; October, 69f 50c.

WHEAT, at *Paris*, has also advanced: the quotation yesterday was 39f to 42f the sack of 120 kilogs. Very little new wheat was offered, but a quantity from the environs of Saumur was taken at 41f. As many as 130 provincial markets have risen from 14c to 2f 86c the hectolitre, whilst in only 8 has there been a fall; 14 have undergone no change. The decree above referred will, it is not doubted, cause a decline in prices even if the bad weather should continue; indeed, it has already done so.

COTTON.—The sales at *Havre*, in the week ending Friday, amounted to 8,447 bales, and the importations to 4,969. The closing price of low New Orleans was 81f the 50 kilogs, and of very ordinary ditto, 92f. This week business has not been very animated, but yesterday low New Orleans was at 82f.

SUGAR.—The market at *Havre*, in the week ending Friday, was firm, though the sales were not large: 305 casks French West India disposable at 49f 50c the 50 kilogs duty paid; 31 ditto for delivery, same price; 80 casks ditto "usine," 51f 50c; and 1,200 casks Havana, 37f 25c in bond. The arrivals were about 2,500 casks. This week, there have been several sales: French West India at 48f 75c to 49f 50c: Havana, 36f 50c to 37f 75c. At *Nantes*, last week, 795 sacks Reunion went at 52f the 50 kilogs; 1,000 at 52f 50c; 800 superior quality, 55f 50c; and 1,229 gros grain, 56f 25c. This week, a large lot of Reunion gros grain has been sold at 56f 25c, and a quantity of French West India "usine" at 52f, one of ordinary ditto at 52f 50c. At *Bordeaux*, last week, 3,400 bales Reunion went at prices kept secret; 94 casks French West India "usine", 54f 50c; some lots of other French West India, 48f 25c to 51f. This week, nothing has been done. At *Marseilles*, last week, 17,000 sacks Reunion went at 53f for time; 2,600 Havana, 38f ditto; some lots of Egyptian, 34f.

COFFEE.—Business at *Havre*, in the week ending Friday, was not very animated, but prices were maintained. 1,600 sacks Hayti disposable went at 78f the 50 kilogs in bond; 700 sacks ditto, for delivery, same price; 170 sacks Cape disposable, 80f 50c; 100 sacks Gonaives, 82f 50c; 30 sacks Cayes, 77f 50c; 50 sacks Rio not washed, disposable, 75f; 1,813 sacks ditto for delivery, 73f to 73f 50c; and two small lots of Malabar and Mocha, the former at 108 duty paid, the latter at 131f to 135f. In addition, some lots of damaged Malabar and Mocha were sold. The arrivals were about 5,000 sacks. This week, a fair amount of business has been done: Rio, 69f 50c to 73f; ditto washed, 88f: Hayti, 78f; ditto Cape, 81f; ditto St Marc, 82f; Gonaives, 81. At *Bordeaux*, last week, 1,100 sacks Rio were sold at 1f 70c to 1f 85c the kilogramme in bond. This week, 1,402 sacks Guayra have been sold at 87f 50c. At *Marseilles*, last week, there were some large sales; and among them some Hayti at 76f. Nothing done this week.

INDIGO.—At *Havre*, in the week ending Friday, there were neither sales nor arrivals. This week, 14 cases Bengal have been sold at 10f 40c to 10f 70c the ½-kilog. At *Bordeaux*, last week, 50 cases Madras were sold at prices kept secret. Some sales of Madras and Kurpah have been made this week, but prices are kept secret.

HIDES.—In the week ending Friday, at *Havre*, 1,338 La Plata, dry, went at 137f 50c to 145f the 50 kilogs duty paid; 300 ditto, salted, part at 67f, part at 80f; 2,418 Rio Grande, dry, 123f to 132f 50c; 2,000 Pernambuco, drysalted, 96f 50c; 551 Lima, drysalted, 85f; 400 New York, salted, 55f. At a public sale the greater part offered were withdrawn. The arrivals exceeded 45,000. This week, there have been numerous sales: Pernambuco, drysalted, 96f 50c; Bahia, ditto, 92f 50c; Buenos Ayres, dry, 145f; La Plata, 137f 50c to 151f; horse salted Buenos Ayres, 99f to 102f 50c (the 100 kilogs).

TALLOW.—At *Havre*, in the week ending Friday, 48 casks Monte Video were sold at 69f the 50 kilogs duty paid, and the arrivals were 376 casks. This week, there have been no sales. At *Paris*, yesterday, the 100 kilogs were 142f 25c.

WOOL.—At *Havre*, in the week ending Friday, 48 bales La Plata unwashed went at 1f 50c to 3f 15c the kilog; and 11 sheepskins at 1f 10c to 1f 25c. The arrivals exceeded 2,500 bales. This week, various lots of Buenos Ayres unwashed have been sold at 200f to 290f the 100 kilogs.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. was 101f to 102f the hectolitre; Montpellier, 86 deg., 130f. At *Bordeaux*, the day before yesterdays, 3-6 Languedoc was 130f; and beetroot, first quality, 103f.

TRIESTE, Aug. 19.

The Austrian authorities in this city have resolved on establishing a register of Austrian and foreign shipping similar to that of Lloyd's at London.

AMSTERDAM, Aug. 21.

According to a circular of one of our great mercantile firms, the production of coffee does not keep pace with the consumption. Thus, in France, Germany, and Belgium (to speak only of the Continent), the consumption during the last ten years has steadily increased, and is doing so still;—but in Brazil the production cannot be augmented from want of hands; in Java it is on the decline; Cuba, Jamaica, Surinam, and Berbice, formerly very fruitful, now produce little; in Saint Domingo, Maracaibo, and Laguayra, the political state is such as to render any augmentation of the supply unlikely, nor at Santos, which has lately exported largely, can any increase be expected. As to Ceylon, its supply is gradually becoming larger year by year, but not in a sufficient ratio to make up for the falling off elsewhere. From these facts, which are supported by statistics, the natural conclusion is drawn that a gradual rise in the price of coffee may be counted on.

Correspondence.

THE MONEY MARKET.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I am rather at a loss to comprehend the present extreme sensitiveness of the money market, as I do not imagine there has been any overtrading or undue speculation in any branch of trade. There is no doubt but that the weather is and has been for some time most unpropitious for the growing crops, and, unless we have a change for the better soon, the harvest will be late and to a certain extent deficient; but I do not quite comprehend how it is that this should occasion such an alarm among money-dealers, for a wet day in London seems to cause almost a panic in the money market, and bills, except those short-dated, are for the moment almost unnegotiable. This state of matters I could have more easily understood previous to the repeal of the Corn Laws, when a deficient harvest would have occasioned such a scarcity that prices must necessarily have risen to an alarming extent before the void could be filled up, and thereby trade would have run the risk of being paralysed from the dearness of food. Now we have nothing of the kind to fear; indeed I think it is likely that we shall have a much larger import of breadstuffs than we require, and, however the public may benefit, our farmers will receive very little extra price for any deficiency in their crops. It cannot be denied but that a deficient harvest is a national loss; at the same time it must be remembered that it is from America, our best customers for our manufactured goods, that we draw our chief supplies, and I think it is but natural to expect that as we increase our orders for corn and cotton, so much greater will be their demand for that which gives employment to our working population.

I am led to make these few remarks, as I consider the alarm to be greatly exaggerated, not only as to the *present* state of our crops, but also as to the consequences were the worst fears to be realised.—I remain, Sir, your most obedient servant, AN OLD SUBSCRIBER.

Pollok Shaws, near Glasgow, Aug. 22, 1860.

COMMERCIAL AND MISCELLANEOUS NEWS.

By the present mail, we have received the annexed commercial advices from India:—Bombay, July 23.—We are glad to be able to report a continuance of favourable monsoon weather, and generally satisfactory accounts from the interior, though a slight want of rain has been experienced in a few of the growing districts. Here the chief characteristic of our market is general dulness, accompanied by great abundance and cheapness of money, which has had the effect of causing considerable speculation in bank shares, and encouraging the formation of new joint stock concerns, including no less than six spinning companies, while others also are in contemplation for the purpose of affording increased facilities for and assisting the general expansion of trade. Cotton piece goods have been in fair and copper in better demand, while exports generally have continued neglected; and, in the absence of buyers, cotton has at last begun to give way to a greater extent than hitherto. The banks' quotations for discount are still 3 per cent. on Government and 5 per cent. on private three months' paper. Public securities are neglected, and sellers more numerous than buyers, so that a gradual decline has taken place, rates closing at 84½ for Four, 97½ for Five, and 103¾ for Five-and-a-Half per Cent. paper, or a fall of from ¾ to 1 per cent. during the fortnight. Calcutta, July 20.—Government Securities—Four per Cents., 16¾ to 17¼ per cent. discount; Five per Cents, 3 to 3¼ per cent. discount; Five-and-a-Half per Cents., 3 to 3 2a. prem. Exchange on London—For first-class credits, at six months' sight, 2s 7-16d to 2s 0¾d. Freight to London—Dead weight, 3*l*; jute, 3*l* to 3*l* 5s; seeds, 3*l* 15s to 3*l* 17s 6d. Madras, July 18.—Government Securities—Five-and-a-Half per Cents., 4¼ to 4¾ per cent. premium; Five per Cents., 1¼ to 1½ per cent. discount; Four per Cents., 15½ per cent. discount. Exchange on England, at six months' sight, 2s 0 5/16d per rupee. Freight for England, 2*l* 10s per ton. Interest on Government loans, 5 per cent. per annum. Money easy.

A statement has just been furnished of all the joint stock companies wound up, or winding up, under the Joint Stock Companies Act 1856 and 1857, and the Joint Stock Company Amendment Act, 1858. It is extremely imperfect as regards some of the points on which information is most to be desired, since it does not state in any case the amount of capital subscribed or paid up, the duration of the company, its total debts, or the number of shareholders. The only figures that can be arrived at are the amount of assets realised, the calls enforced against contributories, and the aggregate costs and charges of each winding up so far as it has proceeded. The list comprises 26 undertakings, only one of which—the Leicester Spinning Company—has reached a termination of proceedings. All the others are still open. The most striking and at the same time most satisfactory feature of the return is the apparent smallness of each scheme—the effect of limited liability being to prevent any continuance of operations on fals ecredit, and thus to compel stoppage the moment all the original subscription has been made away with. The only exception as respects magnitude of amount is in the case of the European and American Steam Company, the history of which still remains to be completed:—

The Act for preventing the adulteration of articles of food or drink came into force on the 6th instant. Its provisions are sufficiently stringent. We extract clauses 1 and 4, as follows:—I. Every person who shall sell any article of food or drink with which, to the knowledge of such person, any ingredient injurious to health has been mixed, and every person who shall sell as pure or unadulterated any article of food or drink which is adulterated or not pure, shall for every such offence pay a penalty not exceeding five pounds, together with costs; and if any person so convicted shall afterwards commit the like offence, it shall be lawful for the justices to cause such offender's name, place of abode, and offence, to be published, at the expense of such offender, in such newspaper or in such other manner as shall seem desirable. IV. Any purchaser of any article of food or drink in any district where there is any analyst appointed shall be entitled, on payment to the analyst of a sum not less than two shillings and sixpence, nor more than ten shillings and sixpence, to have any such article analysed, and to receive from such analyst a certificate of the result, specifying whether in his opinion such article is adulterated, and also whether it is so adulterated as to be injurious to health; and such certificate shall, in the absence of any evidence to the contrary, be sufficient evidence, and the sum paid for such certificate shall be deemed part of the costs.

TO READERS AND CORRESPONDENTS.

Communications must be authenticated by the name of the writer.

E. C.—The lowest average prices of wheat in England since 1819, were:—In 1835, 39s 4d; and in 1851, 38s 7d per quarter.

Mr WRIGLEY'S communication shall receive attention next week, if possible.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 22nd day of August, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,422,630	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	14,947,630
		Silver Bullion	...
	29,422,630		29,422,630

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,643,398
Rest	3,532,936	Other Securities	19,816,415
Public Deposits (including Exchequer, Savings Banks Commissioners of National Debt, and Dividend Accounts	5,598,755	Notes	8,062,650
Other Deposits	13,846,364	Gold and Silver Coin	733,210
Seven Day and other Bills	724,018		
	38,255,073		38,255,073

Dated the 23rd August, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,084,598	Securities	29,381,813
Public Deposits	5,598,755	Coin and Bullion	15,680,840
Private Deposits	13,846,364		
	41,529,717		45,062,653

The balance of Assets above Liabilities being 3,532,936*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£258,551
A DECREASE of Public Deposits of	357,464
An INCREASE of Other Deposits of	1,033,930
A DECREASE of Government Securities of	160,875
An INCREASE of Other Securities of	477,681
An INCREASE of Bullion of	133,091
An INCREASE of Rest of	11,982
An INCREASE of Reserve of	345,406

The present Bank return is rather more favourable, inasmuch as the notes in circulation have decreased 258,551*l*, notwithstanding the bullion has increased 133,091*l*; both circumstances, as well as an increase in the reserve of 345,406*l*, tending to strengthen the position of the Bank.

The increase of other securities of 477,681*l*, shows that the pressure on the Bank must have been very considerable for discount.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank-post bills	£ 20,912,493	£ 19,936,297	£ 21,146,342	£ 22,538,157	£ 22,084,598
Public deposits	7,927,165	5,788,203	5,452,791	6,152,539	5,598,755
Other deposits	9,377,894	9,765,803	13,550,348	14,183,853	13,846,364
Government securities	14,430,847	10,593,654	10,881,244	11,214,668	9,643,398
Other securities	10,720,307	17,353,385	15,064,072	18,304,418	19,816,415

Bank rate of discount	2½ p. c.	5½ p. c.	3 p. c.	2½ p. c.	4 p. c.
Price of Consols	96⅛	90⅝	97	95⅛	92⅝
Average price of wheat	43s 6d	59s 10d	45s 1d	44s 1d	52s 6d
Exchange on Paris (short)	25 32½ 35	25 20 25	25 15 22½	25 7½ 12½	25 15 22½
— Amsterdam ditto	12 0½ 1	11 16 17	11 17 17½	11 14 14½	11 13½ 14
— Hamburg (3 months)	13 11 11½	13 7½ 8	13 9	13 5½ 5½	13 6 6½

In 1850, the money market was one of great ease. The best bills were readily taken for discount at 2¼ to 2½ per cent. The Bank had been making large advances on Government securities at 2 per cent.

In 1857, anxiety was on the stretch for news of the mail hourly expected from India which on its arrival communicated a bold attack by the mutineers upon the British force besieging Delhi. The depreciation of Indian Government securities in the local markets had fairly set in, the 4 per Cents. being quoted at Bombay at 17 per cent. discount.

In 1858, the Continental exchanges had recovered from the fall which followed the reduction in the value of money from the previous panic-point, and gold was still flowing into the Bank in large quantities. The first instalment was upon the point of being paid on the Brazilian 4½ per Cent. loan of 1,526,000*l*. The loan by the Bank of England to the East India Company of one million on India Bonds had just been renewed for another twelvemonth at 3½ per cent.

In 1859, the negotiation of the Russian and Indian loans had been concluded. The total number of tenders sent in for the Indian loan was about 800 forming an aggregate of 7,550,000*l*, or 50 per cent. more than was wanted. The minimum price fixed was 97; but the loan was for the most part subscribed for between 97*l* 0s 3d and 97*l* 10s. The loan immediately went to a premium.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 1,342,413*l*; in 1857, a deficiency of 7,587,582*l*; in 1858, a deficiency of 1,513,724*l*; and in 1859, a deficiency of 4,120,565*l*. In 1860, the deficiency is 5,970,051*l*.

DISCOUNT AND MONEY MARKET.—The rate of discount both in Lombard street and at the Bank of England is 4 per cent. The demand for money has certainly not been quite so active this week. The state of the weather, and the extreme caution exercised by the discount houses in taking bills and in discouraging speculation, would be quite sufficient to account for the dulness in trade; and were it not for the fear of a large exportation of bullion to pay for corn, money would hardly maintain its present value. It is certain that large amounts are pressed on the discount houses at 3 per cent. on call; and they are so full of money that they employ it on the Stock Exchange in loans on Government securities at 2 per cent., and they cannot lend it in any quantity even at that rate. These circumstances, coupled with the fact of the demand for gold for export having slackened, and also that 160,000*l* has been sold to the Bank of England this week, would seem to indicate an easier money market.

ENGLISH FUNDS.—The transactions in the English funds have been very limited during the week, the market being entirely guided by the state of the weather. If anything, the public take off stock in small quantities, the price being precisely the same for money as the account.

There is no demand for money in the Stock Exchange; the rate may be quoted 1¾ to 2 per cent.

Consols have fluctuated between 93⅛ and 92¾, and close, this afternoon at 92¾ ⅞ for money and account; Exchequer Bills are 1s to 4s pm.; 3 per Cent. Reduced, 93½; and New 3 per Cent., 93¼.

FOREIGN FUNDS.—The market in foreign funds has been heavy, although the transactions are of a most limited nature. Turkish Bonds are steady at 60 to ½ and 74. Spanish Coupons have risen to 6 to ¼.

French Rentes are rather firm than otherwise, and close 68.10 to 15. The market has been supported by speculators for the rise demanding the delivery of the stock they have bought—an operation assisted by the Bank of France making advances.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

	Consols, Money. Lowest.	Highest.	Account. Lowest.	Highest	Exchequer Bills.

RAILWAYS.—The railway market has been very heavy; more, however, in sympathy with the heaviness of the English funds than from any other cause. London and North-Western is lower, in consequence of the supply of stock from the consolidation of the "Eighths" shares. There has been a very considerable demand for American railways. This demand has arisen, first, from a sounder state of affairs generally in America; secondly, from the prosperity arising from good crops both of corn and cotton. Both in America and in this country an increasing demand for the principal lines has in consequence taken place, the Illinois Central, and New York and Erie being most sought after. An impulse has been given to the shares of the New York and Erie line by reason of the progress of the Atlantic and Great Western Railway, the first section of which is now completed. It is very possible that a stimulus has been given to American railway securities by the statistics given by Captain Galton in his official report on the railways of Great Britain, which shows the following remarkable results:—

	England.	United States.
Miles constructed and in use.	9,119	26,210
Total cost of all in use	£304,989,826	£216,887,750
Net earnings	4.7 per cent.	6.7 per cent.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also of those in India Government loan notes:—

Gold.—We have to report some rather large arrivals of gold since the date of our last circular (16th August); the particulars are as follows:—The Agincourt, from Melbourne, with 174,500*l*; the British Trident, from Melbourne, with 110,000*l*; the Vigo, from New York, with 84,000*l*; the Canada, from Boston, with 20,000*l*. The demand for export has not been so good during the week. A considerable amount of the gold mentioned above has been sent into the Bank, and there is every probability of more following. The United States gold coin has been partly sold at 76s 3d per oz, showing a slight decline in price.

Silver.—The market for silver is quiet, and there is but very little demand for the outgoing mail to Bombay of the 27th inst. For the Calcutta and China mail of the 4th September, a good demand is expected. The Tasmanian has taken 11,620*l* to the West Indies.

Mexican Dollars.—The Bremen has brought 36,000*l* in dollars from New York; these have been sold at 62¾d per oz. The last mail for China took out nearly 240,000*l*, and the demand for the next mail of the 4th Sept. is likely to be good. There are but few Mexican dollars now here, and we quote the price as 62½d per oz nominal.

Exchange on India remains the same. We quote 60 days' sight Bank drafts on Bombay and Calcutta, 1s 11¾d; bills with documents, 1s 11d to 1s 11¼d. Bank of Bengal post bills, sight, 1s 11¾d.

India Government loan notes are nominal at 96¼ for 5 per Cents., and 101¾ for 5½ per Cents. The quotations from Bombay and Calcutta to hand yesterday are, at the former place, 97½ for 5 per Cents., and 103¾ for 5½ per Cents.; and at the latter place, 96¾ to 97, and 103 to 103¼.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 78s per oz std; Spanish doubloons, 76s 3d to 76s 6d per oz, last price; South American doubloons, 74s to 74s 3d per oz, last price; United States gold coin, 76s 3d per oz, last price. Silver—Bar silver, 5s 1⅞d per oz std; bar silver, containing 5 grs of gold, 5s 1¾d per oz std; fine cake silver, 5s 6d per oz; Mexican dollars, 5s 2½d per oz, nominal; Spanish dollars (Carolus), 6s 2d per oz, last price; five-franc pieces, 4s 11⅝d per oz, last price.

FAILURES.—Messrs J. J. Tilley and Co., Manchester warehousemen, have stopped payment, with liabilities computed at 35,000*l*.

Messrs Chicken and Bodilly, a wholesale house doing a considerable business in the Manchester and woollen trades, have also suspended.

The failure of Mr F. C. Perry, ironmaster, of Birchill Furnaces, near Walsall, is announced. His present liabilities amount to about 22,000*l*; in 1857-8 he failed, with liabilities amounting to 80,000*l*, upon which a composition of 8s in the pound was paid.

The estate of Messrs Thompson and Woodhouse, of Birmingham, warehousemen, is to be wound up under the private arrangement clause.

The liabilities of Mr Cottam, ironfounder, of West Bromwich, amount to 10,000*l*, and an offer of 5s in the pound has been made, and is under consideration by the creditors.

The liabilities of Mr Alfred Penny, underwriter of Lloyd's, &c., amount to 45,349*l* 19s 5d.

Mr Charles Cross, silk warehouseman, has been adjudicated a bankrupt. His liabilities are about 10,000*l*, and assets 7,000*l*.

In the Bankruptcy Court the adjudication against Messrs Francis and Hooper, of Bermondsey, was confirmed.

Messrs J. H. Barber and Co., ironmasters, of Liverpool, have made a proposition to their creditors to pay 4s in the pound, but it has been declined. The liabilities are 29,000*l*, and the assets under 7,000*l*.

At a meeting of the creditors of Messrs Mouat, Nickisson, and Co., of Cannon street, a composition of 13s 4d in the pound was offered and accepted, payable 4s in three months, 3s 4d in six months, 3s in nine months, and 3s in twelve months. The partnership is to be dissolved, and the business will be carried on by Mr Mouat. The statement of their accounts, prepared by Messrs Edwards and James, accountants, of King street, Cheapside, shows liabilities of 53,612*l* 12s 2d, and assets of 48,869*l* 9s 10d. Funds will be provided for the bills falling due.

At a meeting of the creditors of Mr Edmond Buvelot, in the leather trade, a statement of his affairs, prepared by Messrs Hutchinson and Bostock, accountants, of Tokenhouse yard, was presented, showing liabilities of 57,790*l* 18s 5d, and assets of 16,209*l* 18s 5d. After some discussion it was resolved to accept a composition of 5s in the pound, payable at 2, 4, 6, and 12 months, the estate to be under inspection.

At a meeting of the creditors of Mr Abbott, of the Bow Brewery, a committee of five was appointed to take into consideration an offer of a composition of 7s in the pound, in the event of the East India Company refusing to take the beer shipped to them; or 12s in the pound if, on the other hand, they are induced to accept the shipment. The accounts, prepared by Messrs Quilter, Ball, and Co., show the liabilities to be 78,492*l* 11s 5d, and the assets 47,495*l* 16s 9d, showing a deficiency of 30,996*l* 14s 8d, but if the Indian Government refuses to take the shipment of beer, the assets will be reduced to 33,092*l* 12s 2d.

Notwithstanding the features presented in connection with the stoppage of Mr E. H. Strange, of Ampthill, many of the provincial creditors on deposit accounts have already signified their adhesion to the resolution passed recently at a meeting in London, viz., that the estate should be wound up under a deed of assignment. They are apparently under an impression that this is the only way to realise the limited assets estimated at 4,796*l*.

MISCELLANEOUS.—The last advices regarding the silver mines of California state that the shipments of ore from San Francisco average about 100 tons a month. The per centage of silver is not mentioned, but is probably considerable.

The following calculations, the authorship of which rests with Mr J. A. Franklin, the professional accountant, place the position of the guarantee of the Red Sea Telegraph Company in a clear light :—

Looking at the authoritative construction put upon the State guarantee to the Red Sea Telegraph Company (22 and 23 Vic., cap. 4), not a mere interest of 4½ per cent., nor simply a contribution so limited, but expressly a "dividend" at that rate (as a minimum) upon any amount of sanctioned capital—it is obvious that failure of the enterprise, even though it prove irretrievable, can only affect the chances of a dividend in excess of 4½ per cent., that annuity remaining intact until August, 1908. Its value, measured by the last quoted price (16¾) of like annuities expiring in April, 1885 (claiming 10s next October), is 21*l* 1s 8d per 20*l* Red Sea Telegraph share, yielding 9s per half-year for 48 years. The rate of interest indicated at those prices is 3 7-16 per cent. per annum, plus sufficient for a sinking fund to replace the capital at termination of the annuity. The following table indicates the prices at which a 20*l* share will afford various rates of interest, and also the sinking fund for replacement of the cost, together equivalent to a perpetuity :—21*l* 6s 4d, 3⅜ per cent.; 20*l* 17s, 3½ ditto; 20*l* 8s, 3⅝ ditto; 19*l* 19s 4d, 3¾ ditto; 19*l* 10s 11d 3⅞ ditto; 19*l* 2s 9d, 4 ditto; 18*l* 14s 10d, 4⅛ ditto; 18*l* 7s 4d, 4¼ ditto; 17*l* 19s 11d, 4⅜ ditto; 17*l* 12s 9d, 4½ ditto.

The Directors of the Wolverhampton and Staffordshire Banking Company have declared a dividend of 5s per share for the half-year ending the 30th of June, 1860, payable on the 1st of September, free of income tax.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about at par, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424¾ per mark, and the short exchange on London is 13.4¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 1-10th per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 109⅞ per cent., which, when compared with the Mint par between the two countries, shows that the exchange is slightly in favour of England; and, after making allowance for charges of transport and difference of interest, the present rate leaves a small profit on the importation of gold from the United States.

Imports of the week ..... 233,85 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the continuance of unfavourable weather for harvest work, and the unusually backward state of the crops, the grain trade at Mark lane, to-day, was in an excited state. The few samples of wheat on offer were disposed of at 2s per quarter above Monday's currency, and a large business was transacted in foreign qualities, partly for inland consumption, at quite the same amount of improvement. All spring corn produced more money, and, compared with Monday, a rise of *six* shillings per sack took place in the value of town-made flour—the present nominal value being 60s. The imports from abroad, this week, have been large, viz., 32,770 quarters of wheat, 5,380 barley, 42,810 oats, 2,530 sacks and 15,938 barrels of flour.

At Liverpool, this morning, produce, generally, changed hands steadily at very full prices.

The amount of excitement in the trade may be gathered from the fact that orders for the purchase of nearly 1,000,000 quarters of produce have, to-day, been forwarded to continental ports—importers generally being of opinion that there is still ample room for a further considerable rise in the quotations. The sudden suspension of the sliding scale in France, so far as importations of produce are concerned, will, no doubt, bring that country into direct competition with us for a supply of food. The steamer sailing for New York to-morrow, will carry out very large orders for flour.

Messrs Briggs and Co., of Alexandria, report the state of the corn trade to the 11th inst., as follows:—

An active business has continued to be transacted in our grain market during the past week, and prices in general have been very firm. Beans have come forward somewhat more abundantly, but prices, although slightly weaker at the commencement, have stiffened simultaneously with the increased arrivals. The sales noted at foot comprise a lot of 5,000 ardebs of Pacha's produce, sold at T. P. 70 per ardeb, equal to 26s 7d per quarter free on board. Linseed continues in good demand, but its value varies considerably, according to quality and degree of cleanliness. The following are the sales since our last, with present prices, f.o.b.:—Wheat, Saide, 12,950 quarters, at 34s to 35s per quarter; Behera, 2,850, at 31s 6d to 32s 6d; do. Pasha's, 1,250, at 33s; do. white, 640, at 33s to 33s 6d: beans, Saide, 5,640, at 26s 3d to 27s; do. Behera, 910, at 24s 9d to 25s 3d: barley, 2,200, at 19s to 20s; lentils, 290, at 26s to 27s; linseed, 990 at 35s to 40s. Freights continue steady at high rates, say 6s to 6s 6d for beans to the United Kingdom for orders, and for other grain or seed in proportion. To a direct port, 5s to 5s 6d. No steamer is at this moment in port, but very high rates are spoken of for the next arrivals.

The continental corn markets held this week have been very excited, at further enhanced rates. In the United States, very large supplies of wheat, flour, and Indian corn are still in progress of shipment to England; nevertheless, prices have continued to rule moderate.

There has been a pretty good demand for cotton at Liverpool this week; the sales are 63,000 bales. The quotations are not altered, but the market is rather easier. The large quantity offering and the bad harvest weather influences many holders to realise. The accounts from America about the cotton crop continue unfavourable, and the estimates about the yield are much reduced. If, however, high-priced provisions are in store for us, a reduced consumption must be looked for as the result. The trade took this week 46,000 bales, speculators 7,000 bales, and exporters 10,000 bales. To-day's sales are 8,000 to 10,000 bales. Market steady.

"The continuance of dry, hot weather at the South," writes Messrs Neill and Co., of New York, "has been unfavourable for the upland crops. Complaints from the interior have been general that cotton has suffered for want of rain, and that a longer absence of it would be fatal to the plant in the high, sandy lands. The good start and promising growth of spring has thus been lost in many places, and the prospects for a large yield are considered less favourable than heretofore. The last accounts, however, report rain in some sections; and though we have not heard of an immediate improvement, yet it is thought that the injury may be partly retrieved by favourable weather henceforward. The bottom land and seaboard crops continue to do well, and from these there are no complaints. The crop is yet in a critical condition and greatly dependent upon future weather. In the meantime, picking progresses, and by telegraph we learn that 180 bales of the new crop had been received at New Orleans up to 3rd inst. against 6 bales last year. These early arrivals are generally regarded as evidence that the plant has been forced to rapid maturity without having time for a full growth."

Messrs Volkart, of Bombay, thus refer to the cotton trade of that port to the 23rd ult:—

The market has remained very dull, and scarcely anything has been done since receipt of the European mail of 18th June; nearly all the transactions mentioned below occurred immediately after the departure of last steamer. European houses keep back, in consequence of the unfavourable advices from Liverpool; neither are any inquiries taking place for China, from whence, by telegraph, a serious decline is reported; in the absence of sales, prices are nominal at present, and possibly holders would even accept less than our quotations. Stocks are estimated at about 25,500 cds. We note the following transactions:—150 candies Dhollera, at 117 rs; 450 candies Bhownuggur, at 121 rs; 250 candies Veravul, at 99 rs; 50 candies sawginned Comptah, at 191 rs, all for Europe. Exports of cotton from Bombay since 1st January this year:—

	1860. bales	1859. bales
To Europe	319,761	409,552½
To China, &c.....	117,509½	92,058
Total.....	437,270½	501,610½

Showing a decrease of ..... 64,340 bales.

We have no change to notice in the value of any kind of tea, for which article the demand is very inactive, although the stocks in dealers' hands are by no means large.

There has been a moderate, but by no means active, inquiry for raw sugars, at prices about equal to last week. Refined goods have moved off slowly, at the late decline in value.

Plantation coffee—which has been freely offered—has experienced a slow sale, at 6d to 1s per cwt less money. Other descriptions have met a dull inquiry at about previous rates.

The upward movement in the value of wheat has led to large speculative operations in the rice market, at fully 3d per cwt more money. The stock in warehouse has become much reduced.

Saltpetre, flax, hemp, jute, and coir goods have ruled about stationary. Rum has commanded rather more attention, at full prices. Brandy and grain spirits have realised quite former terms.

Oils have changed hands somewhat briskly. Linseed oil has advanced to 31s, and sperm has risen 5*l* per ton. Turpentine has been in improved request at 30s to 31s per cwt for spirits.

Notwithstanding the heavy shipments from St Petersburg, the tallow trade has been somewhat firmer, and P.Y.C. on the spot has changed hands to-day at 51s 6d; for September, 51s 3d; October to December, 51s 6d; December, 52s 3d; and January to March, 52s 6d per cwt.

"Money has been in rather more active demand than usual during the week," says the New York *Shipping List* of the 11th inst. "There is a large amount of capital in process of diversion from the custody of City Banks and brokers to the financial centres of the Western country, where it is or soon will be actively employed in sending forward the crops to market. We quote:—

	Per cent. per annum.

The dry goods trade is becoming more and more buoyant, under a gradually increasing demand for staple cotton goods, at very full prices, for all the regular makes. Buyers from the Southern and South-western States who deferred their purchases to the latest moment, are now busily engaged in making selections, and their

operations bid fair to be on a more extensive scale than for several years. Trade with the interior and near-by sections presents a corresponding improvement, and sales are already to a fair extent. Foreign goods are steady for all desirable patterns and makes, for which fair and satisfactory prices have been obtained. Undesirable goods are very plenty, and, in the absence of auction sales, are very hard of sale, and prices are irregular and nominal."

The following return shows the imports of foreign dry goods at New York for seven months from January 1st:—

	1858. dols	1859. dols	1860. dols

COTTON.

New York, August 7.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices, f.o.b., with freight in sterling at current exchange:—

	Sales.	Closing.	Middling.	Freight.	F.o.b.
New Orleans...Aug.	3400	nominal	10½c	¼d equal to	5.32d
Mobile	600	—	10¼c	¼d —	5.67d
Charleston	900	—	10c	¼d —	5.40d
Savannah	500	—	10c	¼d —	5.40d
New York	4500	—	Upl. 10¾c	5-32d —	5.57d
Total	9900 bales		Average		5.55d

There is now an excess in receipts of 777,000 bales over last year, when the crop reached 3,851,000, and of 1,393,000 over 1857-8 (crop 3,114,000).

New York Market.—There has been a steady business in this market during the week, without change in prices. The home trade continue to supply their wants here, as this market presents a better choice than can be found at the South. The sales of the week reach about 4,500 bales, and the market closes steadily at 10½c to 10⅝c for middling Uplands on the spot.

The following is a statement of the movements of cotton for the past week, and since 1st September last, compared with the five preceding years:—

	Receipts Week's Receipts. bales	Receipts Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts bales
1859-60	10000	4455000	5000	1000	6000
1858-59	5000	3685000	1000	9000	4000
1857-58	11000	3062000	5000	1000	4000
1856-57	3000	2895000	5000	3000	1000
1855-56	12000	2482000	2000	...	1000
1854-55	12000	2762000	2000	2000	4000

	Exports Since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1859-60	2660000	578000	493000	3731000	159000
1858-59	1966000	438000	545000	2949000	130000
1857-58	1777000	378000	388000	2543000	116000
1856-57	1412000	412000	407000	2232000	76000
1855-56	1939000	478000	520000	2937000	57000
1854-55	1502000	409000	280000	2191000	127000

Thus the receipts show an increase of 770,000 bales over those of last year, and an increase of 1,393,000 over 1857-8, and the exports exhibit the following results:—

	To G. Britain.	To France.	To other F.P.	Total.	Stock
Compared with last year	Inc. 694000	Inc. 140000	Dec. 52000	Inc. 782000	Inc. 29000
Compared with 1857-8	Inc. 883000	Inc. 200000	Inc. 105000	Inc. 1188000	Inc. 43000

Southern Markets by Telegraph.—There has been a shade better feeling at the South, owing to the steadier advices from Liverpool and unfavourable accounts of the growing crop. Business continues small, however, and is limited for want of stock. At New Orleans the week's sales have only been 3,400 bales, but holders have shown more firmness, and at the close demanded an advance. At Mobile, the week's business has been restricted to 600 bales, for which buyers have had to pay rather higher rates. In the Atlantic markets there is nothing doing, and prices are entirely nominal. The growing crop is the principal subject of attention, and we must wait for early receipts of new cotton before activity can be renewed at the South.

Receipts.—The receipts of this week amount to 10,000 bales, being increased by arrears at Savannah and Texas, which are brought into to-day's tables. The total is now 4,455,000 bales, and the excess over last year 770,000 bales. The receipts of new cotton at New Orleans up to 3rd inst. reached 180 bales, against 6 to same date last year. Exports—The exports continue very small, amounting to only 14,000 bales to all ports during the week, of which 5,000 are for Great Britain, 1,000 for France, and 6,000 for other foreign markets. The total taken by Great Britain is 2,660,000 bales against 1,960,000 last year, and there are now 12 vessels loading for that quarter against 15 last year. The home trade are still buying, and their total now amounts to 712,000 bales against 709,000 last year. Freights to Liverpool are rather higher from Mobile and Charleston, the rates being ⅛d and 5-16d respectively.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.*

The cotton market has been free from excitement this week. The trade have purchased about their usual snpply, and a fair business has again been done for speculation and export. Prices of the middling and better grades of American are slightly advanced, whilst the lower are offered rather more freely. Egyptian are in abundant supply, and remain very difficult to sell; prices are, however, nominally the same. Brazil are without alteration. East India are firm at last week's rates. The sales to-day are 8,000 bales. American move steadily at the above quotations. The reported export amounts to 9,550 bales, consisting of 3,820 American, 200 Brazil, and 5,530 East India.

MARKETS IN THE MANUFACTURING DISTRICTS

In most of the markets held during the pre sent week, the transactions for shipment to India have been on a very moderate scale. Prices, however, have, for the most part, been well supported. On French and German account, the dealings have been to a fair average extent, at full quotations. The home trade is still very healthy. Wool has continued to sell at very high rates, notwithstanding the immense quantities which are still changing hands at the London sales. The coal trade is tolerably healthy.

Manchester, Aug. 23.—The market has maintained a steady business at last week's rates. Accounts received from Calcutta of continued weakness and decline in piece goods and yarn have restricted operations for that quarter. For Bombay considerable inquiry has been experienced, and numerous rather than extensive transactions have occurred. In particular, 8 lb 4 oz shirtings for that market and China have been found cleared from stock, and are now ordered some time in advance. Sellers of yarn have found the demand slightly exceeding the supply, and were the weather to clear up a more general revival here is beginning to be expected.

Comparative statement of the cotton trade.

Bradford.—Wool—We have no new feature to report in this branch of our trade. In noils and shorts there is no change to report. Yarns—The spinners are well employed for export, the

buyers pressing for early delivery. In the home trade there is less buoyancy. Pieces—The piece market continues in the same languid condition we have reported for many weeks,—a condition aggravated by two or three heavy failures in London and Birmingham, of parties who were largely indebted to Bradford houses.

LEICESTER.—The hosiery trade continues slack as respects the home demand, but shipping orders, &c., keep the operatives tolerably well employed. In the country districts there is no change to report, business continuing steady. Manufacturers are as far as possible keeping down stock. Wools are making high prices, and yarns are selling at late rates.

NOTTINGHAM.—The lace trade is, if possible, a little more dull than it was last week. The inclemency of the season has operated against the sale of fancy light articles, and the home demand at the present time is unusually limited. Plain goods are also less in demand than for some time past, and the consequence is that the operatives are very indifferently employed; many are out of work entirely, as manufacturers are producing only for their present requirements.

HALIFAX.—The textile manufactures of this town and neighbourhood continue in a rather quiet condition. Speculation, whether in worsted, woollen, or cotton, is at a very low ebb, and all transactions appear marked with great caution. Stocks of goods are undoubtedly increasing, but the bulk in hand up to the present time is not excessively large.

HUDDERSFIELD.—We have to report an improved market. There has been a large influx of buyers from London, Glasgow, Dublin, Bristol, and Manchester, besides the usual district attendance, and a brisk business has been the result. The greatest demand has been for the finer goods, chiefly in fancy trouserings, of which there is now no stock on hand. Black doeskins continue to sell well. The shipping trade is quiet.

LEEDS.—Several articles, principally good fancies and unions, command a fair share of attention in the market, but of others stocks are beginning to accumulate. Rates are not quotably lower, but some descriptions of goods are said to be rather easier to purchase. We have no change to notice in the flax trade of this district, the raw material still being freely bought at the enhanced rates, while for line and tow yarns there is a good demand, principally for exportation.

ROCHDALE.—Quotations have slightly hardened, but late prices would be accepted for delivery when convenient.

BELFAST.—Yarns—The demand from manufacturers has been of a fair steady character, with less activity, however, than had previously prevailed; there is an absence of animation in the demand for export. For some descriptions of yarn spinners hold forward orders. Stocks of line are not heavy; of tows small. Prices generally are without change.

GLASGOW.—The demand for all classes of wool has been dull. Laid and white Highland, except the very best clips, are not much inquired for. Laid Cheviots and crosses are not in so good demand.

WOLVERHAMPTON.—There is a moderate business doing in iron, at quite last week's prices.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 7.—Flour—The market, in consequence of the foreign news, was firmer and in good request, and especially common and medium grades of State and Western. The transactions footed up about 15,000 bbls, closing at 5 cents per barrel advance, and within the range of the following quotations:—Superfine State, 5.18 dols to 5.25 dols; extra State, 5.25 dols to 5.45 dols; superfine Western, 5.10 dols to 5.15 dols; common to choice Western extra, 5.40 dols to 6.50 dols; St Louis extra, 5.65 dols to 6.75 dols; mixed to straight Southern, 5 dols to 5.50 dols; straight to good extra ditto, 5.60 dols to 7.50 dols; choice extra family and bakers' brands, 7.50 dols to 8.75 dols; rye flour, 3.30 dols to 4.10 dols; corn meal, New Jersey and Brandywine, 3.35 dols to 3.75 dols. Canadian flour was held at firmer rates, with sales of about 600 bbls, at 5.10 dols to 5.15 dols for superfine, and at 5.65 dols to 7.50 dols for extra qualities. Southern flour was in good request at the above figures, while sales footed up 3,200 bbls, the market closing quite firm, especially for common and medium grades. Rye flour in steady request, with sales of 325 bbls at the above figures. Corn meal was firm, with sales of about 300 bbls within the range of the above figures. Wheat—The market was firmer and active, and closed at an advance of about 5 cents per bushel. The sales footed up about 90,000 bushels, at 1.40 dol to 1.45 dol for new white Kentucky, and white Canadian at p. t.; old white Indiana at 1.36 dol to 1.37 dol, and 1.30 dol to 1.33 dol for new white Ohio, 1.30 dol to 1.33 dol for new red and amber coloured Southern, 1.25 dol to 1.26 dol for new red Western, 1.24 dol to 1.27 dol for fair to prime Milwaukee Club, with a sale of Chicago spring reported at 1.20 dol. Corn was less buoyant at the opening, but closed firm; sales were freely made, and embraced about 95,000 bushels, closing at 62c to 62½c for sound Western mixed, choice ditto at 63c, and round yellow at 65c to 66c, and Western white in lots at 67c to 68c. Rye was firm, with sales of 2,500 bushels at 81c. Barley and barley malt were quiet and nominal. Oats were firm and in good request, with sales of 30,000 bushels at 36½c to 38c for Canadian and Western, and State at 38½c to 39c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Since we last wrote, very limited supplies of home-grown wheat have been on offer both here and in the leading provincial markets. The continuance of unfavourable weather and the backward state of harvest work have produced greater firmness on the part of holders, and prices have, consequently—although the trade has not been to say brisk—advanced 1s to fully 2s per quarter. In foreign wheats, rather large transactions have taken place, partly for inland consumption, at 1s to 2s per quarter more money. Sales have been sufficiently large to prevent any accumulation in warehouse. Scarcely any barley has been on offer, and the inquiry for it has ruled somewhat active, at, in some instances, a further advance in the quotations of 1s per quarter. As regards malt, there has been more disposition to operate in it; nevertheless, no change has taken place in the currencies. The oat trade has ruled very firm at 6d to 1s per quarter more money. Both beans and peas have realised quite former terms, and the value of flour has had an upward tendency. Much anxiety is naturally manifested in all quarters respecting the ultimate fate of the crops. Another ten days of wet weather would prove very prejudicial to them, and have the effect of enhancing prices materially; but a return of a dry temperature would not only save the wheats, but keep prices in check.

The foreign markets have become rather excited. Wheat, flour, and all kinds of spring corn have produced more money, and the trade generally has ruled active. The business doing for shipment to England is very large. Advices from the United States inform us that the outflow of food to England was on the increase, without having any important influence upon the quotations.

In Scotland, wheat has realised 2s per quarter more money, and the value of all other articles has had an upward tendency. The supplies on offer have been comparatively trifling.

The Irish markets have shown signs of animation. The quotations, generally, have improved; but, owing to the want of adequate supplies, the transactions have continued limited.

The few samples of English wheat here to-day were quickly disposed of at 1s to 2s per quarter above last Monday's currency. Foreign wheat was brisk, and 2s per quarter dearer. Both barley and oats produced rather more money The flour trade was brisk, and town-made qualities advanced to 60s per 280 lbs.

Mr Edward Rainford reports the floating trade as follows:—Floating Cargoes—The arrivals off coast for orders since the 15th inst. are 68 cargoes, consisting of 29 wheat, 1 rye, 21 maize, 13 barley, 3 oats, and 1 beans, viz.:—Wheat, 1 cargo from Galatz, 14 Taganrog, 3 Berdianski, 7 Marianople, 1 Leghorn, 2 Odessa, 1 Trieste; rye, 1 Ibraila; maize, 13 Sulina, 1 Salonica, 5 Ibraila, 2 Oltenitza; barley, 3 Constantinople, 1 Taganrog, 2 Eupatoria, 5 Ibraila, 2 Sulina; oats, 2 Ibraila, 1 Odessa; beans, 1 Alexandria. Of these above one third were disposed of before arrival. Since this day week there has been an active business in cargoes afloat at increasing prices, and to-day, in consequence of continuous heavy winds and a low temperature, the market has been considerably excited. The following prices have been paid:—Wheat, arrived, Berdianski, 56s 6d; Marianople, 56s 9d and 57s; Taganrog Ghirka, 53s 6d, 55s 3d, 55s 4½d, 56s and 57s per 492 lbs.; Polish Odessa arrived in London, at equal to 56s 4½d per 496 lbs; Galatz at 52s 9d per 480 lbs; on passage, Taganrog Ghirka, about 8 cargoes at 54s to 55s, and 1 ditto, hard, at 51s per 492 lbs; Sandomirka at 56s per 480 lbs; Egyptian Saide, at 44s and 45s per imperial quarter; now shipping, Berdianski at 55s. Maize, arrived, Ibraila (not perfect), at 33s, 33s 3d, and 33s 9d per 480 lbs; Foxanian at 34s, and Bulgarian at 34s 3d per 492 lbs; on passage, Oltenitza at 32s 9d per 480 lbs; and Foxanian at 34s per 492 lbs. Rye, arrived, Ibraila at 31s 6d per 480 lbs. Barley, arrived, Danube at 27s 6d and 29s 1½d; ditto heated, 25s 6d; Taganrog, fine, 30s 9d; Eupatoria, 29s 6d per 440 lbs; on passage, Danube, 27s per 400 lbs, condition guaranteed; Taganrog, 28s 6d; to be shipped in September, Taganrog, 27s 6d: in October, Odessa, 26s 6d per 400 lbs. Oats, arrived, Odessa, at 19s 9d per imperial quarter. Beans, on passage, Egyptian at 33s and 32s 9d per imperial quarter.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There is no change to note in this market, the demand being moderate, and prices as last quoted. The deliveries for home use keep large. Last week, at this port, the total clearances were 5,314 tons, against 4,303 tons in the corresponding week last year. Stocks now show a reduction of 1,640 tons compared with 1859, owing to heavy landings at this period last year.

West India.—Sales to yesterday 2,500 casks, including some Barbadoes by auction at 37s 6d to 43s, and Jamaica at 39s 6d to 41s 6d per cwt.

Mauritius and East India.—The public sales have been confined to 2,476 bags Mauritius, 1,634 bags Bengal, and 153 bags Madras: the former mostly found buyers at 39s to 44s 6d for low to fine yellow; the Bengal went at 42s to 43s for good to fine Gurpatta, and 31s to 33s for brown; the Madras was bought in. Privately, 4,000 bags brown date Bengal are reported at 29s 6d to 32s; and 1,000 bags native Madras at 33s to 34s 6d per cwt.

Foreign.—At auction, 352 casks Porto Rico realised 39s to 45s 6d; and 2,243 bags good brown Guatemala also sold at 37s 6d. 1,831 boxes Havana were all bought in at 37s 6d to 43s 6d per cwt. Privately, 12,000 or 14,000 bags clayed Manilla have changed hands at 37s to 37s 6d; 150 casks Porto Rico at 40s 6d to 41s; and afloat three cargoes Havana, Nos. 11½ to 12 at 28s for United Kingdom, and No. 13 at 20s for the Baltic.

Refined.—Rather cheaper again; brown lumps, 49s 6d per cwt.

MOLASSES.—A few sales made in British colonial at 16s 6d to 18s per cwt.

RUM.—Demand good, and 1,500 casks have found buyers: Leewards at 1s 6d to 1s 7d; Demeraras at 1s 9d to 1s 10d; and Penangs at 1s 5½d per gallon.

COFFEE.—The public sales of plantation Ceylon have been heavy, and prices have given way 6d to 1s per cwt. There were offered 1,390 casks 840 bags, and all sold at 67s 6d to 74s 6d for fine fine ordinary to good middling, up to 85s for fine. Native has realised full rates; 1,038 bags 32 casks, in auction, obtaining 59s 6d to 62s 6d per cwt. 300 packages Mocha found buyers at 100s to 123s; and 2,600 bags Costa Rica also sold at 63s to 67s per cwt. A floating cargo of Santos, 3,550 bags, sold for a near port at about 58s 6d per cwt.

COCOA.—Nothing done worth mentioning.

TEA.—Business still very limited; prices unaltered.

RICE.—The inquiry continues good, and the transactions to yesterday were estimated at near 80,000 bags, chiefly Rangoon and Arracan at 9s 9d to 10s 6d, with Madras at 10s 10½d to 11s 6d, and white Bengal at 11s 6d to 13s 6d per cwt. Six floating cargoes have been sold: fine Arracan at 11s to 11s 1½d; and one Moulmein at 11s per cwt. Also, 200 tons fine Bengal for Liverpool at 15s 9d.

SPICES.—Very little doing in any description. Sumatra pepper has sold at 4½d to 4¾d, and Penang at 3¾d to 4d, cash and short prompt. Of Cochin ginger, 332 cases were disposed of at 59s to 98s for low wormy to fair bold, being about 5s lower for the common.

COCHINEAL in steady request. At auction, 557 bags were mostly sold. Honduras silver, low to fine, 3s to 3s 8d; black, low to middling, 3s to 4s 1d; Teneriffe silver, 3s 1d to 3s 3d; and black, 3s 3d to 4s per lb.

DYESTUFFS.—In Cutch and Gambier there is no new feature to notice the former is quoted at 27s 6d for good Pegu, and the latter at 17s 6d to 18s per cwt.

SHELLAC is dearer. At auction, 100 chests fine free livery orange sold at 11*l* to 11*l* 5s; also 80 bags good bright button at 10*l* 12s 6d to 10*l* 17s 6d per cwt.

DRUGS.—Turmeric quiet: 754 bags Bengal partly sold at 12s 6d to 13s for ordinary; and 111 bags Madras at 11s 6d per cwt for middling bright. Aniseed oil quiet at 7s 6d per lb. Castor oil is steady; 123 cases selling at 5½d to 5¾d per lb for common seconds. 1,000 cases Japan wax chiefly found buyers at 60s for middling cake, and 64s to 64s 6d per cwt for saucer. Camphor—Market quiet at 8*l* 5s per cwt. In other drugs there is no change to note.

INDIA RUBBER.—Para is 1d to 2d per lb lower. At auction, 4 cases 60 brls 346 bags were sold at 2s 8½d to 2s 9d for good sheets; 2s 2d to 2s 5½d for middling quality to good bottle; and 1s 11½d to 2s per lb for negrohead. East Indian lump is nominally quoted at 2s 1d to 2s 2d; some sold for arrival at 2s per lb.

SALTPETRE.—Business limited to 3 or 400 bags Bengal at previous rates: refraction 5 at 44s 6d, and refraction 11½ at 40s 9d cash or short prompt. 600 bags offered by auction were bought in.

NITRATE SODA.—4,423 bags brought to public sale were all bought in at 13s 6d per cwt.

METALS.—Spelter has met less demand, and only limited transactions have occurred, 20*l* 12s 6d ex ship being accepted. Scotch pig iron rose to 52s, but has since receded to 51s 6d to 51s 9d per ton cash for mixed numbers. Copper meets little demand. Tin in fair request: Banca 136s 6d; and Straits, 132s per cwt.

SEEDS.—The market is barely supplied, and prices have again advanced. Linseed, 54s for Calcutta, and 56s for Bombay. Rapeseed, 58s to 60s up to 72s for Guzerat.

OILS.—In sperm a considerable rise has occurred; 108*l* paid for American, and 110*l* is asked for colonial. Common kinds as last quoted. In olive more doing at quotations. Linseed oil is again dearer, the value on the spot being 30s 9d to 31s per cwt. In rape, large sales are reported for future delivery, and higher rates are paid: foreign refined, 48s; and brown, 44s 6d to 45s per cwt. Cocoa-nut finds buyers at 49s for Cochin, and 46s 6d to 47s for Ceylon. Fine palm obtains 45s per cwt.

TURPENTINE.—Quiet at 8s 9d to 9s for rough. Spirits offer at 29s 6d for English, and 30s 6d American.

TALLOW.—The market is firmer, and Petersburg is now quoted at 51s 3d to 51s 6d on the spot, and at 52s 3d per cwt for first three months.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—There is no change to report in the tone of the market, which closes steadily, but without animation. Of West India muscovados, 660 casks have been sold at last Friday's rates, making the total business for the week 3,160 casks. The public sales were limited, comprising 1,157 bags Gurpatta date, which meeting languid biddings, only a small part was realised, good yellow 42s 6d to 43s: 240 bags fair brown Guatemala were taken at 36s 6d. Privately, a cargo of Havana, 840 boxes, No. 16, has been sold at 30s 6d for Gothenburg.

COFFEE.—At public sale to-day, 440 casks 360 barrels and bags plantation Ceylon went off with rather more freedom at the rates above quoted; 72 casks 600 bags native were partly sold, fair to real good ordinary, 61s to 62s 6d; garblings, 37s 6d to 55s. 554 bags Costa Rica went off without alteration.

RICE.—An active demand prevails to the close, and about 30,000 bags have been sold privately, at prices now showing a pretty general advance of 6d per cwt for the week, chiefly soft grain, 10s to 10s 9d; and Madras, 11s 3d to 11s 6d.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined has been quiet this week, with lower prices, lumps having been sold at 49s 6d and 49s. In Dutch crushed small sales have been made for B & H No. 1, at 32s 3d in barrels.

GREEN FRUIT.—Market quiet, and but little offering, excepting West India pine apples; the remainder of the cargo, ex Amy, sold by Keeling and Hunt at public sale, went at an advance of 2d to 3d per pine. A few packages of grapes per steamer from Lisbon have been received, and which appear free from disease. The new crop of Malaga lemons will be short and dear. Grapes look promising.

DRY FRUIT.—Scarcely any business has been transacted this week. The first two cargoes of new Valentia raisins are expected here on Monday, and of currants in about a week hence.

ENGLISH WOOL.—The market has experienced no change whatever since last week's report.

COLONIAL WOOL.—Owing to the unsatisfactory weather, the public sales have not shown the same firmness for the last few days hitherto exhibited, especially for ordinary and lower sorts.

FLAX unaltered.

HEMP.—Market quiet, and but little business doing.

COTTON.—Sales of cotton wool from Friday, 17th of August, to Thursday, the 23d, inclusive :—1,300 bales Surat at 3½d to 3¾d for middling fair to fair Compta, and 3¾d to 4d for fair to fully fair Dholleras, and 4¾d to 5½d for good fair new Oomrawattee and good new Broach; 2,500 bales Madras at 3¾d to 5d for ordinary to good fair Tinnivelly, and 3¾d to 3 5-16d for fair to good fair Western. The demand continues good, and the transactions have been tolerably large, at the extreme prices of

last week, for all descriptions. Yesterday, 1,181 bales Tinnivelly, and 360 bales Western Madras were offered at public sale; the former were bought in at 4¼d to 4⅜d for middling and fully fair, and after the sale 220 bales fully fair were sold at 4⅜d per lb; the Westerns were all sold at 3⅞d for middling fair. P.S.—Market firm. Sales to-day: 100 fully fair Tinnivelly, 4⅜d; 600 Surat, 3 5-16d to 4⅜d, middling fair Compta to good fair new Dholleras.

SILK.—A fair business has been doing, with firm prices, chiefly for exportation.

TOBACCO.—Our market remains steady, without any alteration in prices; demand quite of a retail character.

LEATHER AND HIDES.—The transactions of the past week in leather have been to a full average extent. The sales are of a general character, without any great demand for any particular article. The supplies of fresh leather at Leadenhall, on Tuesday, were not excessive, and stocks in general do not accumulate, but they are sufficient relatively to the demand to induce manufacturers to concede slightly in prices in order to effect sales.

METALS.—The continued anxiety about the weather keeps us from rallying in our market. Copper is but moderately inquired for, even at the late decline. Iron presents no new feature, both manufactured and Scotch pig continuing to rule quiet. Tin keeps up fully to the standard of several months past. Lead is in moderate request only. Spelter somewhat neglected again, and lower in price in consequence. Tin plates continue very flat.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	9
Yellow Russian	53	0
Melted stuff	40	0
Rough ditto	23	6
Greaves	20	0
Good dregs	7	0

Imports this week 4,670 casks.

PROVISIONS.

Bacon still continues to maintain its present high price, but we are in hopes, in consequence of some fresh arrivals of new cured meat, of lower prices. Butter very brisk, prices from 2s to 4s higher.

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 20.—The total imports of foreign stock into London last week amounted to 14,783 head. In the corresponding week in 1859 we received 10,824; in 1858, 9,906; in 1857, 10,284; in 1856, 8,897; in 1855, 8,362; and in 1854, 9,751 head.

From our own grazing districts the receipts of beasts fresh up this morning were moderately good as to number, but very deficient in quality. The demand for all kinds ruled very inactive, at a decline in the quotations, compared with Monday last, of 2d per 8 lbs. The best Scots sold at 5s 4d per 8 lbs. Compared with this day se'nnight, there was a full average supply of sheep in the pens. The mutton trade was rather inactive, and in some instances inferior breeds were the turn lower. Lambs were in good supply, and moderate request, at about stationary prices. About 250 reached us from Ireland. We have to report a slow sale for calves, at 2d per 8 lbs beneath the currency of Monday last.

SUPPLIES.

	Aug 23, 1858.	Aug. 22, 1859.	Aug. 20, 1860.
Beasts	4618	4820	4810
Sheep and Lambs	24500	27250	27500
Calves	283	270	229
Pigs	750	300	270

THURSDAY, Aug. 23.—A moderate supply of beasts was on sale in this day's market. Prime breeds moved off steadily, other kinds slowly, at Monday's currency. We were fairly supplied with sheep. Downs and half-breds commanded full prices; but long-woolled qualities were a slow inquiry, on former terms. The demand for lambs—the show of which was moderate—was somewhat restricted; nevertheless, the quotations were supported. Calves were in short supply and steady request, at an improvement in value of 2d per 8 lbs.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	6	Prime Southdown sheep	5	4	5	6
Second quality ditto	3	8	4	2	Large coarse calves	4	0	4	10

Veal	4	0	4	8	Small pork	4	8	5	4

Lamb, 4s 6d to 5s 6d.

HOP MARKET.

BOROUGH, Monday, Aug. 20.—The reports from the hop plantations confirm the blight, and the duty is now estimated at 50,000*l* to 60,000*l*. Our market is very active at the following advanced currency:—Mid and East Kents, 160s, 200s, 231s; Weald of Kents, 120s, 160s, 180s; Sussex, 115s, 140s, 160s.

FRIDAY, Aug. 24.—The accounts from hop plantations, if possible, come worse. The market is very active, and fine Weald Kent and Sussex 1859's keep advancing. Duty, 50,000*l* to 60,000*l*, but few in favour.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Aug. 20.—Full average supplies of potatoes continue to arrive coastwise and by land-carriage. The demand is inactive, at from 75s to 180s per ton. No foreign qualities are on offer.

WATERSIDE, Thursday, Aug. 23.—The supplies were tolerably good at this market to-day, both coastwise and by rail, with a fair business doing, at the annexed quotations:—Regents, from 100s to 120s; Shaws, from 70s to 90s; Middlings, from 50s to 60s per ton. Cambridge Ashleaf Kidneys, 3s per sieve.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 3*l* 0s to 5*l* 5s; new ditto, 2*l* 10s to 4*l* 10s; old clover, 4*l* to 6*l*; new ditto, 3*l* 10s to 5*l* 5s; and straw, 1*l* 10s to 1*l* 16s per load. Trade slow.

CUMBERLAND.—Old meadow hay, 3*l* 5s to 5*l* 5s; new ditto, 2*l* 15s to 4*l* 10s; old clover, 4*l* to 6*l*; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 1*l* 18s per load. A fair demand.

COAL MARKET.

FRIDAY, Aug. 24.—Wall's-end Lambton 18s 6d—Haswell 19s—South Hetton 19s—Tees 18s 6d—Hartlepool 18s 6d—Russell Hettons 17s—Kelloe 18s—Eden Main 17s—Riddells 16s 3d—Thorpe 17s 6d—Hilda 16s—Belmont 16s 6d—Robin Hood 14s 6d—Nixon's Merthyr 21s—Tanfield Moor Butes 13s 6d—Tanfield 13s 6d—Howard's Hartley 16s 6d—Lambert's Hartley 16s 6d. Ships at market, 63.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 24.—There is no change in our market, consumers supplying actual wants only, and as stocks of all current descriptions continue within a moderate compass, prices are pretty well supported.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 24.—The arrivals from Ireland and coastwise since Tuesday are confined to small quantities of oats and oatmeal, and from Canadian and foreign ports the supplies are on a moderate scale. The weather in the meantime has been more favourable and trade less excited. A moderate business done for consumption at the full rates of Tuesday.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 24.—There has been a fair demand for manufactured iron during the past week at about previous rates. The business in Scotch pig iron has been on a moderate scale, with only a trifling fluctuation in price. In copper there have been some transactions at the recently reduced quotations, but no great increase of business. The lead market continues dull. Spelter has slightly advanced.

The Gazette.

TUESDAY, Aug. 21.

BANKRUPTS.

J. Hyams, Spencer street, Clerkenwell, watch manufacturer.
P. and J. Arnold, Luton, Bedfordshire, straw plait merchants.
D. Tearle, Houghton Regis and Luton, Bedfordshire, straw plait dealer.

EPITOME OF RAILWAY NEWS.

SOUTH WALES.—The directors of this company state in their report that the receipts for traffic during the half-year ending the 30th of June amounted to 170,577*l*, as compared with 160,062*l* in the corresponding half of 1859, showing an increase of 10,515*l*, of which 2,115*l* was derived from passenger traffic, and 8,399*l* from goods traffic.

NORFOLK.—It appears that the directors of this company intend to recommend the proprietors at the ensuing half-yearly meeting to declare a dividend at the rate of 1*l* 10s per cent. for the half-year ending the 30th of June.

LONDON, TILBURY, AND SOUTHEND.—The report of the directors states that the total receipts on revenue account for the half-year ending the 30th of June amounted to 20,660*l*, and the expenditure to 13,856*l*, leaving a balance of 6,804*l*. The capital account of the Barking branch showed that 199,986*l* had been received and 201,288*l* expended, leaving a balance against the account of 1,302*l*.

SOUTH-EASTERN.—The directors of this company have resolved to recommend the proprietors, at their ensuing half-yearly meeting, to order payment of a dividend of 14s on each 30*l* stock, being at the rate of 4*l* 13s 4d per cent. per annum.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Aug. 20.—The railway market to-day was steady, with little doing. In most of the leading stocks an advance of about ¼ per cent. took place, the principal exception being Eastern Counties, which was again heavy. In the colonial market, Grand Trunk of Canada improved to 30 to ¼, and Great Western to 12¼ to ⅓. Foreign descriptions were dull. Lombardo-Venetian closed heavily at 1⅛ to 1¼ dis., and Pernambuco at 3 dis. Bahia were last quoted ⅝ to ¾ dis., and San Paulo ⅞ to ⅝ dis. Nova Scotia debentures were ½ per cent. higher. American railway securities continued to improve, especially those of the Michigan Central, Michigan Southern, New York and Erie, and Illinois Central companies; the shares of the latter showed the chief rise. Mines were quiet, but firm. In joint stock banks, Australian shares were flat.

TUESDAY, Aug. 21.—The railway market opened with a firm tendency this morning, and remained steady the whole day, Great Northern showing the principal advance. South-Eastern and North British were exceptionally heavy, the former in particular receding nearly ¾ per cent. on the announcement of the proposed dividend at the rate of 4 2-3ds per cent. per annum. In colonial descriptions, Grand Trunk of Canada stock and Great Western shares were again higher. East Indian also improved. No material change occurred in the foreign market. Lombardo-Venetian remained at 1¼ to 1⅛ dis., and San Paulo ⅝ to ⅝ dis. The demand for American railway securities continued, especially for the shares of the Illinois Central and New York and Erie, both of which experienced a further important advance. There was not much doing in mines, but prices were generally firm. Bank of Australasia shares were flat. In miscellaneous descriptions, Berlin Waterworks were quoted lower. Victoria debentures, new, left off at 109¾; Canadian Five per Cents., 101⅝; Ocean Marine Insurance, 2 to ¼ pm.; Universal, ¼ pm.; London and Provincial, ⅝ dis.

WEDNESDAY, Aug. 22.—The railway market was flat, owing to the unfavourable weather, and closed at a general decline. Midland, Great Northern, and North-Eastern stocks were the heaviest. Colonial descriptions were quiet, the only material change being a reduction in East Indian to 99 to ½. Foreign railways were generally unaltered; Bahia shares were firmer at ⅝ dis., while Lombardo-Venetian continued heavy at 1¼ to 1⅛ dis. In American securities there was another rise in the bonds and shares of the Illinois Central. Mines were inactive, and in several cases showed a decline. Joint stock banks were likewise rather dull. In miscellaneous descriptions, Australian Agricultural and Van Diemen's Land receded. Victoria debentures, new, were last quoted 109½ to ¾; Canadian Five per Cents., 101¼ to ⅝; Ocean Marine Insurance, 2 to ¼ pm.

THURSDAY, Aug. 23.—The railway market showed an increased firmness to-day, most of the leading stocks leaving off at a recovery of about ¼ per cent. Foreign descriptions showed no change of importance. Lombardo-Venetian continued without recovery at 1¼ to 1⅛ dis. There was again an active demand for Illinois Central shares, which at one period touched 15 dis., but a reaction subsequently took place to 17 to 16 dis. New York Central and New York and Erie shares also improved. Mines were again flat. Joint stock banks also showed a less favourable tendency, especially Australasia. Agra and United Service, however, were firm, being quoted 82 to 83. In miscellaneous descriptions, Peninsular and Oriental Steam advanced. Victoria debentures, new, closed at 109½ to ¾; Canadian Five per Cents., 101⅜; Ocean Marine Insurance, 2 to ¼ pm.; Universal, ¼ pm.; London and Provincial, ⅝ dis.

FRIDAY, Aug. 24.—The fall in the railway share market, to-day, varies from ¼ to ½ per cent. London and North-Western and Midland stocks exhibited the chief depression. London and North-Western stock was quoted 101 to ⅓; Great Western, 71½ to 72; Midland, 123⅜ to 124½, ex div., and ex the new shares; Lancashire and Yorkshire, 106 to ⅛, ex div.; South-Eastern, 87⅛ to 88½; Caledonian, 93⅜ to 94½; and Great Northern, 117 to 118. Lombardo-Venetian Railway shares were steady at 1 3-16 to 1 1-16 dis. The Canadian lines were likewise steady.

POMMERY'S CHAMPAGNE.—Extra Sorts Creaming and Sparkling.—Agents in London, A. Knicp and Co., 22 Basinghall street; Paris, 18 Boulevart des Italiens.

FREDERICK DENT, Chronometer, Watch and Clock Maker to the Queen and Prince Consort, and the maker of the Great Clock or the Houses of Parliament, 61 Strand, and 34 Royal Exchange. No connection with 33 Cockspur street.

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.
The LANCET states,
"This is superior to anything of the kind known."

RECIPE FOR SUMMER FRUIT PIE.—Boil the flour with milk for four minutes, then pour it over the stewed fruit, and brown it in the oven or before the fire. This is very lightsome and much preferred to the ordinary pie crust.—BROWN and POLSON, Manufacturers to Her Majesty the Queen, Paisley, Dublin, Manchester, and 23 Ironmonger lane, London.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey. Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmatic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

ON SPINAL AND OTHER DEFORMITIES.
PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
London: John Churchill and may be had of all booksellers.

JULLIEN FUND.
Committee Room—50 New Bond street.
The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.
The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.
COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

HOLLOWAY'S PILLS AND OINTMENT are indispensable for the security of life and health. Fever, Influenza, Bronchitis, Sore Throat, Diphtheria, and Bilious Complaints, are ever present plagues to mankind; but these can certainly and permanently be put to flight by the aid of these unrivalled aperient, detergent, and restorative remedies. There are multitudes of sallow and feeble invalids now languishing in all parts of the world under these diseases who would soon have found their healthy appearance, strength, and cheerfulness return if they judiciously used Holloway's preparations, from which no harm can possibly result. The ointment should be well rubbed night and morning over the affected parts, while the pills are taken with discretion. A great and happy change for the better will speedily appear.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA Food, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' Dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 7,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell, Ryderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 50,011.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, "ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 5 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

Proprietor, JOSEPH KARN, M.D., 17 Harley street, Cavendish square, W.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

DINNEFORD'S

PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepare by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

Just published, price 1s; by post, 1s 1d; sealed, 1s 6d,

The true guide to those who desire a speedy and private cure.—By HENRY SMITH, Esq., 8 Burton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer,

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER 228 Piccadilly, London

TO THE NERVOUS AND DEBILITATED

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 2s, [illegible] post paid by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermaterrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

MR CURTIS, author of the above Medical Treatise, may be consulted as usual. The efficacy and harmless nature of the remedies employed by MR CURTIS having been demonstrated by a successful practice extending over a period of 20 years nervous sufferers have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Consultations from 10 till 12 3, and 6 till 8. Sundays from 10 till 1.

NATURE'S GREAT REMEDIES, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Billious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c. Dr BUCHAN'S celebrated DOMESTIC MEDICINE consists of the PATENT SUGAR-COATED VEGETABLE PILLS, UNIVERSAL VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, never-failing remedies, affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Just published, gratis, or post free for one stamp, Extracts from Dr Buchan's Work, entitled Buchan's Domestic Medicine, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay and Sons, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay and Co., 63 Oxford street; Butler and Crispe, 4 Cheapside; Bartlett Hooper, 47 King William street; London Bridge; R. Howden, 78 Gracechurch street; Prout and Hersant, 229 Strand; Darby and Gordon, 149 Leadenhall street, London.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to receive Applications for Loans on Debentures for four or five years, from the 1st July, 1860, at 5 per cent. per annum, payment of the principal and interest being guaranteed by the Secretary of State for India in Council.

Particulars and forms of application may be obtained at the offices of the Company.

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, E.C., June 22, 1860.

GREAT INDIAN PENINSULA RAILWAY COMPANY.

The Directors are prepared to receive Loans on Debentures of £100 and upwards, for five or seven years, from 1st July inst., at 5 per cent. per annum interest, payment of both principal and interest being guaranteed by the Secretary of State for India in Council, and the interest being payable half-yearly, on the 10th of January and 10th of July, at the London and County Bank, Lombard street, London, by means of coupons attached to the Debentures.

Forms of proposal may be obtained on application at this office. THOS. R. WATT, Secretary.

Company's offices, 3 New Broad street, London, E.C., July 18, 1860.

EAST INDIAN RAILWAY COMPANY.

F EXTENSION AND JUBBULPORE SHARES (£15 paid).

Notice is hereby given, that in pursuance of a resolution passed at a meeting of the Board of Directors held this day, the proprietors of F Extension Shares and of Jubbulpore Shares in the East Indian Railway Company are required to pay the final Call of £5 per share on each of their respective shares, on or before the 29th day of September, 1860, at the public drawing office of the Bank of England.

Notice is hereby further given, that proprietors whose calls are not paid on or before the day named, will be charged with interest at the rate of 5 per cent. per annum on the amount called upon each share for the time the said call may remain in arrear, and will incur a loss of interest on the same amount for the period intervening between the 29th day of September aforesaid and the date at which the Company is entitled, under the contract, to make the next payment to the Secretary of State for India in Council on account of the capital, and that if default is made in payment of this call, the shares in respect of which default is made will become liable to forfeiture under the Company's deed of settlement.—By order of the Board,

D. I. NOAD, Secretary.

Alderman's walk, London, August 21, 1860.

SHREWSBURY AND WELCHPOOL RAILWAY COMPANY.—Preference Shares.—

The Directors are prepared to receive Applications for [illegible] per Cent. Preference Shares of £10 each in the Company created under the provisions of the Shrewsbury and Welchpool Railway Act, 1860.

By the arrangements entered into with the London and North-Western Railway Company, that Company will use the Shrewsbury and Welchpool Line when open for traffic, maintain it, bear all expenses (except office expenses), provide efficiently for the traffic, and pay over to the Shrewsbury and Welchpool Company 47½ per cent. of the gross receipts in respect of all traffic on or over the line, and further will, in case it should be required, and to the extent required, allow a rebate of 80 per cent. of their mileage proportion of the receipts in respect of all traffic brought to and upon their system of railways by the Shrewsbury and Welchpool Line, so as to secure to the Company, by means of such rebate, a sum equal to 4½ per cent. on a share capital of £180,000 (being the full amount of ordinary and preference capital authorised to be raised), in addition to 5 per cent. payable in respect of the debentures in the Company, which amount to £50,000.

Applications to be made to the Secretary, at the Company's offices, Claremont, Shrewsbury; or Messrs Eykyn, Brothers, Brokers, Change alley, Cornhill, London.—By order, R. S. FRANCE, Secretary.

TO VOLUNTEERS AND THE PUBLIC.

WILSON'S BREECH-LOADING RIFLE.

Mr THOMAS WILSON begs to call the attention of Volunteers and the Public to his New BREECH-LOADING RIFLE, and to state that he has committed the management of the patent to Messrs Rabone Brothers and Co., of 47 Broad street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's service, and is pronounced by the highest authority to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading or otherwise is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly for firing without the aid of tools. This facility would be occasionally valuable in rendering the gun useless to an enemy or mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns at an inconsiderable saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr Lancaster's, No. 151 New Bond street, and at Mr Pritchett's, No. 56 St James's street, London, as well as at Messrs Rabone Brothers and Co., 47 Broad street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

DEANE AND CO.'S FURNISHING WAREHOUSES, LONDON BRIDGE.

PIESSE AND LUBIN'S SWEET SCENTS.—FRANGIPANNI, KISS-ME-QUICK, WHITE-ROSE, and others from every flower that breathes a fragrance; in bottles 2s 6d each, or three in a case 7s. Sold by every Fashionable Druggist and Perfumer in all parts of the world.

Laboratory of Flowers, 2 New Bond street, London.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systeme of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

Is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

S. W. SILVER AND CO.,

OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Clothing for Gentlemen's Home Use,—viz., Naval and Military Uniforms and Civilian Dress of the best Materials and Workmanship. Shirts, Hosiery, Gloves, &c. Ladies' Outfits. Furniture for Camp, Barrack, Cabin and Colonial use, embracing every variety of Cabinet Work, Canteens, Trunks, Portmanteaus, &c., portable and suited to all climates.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's Judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity ha induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

SHIRTS.—FORD'S EUREKAS.—

Patterns of the new coloured Shirtings to select from, on receipt of Six Stamps.

The Illustrated Catalogue, free per post.

Richard Ford, 38 Poultry, London.

SHIRTS.—FORD'S EUREKAS.—

Coloured, Six for One Guinea. Upwards of 100 various designs to select from. Many patterns can be sent by post on receipt of Four Penny Stamps.

Richard Ford, 38 Poultry, London.

SHIRTS.—FORD'S EUREKAS.—

The best quality, Six for Forty-two Shillings.

The Illustrated Price List, containing every particular and mode of self-measurement, post free.

Richard Ford, 38 Poultry, London.

NOTICE.—"BEWARE OF IMITATIONS."

LEA AND PERRINS'

"WORCESTERSHIRE SAUCE"

Is pronounced by Connoisseurs to be a most agreeable addition to every variety of dish.

*** See the names of Lea and Perrins upon every label, bottle, and stopper.

Sold by Messrs Crosse and Blackwell, London; and by dealers in sauces generally.

Sole Manufacturers—

LEA and PERRINS, WORCESTER.

HARVEY'S FISH SAUCE.—

Notice of Injunction.—The admirers of this celebrated Fish Sauce are particularly requested to observe that none is genuine but that which bears the back label with the name of WILLIAM LAZENBY, as well as the front label signed "Elizabeth Lazenby," and that for futher security, on the neck of every bottle of the Genuine Sauce will henceforward appear an additional label, printed in green and red, as follows:—"This notice will be affixed to Lazenby's Harvey's Sauce, prepared at the original warehouse, in addition to the well-known labels, which are protected against imitation by a perpetual injunction in Chancery of 9th July, 1858."

6 Edwards street, Portman square, London.

CROSSE AND BLACKWELL,

Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. and B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their Manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable oilmen, grocers, &c., and wholesale of Crosse and Blackwell, 21 Soho square, London.

The Political Economist.

OUR WEAK POINT.—THE STATE OF LOMBARD STREET.

The unfavourable weather of the week has increased the probability of a higher value of money during the present autumn. A great deal of corn will unquestionably be imported, and the almost inevitable consequence is an augmentation of the rate of discount in Lombard street. We shall not, indeed, have to pay for the whole of the food we import in money. Experience shows that some portion of it will be paid for in our manufactures. The *ability* of the nations which send us corn to purchase our goods is augmented, and if they *wish* to buy more of us than usual, they can do so. The high rate of freight *to* England may also tend to reduce the rate of freight *from* England, and thus materially aid the export of bulky commodities. These causes will diminish the drain of bullion. We can also, as heretofore, to a very great extent protect ourselves against it by raising our rate of interest. But the tendency of a deficient harvest must always be to create a drain on the resources of the Bank of England, and if we wish to retain our money, we must augment its value. We must attract capital from abroad by a high rate of interest, in order to counterbalance the mercantile causes which require us to pay gold to foreign countries.

What, then, will be the effect upon the money market of this increase in the value of money? Are there any peculiar features in that market at present which may make that effect different now from that which it used to be? We believe that there are such features, and though they are not such as would justify great anxiety, we are sure that they deserve patient attention, and should warn us to care and watchfulness.

A principal peculiarity of the money market of late years is the quantity of money in it. We have larger deposits held at interest, either at call or at very short notice, than we used to have, and the competition which is thus caused is very severe. It is especially severe on the bill-brokers. The joint stock banks have large sums for which they pay nothing; but the bill-brokers pay highly for every sixpence which is left with them, and they are obliged to use all their resources as profitably as they can. They have to make high payments to all their depositors, and they have to compete with very powerful establishments which have not in all such cases to make such payments. Moreover, under the provisions of the Limited Liability Act, two large companies have been established for carrying on a bill-broking business, and their operations, though not as yet extremely large, have certainly tended to augment the competition for money in Lombard street. The pressure on the bill-brokers to give high rates for money has increased—perhaps is increasing.

The difficulty, too, of conducting their business is augmenting. Year by year trade is growing, the number of firms enlarging, the difficulty of knowing any one's circumstances with precision becoming greater. A bill-broker has not the same opportunities that a banker has for watching the transactions, and detecting a change in the circumstances, of those with whom he deals. A banker has the current account of his customer to guide him. If he is careful and experienced, he will nearly always derive important information from it. It will show him the nature and the extent of business which the customer carries on, and the sort of persons with whom he deals. But a bill-broker has no such assistance; he has to decide *in vacuo*, from general information and from the report of others.

It is to the joint action of these two causes, of the increased competition in the discount market and the increased difficulty of bill-discounting, that we attribute such cases of misplaced credit as we have just seen in the leather trade. They are the exact effects which these causes would tend to produce. An increased anxiety to lend, and an increased difficulty in lending safely, must inevitably *tend* to produce bad loans.

We believe the trade of the country to be in general sound. We believe that the two great processes of production and distribution go on for the most part as well as they have ever done. But we are not entirely sure that the system of credit which facilitates both these operations is in a state equally sound. We will not assert a negative; nothing but time can show what the truth in such a matter is. But after such large instances of undue credit as have recently been disclosed in the leather trade,—instances almost wholly unsuspected in the trade or out of it,—it is not unreasonable to be apprehensive that something similar *may* be happening in other trades, though probably to a much less extent, and we will hope with far less pernicious results. We fear, therefore, that a tightness in the money market may not find our credit system in every part of its ramified structure quite so sound as we might wish.

Nor is this the only danger to which that system may this autumn be exposed. Every system of credit is liable to derangement if the resources upon which the lenders count should be diminished. Those of the bill-brokers have been diminished. Formerly they had by tacit agreement and established custom an unlimited credit at the Bank of England. So long as they brought good bills to the Bank, there was a practical "understanding" that they should have the money for them. In 1857, this understanding was acted on to a great extent. Several bill-broking firms received great assistance from the Bank; and if such assistance had not been necessary to them, they certainly would not have asked for it at the high rates of interest charged at that time. But now, whether the bill-brokers want aid or not, they are, except at certain seasons of the year, not to have it: no matter how good the bills they

bring to the Bank, they will not be discounted there. We are certainly afraid that this rule, if unmodified, may produce in a tight money market, in our present state of feeling, considerable evils.

We are not so much afraid of the bare effect of the rule in itself, as of the indefinite apprehensions which it may cause among the public. We believe—*we know* that the discount houses keep a considerable reserve in loans in the Stock Exchange, and on securities elsewhere. We know that in a period of anxiety—in even such a time as the present—they restrict their operations anxiously and carefully to short-dated paper. We know that they have of their own, securities of great value, on which, in all but the most extreme moments of panic, large advances would be readily attainable. We know that under all ordinary circumstances those resources will be sufficient; but we are by no means sure that in the present condition of men's minds—in the actual circumstances in which they would be tried, if they are tried now, they would be sufficient. It has been well said that "conversation is the adversary of credit." The mere fact of the bill-brokers being excluded altogether from the Bank may cause—we do not say will cause, but *may* cause—a state of feeling dangerous not only to them, but to the public also. These larger establishments hold on deposit perhaps the most *delicate* money in the world, the reserve of bankers. In a time of pressure it is to be feared that such bankers may say—'We 'do not know about these bill-brokers. They are not in so 'good a position as they used to be. The Bank of England 'wont have anything to say to them. They tell us they have 'a large reserve in the Stock Exchange and elsewhere; but 'we do not know about "all that." At any rate let *us* be on 'the safe side, and have *our* money.' We are far from saying that such language would be wise; our opinion is very different; but *all* bankers are not very wise, and we fear some of them may use it. If a few very unwise persons should even begin to use it, the result might be extremely serious.

Again, it is said that the discount houses would in the commencement of a panic stop discounting, and throw the whole pressure on the Bank of England. We scarcely think that this course would be a prudent one for their interests. We fear it would draw on them too marked attention, and would quicken the mischievous "conversation" of which we speak. But if they did so, the result would, as far as the public are concerned, be very serious. A sudden derangement of the credit system of Lombard street in a tight money market, possibly during a drain of bullion, would have formidable consequences, in the first instance to the interests of bankers throughout the country who live upon their credit, and through them upon the public at large.

All the peculiar causes which render a tight money market somewhat more than usually dangerous now we cannot on the spur of the moment hope to remedy. We cannot at once alter the conditions on which money is left upon deposit in Lombard-street; we cannot at once make it easy to distinguish between good bills and bad. But the relations between the bill-brokers and the Bank might be altered. They were established by a resolution of the Bank, and that resolution might be modified. The old system of allowing an "unlimited" credit to the bill-brokers at the Bank was the worst possible system; the present is a great improvement upon it; but though it might not really strengthen the discount houses very materially, *it would be thought to strengthen them very much*, if they had a moderate and businesslike arrangement with the Bank of England, such as we have before suggested—if they were allowed, on proper banking terms, to have a proper banking advance, for limited periods and to a limited amount.

COUNT PERSIGNY'S THEORY OF THE EMPEROR'S MOTIVES.

The Emperor of the French has had and has many admirers, but probably counts but one faithful believer, and we need not say that this believer is Count Persigny. Yet we now find from the frank speech of the Count at the opening of the Council of the Department of the Loire, that there was a single moment when even *his* religious faith in the Emperor wavered,—when, to use the language in which this vehemently repentant disciple prostrates himself before the master whom he has wrongfully doubted,—"For one "moment, and some time before the Italian war, ap- "pearances seemed to be so strong against us, that, like "St Peter denying his master, I was the first to believe "that my Government, in the intoxication of success, had "forgotten the programme of Bordeaux *(L'Empire c'est la "paix)*, and I grieved over it profoundly *(je m'en affligeais "profondement)*. Soon enlightened as to the state of affairs, "I blushed to have doubted the wisdom of the Emperor; "but I was not the less affected by a situation which gave "us the appearance of being the aggressors." This is, in Count Persigny at least, the language of genuine faith; and no Englishman can feel otherwise than interested in this eager disciple's *rationale* of his master's actions and motives. He at least believes them to be reconcileable not only with perfect wisdom, but with perfect simplicity and candour. We, who find the Emperor's character and political intentions more ambiguous than M. de Persigny, are yet willing, if only for the sake of the abstract interest of the problem, (to say nothing of what we owe to the genuine regard for England which the French Ambassador has steadily evinced), to give a candid hearing to his individual creed,—for it is nothing more,—as to his master's political motives and ends. If it do not prove convincing or self-evident, it will at least show us what view of them the Emperor *wishes* to be adopted by the most earnest and devoted of his followers.

M. de Persigny then begins by stating that Napoleon III expressly abandoned all the hereditary excuses for war which might have been derived from the history of the last Buonapartist *régime*, when he declared at Bordeaux that the Empire meant peace. He did not mean to disavow all war, but only to declare that he would not accept his uncle's policy with his crown,—that he would not accept those legacies of strife which the last days of the Empire had bequeathed to him. But this conceded, there were two inevitable wars before there could be any solid peace,—a war to forbid the dismemberment of Turkey, and a war to counteract the threatening predominance of Austria in Italy. The great European danger before the Crimean war, consisted not in the weakness and maladministration of the Porte, but in the impending aggression of Russia, which would have superseded and rendered impossible all reorganisation of the decrepit Government of Constantinople. The European danger of the Italian question was the overwhelming influence of Austria in the Peninsula, which prevented the possibility of all natural and durable arrangements. The former danger was evaded by the Crimean, the latter by the Italian war,—and in both cases the Emperor stopped short, says Count Persigny, when just enough had been done to remove it, and no more than enough. He was careful to mark his determination not to let them take the *dimensions* of the wars of the first Empire. "Such seems to "have been, in fact, the predetermination of the Emperor to "hinder the one or the other from taking the character of "the wars of the First Emperor, that they were terminated "when, judging by the impression of historical analogy, the "public believed them scarcely commenced." But the *dimension* of the wars is not the point in question. It is on the *motive* and policy of the wars that Count Persigny professes to instruct us. Nor does any one, in England at least, profess to find any stumbling block or ambiguity in the policy adopted by France in the Crimean war.

And with regard to the Italian war the French ambassador admits, as we have seen, that he was at first staggered. He was puzzled by the secrecy of the French policy, as well as probably by his knowledge of the prize that was aimed at. France seemed to be aiming at a rectification of the French frontier towards the side of the Alps, and especially at such a rectification as would most emphatically mark the purpose of France to repudiate the securities taken against her aggressive propensities by the European Powers in 1815. One great provision of these treaties was to keep France out of Savoy. The ultimate, though suppressed aim of the Emperor appeared to be to absorb Savoy. Knowing these things, and aware, as he evidently was, of the compact which preceded the Italian war, we do not wonder that M. de Persigny's faith should have been "for a "moment"—and a rather extended moment—sorely tried. How could he convince himself that the programme of Bordeaux,—even as interpreted by himself—the programme which stated that France had renounced all intention of reopening the

grievances bequeathed by the first Empire,—had not been broken through ?

But this dark interval of reeling faith, when even the wisdom of the Emperor seemed no longer a solid and immutable certainty, and when, therefore, Count Persigny was tempted to "deny his master," did not last long. The infinite condescension of Napoleon III. came to his aid. The involuntary infirmity of the Minister was excused and the cloud of doubt dispelled. "The Emperor," says Count Persigny, "did not disdain to reply to these observations of "a faithful subject; and I hasten to avow it, his elevated "wisdom prevailed over the counsels of his servant." What, then, was that view of the case which the Emperor wished to present as the most plausible, and the Minister was eager to accept as the most true? The Emperor wishes Count Persigny to believe that every difficulty and ambiguity will be removed by the assumption, that while the main object of France was to liberate Italy from the virtually dictatorial power which Austria wielded in all the Italian States, everything that seemed indirect in the French policy was a result of the Emperor's extreme anxiety to effect this at the least practicable expense of alarm to Europe, of sacrifice to France, and of injury to Austria. Why, M. Persigny had objected, did not the Emperor explicitly declare, as in the case of the Russian war, that if Austria attacked Piedmont, or entered the neutral States, France would resist her? Some had answered,—'because France wished to entrap Austria into an act of aggression before she knew with whom she had to fight.' Just for the opposite reason, replied the Emperor;—because the only chance of restraining Italian zeal, and bringing Austria to reason, was to suppress the determination of France to the last. "To have made publicly known the obligation which "we had undertaken, would have been to give us no longer "the appearance, but the reality of aggression against "Austria; for from the moment that Italy should know "upon what powerful aid she could count, there would no "longer have been any means of restraining her, and that "which we still hoped, that which England hoped for to the last "moment, from the good sense of Austria, it was im"possible to expect from a people furious with hate and with "vengeance. Thus, gentlemen, the silence with which the "Emperor was reproached was unfavourable to himself "alone, and his good faith shone forth all the more that it "was unjustly and cruelly impugned." Count Persigny, like all idolaters praying to have their doubts resolved, is far too eager a believer to sift the response, or he might have asked whether a public and explicit engagement to defend Piedmont and other Italian States against the active interference, and *only* against the *active* interference, of Austria, would have been half as likely to foster excitement in Italy as the vague and universal impression of a secret league conceding a provisional accession of territory to France. A public engagement thus limited and accompanied by no prospective gain to France, would have been far less irritating to Austrian jealousies, and far less encouraging to Italian hopes. But the opening for French ambition depended on the irritating mystery of the arrangement: had not Austria seen reason to fear, and Italy to hope, that France was more deeply pledged than any abstract and disinterested "idea" would account for, the collision would perhaps have been indefinitely deferred.

"It was the same," says M. de Persigny, "with the affair "of Savoy." France could not publicly declare after the treaty of Villafranca that if that treaty were not carried into effect, if an annexation policy were pursued by Piedmont, she should expect the compensation of Savoy,—because to declare this would have been to give a significant hint to Italy that France was not unwilling to see the Austrian articles of that treaty practically evaded. France was silent as to the alternative in order to persuade Italy that there was *no* alternative to the fulfilment of the Villafranca contract. Yet why was this condition concerning Savoy sedulously concealed during the earlier stages of the war? This, too, was done, replies the "elevated wisdom" of the Emperor, to prevent the effervescence of Italian zeal, and to keep a place for repentance open for Austria. Had the bargain been published, Italy would have at once felt confident of French aid, and would have relied on that aid. Yet, not improbably the publication of the contract would have affected in no small degree the alliances of Austria. Had the slopes of the Alps and the guarantee treaties of 1815 been confessedly involved, Austria might not have sought European assistance in vain.

On the whole, the replies made by the "elevated wisdom "of the Emperor" to a faithful subject do not impress us quite as they impress Count Persigny. They appear to us, when analysed, to come to this,—that France desired to *supplant Austrian by French influence* in Italy, and to cancel the provisions of the treaty of 1815 so carefully excluding her from Italy, with as little danger to herself and as little stir in Europe as she might. But this was her main end. She had long divided with Austria the authority which Emperors could exert over the Pope. She desired to do more than divide the influence in the minor States. For the unity of Italy the Emperor had no wish,—witness the treaty of Villafranca. For *non-intervention* as a principle, he had still less wish,—witness not only the military contingent at Rome, but the favour with which France received and would have urged on England the proposition to prevent the extension of Garibaldi's operations to the mainland of Italy. But for French influence in Italy,—for the utter and final destruction of the exclusionist treaties of Vienna,—the Emperor had the strongest desire. Hence the ultimatum which from the first he steadily adhered to:—either a divided Italy protected by French influence against Austria,—or a cession of that key of the Alpine passes to France which had been regarded in the treaties of 1815 as the chief guarantee against French invasion.

M. de Persigny wisely passes by the explicit, and explicitly broken, promise of ceding Faucigny and Chablais to Switzerland in case of the appropriation of Savoy. Perhaps he thinks this too trifling an exception to the statement that the "*ensemble*" of the policy of France has been "simple, pure, and honest." We only hope that he may have better grounds for his prospective than he has for his retrospective statements. To believe, with M. de Persigny, that the "military *rôle* of "France, *in Europe*, is terminated," would be no little relief,—even though this somewhat ambiguous phrase should be taken to indicate that her corresponding part in *Oriental* politics were only just begun.

THE FRENCH CANADIANS AT MONTREAL.

The accounts which reach us to-day of the strange and disloyal tumult raised in the Council Chamber of Montreal, notwithstanding—indeed it may be rather in consequence of—the Prince of Wales's approaching visit, by some of the French Canadians, form one amongst many indications that the French people would rather be ruled even oppressively by one of their own race, than be reigned over with the largest measure of political liberty, so long as it is a condition of the exercise of those liberties that they shall act in concert with the English, or men of any other stock. They are now using in the Council Chamber of Montreal, with relation to their English ruler, language which would scarcely be appropriate in the mouth of the subjects of Francis of Naples, or in the Venetians towards the Austrian Government. They speak of the "attempts made "by the *accursed* English to rule the descendants "of one of the greatest nations on the face of the earth." But the hatred which they now express so freely and, as we believe, so causelessly, is not, in reality, aimed half so much at the throne as at their fellow-subjects. The time was when the "tyranny established at the cannon's mouth," of which these disaffected Canadians speak so bitterly, was the most popular of Governments; and that, too, was a time when they had no privileges of self-government at all:—but, then, it was also a time when the French were the main constituents of the population, and had nothing to fear from the competition of English fellow-citizens. After the American war the British rule was exceedingly popular with the French Canadians. There was a period, indeed, when they were even anxious to repudiate the rights of political self-government. When, in 1791, an elective form of Legislature was asked for by the British residents in Canada, the French declared that they did not want any such change, that they were perfectly happy under the Quebec Act as it was called, and that they were very apprehensive that the increase of British immigration into Canada would leave them in a minority, and that thus, instead of being governed by the British Crown, they would be governed by their British fellow-subjects. This was the apprehension

which gave rise to the unfortunate separation between the Canadas,—a step which it was afterwards found so necessary and difficult to retrace. But the same fear has been permanently manifested in the Canadas. The French have never cared so much for the rights of self-government as for the sentiment of race. The jealousy seems even to have been increased by the habit of acting together in political affairs. And yet the British *Government*, at least ever since the rebellion of 1837, has treated the French Canadians with more than justice,—with something like favour. It was in their cause that Lord Elgin suffered so much unpopularity, when he gave the Royal assent to the Rebellion Losses Bill which was so unpopular with the English party in Lower Canada, because it proposed to indemnify all sufferers by the rebellion who had not been legally convicted of taking part in it. This measure, carried through the Assembly chiefly by the influence of the French Canadians, brought down on the British Governor in Canada much personal insult. It was the origin of a fierce movement in favour of annexation to the United States; —but still the French Canadian party were supported, and other measures tending to allay their jealousy of the English were passed at the same time. Indeed, now for many years, political liberty so large as that which has been enjoyed by the French Canadians in Lower Canada has not been enjoyed by any other French community in the world.

In spite of all this the French Canadians do not seem to be half as content with their position now as they were near a hundred years ago, when they were governed absolutely by the British Crown, but had as yet no rivalries with English fellow-subjects. They care less by far for constitutional privileges than for the prejudices of race, and would be far better satisfied if Napoleon III. were to land in Canada and establish over the water the censorship of the press, the iron system of political control, the active police espionage, of France, than they are now. This, indeed, is said to be the avowed object of their aspirations. They wish to see a war between England and France, that they may once more return to the old rule, which, notwithstanding its absolutism, is better simply because it is French. Surely these things should warn us that we are apt to be too hasty when we censure Louis Napoleon for depriving his countrymen of all the germs of free institutions. Does he not understand them better than we? Do they really object to despotic Government at all? Do they not rather admire it? At all events they prefer it to any division of power with an alien people. They were content when they were governed absolutely by an English King, and would be glad now to be governed absolutely by a French Emperor,—but to buy the right of moulding their own institutions by the concession of an equal right to their English fellow-subjects,—this alone rouses them into active sedition and disloyalty.

THE BOARD OF TRADE TABLES FOR JULY.

THE HALF-YEAR'S EXPORTS AND IMPORTS.

The declared value of the exports for July shows a considerable increase,—more than a million sterling—on the same month last year,—and this has brought up the value of the seven months' exports somewhat above that for the same period last year. The returns are as follows:—

Exports for July.			Exports for the Seven Months ending July 31.		
1858	1859	1860	1858	1859	1860
£	£	£	£	£	£
10,993,997	11,285,451	12,522,698	64,461,801	74,288,610	74,542,687

The increase in the value of the exports of the month is chiefly due to the increased exports of cottons to all parts of the world during the month as compared with July, 1859: this amounts to 600,000*l.* The remaining increase is pretty equally distributed over our export trade, but must be ascribed more to the export of woollen manufactures than to any other single branch of industry, except the cotton trade.

The imports for the month of July have no very remarkable feature. The receipts of cotton have somewhat declined, though larger than in 1858. The new tariff has caused a very marked increase in the import of butter, which for the seven months is increased by near 70 per cent. in quantity, and for the six months ending with June by a value of 650,000*l.* The only other article of which the increase in import is worth noticing is French wine. The quantity retained for home consumption has increased in July as compared with July, 1859, by 52,000 gallons, or nearly 70 per cent., and in the seven months by very nearly 400,000 gallons, or full 95 per cent. Comparing the table of values (not of the wine retained for consumption, which we do not know, but of the whole quantity imported), which is made up to the end of June, we find the *value* of the French wine imported increasing very nearly, though not quite, at the same rate as the *quantity*, which implies apparently that there is no great change in the quality or cost of the French wines imported, —that the cheaper wines are not as yet taken, as it was hoped they would be, in much larger quantity than the more expensive wines. No doubt French wines are still consumed by much the same classes as before—the richer classes—only consumed in larger quantities.

The imports (of enumerated articles) for the first six months of 1860 show an increase in value of no less than fourteen and a half millions sterling over the first half of last year, and are still more in excess of the first half of 1858, and even six millions in advance of the first six months of the prosperous year, 1857. This increase is in a very great measure due to our increased consumption of one article alone, cotton. The quantity of the raw cotton imported has increased so enormously during the last year, that it is worth while to compare the value of the (enumerated*) imports of the six months in each successive year with that assigned to cotton alone.

Computed Real Value of Principal Imports during Six Months ending 30th June, compared with Imports of Raw Cotton in same period.

	1857	1858	1859	1860
	£	£	£	£
Imports of principal articles	69,350,383	58,006,634	60,815,537	75,369,106
Raw cotton	18,008,874	17,530,173	17,407,854	24,501,978
Principal imports exclusive of cotton	51,341,509	40,476,461	43,407,683	50,867,123

Hence we see that, exclusive of our imports of cotton, the imports of 1860 rather fall short in value of the imports of 1857,—a year, probably, of somewhat inflated prosperity, as evinced in the commercial crisis with which it ended. But even after subtracting the increase over the first half of last year (of no less than seven millions sterling) due to our import of cotton alone,—it will be seen that another seven millions and a half remain to be distributed among other articles. The principal items of increased expenditure of British capital (as compared with last year), are to be accounted for as follows:—

Excess in 1860 over Value Imported in the same Six Months of 1859.

	£
Cotton (raw)	7,094,000
Tea	1,248,000
Wine	1,164,000
Wool	961,000
Butter	657,000
Sugar	549,000
Coffee	419,000

besides a great many other smaller increases, balanced to some extent by a large falling off in the imports of corn, flour, and silk.

The tables for July include the useful tables of the values of imports and exports to various countries, and show, therefore, how the increase of our commerce is distributed among the various produce markets which supply us with materials, and the various customers who take our products. These tables, it must be remembered, profess to give the values not only of the "principal" articles, but all articles imported and exported,—and in the case of the imports the totals are, therefore, about 20 per cent. more than in those we have hitherto been considering. The comparison is as follows:—

Imports—Half-year ended June 30.—(Computed Real Values.)

	1858	1859	1860
	£	£	£
From foreign countries	57,004,508	61,320,386	75,798,781
From British possessions	13,367,426	14,221,560	16,663,656
Total imports	70,371,934	75,541,946	92,462,437

Exports—Half-year ended June 30.—(Declared Values.)

	1858	1859	1860
	£	£	£
To foreign countries	33,888,654	40,531,283	41,195,264
To British possessions	19,579,150	22,471,876	20,824,725
Total exports	53,467,804	63,003,159	62,019,989

Of course, by far the greatest increase of our imports is due to the United States of America for their raw cotton, but

* The value of the *enumerated* articles imported is usually about 80 per cent. of the total value of our imports.

the exports thither have by no means increased in the last half-year. The amount is as follows:—

	1858	1859	1860
	£	£	£
Exports to United States (declared value) in the 1st half-year (Atlantic Ports)	5,752,930	11,625,920	9,366,647
Imports from United States (computed real value) (Atlantic Ports) in same period	19,613,958	17,301,790	25,618,472

So that while our imports from the States have increased by more than eight millions, our exports thither have fallen off by more than two millions as compared with the same six months in last year. With France our trade has not as yet increased, as will be seen from the following account:—

	1858	1859	1850
	£	£	£
Imports from France in the 1st half-year	7,135,107	9,615,065	8,523,983
Exports to France ditto	2,113,542	2,358,912	2,324,665
Total imports and exports	9,248,649	11,973,977	10,848,648

which shows some falling off on the same period last year.

The changes which are most marked in our foreign and colonial commerce are the increase of trade with the Hanse Towns and with China.

Trade with Hanse Towns in Half-year ended June 30.

	1858	1859	1860
	£	£	£
Imports thence	1,833,597	1,986,358	2,790,307
Exports thither	3,773,762	3,809,479	5,232,244
	5,607,359	5,795,837	8,022,551

showing, on half a year's trade alone, a total increase of considerably more than two millions in the value of the transactions.

The trade with China has also increased greatly:—

Six Months ended June 30.

	1858	1859	1860
	£	£	£
Imports from China (including Hong Kong)	3,943,359	5,070,691	5,526,054
Exports to China (exclusive of Hong Kong)	906,983	1,001,709	1,622,525
Exports to Hong Kong	592,331	976,703	1,236,262
	5,442,673	7,049,103	8,384,841

showing an increase of more than a million in the value of half a year's trade as compared with last year, and of three millions as compared with the first half of 1858.

The exports to British India show a falling off of near two millions sterling on the half-year; the imports thence an increase of 600,000*l* for the same period. The value of the trade with Turkey is considerably increased.

FRENCH TAXATION.

IV.

TOBACCO AND LIQUORS.

The importation, manufacture, and sale of tobacco in France constitute a strict Government monopoly. About half the leaf or unmanufactured tobacco required for consumption is imported from abroad: the other half is grown at home under the strictest regulations, and purchased exclusively by the Government. No private or unauthorised individual may purchase either native or foreign tobacco, except from the Government stores. The foreign article is supplied to the authorities by open tenders; and when the purchases have been made or arranged, the same authorities decide, generally in August every year, the amount of indigenous leaf which they will require in the following year, and permission to grow this quantity is then given and distributed in the following manner.

No tobacco can be planted on any pretext except in certain specified departments, which are now, we believe, nine in number. Among these nine, the administration charged with this fiscal branch divides the total quantity required; which again is further subdivided and apportioned among the several *arrondissements* or parishes, the number of acres to be planted and the price offered by the Government being also officially determined and announced. The Prefet then invites offers from all who may wish to cultivate tobacco on these terms, and, after a couple of months spent in delays and formalities, awards to each cultivator his proportion of the general production.

It is obvious that, in order to prevent any of this home-grown tobacco from being surreptitiously gathered and sent into consumption, the most minute and incessant vigilance is required. As soon as the allotment is decided, an officer visits each field to see that the tobacco is sown properly and on proper soil, and that none is sown on any other land than that indicated. As soon as the plant begins to appear above ground, another visit is paid to ascertain that the exact average fixed and no more has been planted, that the rows are at equal and fit distances, and that there are no surreptitious plants introduced between the legitimate ones. The number of plants is then counted and recorded. When the plots require to be weeded, the weeding must be carried on in presence of an officer, who *registers the number weeded out* and sees that they are duly destroyed. If any storm or accident destroys or injures any of the plants, the fact must be forthwith notified to the authorities, who verify the fact and annihilate the injured refuse. Finally, the cultivator is compelled to destroy any tobacco which exceeds the quantity he contracted to deliver, and to make good any quantity falling short of such contract. When the leaf is gathered and delivered, he receives his price, which, theoretically, is so calculated as to leave a somewhat larger profit on the cultivation of tobacco than on that of wheat. This result, however, must of course, in so uncertain a crop, be a problematic one.

The leaf tobacco thus procured, as well as that imported from abroad, is manufactured by the Government, who employ therein about 20,000 workmen. The finished article is then sold to certain officers who give heavy security, called *Entreposeurs*, 357 in number—one for each arrondissement, who furnish it to the *Debitants* or retail dealers at a fixed and uniform price determined by an Imperial decree. These dealers again sell it to the public at a fixed price, which is calculated to leave them a profit of ten or twelve per cent. These dealers are all licensed; they are 33,000 in number; some of their posts, those especially in large towns or extensive and populous districts, are very lucrative, and are bestowed by Prefets and Sous-Prefets among their friends and partisans. The net produce to the revenue from the sale of tobacco is set down in the accounts for the current year at 183,000,000f or 7,320,000*l*.

The manufacture of gunpowder is also a Government monopoly, but only yields about 400,000*l* per annum.

Beverages.—After tobacco, wine and spirituous liquors yield the largest sums to the French exchequer. This year the *Droits sur les boissons* is calculated to produce about 6,700,000*l*. This revenue is levied in a variety of ways, so that much wine and spirits pays three or four times over.

1. There is the tax on *circulation*, in virtue of which a duty is levied on all wine removed from warehouses or merchants' cellars to its place of destination. This duty varies from 60 centimes to 120 centimes *par hectolitre* (or from about one farthing to one halfpenny per gallon), according to the departments to which it is sent and the average value of the wine usually consumed therein.

2. *Retail Tax.*—This consists of 15 per cent. on the price of the wine as sold retail by the licensed dealers, who are therefore obliged not only to declare their prices to the authorities, but to affix a scale announcing them in their shops, and to submit to a fine if they demand more or take less than the price fixed.

3. *Tax on Consumption.*—This duty is levied from the retail dealer on all brandy and liqueurs, and varies from about 2f a gallon of alcohol on the former to 2f per liquid gallon of the latter.

4. *Tax on Entry.*—This is a duty charged on all fermented liquors, from cider up to brandy, on their entering any town or city. Its amount varies in each department and according to the population of the place, the largest towns paying the most. This tax, it must be remembered, is quite distinct from and in addition to the *octroi*, an impost which is levied on most articles of consumption on their entry into any town, and which goes not into the Imperial, but into the Municipal exchequer. The aggregate produce of the *octrois* throughout France now reaches 4,000,000*l* sterling.

There is one curious practice existing in France in reference to some of the last named taxes (those on wine and spirits), which we believe has no parallel among ourselves. Whole districts and communes are permitted to *compound* for the amount of revenue estimated to be due from them to the State, and to raise the sum among themselves in such manner as they may agree upon. This plan is said to work well, and to give much satisfaction.

THE QUEEN'S SPEECH.

The following is a copy of the Queen's Speech read by the Lord Chancellor on the prorogation of Parliament on Tuesday last:—

My Lords and Gentlemen,

We are commanded by Her Majesty to release you from further attendance in Parliament, and at the same time to convey to you Her Majesty's acknowledgments for the zeal and assiduity with which you have applied yourselves to the performance of your important duties during the long and laborious Session of Parliament now about to close.

Her Majesty commands us to inform you that her relations with foreign Powers are friendly and satisfactory; and Her Majesty trusts that there is no danger of any interruption of the general peace of Europe. Events of considerable importance are, indeed, taking place in Italy; but if no foreign Powers interfere therein, and if the Italians are left to settle their own affairs, the tranquillity of other States will remain undisturbed.

The proposed Conferences on the subject of the cession of Savoy and of Nice to France have not yet been held. But Her Majesty confidently trusts that, in any negotiations which may take place, full and adequate arrangements will be made for securing, in accordance with the spirit and letter of the Treaty of Vienna of 1815, the neutrality and independence of the Swiss Confederation. That neutrality and independence were an object to which all the Powers who were parties to the Treaties of Vienna attached great importance, and they are no less important now than then for the general interests of Europe.

Her Majesty commands us to assure you that the atrocities which have been committed upon the Christian population in Syria have inspired Her Majesty with the deepest grief and indignation. Her Majesty has cheerfully concurred with the Emperor of Austria, the Emperor of the French, the Prince Regent of Prussia, and the Emperor of Russia, in entering into an engagement with the Sultan, by which temporary military assistance has been afforded to the Sultan, for the purpose of re-establishing order in that part of his dominions.

We are command by Her Majesty to inform you that Her Majesty greatly regrets that the pacific overtures which, by Her Majesty's directions, her Envoy in China made to the Imperial Government at Pekin did not lead to any satisfactory result, and it has, therefore, been necessary that the combined naval and military forces which Her Majesty and her ally the Emperor of the French had sent to the China Seas should advance towards the Northern Provinces of China, for the purpose of supporting the just demands of the allied Powers.

Her Majesty, desirous of giving all possible weight to her diplomatic action in this matter, has sent to China, as Special Ambassador for this service, the Earl of Elgin, who negotiated the Treaty of Tien-tsin, the full and faithful execution of which is demanded from the Emperor of China.

Gentlemen of the House of Commons,

Her Majesty commands us to convey to you her warm acknowledgment for the liberal supplies which you have granted for the service of the present year, and for the provision which you have made for those defences which are essential for the security of her dockyards and arsenals.

My Lords and Gentlemen,

Her Majesty commands us to express to you the gratification and pride with which she has witnessed the rapid progress in military efficiency which her volunteer forces have already made, and which is highly honourable to their spirit and patriotism.

Her Majesty has given her cordial consent to the Act for amalgamating her local European forces in India with her forces engaged for general service.

Her Majesty trusts that the additional freedom which you have given to commerce will lead to fresh development of productive industry.

Her Majesty has given her ready assent to several measures of great public usefulness.

The Acts for regulating the relations between landlord and tenant in Ireland will, Her Majesty trusts, remove some fertile causes of disagreement.

The Act for amending the law which regulates the discipline of Her Majesty's navy has established salutary rules for the administration of justice by courts-martial, and for maintaining good order in the naval service. The Act bearing upon endowed charities will give means for a less expensive administration of the property of charities, and for the speedy and economical settlement of disputes affecting such property; while, by another Act, relief has been afforded to Her Majesty's Roman Catholic subjects with regard to their charitable endowments.

Several other Acts have been passed for legal reform, which must lead to the more satisfactory administration of justice.

Her Majesty has observed with deep satisfaction the spirit of loyalty, of order, and of obedience to the law which prevails among her subjects, both in the United Kingdom and in her dominions beyond sea; and Her Majesty has witnessed with heartfelt pleasure the warm and affectionate reception given to His Royal Highness the Prince of Wales by her North American subjects.

You will, on returning to your several counties, have duties to perform scarcely less important than those which have occupied you during the Session of Parliament, and Her Majesty fervently prays that the blessing of Almighty God may attend your efforts, and guide them to the attainment of the objects of her constant solicitude—the welfare and the happiness of her people.

THE NEW STAMP ACT.

The New Stamp Act being now printed by authority, and in force, we extract the principal clauses as follows:—

3. From and after the 31st day of December, 1860, the allowances granted respectively by the 18th section of the Act passed in the 13th and 14th years of Her Majesty, chapter 97, in respect of stamps and receipts; and by the 24th section of the Act passed in the 17th and 18th years of Her Majesty, chapter 83, in respect of stamps for drafts, bills, and notes, and any allowance granted by or payable under any other Act in respect of any of the stamps hereinafter mentioned, shall cease; and in lieu thereof there be granted and allowed to every person who at one and the same time shall produce at the office of the Commissioners of Inland Revenue in London or Dublin paper to be stamped with stamps for denoting any rate of duty not exceeding 1s on bills of exchange, drafts, or orders, or promissory notes, or stamps for denoting the duty of 1d on any instrument or document whatever (except postage stamps and customs stamps), to the amount of 2*l* or upwards in the whole of all or any of such stamps as aforesaid, and to every person who at one and the same time shall purchase any such stamps as aforesaid at the office of the said Commissioners in London, Edinburgh, or Dublin, to the amount aforesaid, or of any distributor or sub-distributor of stamps at any place not within the distance of ten miles from the said offices respectively, to the amount of one pound or upwards, an allowance of tenpence for every twenty shillings of the amount of the duties denoted by such stamps.

5. The duties by this Act granted on promissory notes made or purporting to be made out of the United Kingdom shall be denoted by adhesive stamps, to be provided by the Commissioners of Inland Revenue for the purpose, or by any stamps of sufficient amount which shall have been provided for denoting the duties on bills of exchange made out of the United Kingdom; and the proper adhesive stamp for denoting the duty on any such note shall be affixed thereon, and be cancelled at the same time and times, and in like manner as is provided by the 5th section of an Act passed in the 17th and 18th years of her present Majesty, chapter 83, and the 12th section of an Act passed in the present session, chapter 15, in the case of bills of exchange therein respectively mentioned, and under the like penalties respectively for any neglect thereof; and the said respective sections shall be read as if the same were inserted in this Act expressly in reference to the promissory notes aforesaid, and the duties by this Act granted thereon, as well as to the bills of exchange therein respectively mentioned.

6. The term "contract note," wherever the same is used in this Act, shall mean any note or memorandum mentioned or referred to under the head contract note in the schedule to this Act; and the term "insurance" shall mean also and shall include the term "assurance."

7. The stamp duty on contract notes may be denoted either by impressed or adhesive stamps, and the said Commissioners shall provide stamps of both descriptions; and in any case where a contract note is made, and the same is not written on an impressed stamp, there shall be affixed thereon a proper adhesive stamp; and every person who shall make or sign a contract note to which an adhesive stamp shall be affixed, shall effectually cancel and obliterate the stamp by writing upon or across it his name, or the name of his firm, or the initials thereof respectively, and by adding thereto the date of such cancelling, and so and in such manner that the said stamp cannot be used upon or for any other document or writing; and if any person shall make or sign any contract note by this Act chargeable with stamp duty without the same being duly stamped to denote the said duty, or shall refuse or neglect to cancel and obliterate as aforesaid any adhesive stamp affixed thereon, he shall forfeit the sum of 20*l*; and no charge for brokerage, commission, agency, or otherwise, made or to be made by any broker, agent, or other person in or about the sale or purchase mentioned or referred to in any contract note made or signed by him, shall be lawful unless such contract note shall be duly stamped, and the stamp thereon, if adhesive, properly cancelled.

8. Where any insurance in respect of which a policy or agreement is chargeable with stamp duty under this Act shall be renewed or continued on the payment of further premium or consideration, whether in pursuance of any stipulation in the policy or agreement or otherwise, a receipt for such further premium or consideration shall be given by the person who shall receive the same, and such receipt shall for the purpose of this Act be and be deemed the policy or agreement for such renewed or continued insurance and be chargeable with the duty by this Act granted; and if any person shall receive any money for premium or consideration for any such insurance, and shall not within a month make out and, if required, deliver a duly stamped policy or agreement in respect thereof; or in the case of a renewal or continuance of such insurance, shall not thereupon give such receipt as aforesaid duly stamped; or if any such person shall deliver or cause to be delivered any policy or agreement, or give or cause to be given any receipt not duly stamped, he shall forfeit the sum of 20*l*; and where the insurance shall be made, renewed, or continued by or for any society or company, the person who shall be a managing director, or the secretary or other principal officer thereof, at the time of the payment of any such premium or consideration, and of any such default or unlawful act being done or suffered as aforesaid, shall be held and deemed to be a person doing or suffering the default or unlawful act, and shall, as well as the society or company, and the members thereof who may by law be chargeable therewith, be subject and liable to the said penalty in respect thereof.

9. The duties hereby granted on instruments of insurance may be denoted by any adhesive stamps that the Commissioners of Inland Revenue may provide for the purpose, and in the meanwhile by any adhesive stamps provided by them not appropriated by name to any other instrument, as well as by impressed stamps, or by a combination of both impressed and adhesive stamps; and in any case where an adhesive stamp is issued it shall be cancelled by writing upon the stamp the name of the person or the society or company making the insurance, or the initials thereof, and the date of writing the same, and also any particulars relating to the insurance for which the stamp may be adapted; and in default thereof such person or society or company, and also the managing director, secretary, or other principal officer as aforesaid of any such society or company, shall forfeit the sum of 10*l*.

10. Whereas, it is expedient to reduce the stamp duty now chargeable on policies of insurance upon lives for small sums: be it enacted, in lieu of the stamp duty of 6d now payable upon or for or in respect of any policy of insurance or other instrument by whatever name the same shall be called, whereby any insurance shall be made upon any life or lives, or upon any event or contingency relating to or depending upon a life or

lives, where the sum insured shall not exceed 25*l*, there shall be charged and payable the stamp duty of 3d.

12. The stamp duty of 6d by the Act of the present session of Parliament, chapter 15, charged on an agreement under hand only may be denoted by an adhesive stamp in any case where the same is capable of being used under the terms and restrictions hereinafter mentioned; and the Commissioners of Inland Revenue shall provide stamps for the purpose; and whenever any such adhesive stamp shall be used, every party to the agreement who shall sign the same, shall also at the time of so signing write upon or cross the stamp his name and the date of the day and year of writing the same, so that the stamp may be appropriated to the instrument, and effectually cancelled and rendered incapable of being used for any other; and in default thereof the stamp shall be of no avail; and proof of the said writing upon or across the stamp, as hereby required, shall be a necessary part of the evidence of the agreement in any case where such agreement is not stamped with an impressed stamp.

13. Every writing or document entitling or intended to entitle any person to the delivery of any goods, wares, or merchandise lying in any dock, port, or warehouse, or upon any wharf, as in the said Act of the present session is mentioned, shall be deemed to be made and given upon a sale or transfer of the property in such goods, wares, or merchandise, unless the contrary shall be expressly stated therein by the person making or giving the same; and if any person shall untruly state, or by any word or words signify or cause or permit to be untruly stated or signified in any such writing or document that the same is not made or given upon a sale or transfer; or if any person shall himself or by his servant or other person procure or require the delivery of any of the goods, wares, or merchandise therein mentioned, knowing that the same contains any such untrue statement, every such person shall forfeit, over and above any other penalty to which he may be liable, the sum of 20*l*; but any such writing or document shall not, by reason of the same not being stamped, be invalid in the hands of the person having the custody of the goods, wares, and merchandise, and delivering out the same, unless such person shall be party or privy to the fraud thereby committed.

14. The stamp duty of 1d payable on any such writing or document as in the last preceding clause is mentioned shall, in the absence of any special agreement between the parties relating to it, be paid by the person requiring the writing or document; and it shall be lawful, in any such case, for the person of whom the writing or document is required to refuse to give the same until the amount of the stamp duty thereon be paid to him.

15. Whereas a practice prevails in relation to certain descriptions of goods, wares, and merchandise lying in docks and warehouses, and upon wharfs, for the company or person in whose custody the same may be to deliver to the owner thereof, in addition to a warrant evidencing the title to the property, a certain other document termed a weight-note, such document being intended to be delivered by or on behalf of the owner to the purchaser of the goods mentioned in the warrant upon any sale thereof before the completion of the contract for sale, but which other document as well as the warrant is chargeable with the duty of 3d under the head "dock warrant" in the schedule to the said Act of the present session; and it is expedient that the same should be exempted from the said duty: Be it therefore enacted, in any case where a document designated a warrant, chargeable with and duly stamped for denoting the payment of the said duty of 3d, and also a document termed a weight-note, or any other document of the like character or description relating only to the same goods, wares, or merchandise as are specified in the warrant, shall be issued by the company or person in whose custody the said goods, wares, or merchandise shall be, to the owner thereof or his broker or agent, the weight-note or other document aforesaid shall be exempt from the said duty of 3d.

16. The stamp duty of 1d by the said Act of the present session charged upon a certified copy or extract of or from any register of births, baptisms, marriages, deaths, or burials shall not be deemed to have been or to be payable upon any such copy or extract which is or shall be furnished by any clergyman, registrar, or other official person, pursuant to and for the purposes of any Act of Parliament, or to any general or superintending registrar under any general regulation, nor in any case where the person giving the copy or extract is not entitled to any fee or reward for the same.

17. No draft, or order, writing, or document for the payment or for entitling any person to the payment by or through any banker or person acting as a banker of any sum of money, such draft, order, writing or document being sent or delivered by the person making or giving the same to the banker or person acting as a banker by or through whom the payment is to be made, and not to the person to whom such payment is to be made, or to any person on his behalf, shall be chargeable or be deemed to have been chargeable with any higher stamp duty than 1d, notwithstanding the said payment shall be or have been thereby directed to be made at any time after the date thereof, which duty of 1d may be denoted by an adhesive stamp, to be cancelled as in the case of a draft or order on demand.

18. Where any draft or order for the payment of money by any banker or person acting as a banker, chargeable with the stamp duty of 1d, shall come to the hands of such person unstamped, it shall be lawful for him to affix thereto the necessary adhesive stamp, and to cancel the same in manner by law required, and upon so doing to make the payment thereby directed, and to charge the duty in account against the person who ought to have paid the same, or to deduct such duty from the sum so directed to be paid; and such draft or order shall, so far as relates to the stamp duty chargeable thereon, be good and valid; but this shall not relieve any person from the liability to the penalty he may have incurred by issuing the said draft or order unstamped.

19. Whereas by the 18th section of the Act passed in the 55th year of the reign of King George III., c. 184, the issuing of promissory notes payable to bearer on demand with printed dates therein is prohibited, and such prohibition is an unnecessary restriction: be it enacted, that the said section of the said last-mentioned Act shall be and is hereby repealed: provided always, that, notwithstanding anything in any Act of Parliament contained to the contrary, it shall be lawful for any person to draw upon his banker, who shall *bona fide* hold money to or for his use, any draft or order for the payment to the bearer or to order on demand, of any sum of money less than 20s.

20. Whereas by an Act passed in the 50th year of the reign of King George III., c. 41, every hawker, pedlar, and petty chapman, and other trading person going from town to town or to other men's houses, in England, Wales, or Berwick-upon-Tweed, is required to take out a licence as therein mentioned, and by an Act passed in the 55th year of the reign of the said King, chap. 71, such trading persons in Scotland are also required to take out a licence: be it enacted, that a licence taken out under either of the said Acts shall be sufficient to authorise the trading, according to the tenor of it, in any part of Great Britain, and shall be read as a licence granted under both of the said Acts.

22. It shall be lawful for any person in the service or employment of the Post Office, without any licence or any authority other than this Act, to carry about for sale and to sell at any place or places within the United Kingdom, postage stamps and printed forms of any kind issued from or used at the General Post Office, and any other matters and things relating to the business of the Post Office which are or may be authorised or permitted to be sold at any post office; and such person shall not be subject or liable to any penalty or forfeiture for so doing, anything in any Act or Acts to the contrary notwithstanding.

SCHEDULE referred to, containing the duties by this Act imposed.

	£	s	d
AWARD in England or Ireland, and Award or Diacreat Arbitral in Scotland:—			
Where the amount or value of the matter in dispute shall not exceed 50*l*.	0	2	6
And where it shall exceed 50*l* and not exceed 100*l*.	0	5	0
And where it shall exceed 100*l* and not exceed 200*l*.	0	10	0
And where it shall exceed 200*l* and not exceed 500*l*.	0	15	0
And where it shall exceed 500*l* and not exceed 750*l*.	1	0	0
And where it shall exceed 750*l* and not exceed 1,000*l*.	1	5	0
And where it shall exceed 1,000*l*, and also in all other cases not above provided for.	1	15	0
CONTRACT NOTE.—Any note, memorandum, or writing, commonly called a contract note, or by whatever name the same may be designated, for or relating to the sale or purchase of any Government or other public stocks, funds, or securities, or any stocks, funds, or securities, or share or shares of or in any joint stock or other public company, to the amount or value of 5*l* or upwards.	0	0	1
LEASE.—Any assignment or surrender of a lease or tack for a term of years exceeding thirty-five, upon any other occasion than a sale or mortgage.	A duty equal to the ad valorem duty with which a similar lease or tack would be chargeable, but no higher duty than 1*l* 15s shall be charged.		
POLICY OF ASSURANCE or Insurance, by whatever name the same shall be called, whereby any sum of money shall be assured, or agreed to be paid only upon the death of any person, from or by reason of any cause incident to or consequent upon travelling, whether by land or water, or any accident or external violence, or any cause whatever other than a natural cause; or whereby any compensation shall be assured or agreed to be made or paid for personal injury received from any cause whatever; or whereby both a sum of money upon death and a compensation for personal injury as aforesaid shall be assured and agreed to be paid, or whereby any assurance or insurance shall be made upon glass from loss or damage of any kind except by fire,			
Where the premium or consideration for such assurance, insurance, or agreement shall not exceed two shillings and sixpence	0	0	1
And where the same shall exceed two shillings and sixpence and shall not exceed five shillings	0	0	3
And where the same shall exceed five shillings, then for every five shillings and also for every fractional part of five shillings	0	0	3
PROMISSORY NOTE made in the United Kingdom for the payment of any sum of money exceeding 4,000*l*, For every 1,000*l* or part of 1,000*l* of the money thereby made payable	0	10	0
FOREIGN PROMISSORY NOTE made or purporting to be made out of the United Kingdom for the payment within the United Kingdom of any sum of money	The same duty as on an inland bill of exchange for the payment otherwise than on demand of money of the same amount.		

Agriculture.

THE FARMERS' PROSPECT AND THE PEOPLE'S.

SINCE our last the weather has continued of the same character as heretofore during the present season. Until Thursday last there has been no day or night without some rain, and generally very heavy rain. During last week there were three days of thorough downright rain, and two others which in ordinary seasons would have been designated as wet days. In the present week the rain has partaken more of the character of thunder rain; storms, often of several hours' duration, have occurred at intervals of little more than twelve hours, by which the sodden earth has been converted into veritable quagmires. There is still some hay in the fields, and farmers have slowly and reluctantly begun to cut both wheat and oats. Some grain even has been carted, but its condition must be so bad that it would have been better to have let it remain in the field in the

hope of better weather. For the last few days there has been some increase of temperature, and farmers hope from that circumstance, as well as the more fitful nature of the rain, that a period of drying weather is approaching. On Thursday last a strong drying wind sprang up, and on Friday there was a good breeze with sunshine. In France it has been dry for nearly a week, and the later harvest there has been more favourable. The only favourable circumstance for the farmer in this miserable summer has been the wonderful backwardness of all the grain and pulse crops. Had the crops ripened about the usual time, with such weather as we have had during the last part of July and throughout August, they must have been spoiled in the gathering; but now, except in the most forward districts, there is very little wheat fit to cut, while the oats in many cases are still quite green. This gives another chance for getting in our crops in a fine autumn, should such a happy change occur. At present we have not observed or heard of any sprouted grain, which again is due to the backwardness of the crops. Unless the weather take up and become decidedly dry, there will be very little corn fit to be thrashed until it has stood for some time in stack, and the main reliance of the consuming public must be upon foreign importations. The rise of 5*s* per quarter on wheat, which occurred from the 20th to the 27th of August, sufficiently proves the necessity for such importations; and thanks to the fine crops in America and Southern Russia, our demands are likely to be well supplied.

To our weaker farmers, who usually thrash out a considerable portion of their wheat before Christmas, the present season is likely to be a very trying one, and not a few landlords will find the Michaelmas rents less punctually paid than they have been of late years. One consequence of the late harvest must be that a smaller breadth of wheat than usual will be sown this autumn, so that in all probability the untoward weather of the present year may affect our next year's prices. Then, we may fairly calculate of the next few years being more stormy and broken than we have been accustomed to during the seven years preceding the present; for all experience has shown that dry and wet years occur in cycles, and prior to this year there were seven seasons with less, in several years considerably less moisture than the average.

One point should be strenuously pressed on farmers, viz., not to be in a hurry. Except on the most forward soils, the wheat can yet stand well for some time, and even when it is cut, the mistake of carrying it too soon is that most commonly made in a wet season. It is now almost certain that the failure of the potato crop is greater than in any year since 1847. The root crops are full of weeds in most cases, and where tolerably clean, they cannot grow for want of sun and from excess of moisture. At present the farmer's chief hope is a dry autumn; without it, his position will indeed be serious.

AGRICULTURAL PATRONAGE AND PROGRESS.

Not long since—in July last—a party met at the London Tavern to celebrate by a dinner the opening festival of the "Agricultural Benevolent Institution," a charity "for the relief of farmers, their widows and orphans." Mr Mechi, the originator of the scheme, in responding to the toast of his health, said:—"The farmers of Great Britain paid 50,000,000*l* a year as rent to their landlords, and the land they cultivated was worth in the market 28 years' purchase. How was it that agriculture stood alone in possessing no charity for the benefit of those who followed its pursuits? While attending the anniversary festivals of charitable institutions for the trades of butchers, fishmongers, and many other callings—for there was hardly one which had not a charity connected with it—he had often asked himself why it was that the most powerful and perhaps the richest interest in England, that of agriculture, had no institution for the relief of distressed persons connected with it." The result of these reflections was that Mr Mechi determined to promote such a charitable institution, and availing himself of the facilities afforded by railways and the penny post, had succeeded in obtaining donations to the amount of 4,000*l* in furtherance of his object. That sum was for the most part given by great landed proprietors and implement makers, but little being supplied by farmers. Without wishing to check the benevolent purposes of those who believe they can advance the well-being of the class of farmers by supporting such a charity, we may venture to express strong doubts whether such a scheme is calculated to benefit farmers or their connections. It is not charity but justice farmers require. A fair field and no favour will be a far safer reliance than contingent relief from an eleemosynary dole. But we need not go beyond the report of this very meeting for testimony that the farmers labour under difficulties the removal of which are comparatively easy, and which injure and impede them to an extent almost incalculable. Let men, who like Mr Mechi are in earnest, and who have moral courage to state truths not always pleasant to the great proprietors, assist in emancipating farmers from such trammels rather than waste their efforts in attempts to establish mere charities.

Mr C. W. Hoskyns was the chairman,—the originally intended chairman, the Duke of Richmond, being ill, and Earl Spencer busy,—and in that capacity took up the position that there had been no prior charitable institution for the succour of decayed farmers. Mr Hoskyns, as we all know, is in the habit of looking somewhat beneath the surface of things agricultural, and in considering "the peculiar elements in the life of the farmer which made him liable to failure or misfortune," remarked that, apart from accidents and losses which all are liable to, "there is the fact that land is in this country somewhat peculiarly situated, and that its singular position greatly influences the destinies of those who devote their lives to the pursuits of agriculture.....Nearly the whole of the soil [of this country] belongs to a few great proprietors, and to the many other disadvantages to which the farmer is subjected, is *added that of great uncertainty of tenure*. The law [and he might have said still more the custom] of primogeniture tends to put the land in few hands, and with this is combined the difficulty and expense which accompanied the transfer of land from one person to another." He referred to the disappearance of "the substantial yeoman of former days—the men who owned the land they cultivated—and the substitution for them of those who merely cultivated what belongs to another. The land is now almost universally cultivated by those who are mere vicarious possessors of it and not real owners. The position of a tenant is, to a certain extent, that of a hireling; the products of the time and money which he invests in the improvement of the soil *are more or less at the mercy of another person*; and let gentlemen who are familiar with the ordinary course of business in London, say what it must be to invest capital and feel that it is not under their own control." Here we find a gentleman well versed in the affairs of agriculture, himself a landed proprietor, placing his recommendation of a charity for the relief of decayed farmers, their widows and families, upon the precarious nature of the tenures on which they hold their farms, and the absence of any sufficient security for the capital they invest in the cultivation or improvement of other people's land. But is this an inevitable incident to the business of a tenant-farmer? Must farming continue to be a trebly hazardous business until we go back to substantial yeomen, the occupiers of their own land? Mr Hoskyns wisely said "he should certainly be glad to see the soil of England more widely distributed and capable of being purchased with greater facility. He should like to see many a farmer owning his 100, 200, or 300 acres, so that he would not be entirely subject to the will of another." But "as that is not the case, and there does not seem to be much prospect of its being the case at present," let all be done that can be done to prevent poverty "overwhelming those who nobly did their duty in the cultivation of the soil."

We agree with Mr Hoskyns that the custom which prevails in this country of accumulating vast masses of land in the hands of individuals, is an evil which lies at the root of all the impediments to agricultural progress, and to the safe and profitable prosecution of the business of husbandry. Although the possessor of a vast territory may be wealthy, his land is seldom, we may say never, so much improved as it ought to be if his simple object were to obtain the greatest possible amount of income from a given area. Indeed such improvements would absorb too large a portion of the proprietor's income to enable him to sustain the position and expenditure usual with his class. Then if a large estate is to be improved, the only alternative is that the farms should be leased to tenants of capital on such terms as will induce them to effect the necessary improvements. We hope ere long to see such an improvement in the law as will render land easily and cheaply transferable, one effect of which would be that it would be purchased more frequently as a mode of investment by capitalists who have no wish or intention to subside into mere landowners. If land could be bought without a long and expensive investigation of title, and sold without the cost and hazard of such an investigation, there is no reason why many persons should not buy land who now only invest in it on mortgage or other securities. Under such circumstances, the purchaser, having no secondary object, would generally be able to secure a better interest for his money than he can do by investing upon mortgage, with a great probability that, should he wish to sell, he would obtain more than his original outlay. But this must be effected in a business-like way. It will not do to buy a farm, make no landlord's outlay, and merely let it to a yearly tenant, who may or may not be a man of capital, but who with such a tenure will certainly effect no considerable or permanent improvements. A farm, however, requiring improvement will generally pay a purchaser best, provided he has the means of improving it, and then, having let the farm to a tenant of competent skill and capital for a long term of years, it will generally be found, should a future sale be necessary, that the property had advanced in value.

There is, indeed, no reason why the proprietor of a large estate, who has not been restrained by the terms of the settlement under which he holds from granting long and rational leases, should not so deal with his farms as to give perfect security to tenant-farmers, but in fact from custom or prejudice, from anxiety for political influence, from a passion for game preserving, or from some other motive foreign to land considered as property,—income-producing property,—the owner of a large estate very seldom makes such contracts with his tenants as to place them on a par, as regards security and opportunity for enterprise, with men of equal capital engaged in any other business. There is no doubt that landowners might greatly increase their incomes by judicious management, and at the same time improve the condition of their tenants, but to do so, they must cast to the winds all notions of game preserving or vote influencing. And with the various oppor-

tunities now open in foreign and colonial trade, and for farming as an owner in Australia or North America, we believe that landowners will find that neither the patronage of farmers nor of farmers' charities will much longer induce the younger and more intelligent farmers to continue the thriftless avocation of yearly-tenant farmers.

Literature.

PATRIOTS AND FILIBUSTERS; or, Incidents of Political and Exploratory Travel. By LAURENCE OLIPHANT, Author of "Lord Elgin's Mission in China and Japan," &c. Blackwood and Sons.

MR OLIPHANT'S books will always be read with pleasure, and they generally deserve to be read attentively. Their lively, agreeable style, free from flippancy or other offences against good taste which are apt to make lively writing too often the heaviest reading, sets off the incidents and descriptions of the narrative to the best advantage. Solid qualities also lie beneath a pleasant outside, and the ready wit of the author is not more apparent than his right feeling, good sense, and liberality of mind.

The reprints from "Blackwood" that fill the small volume with the fanciful title before us are slight compared with most of their writer's former works; but if slight, they are not superficial. Grave questions of permanent interest are interwoven with the passing details of amusing personal adventures in one or two of the more out of the way corners of the old and new worlds. Of the two, we prefer Mr Oliphant's reminiscences of patriots in the old, to those of filibusters in the new world. This may be partly owing to the fact that circumstances gave him peculiar facilities for "exploratory travel" in the Caucasus by opening to him ground never before trodden by English feet; while Nicaragua and Panama can claim no such exemption from the tourist's note-book, and even the curious "bayons" of the Mississippi, if less traversed, have been already well described before they came under Mr Oliphant's vivid pencil. There is, besides, a strong attraction in the scene of any long-continued and gallant struggle between a scanty mountain people and their relentless pursuers, whether on the Alps, the Black Mountain, or the Caucasus; and, irrespective of any side glance at the probable designs of Russia, we shall see with regret the country of the freedom-loving Circassians added as one morsel more to the slowly enlarging bulk of All the Russias.

That there is an ulterior aim in the steady determination Russia has shown to possess herself of these mountains, cannot be doubted by any thoughtful looker-on. As an acquisition of territory their value will not be worth the cost of their acquirement; but as an obstacle removed from Russia's onward movements South of the Caspian Sea, their value is in proportion to the desire she may have for progress in that direction. On this subject Mr Oliphant has much to say, and much to the point. We may, perhaps, touch upon his views and arguments when we have given a hasty notice of the tour that introduces them.

In the autumn of 1854 the demolition of the line of forts by which Russia had long held their country in a state of blockade, and the new-born hopes, soon to be checked, of effective assistance against their enemy from the allied Powers, raised in the Circassians so "lively a sense of favours to come," that Franks were received with unwonted *empressement*, and the interior opened to their inspection as it had never been before, nor could have been while Russian soldiers guarded every entrance to the sea-coast. The regions of which we have hitherto dimly heard, through the one-sided accounts of escaped prisoners, have been ridden over by free and very observing Englishmen; and we have gained a truer and more distinct, if not a very extensive knowledge of their appearance and inhabitants.

A party was hastily got up among some English gentlemen whom the events in the Crimea had brought to the Eastern shores of the Black Sea, in order to visit the interior, and call on their road upon Prince Michael, the son of Schamyl, and the successor to his dignity, but not to his authority over the minds of his subjects.

Our readers will not need to be reminded that Prince Michael is in the Russian interest and a convert to the Greek Church. Early in life he fell into the hands of Russia, was educated at St Petersburg, treated with every courtesy that could attach him to his gaolers, and finally, when his presence among his father's tribe was thought more likely to promote the cause of Russia than his longer detention as a hostage, exchanged for some Russian prisoners of high rank who had been carried off in one of the sudden raids of Schamyl's followers into the lowlands. After his father's capture, "it was hoped that the troops of the Czar, supported by the powerful influence of Prince Michael, would eventually lead to the subjugation of those wild mountaineers who professed to own allegiance to their Prince, and to the annexation of the entire province to the Muscovite Empire. That anticipation had not been realised when the war broke out. Notwithstanding the exertions of Prince Michael in favour of Russia, his subjects could not be induced to relinquish that independence which he, perhaps compelled by the force of circumstances, had already forfeited."

The scenery through which the travellers rode to reach the Prince's residence was, says our author, "probably unequalled in the world." We are pretty well used to such phrases—many scenes in various countries having been pronounced unequalled in the world by the delighted traveller who gazed upon them; still the Caucasian valleys do appear to have peculiar beauties. After riding for some time through a noble forest of beeches and limes "whose widely-spreading branches had been turned by the villagers into a novel kind of granary, where the golden hue of the maize, gleaming out from under green leaves at a height of twenty or thirty feet above the ground, produced a most singular and uncommon effect," they reached Prince Michael's house, a massive building of stone and wood, showing in its cheerless interior no traces of the education of its master among the luxuries of a capital city. Some chairs and a spittoon were the only articles of furniture visible. The beauty of the view from the windows, however, made our author forget the discomforts of the rooms. On every side there stretched away below him a country as undulating and rich in fine trees as any park in England; this, swelling gradually into bolder hills, became clothed with heavier forests, till it ended abruptly in the "cleft gorges" and "gloomy recesses" of the "frosty Caucasus." After leaving the Prince's mansion, the real difficulties and novelties of their journey began.

Mr Oliphant's descriptions of the misadventures of the road are amusing; amusing too is the account of the ways and means of existence in a thinly-peopled and savage but hospitable region. As if to prove that *les extremes se touchent*, our travellers found the customs of fashionable life carried out in these wild places to a degree inconvenient even to fashionable stomachs. The hurried lunch at two was seldom followed up by the more important meal till ten or eleven. "Numerous coverlets and quilts of soft and luxurious texture, and downy cushions spread" before blazing fires, could not make the tired travellers forget their hunger, appeased at length and more than appeased by the sheep whose capture, slaughter, and boiling entire, had been the employment of the household since they entered it. Once in a more than usually desperate condition of hunger they ventured, contrary to their guide's advice, to beg that something less than a sheep might be sacrificed. The request was unfortunate; their host was rather poor; he said nothing, but, looking displeased, left the room. "A few minutes after he returned, and, with a grin of triumph, informed us that, in revenge for the serious reflection we had cast upon his hospitality, he had ordered a bullock, instead of a sheep, to be killed for our benefit. It was already nearly eight o'clock, we had had nothing to eat since breakfast, and during the interval had been sustaining almost without intermission the most severe exercise. This announcement, then, was received with a murmur of profound despair, and we flung ourselves on our quilts in a state of sullen discontent."

The journey of the preceding day had been the most dangerous and difficult of all their wanderings; and the first part of the road which, refreshed by the Homeric repast of the night before, they entered upon with renewed spirit was not much less difficult; but the valley of Tecumseh, into which they at length succeeded in scrambling, repaid them by its rare beauty.

> Surely nature has lavished an undue share of her gifts upon the lovely valley of Tecumseh. Never was there such a combination of the sublime and the beautiful. As we followed its course, we seemed to pass from one to the other: we left behind us the snowy peaks and journeyed onward towards gently-swelling hills; issuing from deep narrow gorges re-echoing with the hoarse murmur of flooded torrents, we entered silent peaceful dells, where tiny rills trickled between moss-grown stones; and passed from forests of grand majestic trees, dark and gloomy, into summer gardens of wild flowers, bright and cheerful; and so on through green meadows and orchards of fruitful trees, where branches of purple grapes hung side by side with walnuts or chesnuts, as the tree was covered by the tenacious creeper, and apples and figs presented themselves temptingly to our grasp, and half-ripe medlars suggested the idea of a second visit.

Soon after passing through this valley, the sea-shore was again reached, and the tour ended with a patriotic attack by the Circassian guides upon a degenerate lowlander who confessed to his Russian leanings. We confess to very little compassion for his misfortunes; the seven monthly roubles of Russian pay will doubtless make up to one of his kind for his fellow-countrymen's hatred and blows.

The fact that Russia subsidises the peasantry whom she lures over to herself, and employs them as decoys for their neighbours, speaks volumes of her underhand and crafty policy. Yet it is Mr Oliphant's impression that she will never succeed in reducing the mountain tribes to her rule, but that "they will either emigrate *en masse*, or become exterminated as a race, savage, but free to the end."

The two closing chapters are given to a consideration of the plan of policy that has since the time of Peter the Great been steadily pursued by Russia. Disintegration and absorption, slow, quiet, but sure, have been always preferred to more open measures. Disorders break out in some neighbouring State:—how is Russia answerable for her neighbour's quarrels? Yet, as she is strangely enough always appealed to by one or the other party, she will interfere for the sake of peace, or for the protection of the oppressed. The protection of a powerful neighbour is not readily got rid of—the grasp tightens, the rolling fence of the Russian boundaries encircles the prey, and no more quarrels are heard of henceforth.

It is only when conciliation and a wily policy utterly fail, that recourse is had to open force, as in the present case, in order that the "effective movement of the frontier line," to use a Russian phrase, may not come to a premature end, before it reaches that other "and more important country" at which Mr Oliphant believes she aims. A few sentences from the conclusion of the first portion of his volume will explain his opinions, and the results of his reflections :—"The conclusion, then, to which our consideration of the present state of the acquired provinces in Asia has brought us, seems to be, that they have been acquired only as a necessary prelude to the annexation of another and more important country ;—that notwithstanding the judicious treatment of the Kirghiz, their internal condition is by no means satisfactory, while the natural obstacles which their country presents to the transport of troops are almost insurmountable ;—that even if the conquest of Khiva were achieved, it would be dangerous only to the British possessions in the East indirectly, or through the influence thus exercised upon Persia ;—that this influence can only exist so long as the Russian arms in Armenia are successful :—that, in fact, the extension of the frontier line of Russia to the East of the Caspian must be regulated entirely by its progress to the West of that sea ;—and that by transferring the war from the Crimea to the Transcaucasian Provinces, and preserving Circassian independence, it would have been in the power of this country during the last war to have checked that progress at once, and thus nipped in the bud her long-cherished designs upon Persia, and her deeply-laid schemes for the appropriation of those sources of wealth and power in the East, which have so materially contributed to raise this country to her present high position among European nations."

THE NEWSPAPER PRESS OF THE PRESENT DAY: its Birth and Growth throughout the United Kingdom and British Islands, from 1665, including the Young Cheap Press and the Metropolitan and Suburban District Papers, 1860. London: Saunders and Otley. 1860.

A WORK on such a subject as this must derive its usefulness either from the accuracy and completeness of its statistics, or from its historical and descriptive sketches of facts. The anonymous author of the pamphlet before us can scarcely be said to excel in either of these departments. His descriptions are mostly borrowed (with due acknowledgment, however,) from Andrews's "History of British Journalism," and the "North British" and "British Quarterly" Reviews. His statistics are open to criticism in several directions. That he does not put forth his list of journals as exhaustive, we are warned from the beginning; but few readers would be prepared for the omission, in a classified list of British newspapers, of the great London political journals—the *Times* (!), *Daily News*, *Globe*, *Dispatch*, &c. Of the mixed political and literary London journals, also, there is no distinct mention ; the *Examiner* and *Spectator* are never named throughout. In the enumeration of the provincial papers, the only ones specified are the very old journals still extant, and a few of those which have been started since the abolition of the penny stamp; so that we miss many well-known names, such as the *Cheltenham Examiner*, *Gateshead Observer*, *Alliance News*, &c. Then there are omissions in the list of London "class or representative journals." In enumerating the theological journals, he stops at the *Jewish Chronicle*, and omits the *Reasoner*, the duly registered organ of the Secularists. Among suburban papers we miss the *Enfield Observer*. Of Newcastle-on-Tyne we are told that it has "*a* daily penny paper." Of the newspapers issued in the Channel Isles, we are only told the number belonging to each island, no names whatever being given. All these things will show that the pamphlet is but a hasty compilation. The author says that it "is the outline of a plan for the publication of one of larger dimensions," which will, we hope, be better devised and more carefully completed than the present work.

THE FIRST BORN ; or, A Mother's Trials. By the Author of "My Lady." Smith, Elder, and Co., 65 Cornhill.

THE second novel is in most cases a fair touchstone of its writer's claim to a permanent place in the ranks of novelists. The first may owe its success to many causes that will not equally operate on those that follow it. If the success is a merited one even, and the novel both good and original, it does not necessarily imply that its author possesses that fertility and breadth of imagination, that insight into the deeper springs of character, that will be needful to sustain the vigour and truthfulness of his future writings. In some cases a first work is the fruit of a deep personal experience, perhaps suffering, that finds its relief in outward expression under the safe disguise of fiction; no other can then possess the peculiar power, as none can have the inspiration of the first. In other cases an immediate popularity is won by a keen perception and humorous description of the more superficial varieties of human life and character ; but this sort of brilliant cleverness, if it has not its root in any deeper view into the natures with which it deals, soon degenerates into caricature, or runs into wearisome self-repetitions. Other minds, again, are not naturally fertile ; they exhaust their powers of invention and expression in one well-finished work ; and without long rest and careful cultivation they are incapable of producing more. If urged on by a desire of following up a prosperous beginning, they reap a hasty after-crop scarcely worth the ingathering.

This ast is, we fancy, the case with the novel before us. Whether the rest of a longer fallow-time would have enabled its writer to produce anything better we cannot say ; but it is certain that the two years that have passed since the publication of "My Lady" has not been long enough ; and we regret that the measure of praise that we gave to that first novel, and the hopes we expressed for the future, cannot be accorded to, and have been so far from realised in, its successor. Both the merits and faults of "My Lady" were such as to encourage hopes. A want of concentration in the interest, of care in the weaving of the plot, of wholeness in the story,—these are its chief defects; they are such as added experience, diligent study, and greater care in composition might be expected, in some degree at least, to remedy ; while the character of "My Lady," healthy, natural, graceful, a fair type of matronhood, yet marked out by too many little individual traits to appear a mere type, was calculated to raise our hopes of one who could so well imagine, and so delicately paint it. We seek in vain through "The First Born" for one character worthy to stand by its side. They are, with one exception, on a dull level of mediocrity, and this exception, if a more original, is not a more happy exercise of the author's inventive powers.

The style of the earlier tale, simple, unaffected, and pleasant, seldom careless if seldom powerful or effective, degenerates in this one into downright slovenliness. What else can we call such passages as these? Their writer must be either over-confident in her own powers, and of her place in public esteem, or else careless of her future name while reaping an immediate profit from that which she has already gained.

"Leaving London a week sooner than they had intended, left the Rookly family but a few days more in town."

Again, here is a sentence which has no grammar or construction whatever :—

"He might have replied angrily or contemptuously, as was most likely, but for something overwhelming which came in that pause of his, at the gallop of an express to the cottage, and with anxious haste to the door of the dressing room, in which he talked with his wife—Mr Crawford's own man from town, with a telegraphic message which had suddenly arrived for him at his chambers."

If the style is slipshod, the story is no less so. It is founded in the first place upon an improbable incident—the desertion by a man who is by no means villanous though unamiable, who is sprung from a family jealous of their honour, and who occupies himself a respectable station in life, of his infant daughter in order to avoid the importunities of his creditors. We submit that such a man would not for his own sake drag away his wife in the way described in this tale, or leave his name and his child to the gossip and scorn of a German watering place. The first chapters are improbable, the succeeding ones are tedious. A chronicle of petty tyranny and passive submission is not nice reading for three volumes, yet even this is preferable to the excitement of the conclusion. The deserted daughter is known to be alive and in England; her father thinks it probable that she resembles her mother; his son in a fit of filial devotion declares he will seek for a wife like his mother, and the victim's punishment begins, his time is come, the selfish man's "sin has found him out." He is terrified and driven to the very verge of madness by the fear lest this unknown sister should cross his son's path. She does so, and fully as much is made of this disagreeable source of excitement as the subject can well bear, before, by one of those happy turns that novel-writers can always command, all is made right. The father is at once reduced to a proper state of penitence, and the weak-minded but ill-used wife is restored to her child, and finds rest from "a mother's trials."

THOUGHTS IN AID OF FAITH, gathered chiefly from Recent Works in Theology and Philosophy. By SARA S. HENNELL. London: Manwaring. 1860.

THE aim of this work is thus described by the author in the Introduction :—

There seems to me so wonderful a promise in the direction of modern scientific speculation, beginning as it is to bear steadily upon the great questions of religious faith and hope, that when I listen to the frequent tone of despondency regarding them, I cannot but earnestly desire at least to point towards the sources in which that promise has appeared to me to reveal itself. In reviewing the growth of my own convictions, which have circled around the study of a small number of books, it seems to me that I may be able, by the tracing out of the principles derived from them, to show that leading towards a general combination that has brought delight to myself.

The works which Miss Hennell proceeds to pass in review are, the "Inquiry into the Origin of Christianity," by her brother, the late Charles Hennell; Feuerbach's "Essence of Christianity"; Herbert Spencer's "Principles of Psychology"; Lewes's "Biographical History of Philosophy"; Buckle's "History of Civilization"; and Spencer's "Social Statics." She does not accept this series of works as exhaustive or faultless (and to Lewes and Buckle she enters a few special objections), but the substance of her own thought is derived from them, especially from Feuerbach and Spencer. She emphatically accepts the theory of the former, that, instead of man being the creation of a real and Personal God, the

"idea of God" is the creation of the idealising instincts of man: but to this she adds the following corollaries:—

If our superstitious imagery reared the theory [of God's existence], the theory has given to our nature its religiousness; stamped and sealed upon our constitution by that lovisible and inconceivable Spirit of Nature, which tries, as it originated, all our works. Under the guidance, as by the impulse, of that Unknown Power, we now see it was that our minds have been instinctively building up their beautiful faith; in this sense, a Divine Work after all..... A Religion is left to us, as true a thing as our perception of the light of the sun;....a trust in the general ordering of things towards good, founded upon the conviction of the stability and happiness-producing power revealed in the past. (Pp. 198-9.)

These thoughts, applied in a variety of ways, give the colour to Miss Hennell's system. For those who have already adopted the premises from which she sets out, her work may, perhaps, be not inaccurately described as "in aid of Faith." But to all other readers, it will be more notable for the negations involved in the premises, than for the ideality pervading the conclusions. Indeed, there is this manifest inconsistency between the two, that while her Pantheism frequently touches the dreariest extremes of Atheism, at other times (as in the preceding extract) it plainly implies one of the first principles of Theism; an inconsistency which it is perhaps impossible for Pantheism to avoid, but which it seems strange that Pantheists should not perceive.

We should add that the style of this book is not felicitous, the language being very involved, and the meaning frequently obscure, as though the writer were struggling with a tide of rushing thoughts. But with whatever drawbacks, the book is marked by earnestness and individuality, and is worth noting as a sign of the times.

Camp Life: or Passages from the Story of a Contingent. By Lascelles Wraxall, Author of "The Armies of Europe," &c. London: C. J. Skeet. 1860.

Captain Lascelles Wraxall belongs to a class of writers whose numbers and prolificness are a blessing to weekly magazines, and an astonishment to more laborious authors. These gentlemen write with ease and fluency, if they do not write well; it is their aim to be emphatically "readable;" and, if they attain this object, they are indifferent to the probability of being read a second time, and do not aspire to durability of reputation. The volume before us is a favourable specimen of the productions of this school. It relates to a portion of recent history concerning which Englishmen have much curiosity and little information; and if it adds nothing to our stock of knowledge concerning the events of the Crimean war, it does justify its title by giving us, in hasty and careless sketches, a somewhat more lively idea of "Camp Life" than most of us enjoy. Not that the author shared the labours or the miseries of the troops actually engaged in the trenches, and quartered in the wretched wooden huts—"a cross between a barn and a cowhouse, with walls like the floor of the Crystal Palace"—which formed the English camp before Sebastopol. The Turkish contingent, to which he belonged, was quartered at Kertch, and Captain Wraxall had at least a good roof over his head while waiting there for an enemy who never came. Perhaps his little volume is all the more lively for his exemption from evils too serious to be treated in the style that suits him best.

It would be difficult, and is not necessary, to give a connected account of the series of disjointed sketches which embody the most amusing parts of the Captain's Crimean experiences. Suffice it to say that very amusing some of them are, and that we have not lately met with anything more suited to while awny a few hours in an express train, for which time and manner of reading it seems to have been written. Nor are there any portions sufficiently striking to merit extraction. "Camp Life" certainly displays a good deal of practice in the art of book-making; but it is amusing and readable, and scarcely pretends to be more.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

This is the season at which the Councils General of Departments meet. The session of these bodies this year will probably be of more than usual importance, as many of them will no doubt discuss the commercial treaty with England and the tariff reforms effected or contemplated by the Government. On these matters we may hope that M. Michel Chevalier will have something to say in his Council,—that of the Herault, a department, by the way, which, being a large wine-producing one, is much interested in the treaty. Some of the Councils have already assembled, and among them those of the Bouches du Rhone (Marseilles) and the Nord (Lille). In the former it appears the President, M. de Chanterac, spoke warmly in favour of the recent commercial reforms; and in the latter, M. Mimerel, the unfortunate and discomfited champion of prohibition and protection, delivered a discourse which, to judge from the one single sentence of it produced in the newspapers, was anything but wise:—"The Emperor himself has authorised me to tell you that he will always protect the labour *and the wages* of our workmen." Surely, however, His Majesty can have given no such assurance—at least in the sense which M. Mimerel attaches to it.

The Superior Council of Commerce has at last, after three months and a-half of arduous labour, concluded its examination of the representatives of the different branches of manufactures which will be affected by the treaty of commerce. In its last sittings it heard the makers of porcelain and pottery (who were very pressing in their demands for protection against English competition), of glass and crystal, of caoutchouc articles, ready-made clothing, chemical productions, leather gloves, and finally it examined carriage-builders and ship-builders. The Council will now have to proceed to what will perhaps be the most difficult part of its task—the fixing within the limits laid down in the treaty of the duties to be imposed on the different articles of British production imported into this country. Let us hope that in this grave matter it will display a liberal spirit, as otherwise the practical value of the treaty will be small indeed.

The suspension of the sliding scale as regards the importation of grain and flour is generally approved of; but regret is expressed that as regards exportation it has not been suspended also. It is certainly unfair to subject farmers to foreign competition, without giving them access to the foreign market. The argument that to allow exports would counterbalance the advantage expected from the substitution of a small fixed duty for a sliding scale on imports, is untenable in theory, and has, on other occasions, been proved to be untrue in practice.

A statistical return respecting French railways gives these results:—The total length worked on the 30th of June last was 9,138 kilometres (5,711 miles), and at the corresponding date of last year it was 8,837 kilometres (5,523 miles). The total receipts in the first half of the present year were 185,982,078f, and in the corresponding period of last year 180,773,952f. French railways are now, it is known, divided into the "old net-work" and the "new net-work"; and the reason of this is that the Government guarantees an interest of rather more than 4½ per cent. on the latter, but gives no guarantee to the former. The following is a detailed account of the length and receipts of each line in the two categories:—

	Length.			Total Receipts.		Difference.	
	Total worked on June 30, 1860.	Average worked in the half-year.	Total worked on June 30, 1859.	Six Months of 1860.	Six Months of 1859.	1860 Plus.	1859 Plus.

* The kilometre is ⅝ths of a mile.

A vigorous effort has at last been made by certain eminent capitalists to give vitality to the famous enterprise of the "Docks" of Paris, which has occasioned so many scandals. An Imperial decree authorises the transformation of the affair into a *compagnie anonyme*, under the name of "Compagnie des Entrepots et Magasins Generaux de Paris," and a new company has been formed with a capital of 25,000,000f, divided into 25,000 shares—one of which is to be given for every eight of the old shares.

M. Mires' "Société de l'Eclairage au Gaz et des hauts Fourneaux et Fonderies de Marseille et des Mines de Portes et Sénéchas,"

has also, after a long delay, been sanctioned as a *compagnie anonyme.*

On the subject of the establishment of postal communications between this country and Asia, referred to in my last, the Bordeaux journals announce that some steamers which the Messageries Imperiales Company had prepared to ply between Marseilles and Brazil are to be employed to establish regular communication between Suez and China (Shanghai.) The Messageries will consequently only keep up a monthly communication with Brazil from Bordeaux, instead of twice a month,—once from that port, once from Marseilles, as was intended. The Bordeaux papers, however, say that this arrangement will probably not come into effect for a year. They state also that there is once again "a question" of establishing regular steam communication between this country and the West Indies and New York; but there has been a "question" of the same thing for so many years past, that the man must be sanguine indeed who hopes to see it realised.

An Imperial decree enacts that the projected railway from Toulon to Nice shall be increased by a section from the Var to the town, and that in consequence the guarantee shall be for 66,000,000f of the capital, instead of 60,000,000f as previously fixed.

The Algerian Railway Company require the payment of 75f per share between the 1st and 5th September, so as to make up the first call of 125f.

An important piece of news to paper-makers comes in today by telegraph from Madrid:—a reduction of almost one-half in the import duties on foreign paper for printing has been decreed.

Business on the Bourse during the week has been devoid of animation. The following are the quotations:—

The following is an account of the markets:—

Flour, at *Paris*, owing to the decree suspending the sliding scale on importations, has undergone a marked decline. Yesterday, the sack of 159 kilogs was 61f to 65f; four marks in the early part of the day were at 63f for September and October, and subsequently at 62f; for longer dates at 62f 50c to 63f.

Wheat, for the reason above given, has also declined at *Paris*, the quotation yesterday having been 36f to 39f the sack of 120 kilogs, according to quality. As regards the provincial markets, on the contrary, not fewer than 90 present a rise, whilst in only 29 has there been a fall. The rise varies from 20c to 3f 28c the hectolitre; the fall from 20c to 2f 25c. In 23 markets there has been no change.

Cotton.—At *Havre*, in the week ending Friday, the sales were 7,383 bales, and the arrivals 2,524. Low New Orleans rose 1f—that is to 82f the 50 kilogs; very low ditto also rose 1f; other sorts remained unchanged. The market has not been very animated this week, and yesterday low New Orleans was 81f to 82f.

Coffee.—Business at *Havre*, in the week ending Friday, was tolerably brisk. 900 sacks Hayti Port-au-Prince disposable went at 79f the 50 kilogs in bond; 400 sacks ditto for delivery, same price; 250 sacks St Marc disposable, 82f; 1,600 sacks Gonaives for delivery, 81f to 81f 50c; 180 sacks Cape disposable, 81f; 100 sacks ditto for delivery, 80f 50c; 3,000 sacks Rio, not washed, disposable, or in the port, 69f 50c to 75f; 1,100 sacks ditto for delivery, 70f; 350 sacks ditto washed disposable, 87f to 88f; a lot of San Jago, 82f; 377 sacks Porto Cabello, 82f to 88f; and a small lot of Guadeloupe "habitant," 127f 50c to 135f (duty paid). The arrivals were about 10,000 sacks. This week sales have been numerous. Rio, 72f 50 to 80f; Hayti, 78f; ditto Cape, 81f to 82f; ditto Gonaives, 81f 50c to 83f 50c; ditto Jacmel, 78f; Singapore, 108f duty paid; Ceylon triage, 106f; ditto Porto Cabello, 87f to 89f. At *Bordeaux*, last week, 1,402 sacks Guayra "non grage," went at 87f 50c; and two lots of "grage" ditto at established prices, 800 sacks Mysore, 117f; 105 sacks Malabar plantation, 118f 50c. This week, only a lot of Macassar has been sold. At *Nantes*, last week, 275 sacks Port-au-Prince went at 81f in bond; and by public auction, about 1,200 sacks Porto Cabello went at 88f 75c to 98f 75c. No sales have been made this week.

Sugar.—In the week ending Friday, at *Havre*, the sales were: 1,400 casks French West India disposable, or in the port, 48f 75c to 49f 50c the 50 kilogs duty paid; 315 ditto for delivery, 49f 50c; 51 casks "usine," 50f. 1,270 casks Havana, 36f 50c to 36f 75c. The arrivals were about 2,000 casks French West India and Havana. This week, various lots of French West India have been sold at 49f and 49f 50c. At *Nantes*, last week, 1,000 sacks Reunion went at on average 52f 50c. 2,011 ditto "gros grain," 54f 75c to 56f 25c; and some lots of French West India, 48f 50c to 52f. This week, French West India has been sold at 48f 50c; Reunion inferior, 50f and 51f 50c. At *Bordeaux*, last week, business was active. 3,950 bales Reunion went at prices kept secret; 698 casks French West India, 47f to 48f; 2,027 bales Mauritius, 77f to 78f (the 100 kilogs) in bond; and a lot of Santo Jago, 74f. This week, French West India has been sold at 48f to 48f 25c; some "usine" ditto, 61f; and some Reunion at prices kept secret

Indigo.—At *Havre*, in the week ending Friday, the sole sales were 14 cases Bengal at 10f 40c to 10f 70c the half-kilog duty paid, which price was 50c to 75c above the estimates. This week, some Bengal has been sold at prices kept secret. At *Bordeaux*, last week, the sales were 57 cases. Kurpah at 10f to 21f the half-kilog; 37 Madras, 6f to 13f; 10 Bengal, 12f 50c to 25f50c; and a lot of Guatemala, 9f to 18f. No sales have been made this week.

Hides.—The demand at *Havre*, in the week ending Friday, was regular: 2,400 dry La Plata went at 137f, 500 to 151f the 50 kilogs, duty paid; 253 salted ditto, 83f; 134 Rio Grande, dry, 124f; 500 Pernambuco, drysalted, 96f 50c; 100 Bahia ditto, 92f 50c; 800 New York, salted, 55f; 1,000 ditto for delivery at prices kept secret; 100 New Orleans, salted, 52f 25c; also 1,326 horse-skins, salted La Plata, 99f to 102f 50c the 100 kilogs. The arrivals were about 15,000. This week, sales have not been large: Monte Video, dry, 137f 50c to 140f; Monte Video, 81f to 85f 50c; New York, salted, 54f 50c to 56f; New Orleans, salted, 53f 50c; Arica, dry, 110f; Buenos Ayres, dry, 137f 50c.

Wool.—At *Havre*, in the week ending Friday, 124 bales La Plata unwashed went at 1f 60c to 3f the kilog; 45 ditto, washed, 3f 40c to 4f 70c; and 4 bales sheepskins, Buenos Ayres unwashed, 1f. The arrivals were not numerous. This week some lots of Buenos Ayres has been sold at 110f to 255f the 100 kilogs; Monte Video, 120f to 315f. Buenos Ayres sheepskins, unwashed, 135f.

Tallow.—Nothing was done at *Havre* in the week ending Friday, and there were no importations. This week a quantity of Buenos Ayres has been sold at 70f the 50 kilogs for delivery, and 50 pipes ditto, for London, 69f. At *Paris*, yesterday, the 100 kilogs were 140f 70c, a fall on last week's quotations.

Spirits.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, were 160f the hectolitre; Montpellier, of 86 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 130f, and beetroot, first quality, 103f.

Copenhagen, Aug. 26.

From an official return just published, it appears that the railways in Holstein in communication with Altona give an average dividend of 8 to 8½ per cent.; but that the Southern line in Schleswig has not succeeded, though a dividend of 6 per cent. was guaranteed by the lessee.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed commercial report is dated Calcutta, July 19:—Produce Market—There has been little or no activity in our market since last mail, owing chiefly to the small quantity of produce in the market. We expect a liberal supply on the opening of the rivers, when we hope to report transactions on a larger scale, but which will mainly depend on holders reducing their present prices. Import Market—The long-continued dulness in our market has increased considerably during the last fortnight. Piece goods and yarns have been very quiet, and lower prices have been established. Accounts from almost all the up-country markets are very discouraging, and the long-prevailing drought affecting the crops seriously in the upper provinces gives no hopes of a speedy improvement. Money Market—The amount of money unemployed by the Bank of Bengal amounts to upwards of two millions and a half sterling, but this is not all; an equally large amount is probably lying idle or nearly so in the hands of native capitalists; even at 3 to 4 per cent. it cannot find employment.

Statement of the clearances of the principal articles from Calcutta for Great Britain from the 3rd to the 17th July, 1860, inclusive, compared with the corresponding period in 1859:—

	1860		1859	
	London.	Liverpool.	London.	Liverpool.

The alterations in the commercial tariff of Portugal, by a liberal reduction of the import duties, turns out to be very considerably overrated. The alterations chiefly embrace pigs' bristles, carpeting, saddle bags, embroidery, wool, plain and printed kerseymere shawls, and merino, cashmere in shawls, piece, or dress, and blankets, viz.:—

Arts.	Wools and Hair Skins.	Old duty. rs. per 100 lbs.	New duty. rs per 100 lbs.
216.	Hogs' or wild boars' bristles, raw or prepared	1,500	1,000
		or 6s 9d. per lb.	per lb.
221.	Wool—for embroidery, white	1,000	600
222.	Wool—for embroidery, coloured	1,600	1,000
230.	Wool—woven in carpets of all sorts and colours, even when the wool be mixed with any other material, silk excepted	450	150
231	Wool—woven in wallets	300	100
235.	Wool—woven in shawls and handkerchiefs, denominated of the merino class of all colours	2,000	1,500
236.	Hair—woven, of cashemire, and other hairs, whatever their origin, in shawls, pieces, &c.	2,000	1,500
237.	Hair—blankets	450	300

The new duties came into force on the 13th inst.

From Jamaica our advices extend to the 10th ult. A few small lots of mountain grown coffee had been brought to market, and readily taken up at 46s to 48s. Small parcels of pimento of the new crop had been sold at 16s per 100 lbs At Trinidad a meeting of the Council of Government was held on the 1st inst., at which the quarterly statement of the revenue and expenditure was laid on the table. The imports for the quarter had been pretty well kept up, the duty amounted to 15,474*l*, and the total revenue to 57,454*l*, against a total expenditure of 59,846*l*. The weather was admirable for the planters, and everything promised well for next year's crop. Produce returns show that the sugar shipped falls about 5,500 hhds, 700 trs, and 200 hhds short of last year. Grenada advices are to the 8th of August. Fine rain had at last set in, and a wonderful change for the better had been produced in the appearance of the growing crops. Of the principal articles of export, there had been shipped to date, in 18 vessels for the United Kingdom, and per mail steamers and intercolonial craft, packages making 5,452 hogsheads (of 16 cwts each) of sugar, 1,170 puncheons (118 gallons) of rum, and 5,742 bags of cocoa.

The receipts at tide-water, at New York, of flour, wheat, corn, and barley, for the 2od week of August, in 1860 and 1859, were as follows:—

	Flour. bbls.	Wheat. bush.	Corn. bush.	Barley. bush.
1860	9,800	188,000	558,100	...
1859	5,100	23,800	179,800	...
Increase	4,700	164,200	379,300	...

The aggregates of the receipts of the above articles so far for the years 1860 and 1859, have been:—

	Flour. bbls.	Wheat. bush.	Corn. bush.	Barley bush.
1860	372,900	4,132,200	7,641,700	78,900
1859	197,500	679,600	1,443,000	150,300
Increase	175,400	8,452,600	6,198,700	...
Decrease	...	...	...	71,400

Reducing the wheat to flour, the excess in the receipts of 1860 is equal to 865,920 bbls of flour.

The receipts at tide-water of the principal articles of produce, from the opening of the canals to and including the 14th inst., have been as follows:—

Canal opened—	1860. April 25.	1859. April 15.	1858. April 28.
Flour ..... bbls	372,900	197,500	885,000
Wheat ..... bush	4,132,200	679,600	4,926 600
Corn	7,041,700	1,443 000	2,533,600
Barley	78,900	150,300	388,200
Rye	118,900	106,000	214,000
Oats	3,514,900	2,261,000	2,375,000
Pork ..... bbls	5,924	36,261	18,477
Beef	2,282	14,010	6,753
Cheese ..... lbs	49,200	177,000	143,0000
Lard	505,700	3,019,600	2,241,300
Butter	143,300	223,400	113,400
Bacon	443,300	1,763,000	2,844,600
Wool	1,424,400	1,318,300	1,467,900

The annexed report shows the state of the Albany lumber market to the 15th August:—There is a large stock of lumber of all kinds in market, the large receipts of the last few weeks having accumulated on the yards. Freights on the canal are advancing—from Buffalo they are 50 cents per M. higher than last week, and the probability is that they will advance farther soon. The receipts by the Erie and Champlain canals, during thesecond week in August, in the years named, were as follows:—

	Boards and Scantling, ft.	Shingles. M.	Timber. C. ft.	Staves. lbs.
1858	7834503	815	...	1478020
1859	11691000	1797	2975	5212646
1860	11017000	3005	...	5925800

The receipts by the Erie and Champlain canals, from the opening of navigation to August 15, in the years named, were as follows:—

	Boards and Scantling, ft.	Shingles. M.	Timber. C. ft.	Staves. lbs.
1858	148790027	16467	80770	66330851
1859	158986762	33027	52228	73086553
1860	174360000	29776	81959	64126679

The following return shows the state of the note circulation in the United Kingdom during the four weeks ending July 28, 1860, compared with the previous month:—

	June 30, 1860.	July 28, 1860.	Increase.	Decrease.
	£	£	£	£
Bank of England	21005442	22039963	1034521	...
Private Banks	3432810	3466543	33773	...
Joint Stock Banks	2981348	2998615	9267	...
Total in England	27422600	28500161	1077561	...
Scotland	4263174	4059686	...	203488
Ireland	6511687	6303192	...	208495
United Kingdom	38197461	38863039	665578	...

And, as compared with the month ending the 30th of July, 1859, the above return shows an increase of 433,548*l* in the circulation of notes in England, and an increase of 461,416*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 938,352*l*, the English joint stock banks are below their fixed issue 308,742*l*,—total below fixed issue in England 1,247,094*l*; the Scotch banks are above their fixed issue 1,310,415*l*, the Irish banks are below their fixed issue 51,302*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 25th of July was 16,163,104*l*, being a decrease of 138,946*l* as compared with the previous month, and a decrease of 1,635,092*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 28th of July:—Gold and silver held by the Scotch banks, 2,458,880*l*; gold and silver held by the Irish banks, 2,397,138*l*; total, 4,856,018*l*; being a decrease of 7,811*l* as compared with the previous return, and an increase of 212,879*l* when compared with the corresponding period last year.

MARKETS IN THE MANUFACTURING DISTRICTS

In most of the markets held in the manufacturing districts this week, a very moderate business has been transacted for shipment both to India and China, and, in some instances, goods suitable for those markets have rather given way in price. For the Continent, there has been rather more inquiry, and very little accumulation of stock is complained of. The home trade is very healthy, and the quotations, generally, are well supported. The iron trade has continued flat; nevertheless, prices have undergone very few changes. In coals only a limited business has been passing.

MANCHESTER, Aug. 30.—The market has been flatter on receipt of unfavourable intelligence from India, and in consequence of the unfavourable weather. In cloths, sellers have in many cases accepted a small reduction, and a moderate business has been done on such terms. That such has been in a great measure the practice for some weeks back is evidenced by the fact, that though prices have been slowly giving way during that time, there are now no stocks on hand, except of a very few articles of which printing cloths may be said to be the chief. Shirtings, madapollams, jaconets, and longcloths are on the whole still engaged, at prices slightly higher than would be accepted for delivery at a future date. In yarns little has been doing, and rates are easier.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Wool—A somewhat improved feeling has been manifested in this market; there have been several inquiries, and more wool has been sold. The spinners have worked themselves out of stock, and are compelled to buy something. Yarns—The spinners are well employed, and are delivering their contracts, made two months ago. There are a few new transactions entered into. Pieces—The market is characterised by almost total stagnation. Manufacturers, owing to the high price of the raw material, are unable to make any concession, and merchants, under these circumstances, abstain from purchasing until they have got quit of their stocks.

LEEDS.—Business has been dull in the warehouses this week. The uncertain state of the weather tends to keep from the market. The foreign houses are dull.

HUDDERSFIELD.—Our market has been flatter. Prices about the same.

HALIFAX.—The trade of this district has undergone no material alteration. Spinners and manufacturers are letting as little of their machinery stand as possible, but stocks are rather accumulative, and, unless an improvement in the demand takes place, there must be scarcity of employment. Notwithstanding the quietness of trade, wool continues pretty firm, though a few dealers have shown a little disposition to sell at a shade lower.

LEICESTER.—The hosiery trade, as respects the export department, is steady, but there is not much doing at the present time in the home department; however, nearly an average amount of business is doing. At Loughborough and the adjacent framework-knitting districts trade is quiet. If the present fine weather continues, there will be abundance of work for the operatives in the harvest-field. Wools are hardly so steady, and rates are not so high. No important change in yarns.

ROCHDALE.—Trade here is checked by the discouraging harvest prospects, but nevertheless the business doing is better, and the tone firmer than might be anticipated.

DUNDEE.—Our flax market has continued very firm, and a fair amount of business has been doing at about former rates. There has been an active demand for good medium tows and codillas. For jute there has been more inquiry, and holders of the article are firm at former prices.

BIRMINGHAM.—The reports relative to the general state of trade in the town are by no means satisfactory, though upon the whole they do not appear to be worse than those from other manufacturing districts.

WOLVERHAMPTON.—Pig iron continues flat and unsaleable, with a drooping tendency. The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*, and all other sorts in proportion.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 29th day of August, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,589,495	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	15,114,495
		Silver Bullion	...
	29,589,495		29,589,495

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,643,398
Rest	3,481,910	Other Securities	19,996,726
Public Deposits (including Exchequer, Savings Banks Commissioners of National Debt, and Dividend Accounts	5,949,005	Notes	8,447,710
		Gold and Silver Coin	799,858
Other Deposits	14,168,176		
Seven Day and other Bills	735,601		
	38,887,692		38,887,692

Dated the 30th August, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,877,386	Securities	29,562,124
Public Deposits	5,949,005	Coin and Bullion	15,914,353
Private Deposits	14,168,176		
	41,994,567		45,476,477

The balance of Assets above Liabilities being 3,481,910*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£207,212
An INCREASE of Public Deposits of	350,250
An INCREASE of Other Deposits of	321,812
No change in the amount of Government Securities.	
An INCREASE of Other Securities of	180,311
An INCREASE of Bullion of	233,513
A DECREASE of Rest of	51,026
An INCREASE of Reserve of	452,308

The present Bank return is the most favourable we have we have had for some time past. The decrease in the circulation, the increase in the reserve and bullion, all tend to strengthen the position of the Bank. The increase in public and private deposits are also favourable features, as showing that the pressure is diminishing, although a slight increase in the other securities indicates that an active demand for discount still continues.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 20,987,750	£ 20,108,234	£ 21,093,286	£ 22,428,020	£ 21,877,386
Public deposits	8,261,281	6,429,294	5,627,855	7,816,480	5,949,005
Other deposits	9,281,099	9,795,366	13,674,788	12,730,833	14,168,176
Government securities	14,430,817	10,593,654	10,913,381	11,220,018	9,643,398
Other securities	11,419,381	17,811,663	15,453,324	18,991,882	19,996,726
Reserve of notes & coin	11,986,828	6,651,460	11,969,376	9,476,849	9,247,568
Coin and bullion	16,769,573	11,500,587	17,797,106	16,540,454	15,914,353
Bank rate of discount	2½ p. c.	5½ p. c.	3 p. c.	2½ p. c.	4 p. c.
Price of Consols	96⅜	91	90½	95⅝	93
Average price of wheat	43s 6d	60s 4d	42s 6d	44s 5d	52s 6d
Exchange on Paris (shrt)	25 30 35	25 17½ 25	25 15 22½	25 7½ 15	25 15 22
— Amsterdam ditto	12 0½ 1	11 16 17	11 17	11 14½ 15½	11 13½ 14
— Hamburg (3 months)	13 11	13 7½ 8	13 8	13 5½ 6	13 5½ ⅝

In 1850, the Bank of England had been making advances on Government securities at 2 per cent.; and the extraordinary accounts of the richness of the gold deposits in California were daily gaining ground. The public were beginning to turn their attention to English railway securities in consequence.

In 1857, a large force of British troops were in course of hasty despatch to India; and fears were beginning to be entertained that the struggle in India would be protracted. The funds were prejudiced by the prospect of pecuniary demands on the part of the Indian Government.

In 1858, Messrs Dent, Palmer, and Co.'s Turkish Loan of 3,000,000*l* in a 6 per cent. stock at 80 had just been taken, the applications in excess of this sum amounting to more than a million. Subscribers were allowed the option of taking another two millions until the ensuing 8th October. The final instalment had been paid on the Brazilian Loan of 1½ millions. The influx of gold to the Bank continued very rapid. The funds were strengthened by a steady rise in French Rentes.

In 1859, large arrivals of bullion were announced. It was ascertained that the average price at which the Indian Loan had been taken was 97*l* 3s 2d, and the price had risen to 2 to 2½ premium. Messrs Thomson, Bonar, and Co. communicated to the London Stock Exchange a notification from the Russian Government, intimating that the whole of the 12,000,000*l* 3 per cent. Russian Loan had been taken.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 2,138,282*l*; in 1857, a deficiency of 8,106,297*l*; in 1858, a deficiency of 1,778,536*l*; and in 1859, a deficiency of 6,251,049*l*. In 1860, the deficiency is 5,828,550*l*.

DISCOUNT AND MONEY MARKET.—The tendency of money in the discount market is certainly towards ease; the rate is 3¾ to 4 per cent., but the greater proportion of business is transacted at 4 per cent., and nothing but first-class paper at short dates is discounted below that rate. We observe nothing but the greatest caution exercised among the discount houses, and a wise determination not to encourage any speculation in corn, which, if we are to take the crowded state of the warehouses in the port of London as a criterion, is fast accumulating in this country.

The weather seems also rather more settled, which in itself exercises a great influence not only on the price of corn, but on the money market. We may also mention that the arrivals of bullion this week amount to 774,606*l*, and that 272,000*l* has been taken to the Bank of England.

Money in the Stock Exchange on Government securities is 1½ to 2 per cent. The discount houses allow 3 per cent. at call, and 3½ per cent. at seven days' notice.

Some discussion in monied circles has been going on as to the influence taking money on call has on the money market, and what would be the effect of abolishing that system. Suffice it to say, that if the custom were abolished, the only effect would be to add to the stringency of the money market, and, in times of pressure, to throw all the weight of a panic on the Bank of England.

The discount houses, by taking money at call, act as it were as clearing houses to the bankers at large. If one banker requires money, another has it to lend, for, generally speaking, balances are merely transferred from one bank to another. The discount houses are the medium through whom these transactions are equalised. Abolish this system, and the bankers would be obliged to keep their money in bank notes, and consequently so much capital which is now employed would be idle. The only caution necessary is, that bankers should take convertible security for the money they lend on call in every instance. This seems to us the only caution necessary; the rest finds its own level.

The following are the rates of discount at

	Bank Rate. Per cent.	Open Market. Per cent.
Amsterdam	3	3
Berlin	4	4
Brussels	3	3
Frankfort	2	1¾
Hamburg	No Bank rate	1½
London	4	4
Paris	3½	3
St Petersburg	5	5 to 5½
Vienna	5	4

ENGLISH FUNDS.—The utter absence of speculation which prevails not only on the English Stock Exchange but on most of the Bourses of Europe, notwithstanding the pacific assurances of the Emperor Napoleon and M. de Persigny, is a feature fraught with a significance, on which it would be well for all Governments to ponder. In times past such assurances would have been followed by an advance in securities, but now pacific assurances are not heeded, either from distrust, or probably from this cause, that the enormous expenditure of Governments absorb the capital which was always ready to be employed in investments in Government securities. Take England for an example. In this country, since 1850, the expenditure has risen from 54,500,000*l* to 76,000,000*l*, besides the loans contracted at the period of the Russian war. We have no doubt the expenditure of the other Governments of Europe has been proportionably augmented. It is this abstraction of the savings of the people for purposes of warlike expenditure which causes, in the opinion of many thinking men,

this protracted stagnation; and it may be a matter worthy of consideration how much longer these great outlays in warlike—and, consequently, in unproductive—expenditure can be borne without seriously affecting the public credit of the nations who indulge in them. These observations are elicited because it is notorious that most of the Governments of Europe require loans, forgetting at the same time they are exhausting the power of the people to lend. We believe to this cause may be attributed more than any other the stagnation in the money markets of Europe.

There has been scarcely any movement in the English funds this week. The price of Consols has remained almost stationary at 92⅞ to 3; New 3 per Cents. 93¼ to ⅜, and Reduced 93¼ to ½; Exchequer Bills, 1s to 4s prem. The rate of continuation on Consols from this account (Sept. 6th) to Oct. 11th is 3-16ths, or about 2½ per cent. per annum.

Large amounts of Consols have been continued at that rate by bankers, who employ the money so raised in discounting bills, which leaves a considerable margin of profit.

The closing price of Consols this afternoon is 93⅛, the market presenting rather a firm appearance.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

FOREIGN FUNDS.—There has been more doing in foreign funds. Buenos Ayres Bonds have risen about 3 per cent. Spanish and Mexican Bonds have also improved. The following is from the Committee of Mexican Bondholders:—

The Committee have received letters, dated Mexico the 13th and 28th ult., from Mr Whitehead, who had arrived safely in the capital, after having been robbed on the road, and was well received by the authorities there. The remittances from Vera Cruz in bills on Mexico amounted in July to 41,588 dols, making the deposit in the capital 830,872 dols. Great efforts had been made to get up a Conducta to Vera Cruz in the week before the 28th ult., and Her Majesty's Minister would have allowed the British Consul to accompany it with his flag, provided no more than the legal amount of duty was levied and the bondholders' money taken free, at the same time warning English houses to have nothing to do with it, as it did not, in his opinion, afford due security. As Government, however, had at the last moment issued a notice to the effect that it was not a thing promoted by them, but that they had merely assented to certain proposals made by one Scvilla with reference to it, this appeared tantamount to a withdrawal of authority, and will most likely have put an end to the whole scheme. At all events, Mr Whitehead could not have intrusted the funds of the bondholders to it, contrary to Mr Mathews' opinion that it was not safe. The communication of the capital with the interior was quite cut off. General Miramon was still at Lagos, half-way between Guadalajara and Mexico, with an insufficient force to undertake anything. He is not now recognised by any of the foreign Ministers.

French funds have remained almost stationary at about 68. The last price this afternoon is 68.10.

Greek Bonds, on which neither principal nor interest has been paid for upwards of 30 years, have advanced to 9¼ to 10.

The Danish Government have advertised their intention to pay off, on the 1st of March next, the outstanding portion of the 800,000*l* 5 per cent. loan contracted in 1850, amounting to 691,300*l*. The holders have the option to accept in lieu 4 per cent. stock.

RAILWAYS.—The railway market has been rather heavy. The half-monthly settlement which took place to-day shows that stock has been brought to market, which is indicated by the large rates paid for continuation. So much as ¾ per cent. has been paid to carry on Midland stock, which is equal to 15 per cent. per annum. The general rate of continuation has been about 5 per cent. The market, after the settlement of the account, has shown more firmness. With the exception of Lancashire and Yorkshire, which has risen about 2 per cent., other lines have fallen from 1½ to 3 per cent. The takes, however, continue to be satisfactory.

With reference to the market for American securities, Mr E. F. Satterthwaite reports as follows:—

The market in London for American securities has been since our last very firm; the disposition to invest in them continues to increase. Illinois shares have moved less rapidly than for some weeks previous; they have, however, advanced three per cent., touching to-day 15½ discount. The transactions in Erie shares and bonds have been quite unimportant. There is a fair inquiry for Michigan Central and New York Central shares; the latter still carry the dividend, just declared, of three per cent. for past six months.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also of those in India Government loan notes:—

Gold.—Since our last circular of the 23rd inst., several large amounts of gold have come to hand; they are as follows:—City of Washington, from New York, with 86,000*l*; Illinois, from ditto, with 30,000*l*; Asia, from ditto, with 75,000*l*; Saxonia, from ditto, with 40,000*l*; Yorkshire, from Melbourne, with 169,000*l*; La Plata, from West Indies, with 65,500*l*; total, 465,500*l*. Of these sums, 216,000*l* has been sent to the Bank, about 60,000*l* has been sent to Spain, and the remainder taken for the Continent and refining purposes. The demand for abroad is not so good at present, and the United States gold coin has declined in price to 76s 2½d per oz. The steamer to Bombay of the 27th instant took out 30,000*l*, all in gold.

Silver.—The La Plata has brought about 35,000*l* in bar silver from the West Indies. The small quantity that was suitable for China was sold at 61s 0½d per oz standard; a fair amount of business has been done, however, at 61s ⅝d per oz, both before and after the arrival of the West India steamer, and we quote the price to-day as 61s 0⅝d per oz, and firm.

Mexican Dollars.—The dollars brought by the La Plata, about 35,000*l*, have been sold at 62½d per oz; and the Saxonia brought 18,000*l* from New York, which were placed at the same rate. The demand for China has been very good, and we give the price to-day as 62½d per oz. There are scarcely any to be had here, the market having been quite cleared.

Exchange on Bombay and Calcutta is a little firmer. 60 days' sight Bank drafts are 1s 11⅞d to 2s per rupee. Bills with documents, 1s 11d to 1s 11⅛d. Drafts on Madras, 60 days' sight, 1s 11⅜d. Documents, 1s 11d.

India Government loan notes are without change. There is very little doing, and quotations are nominal, at last week's prices.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 78s per oz std; Spanish doubloons, 76s 3d to 76s 6d per oz, last price; South American doubloons, 74s 3d to 74s 6d per oz, last price; United States gold coin, 76s 2½d per oz, last price. Silver—Bar silver, 5s 1⅞d per oz std; bar silver, containing 5 grs of gold, 5s 1⅞d per oz std; fine cake silver, 5s 6½d per oz; Mexican dollars,

5s 2½d per oz, nominal; Spanish dollars (Carolus), 6s 2d per oz, last price.

To-day the Leaping Water has arrived from Melbourne with 158,516*l*; and the Kangaroo, from New York, with 150,600*l*.

FAILURES.—In the Bankruptcy Court an order was made for the transfer of the case of Messrs R. and J. Clarke, tanners and curriers, of Kidderminster, from the Birmingham to the London Court, upon the ground that the great bulk of the creditors reside here. The liabilities were stated at the meeting of the creditors on the 13th inst. at 66,663*l*.

Messrs Poole and Co., boot manufacturers, of Northampton, have been made bankrupts.

At a meeting of the creditors of Messrs John Wilde and Sons, silk manufacturers, of Macclesfield, a statement was presented by Mr Chatteris, the accountant, estimating the liabilities at 20,000*l*, and the assets at 9,000*l*. A composition of 7s 6d in the pound, payable by instalments at four, eight, and twelve months, the two last to be secured, was agreed to.

Messrs Barber and Ellis, ironmasters, of Liverpool, have made an offer of 4s in the pound.

Messrs Cross and Co., ironmasters, Birmingham, have made an offer of 10s in the pound, of which 5s to be paid in two months, and the rest in equal payments guaranteed, but it has not yet been accepted.

At a meeting of the creditors of Messrs Bailey, Son, and Co., lace manufacturers, Nottingham, a composition of 4s in the pound, payable by instalments of 2s each, the latter guaranteed, has been accepted by six-sevenths of the creditors.

A meeting of the creditors of Messrs T. and A. Oliver, lace merchants, Nottingham, has resulted in the acceptance of an offer to pay 3s 6d in the pound, in two instalments, viz., 2s on the 1st of November next, and 1s 6d the 1st of January next, the estate to be collected by inspectors.

At a meeting of the creditors of Messrs James Reinach and Co., merchants, it was resolved to wind up the estate under inspection. The liabilities amount to 26,421*l* 5s 10d, and the assets to 12,865*l* 19s 3d.

At a meeting of the creditors of Messrs David Barclay and Sons, tanners, Bermondsey, a statement of the position of their affairs, prepared by Mr C. F. Kemp, accountant, of Gresham street, was presented, showing liabilities of 7,957*l* 15s 9d, and assets 3,878*l* 12s 8d, being nearly equal to 10s in the pound. A composition of 8s 6d, in three instalments—3s at three months and six months, and 2s 6d at nine months, the last secured—was accepted.

Messrs J. Banks and Son, ironmasters, of Ettingshall, South Staffordshire, is the house referred to by the *Wolverhampton Chronicle* as having suspended payment. Mr William Banks is the surviving partner of the house; his debts are announced to approach 30,000*l*.

At a meeting of the creditors of Messrs Wm. Francis and Co., of the New Leather market, Bermondsey, hide and leather factors, a committee was appointed to investigate the affairs previous to accepting a compensation of 4s 1½d in the pound, payable 3s 1½d at once, and 6d at four and six months. The accounts, prepared by Mr Joseph Sawyer, accountant, show liabilities of 69,721*l* 1s 8d, while the assets are only 10,951*l* 3s 8d, showing a deficiency of 58,769*l* 18s.

MISCELLANEOUS.—Six per Cent. Bonds of the Corporation of the City of Toronto, to the amount of 25,050*l*, are offered for subscription in the London market at par. The interest and principal are payable in London, the latter in twenty years from the date of the Bonds. Including this sum, the debt of Toronto will amount to 463,469*l*, secured by the whole of the property of the city, which is now valued at 5,753,425*l*, and by freehold property belonging to the Corporation, part of which is valued at 294,800*l*. A sinking fund, equal to about 8,200*l* sterling per annum, is now in operation, for the purchase of lands at par in this market.

It is announced that the Directors of the United Kingdom Electric Telegraph Company have made arrangements from which they anticipate being in a position to establish cheap telegraphy between London and some of the more important seats of commerce within a few months of the present date.

At a meeting of the shareholders of the Ottoman Bank, a dividend for the half-year at the rate of 8 per cent. per annum, free of income tax, was declared. The chairman, Mr A. H. Layard, expressed confidence in the honesty of the intentions of the Turkish Government.

At the half-yearly meeting of the General Steam Navigation Company, Mr J. Wilkin in the chair, the usual dividend of 14s per share, or at the rate of 10 per cent. per annum, was declared.

The *Shipping Gazette* contains the following:—"We are enabled to state that Mr W. S. Lindsay, M.P., has been authorised to proceed to Washington, to place before the American Cabinet and the Senate the views of Her Majesty's Government with reference to the existing Navigation Laws of the States, and its effects upon maritime commerce, and to enter upon negotiations for the opening of the American coasting trade to British shipping, for arriving at a mutual understanding respecting belligerent rights at sea, and for a more satisfactory adjustment of the law of each country in reference to collisions. Mr Lindsay starts on his important mission on the 8th of September."

The eighth annual meeting of the Netherlands Land Inclosure Company has been held by adjournment; Mr Bidder in the chair. On the 23rd inst. a deputation from the Board waited upon the Dutch Minister of Finance, who communicated the following as the terms of arrangement which the Government are prepared to submit to the Chambers:—"1. The caution money to be returned to the Company, subject to any claims of Dutch contractors. 2. The Company to retain the area of land inclosed and attempted unsuccessfully to be inclosed. 3. The remission to the Company of the further prosecution of the Government canal and barrage of the Eastern Scheldt." In consideration of these concessions the Company is required to give up to the Government:—"1. The right of inclosure of the Government lands comprised in the concession beyond the above lands. 2. The canal lands and works, and the engines, material, and plant at the canal works." The Board had hoped to obtain more liberal terms, but as such would not be likely to be adopted by the Chambers, those proposed have been accepted by the shareholders by a formal vote. The crops last year, upon less than 700 acres in cultivation, produced a gross receipt of 5,300*l*, and this year's crops are expected to produce at least as much. Upon the ratification of the arrangement with the Government, an inclosure of about 800 acres of some of the finest land in Europe, forming part of the destroyed Krabbendyke Polder, may be effected in the spring of next year. The Chairman characterised the profit and loss account for the year as "very gratifying," and said "there was good ground for hoping that there would be something to divide amongst the preference shareholders next year."

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about at par, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424¾ per mark, and the short exchange on London is 13.4¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 1-10th per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 110 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is slightly in favour of England; and, after making allowance for charges of transport and difference of interest, the present rate leaves a small profit on the importation of gold from the United States.

Imports of the week ..... 255,921 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Scarcely any English wheat was on sale at Mark lane to-day yet, owing to continued heavy importations of produce from abroad, and the favourable change in the weather for harvest operations—which, however, are unusually backward—the demand was in a most inactive state, and to have forced sales 2s per qr less money must have been submitted to. Three parcels of *new* Talavera wheat, grown in Essex, were shown. Their quality was inferior, and many of the grains were sprouted. The price asked was 66s per qr, but no sales were effected. We may observe that the finest sample weighed only 61½ lbs per bushel. So little was passing in foreign wheat that the currencies were almost nominal. All spring corn was heavy, and rather lower to sell. The flour trade was very dull, and country marks were the turn cheaper. This week's imports from abroad amount to 21,270 qrs of wheat, 5,580 barley, 41,310 oats, 980 sacks and 26,730 barrels of flour.

At Liverpool, this morning, produce generally sold to a fair extent at Tuesday's currency.

Throughout the Continent large quantities of wheat and spring corn have found buyers for shipment to England. At New York on the 18th inst. flour was dull and lower in price. Wheat and maize were likewise cheaper,

Messrs Briggs and Co., of Alexandria, writing on the 16th ult., state that wheat and other articles were in active request, at the annexed quotations:—Wheat, Saide, 34s to 35s; Behera white, 33s 3d to 33s 6d; ditto red, 32s 3d to 33s 4d: beans, Saide, 26s 6d to 27s 2d; ditto Behera, 24s 6d to 25s 4d: barley, 19s to 20s 6d; lentils, 25s 6d to 26s; ceci, 33s to 34s 6d; linseed, 39s to 40s 6d per quarter.

Messrs Pietroni and Draper have forwarded the following in reference to the grain trade at Odessa to the 17th August:—

Wheats—Our stocks of old are all but exhausted. New Ghirkas are to be had for September at about 46s per qr f.o.b. Polish Odessa and Sandomirka of new crop will not be procurable until September-October, until when it will be impossible to speak of quality or price. The last transaction in Sandomirka was a very poor parcel of old at 42s 6d f.o.b. Maize—Our stock is reduced to about 5,000 quarters, held at 34s 9d cost and freight, and no new will reach until May. Barley—The few parcels of old still on the market being unfit for shipment, business could only b

done in new, which is now arriving plentifully and the quality is satisfactory. 17s 6d imperial or 18s 6d per 400 lbs is the last price paid. Oats arrive freely. Linseed—Stocks of old exhausted, but new seed will arrive freely ere long. The decline in prices, which increased supplies led me to anticipate, has, however, been prevented by the large purchases making for the United Kingdom. Linseed pure and quite free from extraneous seed, 45s f.o.b. for September-October. If mixed with rapeseed, from 43s 6d to 44s f.o.b. Prices are as follows:—

		s	d	s	d		s	d	
Wheat, Polish	462 to 497 lb	34	6 to	43	3	per 480 lb	41	0	f.o.b.

EXPORTS FROM ODESSA.

	To United Kingdom, July 1 to 31. chets	Total to all Parts, since Jan. 1. chets
Wheat	78,715	548,279
Maize	2,975	244,605
Rye	10,201	82,085
Barley	6,739	57,704
Oats	9,517	200,307

The cotton market during the week has been somewhat quieter than in the previous one, but there is no change in prices to report. The total sales amount to 51,760 bales, including 37,474 to spinners, 2,166 on speculation, and 12,120 for export. The present stock in Liverpool is 1,087,800 bales. The prospects for the new crop in America have a little improved in consequence of rain having fallen, so that, after all, the damage done may be partly recovered, and not prove so serious as was expected. To-day's sales, 8,000 bales. In the London market a fair business has been transacted at former rates. Sales, 3,300 bales.

A despatch from New Orleans, dated the 17th ult., states that cotton was firm at 10½ to 10¾ cents. for middling. The week's sales have amounted to 2,950 bales.

"The long season of dry weather which has been the subject of so much complaint lately," write Messrs Neill and Co., of New York, "has at length been broken by a pretty general fall of rain. This would have been more beneficial for the uplands had it come earlier, as the plant in some places has now reached maturity, but where cotton is yet growing, it cannot fail to do good, by arresting the injurious effects of the drought. There are yet serious complaints, however, from the sandy lands, where it is feared the crop has sustained too much injury to be restored to its former promising condition, though favourable weather henceforward will assist the 'top crop.' Texas, Southern Georgia, Alabama, and Florida, appear to have suffered most, and the prolonged drought has dwarfed the plant, and forced it to a rapid maturity without improving the staple, particularly where guano and other fertilisers have been used. The river bottoms and seaboard crops are fortunately in a better condition, and the overflowed lands promise a large yield. The only fear for these crops is an excess of rain, which would spoil their present fine prospects. Estimates at this early period are premature, but where figures had been indulged in there is now a disposition to reduce them. Cotton is opening rapidly in the more forward districts, and the receipts of new crop at New Orleans up to the 14th inst. reached 3,000 bales against 550 last year."

The public sales of tea held this week have gone off slowly, and prices have had a drooping tendency. The demand by private contract is restricted to small parcels, on former terms.

We have received the following report in reference to the transactions in tea and silk from Hong Kong. It is dated July 8:—

Canton Silk.—Rates have advanced from 10 dols to 15 dols. The whole of the second crop has been contracted for, and rates quoted are what dealers will deliver third crop at when it arrives:—Loungkong, No. 1, 430 dols to 435 dols; Kumchuck, No. 2, 410 dols to 415 dols; Kowkong, No. 3, 385 dols to 390 dols; Rereeled Kumchuck, 450 dols to 460 dols; Mahtow, 190 dols to 195 dols. Tea.—Portions of several chops of country congou have arrived; they appear to be of good make. Teamen expect about 35 taels for the finest chops. Since last mail Tayshan congous have been settled at a decline of 1 to 2 taels, and scented kinds are 2 taels lower. Settlements are as follows:—Country Congou—Old, no sales; stock, 3 chops: new, no sales; stock, portions of 7 chops. Tayshan Congou—Sales, 9,000 half-chests at from 20½ to 25½ taels; stock, 5,000 to 7,000 half-chests. Scented Orange Pekoe—Sales, 15,000 boxes; stock, about 25,000 boxes: quotations: curious, 37 to 38 taels; good to fine, 30 to 34 taels; medium, 26 to 28 taels; common, 22 to 24 taels. Scented Caper—Sales, 10,000 boxes; stock, 30,000 to 40,000 boxes: fine to finest, 28 to 33 taels; good medium, 23 to 25 taels; common, 18 to 21 taels. Gonpowers—Scarce. Sales, 3,000 boxes, at 17 to 22 taels. Two vessels have sailed for London. The Southern Cross, full; Ardville, loading. For Liverpool, the Caroline Chisholm. Freights to London, 3*l* to 3*l* 10s for tea. Amoy.—Advices are to the 2nd inst. Only a very trifling business has been done in imports. Tea.—A small business is reported. Oolongs have been taken at 21.50 to 27 dols; congou, at 16 to 20 dols; and Ankois at 14 to 15 dols. The Maida was loading in port, and would proceed to Foochow to fill up. Foochow.—Advices are to the 30th ult. Tea.—Considerable settlements have been made, and, owing to the Shanghai advices, teamen have succeeded in obtaining higher rates. Arrivals have consisted chiefly of "first crop" teas of good common to Kaisow kinds, and are in excess of last season. The "second crop" has been delayed owing to the high prices demanded in the country. Of souchongs, the arrivals have been moderate, and chiefly of the medium kinds. Purchases made principally for the Continent and United States. Oolongs have been taken to a fair extent for the English market, and a few settlements have been made for America. Pekoes and scented kinds, very little has arrived. Sales are as follows:—Congous, 34,250 chests, at 10.5 taels for low dust to 31 taels short for Kaisow; sonchong, 5,650 chests, at 23 taels short for but middling to 42 taels for finest; Oolongs, 24,150 half-chests, at 22 taels to 28.3 taels for fair to good; pekoe, 1,200 chests, at 35 to 55 taels for medium to finest; scented teas, 300 boxes, at 32 taels. Stocks are estimated at—Congou, 25,000 to 26,000 chests, ordinary common to Kaisow; souchong, 6,000 chests, medium to fine; Oolong, 12,000 half-chests, fair and good cargo; pekoe, 800 chests, medium and fine; scented teas, 500 boxes. Shanghai advices are to the 30th of June. Silk.—About 1,000 bales of the new crop had unexpectedly arrived, all which show signs of having been hurriedly prepared, but found eager purchasers at high rates—say, 400 and 380 taels for Nos. 2 and 3 Taatlee respectively. The total export of silk from China to Europe is 69,982 bales, against 81,280 bales last year. Tea.—A few parcels of new Hoochow tea had arrived and been taken at very high rates. Reports from Hohow state quantity to be about the same as last year, but there was little doing, and great uncertainty when supplies could be brought down. Settlements are as follows:—Congou, Shanghai packed, 1,500 chests, at 13 to 17 taels duty paid; congou, new Hoochow, 1,400 chests, at 28 to 28½ taels duty paid; Pekoe, 300 chests, at 30 taels duty paid. Greens—1,300 half-chests. Unsold Stock—Black, 5,000 against 12,000 chests last season; green, 3,000 half-chests, against 4,000 half-chests. Vessel loading, the Jubilee, for London, nearly full, at 4*l* 5s. The total export of tea from China to Great Britain is 85,304,900 lbs, against 65,635,900 lbs last year, or an increase for this season of 19,669,000 lbs. To the United States the export is 30,842,000 lbs, against 29,920,200 lbs last year, or an increase for this season of 921,800 lbs.

Good and fine raw sugars have changed hands to a fair extent, at extreme quotations; but low and damp qualities have met a dull inquiry at late rates.

Several parcels of plantation coffee have been disposed of, at an improvement in value of from 6d to 1s per cwt. Most other coffees have supported former terms. Cocoa has commanded very full prices.

Writing on the 28th ult., Messrs Volkart, of Ceylon, thus report the state of the coffee market:—

We have had almost uninterrupted fine weather in Colombo, and, as a consequence, shipments of coffee have proceeded steadily. The disposal of the present crop to date is as follows:—

PLANTATION COFFEE.

To Great Britain	cwts 389,340	against last year,	cwts	302,445
Foreign Ports	30,391	—	—	38,995
Australia and India	9,150	—	—	7,515
	428,881			348,955

NATIVE COFFEE.

To Great Britain	cwts 78,981	against last year,	cwts	60,580
Foreign Ports	67,269	—	—	117,747
Australia and India	2,376	—	—	7,271
	148,626			185,598

The few parcels of Ouvah native coffee that are brought in from that district find buyers in Kandy at high rates, and we hear of none on offer in Colombo at the present moment, though one or two small contracts have been made. In parchment plantation there have been no transactions since our last, but some of the early crops are being gathered, and we may look for a few arrivals of this quality shortly. The weather in the interior is favourable for ripening crops, and labour is abundant in most districts. Plantation coffee, nominal; native coffee, unpicked, 45s 6d per cwt.

The rice market has become less active; nevertheless, last week's improvement in value has been supported.

New fruit has made its appearance, but the transactions have been limited, and currants have given way 2s to 3s per cwt.

Rum has continued firm, at previous rates. Brandy and grain spirits have moved off slowly. Saltpetre, hemp, flax and coir goods have ruled inactive.

The public sales of colonial wool have been brought to a close. Their result is thus referred to by Messrs Willans and Overbury:—"The July-August series of colonial wool sales, which commenced on the 19th ult., have terminated. The catalogues comprised 91,579 bales, viz.:—26,153 bales from Victoria, 23,377 from New South Wales, 10,651 from Tasmania, 5,198 from South Australia, 13,088 from New Zealand and Swan River, 10,245 from the Cape of Good Hope, 2,867 sundries:—total 91,579 bales. The result of the sales just brought to a conclusion presents, in many respects, a marked contrast to that of the previous series. The May auctions were distinguished by keen competition, a generally sanguine tone, and unusually heavy purchases for French account. During the recent sales, on the contrary, the operations of French buyers were less considerable than usual, and all classes of purchasers exhibited a decided indisposition to operate to a speculative extent. First-class Port Philip and Sydney wools, both combing and clothing qualities, have been in good demand throughout, at about May rates; and, in consequence of the limited quantity, Capes have actually realised an advance of about 1d per lb. Other descriptions, however, have not shared this buoyancy; Van Diemen's Land and New Zealand fleeces, and the lower class of Sydney wools, declining gradually as the sales progressed, closed

at a reduction of about 1d per lb on opening rates. Prices of middle quality Port Philip wools showed great steadiness during the greater portion of the series, but a succession of heavy sales of this description, which came on towards the close, exercised a depressing influence, and they, also, eventually sustained a fall of 1d to 1½d per lb."

Scotch pig iron has declined to 51s cash. Other metals have ruled about stationary.

Linseed oil is firm, at 31s on the spot. Other oils are steady. Tallow has continued in request, at 52s for P.Y.C. on the spot, 52s 6d October to December, and 53s spring.

"In money matters there has been little or no variation since our last review," observes the New York *Shipping List* of the 15th inst. "The applications at bank are moderate. There is a prevailing impression that lenders will be able to make better terms by 1 per cent. at least by the 1st of September, and the impression is probably correct. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5½ to 6
Do. other good securities	6 7
Prime endorsed bills, 60 to 90 days	6 6½
Do. 4 to 6 months	6 7
First class single signatures	6½ 7½
Other good bills	8 9
Names less known	9 10

General trade, so far as this city is concerned, may be said to be fairly active for the season, with every promise of increased animation as the end of August approaches. The same observation holds good in respect to most sections of the country at large. The shipments of flour and grain, on European account, from this port are to a fair extent, and there is nothing in the last advices to discourage the belief that these are to increase. There continues a healthy degree of activity in almost every branch of the domestic dry goods trade, though the great rush of business so confidently predicted by many in the trade has not yet been realised, nor is it likely to be realised at any time during the fall season, unless the complexion of affairs become materially changed. The manufacturing business of the Eastern States is represented to be in a prosperous condition, nearly all the factories having sold close upon production or working on contract. Foreign goods have been in moderate request, and the market is heavy and unsatisfactory, especially when the fact is taken into consideration that the importations are considerably behind last year. An increased demand is confidently anticipated by the trade, somewhat later in the season, however, after the harvesting shall have been concluded in the South and West, and cereals have been in good part converted into cash."

The market remained quiet, under a moderate inquiry for the home trade, until yesterday, when the demand became more active, and a slight improvement in prices was realised. The accounts from the growing crops continue of a more or less unfavourable character, and holders have consequently manifested considerable firmness in their operations. The transactions since Friday aggregate 4,000 bales, closing firmly yesterday, at the revised quotations appended. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	6⅞	6⅞	6¼	7
Good ordinary	8	8¼	8½	8½
Middling	10⅜	10⅜	10⅞	11⅛
Good middling	12⅛	12⅛	12½	12⅝
Middling fair	12⅝	12⅝	12⅞	13⅛

The arrivals have been from Texas, 1,425 bales; New Orleans, 31; Mobile, 326; Georgia, 303; South Carolina, 156; Virginia, 17; Philadelphia, 5—total, 2,263 bales. Total import since 1st inst., 8,671 bales. Total import since 1st September, 457,600 bales. Export from 1st to 14th August, 2,720 bales, against 8,916 in 1859.

NEW YORK, Aug. 18.—Under a moderately active demand during the past three days the market has assumed a more buoyant tone, and transactions have been tolerably large, at very full prices, in part on Southern account. There is manifestly less disposition on the part of holders to realise, and some of the brokers have withdrawn their stocks from the market. Transactions for the three days are 5,800 bales, closing firmly. The arrivals have been from Texas, 507; New Orleans, 922; Florida, 679; South Carolina, 164—total, 2,272 bales. Total import since 1st inst., 10,943 bales. Total import since 1st September, 459,872 bales. Export from 1st to 14th August, 2,720 bales, against 8,916 in 1859.

A fair amount of business has been done in cotton this week, though the market has been invariably quiet. There is an abundant supply offering, and holders accept recent rates willingly, but it is not easy, even with this disposition, to effect sales. We do not, however, alter our quotations for American. Egyptian are still very difficult to move. Brazil maintain last week's prices. East India are without alteration. The sales to-day are 8,000 bales. The market is dull. The reported export amounts to 12,120 bales, consisting of 5,490 American, 60 Brazil, and 6,570 East India.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 15.—FLOUR AND MEAL.—The market for State and Western flour remains without essential change. A tolerably fair demand has prevailed, both for consumption and shipment, under which transactions present a fair aggregate, and with few exceptions previous prices have been realised. The re-

ceipts have been light, scarcely sufficient to meet the requirements of the trade. The sales since Friday aggregate 33,000 barrels. Canada flour has been in steady fair request at lower prices, and transactions for the three days comprise 1,700 barrels, at prices varying from 5 dols to 7.50 dols per barrel, as to quality. State superfine brands, 5.15 dols to 5.20 dols; State extra brands, 5.25 dols to 5.35 dols; Michigan fancy brands, 5.10 dols to 5.15 dols; Ohio common brands, 5.10 dols to 5.20 dols; Ohio fancy brands, 5.20 dols to 5.25 dols; Ohio fair extra, 5.40 dols to 5.45 dols; Ohio good and choice extra brands, 5.55 dols to 7.25 dols; Michigan, Wisconsin, Indiana, &c., 5.20 dols to 5.45 dols; Genesee fancy brands, 5.40 dols to 5.50 dols; Genesee extra brands, 5.60 dols to 7.50 dols; Missouri, 5.60 dols to 7.50 dols; Canada, 5 dols to 7.50 dols. Southern flour has been in steady fair demand.

EXPORT, from 1st to 14th August.

	1860 barrels		1859 barrels
Wheat Flour	77,426	.....	39,950

GRAIN.—The market for spring wheat has been dull and heavy during the three days, but for winter there has prevailed a fair inquiry, both for consumption and shipment, at about previously quoted rates. The continued scarcity of freight room and increasing firmness in freights, together with unfavourable weather, interfered with operations considerably yesterday, and the market closed heavily at prices favouring the purchaser. The corn market was steady and firm, under a moderate demand, at full prices, until yesterday, when the market became heavy and prices were somewhat lower. The sales for the three days are 213,000 bushels.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

In the markets held in the early part of the week considerable excitement prevailed in the demand for wheat, owing to the continuance of unseasonable weather and the backward state of the crops. Prices advanced from 3s to 5s per quarter, and at that improvement in value large quantities of foreign wheat changed hands. Since, then, however, as much less rain has fallen, the trade has become comparatively inactive; nevertheless, the advance here noticed has been supported, although very large quantities of produce continue to arrive from various quarters. Flour has sold readily, and the value of all kinds has had an upward tendency. The few samples of barley on offer have changed hands, at fully 1s per quarter more money. Fine malt has risen 2s per quarter, and oats, beans, and peas have commanded quite 1s per quarter above previous rates.

A few patches of land have been cleared of their wheat, barley, and oats this week; but as yet the progress made in harvest work is trifling. In many parts of the country the crops are unfit for cutting, and apparently this will be the latest harvest almost on record. We believe, however, that from the backward nature of the season generally, the crops have sustained no material injury; but had they ripened at the usual period, the losses would ere this have been enormous. The stocks of wheat in the hands of the home-growers are now reduced to a very narrow compass; but the future range in prices will be chiefly regulated by the state of the weather during the next two or three weeks. Fortunately for the consumers, there are immense quantities of grain and flour now on passage to England. In Scotland, the trade has ruled very firm, and the quotations, generally, have been on the advance. Most of our letters state that the crops promise a fair average yield.

The Irish markets have been firm for wheat, on higher terms. All spring corn has produced more money, and flour has continued steady in price.

A very limited supply of home-grown wheat was on sale here to-day. Nevertheless, owing to the fineness of the day, the trade was heavy; and, to have forced sales, 2s per quarter less money must have been submitted to. Foreign wheat was very dull, and nominal in price. All spring corn, as well as flour, ruled dull, and the turn in favour of buyers.

The state of the floating trade is thus reported by Mr Edward Rainford:—There have been 46 arrivals for orders up to last night since the 23d inst., consisting of 24 cargoes of wheat, 1 rye, 11 maize, 5 barley, 2 oats, and 3 beans, viz.:—Wheat, 1 from Ibraila, 8 Taganrog, 2 Berdianski, 2 Malta, 1 Bordeaux, 3 Odessa, 2 Galatz, 1 Marseilles, 2 Marianople. 1 Leghorn, 1 Alexandria; rye, 1 Cavala: maize, 1 Oltenitza, 1 Constantinople, 3 Sulina, 3 Ibraila, 2 Galatz, 1 Odessa; barley, 3 Ibraila, 2 Sulina; oats, 1 Ibraila, 1 Genoa; beans, 1 Alexandria, 2 Mazagan. About one-third of these were previously disposed of. In cargoes afloat a fair business has been done this week at the following prices:—Wheat, arrived, Marianople at 59s; Taganrog Ghirka at 58s, 58s 6d, and 56s 6d per 492 lbs; Polish Odessa at 58s, 56s, and 56s 3d per 480 lbs; Ibraila at 49s 6d, and Galatz at 52s 3d per imperial qr; Galatz at 54s 3d per 480 lbs or per imperial qr at buyer's option; on passage, Berdianski at 58s, Marianople 58s, Taganrog Ghirka (3 cargoes) at 57s per 492 lbs; Polish Odessa at 55s, and Galatz at 54s 6d and 55s per 480 lbs; now shipping, Taganrog Ghirka 57s; to be shipped in August to October, 5,000 qrs Taganrog Ghirka at 58s per 492 lbs. Maize, arrived, Foxanian 35s and 35s 6d, Galatz 35s 7½d, Oltenitza 35s 7½d per 492 lbs; Ibraila at 34s and 34s 6d per 480 lbs; Danubian at 31s 6d, 2 cargoes at 32s 6d, 2 at 33s, 1 at 33s 3d per 480 lbs, all more or less damaged; Salonica, partly out of condition, at 32s 6d per 480 lbs; on passage, Galatz at 36s per 492 lbs. Barley, arrived, Eupatorian at 31s, and Danubian (heated) at 25s per 400 lbs; on passage, Enpatorian at 27s 6d, and Berdianski (B. L. just received) at 30s per 400 lbs; to be shipped in September or October, Ibraila at 26s 6d per 400 lbs. Beans, arrived, Egyptian at 34s 9d and 35s; on passage, a parcel 33s 6d, a cargo 33s 6d per imperial qr (tho two last named for London direct).

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened without activity, but there has latterly been more inquiry, and prices of all kinds are maintained. Rather a large business has been transacted in British West India, the sales to yesterday reaching 4,185 casks. Floating cargoes also meet with steady buyers.

By auction, 370 casks Barbadoes went at 37s to 39s for brown and low, and 39s 6d to 43s 6d for middling to good yellow. A few lots Jamaica went from 38s to 43s for brown to good yellow. 30,427 baskets Java are advertised for sale by the Netherland Trading Company on the 25th proximo. The deliveries of sugar for home use according to the latest returns showed an increase of 10,160 tons on the previous season's since the 1st January. About this period last year the stock was materially augmented: it is now 72,200 tons against 74,500 tons in 1859.

Mauritius.—3,000 bags brought forward on Tuesday sold at about previous rates: brown and low grey, 36s 6d to 38s 6d; low to good middling yellow, 39s to 42s per cwt.

Bengal.—470 bags Gurpatta date found buyers at 42s to 43s per cwt.

Foreign.—The public sales have been smaller than usual. 3,060 boxes Havana were principally taken in: brown to good yellow, 37s 6d to 44s 6d; grainy sorts, 46s to 50s. 1,114 boxes grainy yellow and white in bond, at 32s to 34s 6d. 300 casks Porto Rico realised 38s to 42s 6d for brown and yellow. Four floating cargoes of Havana are reported sold: two white for Russia at 33s to 33s 6d; one, No. 10½, for a near port, at 27s 3d; and one, No. 13 to 13½, at 28s 9d for the United Kingdom. On the spot, 17,000 bags Manilla have sold at 36s 6d to 37s 6d, and 1,000 boxes Havana at previous rates.

Refined.—The decline established last week has induced the trade to buy with more freedom, and the supply of goods has become moderate. Low and middling descriptions are now quoted 49s 6d to 50s; crushed, 47s to 48s 6d per cwt. A large business has been done in Dutch crushed.

Molasses.—There is no diminution in the demand. Several parcels of West India have sold upon rather higher terms, viz., 18s to 18s 6d for St Kitt's, Dominica, and Antigua. 500 puns new Porto Rico recently obtained 19s per cwt.

Rum.—Less inquiry prevails, and few sales are reported at previous quotations, including Leewards at 1s 6d to 1s 8d; and fair Demerara at 1s 9½d to 1s 10d per gallon proof. About 96,000 gallons are said to have been taken by the Government last week at 1s 7½d per proof gallon.

Cocoa.—Of 663 bags Trinidad in the public sales a fair proportion sold: grey, 67s to 68s; mixed grey and red to superior red, 69s to 86s. 57 bags Grenada brought 60s to 64s. 300 bags good Guayaquil were bought in at 70s per cwt.

Tea.—The market has been dull. On Wednesday, 4,930 packages were brought to public sale, when 3,810 packages found buyers, the quantity being chiefly offered "without reserve." Congous were occasionally ½d cheaper, also common scented capers. The further public sales declared for next week have led to increased caution on the part of the trade.

Coffee.—The public sales have been rather large, but nearly all the quantity offered found buyers at firm prices for plantation Ceylon. 1,120 casks 528 barrels and bags went as follows: fine fine ordinary to middling, 67s 6d to 74s; good middling to good, 75s to 79s 6d. 2,655 bags native brought 61s 6d to 63s 6d for good ordinary to good quality; blacks and triage, 39s 6d to 55s. 74 casks Jamaica realised 61s 6d to 84s 6d for good ordinary to superior coloury. 76 bags African, 75s to 87s. All descriptions are now readily saleable by private contract. A floating cargo of barely good firsts Rio is reported for Trieste at 62s, and one of Santos at 60s 9d for Sweden.

Rice.—At the close of last and commencement of the present week prices again rose 3d to 6d, and large transactions occurred. Subsequently the demand partly subsided, owing to the improvement in the weather, and the above rise has in some cases been lost. Good pinky Madras, which at one time realised 11s 9d, afterwards realised 11s 3d. Bengal has sold at from 12s 3d to 15s; new Necrancie Arracan, 11s to 11s 6d; old, 10s 9d to 11s; Moulmein and Rangoon, 10s to 10s 7½d. By auction, 1,843 bags white Bengal sold from 11s 3d to 13s 6d. Two floating cargoes of Necrancie Arracan have sold at 11s 6d, new conditions, and one of Bassein at 11s 4½d; the latter for the Continent. Pinky Madras afloat realised 11s 9d per cwt.

Imports and Deliveries of Rice to August 25, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons

Delivered	8400	11800	9600	8100
Stock	4400	4050	3250	5030

Deliveries last week 200 tons.

Spices.—270 bags rough Bengal ginger went rather dearer, from 23s 6d to 24s. Cochin declined 5s to 10s, 1,500 cases being fully two-thirds sold at 58s to 101s; small and wormy, 51s to 58s. 95 barrels Jamaica went 3s to 5s cheaper: ordinary to middling, 74s to 90s. 235 cases cassia lignea, 80s to 84s per cwt for second and first pile. 8 cases Penang cloves were taken in at 1s 4d to 1s 5d, and 200 bags pimento at 3¼d to 3½d. By private contract, small sales have been effected in black pepper at last week's rates.

Cochineal.—Of 445 bags in the public sales a fair proportion sold, and prices showed little alteration: Honduras silvers, 3s to 3s 0d; blacks, 3s 3d to 4s 9d; Teneriffe silvers, 3s 1d to 3s 3d; black, 3s 2d to 3s 5d; Mexican black taken in at 3s 5d; silver at 3s 1d per lb.

Lac Dye.—135 chests partly found buyers: good at 1s 3d to 1s 4d per lb. There is not much business doing privately.

Other Dyestuffs.—A parcel of Gambier has been sold for arrival at 17s 6d. The market is quiet. Cutch is firmer, and good quality cannot readily be obtained at 27s. 842 bags by auction were taken in at 26s to 27s. Bengal safflower has sold upon easier terms, viz., 5*l* 12s 6d to 7*l* 12s 6d per cwt.

Drugs.—The most prominent feature to notice in the fortnightly sales yesterday was the decline of about ¼*l* per lb on castor oil, owing partly to large arrivals.

Shellac is rather dearer. Button has sold from 10*l* to 10*l* 17s 6d; livery orange and garnet, 11*l* to 11*l* 2s 6d.

Rubber.—East India has sold at 2s to 2s 0½d per lb.

Metals.—The markets generally are quite devoid of animation British manufactured iron continues steady. Scotch pig has been quiet at 51s per ton for mixed numbers. Only limited sales are reported in foreign tin: Straits, 131s 6d to 132s; Banca quoted 136s. The nominal price of spalter may be considered 20*l* 10s per ton, in the absence of important transactions. Lead remains steady. No change in copper.

Hemp.—St Petersburg clean is steady at 29*l*. More business has been done in Manilla at 22*l* 10s. The jute sales on Wednesday went off with more spirit than of late. 3,800 bales brought full rates, ranging from 13*l* 10s to 21*l* 17s 6d per ton, according to quality.

Linseed.—The market is active. Calcutta and Bombay, 55s to 57s. Large purchases have been made for arrival: Taganrog at 54s 3d delivered; Calcutta, 54s to 54s 6d per quarter for this port.

Turpentine.—Rough, 8s 6d to 8s 9d. Spirits meet a steady sale at 31s per cwt for American.

Oils.—The demand for linseed continues good at 31s. Rape is steady, and foreign refined quoted 48s; brown, 44s to 44s 6d. Moderate transactions are reported in cocoa-nut: Ceylon, 46s 6d to 47s; Cochin, 48s 6d to 49s. The market for palm has been firm, and fine commands 45s per cwt. Olive at length meets with more inquiry, especially common kinds, which have risen 1*l*, ranging from 54*l* to 57*l*; Gallipoli quoted 60*l* per tun. Fish oils do not show any change of importance.

Tallow.—The market has shown a further tendency to improvement, closing 3d to 6d higher than on Friday last. 1st sort Petersburg Y.C., 52s; for delivery in October to December, 52s to 52s 6d; and for the first three months of 1861, 52s 6d to 52s 0d per cwt.

Particulars of Tallow.—Monday, August 27.

POSTSCRIPT. Friday Evening.

Sugar.—The market was firmer to-day, and prices occasionally 6d higher in the public sales, comprising 224 casks St Lucia, 443 casks Barbadoes, and 2,980 bags Madras. 2,368 bags native went 1s dearer, from 33s to 34s 6d for brown. A cargo of clayed Manilla sold for an outport at 24s 9d, and several parcels on the spot. The sales of West India for the week amount to 5,400 casks.

Coffee.—380 casks 304 barrels and 1,327 bags plantation Ceylon sold at rather higher rates, and 332 bags very good ordinary native at 63s per cwt.

Rice.—264 bags old Bengal sold at 11s 6d to 12s per cwt for ordinary.

Pepper.—80 bags common Penang realised 3¼d per lb.

Cochineal.—100 bags Honduras sold at previous rates.

Cutch.—1,800 bags sold at 6d advance: sound, 27s 6d; damaged, 25s to 27s.

Sapan Wood.—150 tons Siam brought 7*l* 10s to 9*l* 5s per ton.

Oil.—100 tuns sperm went at 105*l* 5s to 108*l* per tun. 450 casks of palm part sold at 42s to 45s 3d; 212 casks Ceylon cocoa-nut, 46s to 47s per cwt.

Tallow.—There was less business done to-day, and quotations remain unchanged.

ADDITIONAL NOTICES.

Refined Sugar.—There has been a better market this week in the home trade, and prices are higher. In Dutch crushed 1,200 tons have been bought, for delivery in September, October, and November, at 32s 3d to 32s 7d B & H, No. 1, in barrels; V O, 32s 3d to 32s 6d in barrels; S & T superfine, 32s 6d to 33s in barrels; W & Z, 31s 6d in tierces.

Green Fruit.—Little doing; market quiet, which is usually the case at this period of the year. Some parcels Lisbon grapes, per steamer, sold at public sale, obtained good prices; quality better than usual. No improvement in the price of lemons, weather being against consumption.

Dry Fruit.—The first arrivals of new fruit have taken place this week. On the 27th, new Valencias, per Edina and Queen steamers, were in the market. The price opened at 35s, which is lower to consumers than it ever has opened before. Last year the opening price was 50s. Sales, however, even at this low figure, are limited, though the quality is fair. Old Valentias seem quite forgotten. New currants arrived on the 30th by the London, and on the 31st by the Ossian. Patras and Gulf opened at 40s, and Vostizza, 42s. The quality is good, considering the hurried way in which the fruit has been sent off. Sales are making slowly. At public sales, this week, old currants have been sold "without reserve" at a considerable reduction; 23s was the lowest price made for low fruit; but there is none to be had at that price to-day. Currants are being largely consumed; and the moderate rate of old and new will, doubtless, bring the article more than ever into use this winter.

Seeds.—The supplies of seed are small, and prices keep advancing for most descriptions. The estimate of this year's crop of seeds is exceedingly scanty.

Colonial and Foreign Wool.—The colonial sales finished yesterday, with rather firmer prices than during the previous week, owing to the improvement in the weather. The East India and low wool sales held to-day went off at about previous rates.

English Wool.—No change in demand or prices.

Flax without alteration.

HEMP.—Market steady, the shipments from Russia being considerbaly smaller than last year; the present quotations are very moderate.

COTTON.—Sales of cotton wool from Friday, 24th August, to Thursday, 30th, inclusive:—1,800 bales Surat at 3d to 3 5-16d for ordinary to middling fair Compta, and 4d to 4¼d for fair to good Dhollera; 1,500 bales Madras, 3¼d to 5d for ordinary to good fair Tinnivelly, and 3¼d to 3⅝d for fair to good fair Western. The market continues firm, and a fair amount of business has been transacted, and the full prices of last week have been paid for Surat and Tinnivelly. Rather more has been doing in Western Madras, and prices are in some cases a shade higher. Yesterday, 100 bales Western Madras were sold at public sale at 3¼d to 3⅜d per lb. Market steady to-day: sales, 800 fully fair Tinnivelly, 4⅜d.

SILK.—Silk market quiet during the week; prices firm. New silk to land next week.

TOBACCO.—There has been rather more business done in American tobacco during the past week. Prices remain steady.

LEATHER AND HIDES.—The leather trade of the past week presents no new feature. The business done is again considerable. At Lesdenhall, on Tuesday, there was not much activity, but the supplies of fresh leather were small. There is scarcely any change in prices: no article has advanced, while shaved hides have scarcely realised former quotations. Good common dressing hides, heavy harness hides, and light calf-skins are the articles most scarce and in request.

METALS.—The weather having shown an improvement in the last few days, there has been a better feeling in our market, but the amount of transactions has continued small. Copper is firmer in prices in consequence of more inquiry, but so far the demand has not risen to activity. Iron keeps steady. Tin has been but little done in; however prices show no change. Lead maintains late quotations. Spelter is flat, with more sellers. Tin plates continue rather neglected.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	9
Yellow Russian	53	6
Melted stuff	40	0
Rough ditto	23	6
Greaves	20	0
Good dregs	7	0

Imports this week 2,282 casks.

PROVISIONS.

Fresh arrivals in the bacon market have caused a depression in prices, which now rule from 1s to 2s less. Trade moderate. Foreign butter still arrives in large quantities, at lower rates than our last. Quality good.

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 27.—The total imports of foreign stock into London last week amounted to 10,609; in 1858, 8,931; in 1857, 10,431; in 1856, 11,383; in 1855, 8,372; and in 1854, 10,004 head.

From our own grazing districts the arrivals of beasts were moderately extensive as to number, but deficient in quality. All breeds met a dull sale, at a decline in the quotations, compared with Monday last, of 2d per 8 lbs. The top figure for the best Scots was 5s 2d per 8 lbs. The show of sheep was rather extensive. Prime Downs and half-breds were in fair request, at full prices; otherwise, the mutton trade was in a sluggish state, and, in some instances, the quotations had a drooping tendency. Lambs were in good supply, and heavy request, at 2d per 8 lbs less money. There was a good sale for calves, the supply of which was very moderate, at 2d to 4d per 8 lbs more money.

SUPPLIES.

	Aug. 30, 1858.	Aug. 29, 1859.	Aug. 27, 1860.
Beasts	5836	5210	4410
Sheep and Lambs	26470	27910	27850
Calves	331	212	220
Pigs	330	300	350

THURSDAY, Aug. 30.—A full average supply of beasts was on offer in to-day's market. Prime breeds realised Monday's currency, but inferior beasts declined in value 2d per 8 lbs. Sheep, the show of which was good, met a dull inquiry; Downs and half-breds supported previous rates; other breeds gave way 2d per 8 lbs. We have to report a dull sale for lambs, at a fall in value of 2d per 8 lbs. Owing to large supplies from abroad, calves were very dull, and 4d to 6d per 8 lbs lower than on Monday.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	0	3	2	Prime Southdown sheep	5	4	5	6
Second quality ditto	3	4	4	4	Large coarse calves	3	10	4	6
Prime large oxen	4	6	5	0	Prime small ditto	4	8	5	0
Prime Scots, &c.	5	0	5	2	Large hogs	4	0	4	6
Coarse and inferior sheep	3	6	3	10	Small porkers	4	8	5	0
Second quality ditto	4	0	4	4	Suckling calves...each	19	0	23	0
Prime coarse-woolled do.	4	6	5	2	Quarter old store pigs	26	0	30	0

Lambs, 5s 2d to 6s 4d.

Total supply—Beasts, 1,200; sheep and lambs, 11,100; calves, 750; pigs, 312.
Foreign supply—Beasts, 780; sheep, 2,500; calves, 430.

NEWGATE AND LEADENHALL.

FRIDAY, Aug. 31.—These markets are fairly supplied with meat, and the trade generally is somewhat heavy, as follows:—

Per 8 lbs by the carcass.

	s	d	s	d		s	d	s	d
Interior beef	2	10	3	2	Mutton, inferior	3	6	4	0
Middling ditto	3	4	3	6	— middling	4	2	4	6
Prime large	3	10	4	2	— prime	4	6	4	10
Prime small	4	4	4	6	Large pork	4	0	4	6
Veal	4	0	4	8	Small pork	4	8	5	2

Lamb, 4s 8d to 5s 4d.

HOP MARKET.

BOROUGH AND SPITALFIELDS, Monday, Aug. 27.—The unfavourable weather of the last week has been most injurious to the plant, and the prospects of even a small crop has been proportionately diminished. The duty has receded to 50,000*l*. Our market has been very active for all descriptions, and a further advance of 10s per cwt has been freely given. Mid and East Kents, 170s, 210s, 240s; Weald of Kents, 130s, 170s, 190s; Sussex, 125s, 150s, 170s.

FRIDAY, Aug. 31.—The first pocket of new hops arrived at market yesterday; it has been sold at 22*l* per cwt.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Aug. 27.—Since our last report, the arrivals of potatoes coastwise and by land carriage have been on a liberal scale. Many samples, however, show signs of disease. On the whole the demand ruled steady as follows:—Regents, 100s to 120s; Shaws, 70s to 90s; other kinds, 65s to 70s per ton.

WATERSIDE, Thursday, Aug. 30.—The supplies of this valuable esculent, both by rail and coastwise, are limited, with a good business doing for superior qualities at the annexed prices:—York Regents, from 155s to 180s; Shaws, from 90s to 110s; Middlings, from 60s to 80s per ton; inferior qualities, various.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 3*l* 0s to 5*l* 5s; new ditto, 2*l* 10s to 4*l* 15s old clover, 4*l* to 6*l*; new ditto, 3*l* 8s to 5*l* 0s; and straw, 1*l* 10s to 1*l* 16s per load. A slow trade.

CUMBERLAND.—Old meadow hay, 3*l* 5s to 5*l* 5s; new ditto, 2*l* 10s to 4*l* 12s; old clover, 4*l* to 6*l*; new ditto, 3*l* 8s to 5*l* 0s; and straw, 1*l* 10s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Old meadow hay, 2*l* 15s to 5*l* 5s; new ditto, 2*l* 10s to 4*l* 15s; old clover, 4*l* 0s to 6*l* 0s; new ditto, 3*l* 8s to 5*l* 0s; and straw, 1*l* 10s to 1*l* 16s per load. Trade rather heavy.

COAL MARKET.

FRIDAY, Aug. 31.—Wall's-end:—Hetton 19s 3d—Braddyll's Hetton 17s 9d—South Hartlepool 17s 6d—Kelloe 18s 3d—Eden Main 17s—Gosforth 17s—Brandon 15s 6d—Durham 16s—Newton Main 15s—Holywell 16s 6d—Tanfield 13s—Howard's Hartley 17s—Lambert's Hartley 17s. Ships at market, 41.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 31.—The business done this week has been, as before, on a moderate scale only, and is likely to continue so as long as the weather remains in the present unsettled state. Prices have been hitherto not very materially affected, as the demand has been sufficient to prevent stocks of all current descriptions from accumulating.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 31.—Grain market firm. Wheat and flour in good request at full prices. Maize steady. Beans quiet. All other articles in moderate demand, at unchanged rates. Weather fine.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 31.—There has been little or no alteration in the prices of manufactured iron throughout the past week, and a fair demand has existed. The fluctuations in the value of Scotch pig iron have been trifling in the business that has been transacted, which has been to only a moderate extent. For copper there has been more inquiry. Lead continues dull. Spelter firmer in price.

The Gazette.

TUESDAY, Aug. 28.

BANKRUPTS.

M. Mulrenan, Great Dover street, Southwark, leather dealer.
W. and P. Perrin, Wellingborough, Northamptonshire, boot and shoe manufacturers.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic returns of railways in the United Kingdom for the week ending Aug. 18 amounted to 584,985*l*, and for the corresponding week of last year to 546,285*l*, showing an increase of 38,700*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 255,626*l*, and for the corresponding period of 1859 to 240,861*l*, showing an increase of 14,765*l*.

NORTH STAFFORDSHIRE.—The directors of this company state in their report that, after making provision for bad and doubtful debts, laying aside a reserve of 3,000*l*, and paying every expense chargeable to revenue, they are enabled to recommend to their shareholders a dividend at the rate of 4 per cent. per annum, leaving a balance of 1,040*l* for the next account.

MIDLAND GREAT WESTERN.—The directors of this company have decided on recommending that a dividend at the rate of 5 per cent. per annum be declared for the half-year ending on the 30th of June last.

WATERFORD AND LIMERICK.—The directors of this company recommend that a dividend at the rate of 1 per cent. per annum be declared on the ordinary shares for the half-year ending on the 30th of June, free of income tax.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Aug. 27.—The improvement in the weather caused a general rise in the railway market, especially during the later hours of business. There was no alteration of consequence in colonial stocks and shares. Grand Trunk of Canada was quoted 31 to ½; and Great Western, 12⅝ to ¾. Foreign railways were rather firmer, particularly South Austrian and Lombardo-Venetian, which rallied to I to ⅝ discount. In American railway securities the shares of the New York and Erie relapsed. Illinois Central steadily maintained their late advance. Mines were little dealt in, but closed firmly. Joint stock banks and miscellaneous descriptions were about the same as on Saturday.

TUESDAY, Aug. 28.—The railway market was rather flat owing to the less favourable state of the weather. Most of the leading stocks showed a decline averaging about ¼ per cent. North British, on the other hand, slightly improved. Business was generally limited. In the colonial market, Great Western of Canada shares were in demand in the morning, and advanced to 13; the final quotation was 12⅞ to ¾. Grand Trunk stock was without change at 31 to ½. Foreign descriptions were inactive, almost the only alteration being a decline in South Austrian and Lombardo-Venetian to 1⅛ to I dis. South Australian debentures were 1 per cent. higher. In American railway securities a fresh advance took place in the shares of the Illinois Central. Michigan Central bonds and shares were likewise firmer. Mines were quiet, at an occasional reduction. Joint stock banks were steady, and Australasia advanced 1*l*. In miscellaneous securities, Crystal Palace stock was weaker.

WEDNESDAY, Aug. 29.—In the railway market business was principally confined to the fortnightly settlement, commencing to-day. The stocks chiefly supplied were Great Western and Midland, and a decline consequently took place in the former of ½, and in the latter of ⅜ per cent. Other descriptions were also rather heavy, particularly during the later hours of business. Lancashire and Yorkshire, however, improved. In the colonial stocks, Grand Trunk of Canada receded to 30¾ to 31¼. Great Western shares continued steady. Foreign descriptions were dull, at former prices. South Austrian and Lombardo-Venetian remained without recovery at 1⅛ to 1 dis. In American railway securities a fresh advance occurred in the shares of the Illinois Central, while those of the New York and Erie relapsed. Mines were again without the slightest animation, and in some cases the final prices showed a decline. Joint stock banks left off about the same as yesterday.

THURSDAY, Aug. 30.—There was little doing in the railway market to-day, except in connection with the settlement. No change of importance occurred in the foreign market, and the general transactions were unimportant. In American railway securities the shares of the Illinois Central and New York and Erie, and the bonds and shares of the Michigan Southern, advanced. Mines again presented a dull tendency.

FRIDAY, Aug. 31.—The railway market to-day was better, owing to the improvement in the weather. An advance of ¼ to ⅜ per cent. took place in most of the principal stocks.

MARRIAGE.

On the 23rd August, at Larne, County Antrim, by the Rev. C. Porter, Hugh Crawford Smith, Esquire, Consul of the Argentine Confederation, Liverpool, to Jane, daughter of the late George Whitla, Esquire, J.P., Larne.

A BOON TO NERVOUS

SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

Free for Six Stamps.

ENGLISH, FRENCH, AND

AMERICAN MODE of TREATING DISEASE.—Proving the fallacy of the former, the non-success of the other, and the unequalled efficacy of the latter, as demonstrated in thousands of cases, whereby the sufferer can easily cure himself privately, safely, and at a trifling cost, without the aid of the Faculty with their mineral poisons. The New Mode has been recently introduced into Great Britain by an eminent practitioner, who has studied in the three kingdoms, and holds from each distinguished Titles and Diplomas, including that of the National Academy of Sciences, Paris, who approve the new Self-Cure Discovery, which is sent free to any address on receipt of six stamps by the Doctor's private secretary, Wm. Hill, Esq., M.A., 27 Alfred place, Bedford square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer,

Mr WHITE, 228 Piccadilly London.

Price of a single Truss. 16s, 21s, 26s 6d an 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE

CAPS, &c., for VARICOSE VEINS, and all cases o WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price rom 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London

NO MORE PILLS OR ANY

other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Sherland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Riddington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

VALUABLE INFORMATION.—

GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HOLLOWAY'S OINTMENT AND

PILLS.—Children's Complaints.—While the weekly return of mortality shows a decrease of deaths from smallpox, it displays an alarming increase in fatal cases of measles and scarlatina. Such unfortunate issues would not result were mothers and nurses to rub Holloway's Ointment upon the glands of the neck and upper part of the chest when symptoms of scarlet fever or measles first appear, or even after the eruption has come out. The Ointment, penetrating through the skin to the glands, always stimulates them to throw out a full eruption, which is the safety-valve of both diseases. Holloway's Pills also should be given to lessen the fever, to reduce the irritation of the throat, and to quiet the cough, which are most distressing to all suffering from these complaints.

S. W. SILVER AND CO.,

OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. This snuff is intended for Ladies or Gentlemen who are not Snuff Takers. All letters to William Grimstone, merchant, 52 High street, Bloomsbury.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND

CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row; and Mann, 39 Cornhill, London.

MEDICAL ADVICE.

DR LA'MERT, HONORARY

Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., may be CONSULTED on the Functional Derangements of the Nervous and Reproductive System, and on the various forms of Local and Constitutional Debility, from Eleven till Two, and from Six till Eight, at his residence,

37 BEDFORD SQUARE, London.

The 71st Edition—SELF-PRESERVATION: An Essay on the Secret Infirmities of Youth and Maturity, price 6d, or sent free, in an envelope, by Mann, 39 Cornhill, or by the Author, for Seven stamps.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, Social, and Physical Relations—Happy and Unhappy Unions—Conjugal Anticipations and Disappointments—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence—Its History, Causes, and Moral Consequences—The Sterility of Age.

Dr La'Mert is the only registered and legally qualified medical practitioner who has been engaged exclusively, for upwards of 20 years, in the treatment of these special disorders.

MR LEWIS AND SON,
113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

FREDERICK DENT,
Chronometer, Watch and Clock Maker to the Queen and Prince Consort, and the maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange. No connection with 33 Cockspur street.

POMMERY'S CHAMPAGNE.—
Extra Sorts Creaming and Sparkling.—Agents in London, A. Kniep and Co., 22 Basinghall street; Paris, 18 Boulevart des Italiens.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

LONDON	61 King William st. City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

JULLIEN FUND.
Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchell	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.
Mr John Mitchell, 33 Old Bond street
Mr T. Chappell, 50 New Bond street
Mr W. R. Sams, 1 St James's street

BANKERS.
Messrs Coutts and Co., Strand
Heywood, Kennards, and Co., Lombard street
London and County Bank, Hanover square

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.
April, 25th, 1860.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 72 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Banger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 72 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discoluur with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

TRADE MARK.
BROWN AND POLSON'S
PATENT CORN FLOUR.
The LANCET states,
"This is superior to anything of the kind known."

RECIPE FOR SUMMER FRUIT PIE.—Boil the flour with milk for four minutes, then pour it over the stewed fruit, and brown it in the oven or before the fire. This is very lightsome and much preferred to the ordinary pie crust.—BROWN and POLSON, Manufacturers to Her Majesty the Queen, Paisley, Dublin, Manchester, and 23 Ironmonger lane, London.

DINNEFORD'S
PURE FLUID MAGNESIA
has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.
Prepare by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

DEANE'S TWO-HOLE BLACK PENS
which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity ha induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London Bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.
CHEAP, LIGHT AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.
Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

SEQUELIN'S OIL.—This vegetable preparation is most successful as an instantaneous restorative, strengthening weak hair, opening pores of the skin, most effectual in the growth of hair, eyebrows, whiskers, and monstaches, &c., preventing its falling off, giving also brightness, softness, and keeping its natural colour, and checking the most obstinate baldness in two months. One bottle is sufficient. Price 6s and 10s. The money returned if not effectual. Sold by the Inventor, Sequelin, 40 Wharton street, Lloyd square, W.C., London.

SAUCES.—CONNOISEURS have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper.
Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

SOYER'S SULTANA SAUCE
Relish, Succulante, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

HARVEY'S FISH SAUCE.—Notice of Injunction.—The admirers of this celebrated Fish Sauce are particularly requested to observe that none is genuine but that which bears the back label with the name of WILLIAM LAZENBY, as well as the front label signed "Elizabeth Lazenby," and that for futher security, on the neck of every bottle of the Genuine Sauce will hencetorward appear an additional label, printed in green and red, as follows:—"This notice will be affixed to Lazenby's Harvey's Sauce, prepared at the original warehouse, in addition to the well-known labels, which are protected against imitation by a perpetual injunction in Chancery of 9th July, 1858."
6 Edwards street, Portman square, London.

TO VOLUNTEERS AND THE PUBLIC.
WILSON'S BREECH-LOADING RIFLE.
Mr THOMAS WILSON begs to call the attention of Volunteers and the Public to his New BREECH-LOADING RIFLE, and to state that he has committed the management of the patent to Messrs Rubone Brothers and Co., of 47 Broad street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's service, and is pronounced by the highest authority to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading or otherwise is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly for firing without the aid of tools. This facility would be occasionally valuable in rendering the gun useless to an enemy or mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr Lancaster's, No. 151 New Bond street, and at Mr Pritchett's, No. 86 St James's street, London, as well as at Messrs Rubone Brothers and Co., 47 Broad street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

THE TRADE OF INDIA.

THE CAUSE OF ITS DEPRESSION.

The East India market has become one of such great importance, and especially in regard to our great staple of cotton manufactures, that every event calculated in any degree to affect it must be regarded, even in this point of view, as of national importance. Much has been said latterly as to the comparative stagnation of that branch of trade: we say comparative—because though there has been some decline in it, in relation to the great activity of last year, yet in comparison with any former year the transactions of the present still show an increase. No doubt it is not quantity alone that constitutes a good trade. When the demand is increasing, full, and even rising prices are obtained: when the demand is slackening, although the same quantity as at another period may be sold, yet trade is sluggish and prices generally decline. It would, therefore, be a mistake to accept quantity shipped as an unerring proof of prosperity and good trade. That it is, however, if continued, and speaking generally, a fair criterion, may be conceded.

Opinion has differed much as to what has been the true cause of the sudden depression which has been experienced of late in the India trade. It is, however, with great satisfaction that we learn by the last mail that one, we believe the chief, cause, which has latterly affected that trade, and which threatened at one time, and indeed till very lately, to paralyse it still more seriously, is likely to be soon, if it is not already, greatly modified, perhaps altogether removed. We are well aware that it is a common opinion that the fiscal changes which have taken place in the present year have had some important effect upon the trade. But we apprehend that this view of the case can hardly be sustained by the facts of the case. What have the changes been? By the Customs Act which was passed in Calcutta in the month of February last, the changes in the import duties were two in number:—the first was a reduction from *twenty* to *ten* per cent upon a long list of articles, including haberdashery, millinery, and hosiery, all part of the cotton trade:—the second was an increase in the duty upon cotton yarn from *five* to *ten* per cent.; thus creating a tariff of one uniform duty of ten per cent. This Act applied to the whole of India. But about the same time a change was made by the local Government of Bengal, which applied only to Calcutta, and not to Bombay or Madras. It was of this nature. It appears that by an Act of 1837 it devolves upon the Lieutenant-Governor to fix from time to time a tariff of valuations for all goods subject to *ad valorem* duties, upon which the duties are to be computed. It has been the practice for a revision of this tariff to be made every three years, with a view to correcting the rates according to the change of prices. The rule which has been applied in making these periodical revisions has hitherto been to accept the average price of each article, as nearly as it could be ascertained, for the three preceding years, as a fairer test than the price at the moment. But it must be obvious that it can be no very easy task to fix the precise average price of any article over such a period, and especially when no official record is kept,—and moreover when so many qualities of goods, classed under the same name, must necessarily fall into the average. It must be plain, therefore, that the Board of Revenue under the Lieutenant-Governor could never fix these average prices satisfactorily without the aid and advice of the Chamber of Commerce, formed as it is of the leading merchants, who are men of such high character for probity and honour that their advice may safely be taken upon such points. The periodical revision took place during the last winter, and came into operation about the same time as the new Customs Act. The one applied only to Calcutta—the other to the whole of India. It was natural enough, therefore, that the effect of the one should be confounded with that of the other; especially as it appeared from the discussions which took place in the Legislative Council that it was the intention of the Supreme Government to apply to all India one common tariff of valuations, on the ground that the intention of the Legislature to have uniform duties must necessarily be frustrated, if the duties are computed upon varying values. In framing this new tariff of valuations, we are not aware to what extent the Chamber of Commerce was consulted by the Bengal revenue authorities; but this at least is certain, that it was not to the extent of arriving at an agreement as to the correct valuation, as we believe had been the case on former occasions.

But be that as it may, our present object is to point out that there is on the face of the case the strongest presumptive evidence, that neither the new Customs Act of the Supreme Government, nor the local tariff valuation of the Revenue Board of Bengal, is the main cause of the dulness which has existed for some time in the India trade. We say this, because, according to the commercial advices, which are sustained by our trade returns, the depression has been found to apply as much to those numerous classes of goods with regard to which the import duties were reduced from *twenty* to *ten* per cent., as it has in relation to the important classes of goods subject to the *ten* per cent. duties according to the previous law, and as it has even to the only single article upon which the duty was raised by the last Customs Act. The facts would seem to prove conclusively that it is not to this cause that the depression could be attributed.

In order to show how little the change of duties has to do with the depression to which we have referred, we need only refer to the Board of Trade Tables brought down to the 31st July. First take haberdashery and millinery goods, upon which the duties were *reduced* from 20 to 10 per cent. The

following are the values exported to India in the first seven months of each of the three last years:—

	1858.	1859.	1860.
	£	£	£
Haberdashery and millinery	98,160 ...	122,413 ...	83,552

Next take cotton piece goods, upon which no change of duty has been made. The values exported to India in the first seven months of each of the last three years were:—

	1858.	1859.	1860.
	£	£	£
Cotton piece goods	5,247,187 ...	7,186,084 ...	5,938,485

And lastly take yarn, upon which an increase of duty has taken place from 5 to 10 per cent. The values exported in the same period were:—

	1858.	1859.	1860.
	£	£	£
Yarn and twist	1,086,611 ...	1,524,784 ...	1,167,680

Under all these varying circumstances the effect seems to be nearly the same: indeed, the greatest relative reduction has taken place in the goods upon which the duty has been *reduced*.

Then with regard to the new tariff of valuations. This applied only to Calcutta,—and not to Bombay, where the same valuations are in force still which have been acted upon for some time past without complaint. And yet the depression experienced in Calcutta has been equally experienced in Bombay. If this tariff of valuations had been the cause of the dulness in Calcutta and if that of Bombay had been more favourable, the effect should have been to have given additional life to the latter market in the supply of the North-West Provinces, with which each port has transactions in common.

Our object in making these remarks is not to depreciate the effect of moderate and equitably adjusted duties upon the course of trade. On the contrary, we believe it to be the first duty of the Supreme Government to make every effort to settle these points in the most liberal spirit—in the full conviction that in doing so, they will best consult the true interests of their finances. But our object is to draw attention to what we believe to be the real causes of this depression, in order that a correct estimate may be formed of them and of their probable duration. In the first place, we believe it will be admitted on all hands, that the enormous profits made in the India trade during a portion of last year led to a sudden and large increase of supplies to the market, more than was required for ordinary consumption, as far as this country was concerned, and to a very extensive speculative trade by the native capitalists in the supply of the markets in the interior from the seaports. For example, the exports of cotton piece goods to British India, as shown by the Board of Trade Tables for last year, amounted in 1859 to the value of 12,043,000*l*, against 9,299,000*l* in 1858, and 5,714,000*l* in 1857; —and of yarns the exports were in 1859 2,546,000*l*, against 1,969,000*l* in 1858, and 1,147,000*l* in 1857. For a long time goods were taken off as rapidly as they arrived, and as long as prices continued to rise there was no lack of speculative Mahajans to make purchases and consign to the markets of the interior; and there is no doubt, from the best information we can obtain, that large stocks of goods accumulated at all the markets of the North-West. Upon this point the testimony from Mirzapore, Allahabad, Lucknow, Agra, Delhi, Umritsur, and Lahore, is uniform. At the same time there is as little doubt that the practice of consuming English manufactures, in lieu of native fabrics as hitherto, has enormously increased, and must in the main continue to increase, not only on account of their superior appearance, but greater cheapness. That is a point upon which we believe the most minute inquiries leave no doubt whatever. It may, therefore, be considered certain that had no other causes intervened, the glut in those markets which took place in the early months of the year would long ere this have disappeared.

What were those causes? We have taken great pains to inquire into this subject, and we believe the following explanation may be implicitly relied upon as the correct one. The autumn crops of 1859 throughout Northern India were undoubtedly much below an average. The drought which prevailed less or more everywhere, affected both the quantity and the quality of the crops. The consequence was a very high range of prices through the winter and spring, which has latterly been still more aggravated by threatened scarcity of no ordinary kind. We all know by the experience of the past the effect of high prices of food at home. They circumscribe the power of the people to consume other articles by abridging or altogether destroying the margin of income above that which is required for the absolute necessaries of life. The same effect, no doubt, has been produced in India. But to aggravate this cause of depression in trade, came the usual companion of scarcity and high prices—disease. Throughout the whole of the North-West the cholera prevailed to so alarming an extent among the densely-peopled cities, that the ordinary business of life was in many cases suspended, and the population fled as from an invading enemy. To add to all these calamities, Upper India was threatened for a month or six weeks before the departure of the last mail with a misfortune more appalling than all. The rains upon which alone the autumn crops depend usually fall by the middle or at latest the end of June. This year up to the middle of July not a drop of rain had fallen. From the North-West frontier down to Lower Bengal; from the Kyber Pass to Benares, including the great Doabs of the Sutlej, the Jumna, and the Ganges, all was one arid, hard, and immoveable surface of parched earth. It was only in the few exceptional places which were moistened by the rivers passing through them, or by the tributaries of the two great irrigation works, the Jumna and Ganges canals, that any cultivation was possible. The prospects of a famine equal to that of 1837-38 created on all hands the greatest apprehension. Prices rose still more. Cattle were dying in numbers or being drawn to the hills, in place of tilling the soil, and the people are described as being on the borders of starvation.

These we believe to have been the main causes of the depression of trade to which we have adverted—causes quite sufficient to account for it. Fortunately, however, according to the telegraphic accounts received and published at Calcutta during the eight days previous to the departure of the last mail which left on the 27th of July, it seems that at the eleventh hour rain had fallen copiously through the whole of the districts which we have now described; thus averting one of the most awful calamities to which a dense population can be exposed. But, though the rains have come in time to avert a famine, it is still doubtful whether they have come in time to secure good crops. The instant effect, however, had been a large and sudden fall in the price of rice, and "more "inquiry for goods," with an increase of confidence in the future. But though an appalling misfortune had been thus averted, and the danger of extensive ruin among the native commercial classes had passed away, it would be premature to build very sanguine expectations as to any very great activity in trade for some time to come. But at least we may congratulate those connected with the trade of India that they have escaped from what might otherwise have been very serious losses.

But while we thus draw attention to these causes immediately affecting trade, we trust that the questions connected with the tariff, whether it be of valuation or of duties, will not fail to secure from the Supreme Government the attention they so well deserve. We learn that upon an appeal from the Chamber of Commerce, the Supreme Government have allowed the duties to be received subject to adjustment, in accordance with the decision of a Committee which has to meet, and in which will be represented the Revenue Boards of Calcutta, Bombay, and Madras, and their respective Chambers of Commerce. The Supreme Government, it appears, have another object in convening this Committee. While it will settle a fair tariff of valuations to be applied equally to all parts of India, it will also settle upon uniform terms and denominations in which entries of goods must be made. At present the practice is most inconvenient. In one port the same articles are charged by weight, in another by measurement;—in one port Indian weights and denominations are used, in another English. And thus the practice is so dissimilar, that no comparison can be made between one and another with regard to the same thing without going through the most intricate calculations. Another avowed object of this Committee is to frame and agree upon a common form of Trade Accounts to be published for each port and for the whole of India monthly, similar to our Board of Trade Returns. Thus the Supreme Government hopes to introduce one uniform tariff—uniform terms and designations—and uniform Trade Accounts, for the whole of India, in lieu of the

ectional and disjointed systems which have hitherto prevailed.

THE TRUE RULES OF BILL-BROKING.

No trade can be more important than that of bill-broking. On the one hand, there are in this country immense accumulations of capital, which are being augmented every day, and for which it is requisite to find an increasing supply of secure and remunerative employment. On the other hand, there is likewise in this country an almost unprecedented demand for capital. The persistent energy, well-regulated enterprise, and steady industry which we have in England, are probably altogether unexampled. Nothing at all like them exists in France or in any other continental country. Our traders are ready and willing to employ all the accumulations of our national capital in increasing our trade. All we want is a safe channel for conducting the business—an expedient for lending money to those traders who can and will repay it, and to no others. And bill-broking is such an expedient.

In fact, bills of exchange *must* be somehow or other a good security. Experience proves that they are so. Enormous sums are lent on them, are paid, are lent again. We are occasionally surprised at the number of bad bills which some of our great bankruptcies disclose, but, after all, the per centage of bad bills is very trifling. The real wonder is the number of good bills. The really surprising consideration is, that so much money could be safely lent, *without any specific property being pledged for its repayment*, upon the mere credit of very probably not more than two persons, who are almost always engaged in business, very probably in very large business—whose liabilities are considerable—whose balance sheet is unseen—whose transactions are unknown to the lender. A cursory theorist would pronounce such loans to be impossible.

In truth, however, there is a very conclusive reason why such loans should be good. For the most part it is the interest of the borrower that the security should be good, and he has the means of making it good. All legitimate bills of exchange are based on "goods sold and delivered"; it is the interest of the seller to sell to persons who will pay him; if he does so, the bills which he takes will be good and will be paid. If he uses due caution before he parts with his property—if he makes proper inquiry—if he keeps his eyes and ears open to the current transactions *of his own trade*,—the bill will almost certainly be a good one. The real reason why so much money is safely lent on bills of exchange, is not that the lenders have any infallible discernment—not that bankers and bill-brokers have any very effective means of detecting bad bills, though of course they have some means—not because a careful judgment was exercised at the *creation* of the bill,—but because the seller of the goods sold them to a person whom he believed could pay—because, in a word, in each instance the self-interest of a person who had very fair means of making the security good, took care that it should be good.

It is evident, however, that this reasoning is applicable solely to what are called "legitimate" bills, to bills, that is, for which real goods have really been sold: to any other kind of bill it has no reference whatever. On the contrary, every bill which pretends to this character without being entitled to it, is very probably bad. A trader who brings an "accommodation" bill to be discounted is probably worth nothing, and a person who lends his name to such a bill is probably worth less than nothing. Such a trader does not inquire whether the acceptor of the bill can pay it, for it is never meant that he should pay it. The only question in such a trader's mind is "will the credit of *this* acceptor's name induce the banker to discount this bill for me?" If the bill can be "melted," as the market phrase is, he cares for nothing more. Side by side, therefore, with an immense majority of bills which are nearly sure to be good, there are likewise a small minority of bills that are nearly sure to be bad; and the difficulty of bill-brokers is to discriminate between them.

The importance of making the distinction is very great—greater even than an ordinary trader could at first perceive. A banker, and a bill-broker still more, cannot afford to make bad debts. An ordinary trader who obtains a trading profit of 20 per cent., or whatever it may be, on the goods he sells, can afford to make some bad debts; but a banker who only gets the bare *interest* of money, five per cent., or whatever it may be, cannot afford to do so. A Lombard street bill-broker can afford it still less. A banker gets, speaking generally, much money for nothing; but a bill-broker pays a high rate of interest for every sixpence which is left with him; and, although a bill-broker may sometimes charge a commission as well as interest on the bills he discounts, he has no regular profits from thence equal to those which the banker derives from his commission on large and fluctuating accounts current. It is of the utmost importance, therefore, to the bill-broker to discriminate between good bills and bad. If he fails in doing so, he may very easily lose not merely the profits he hoped to make, but also some of the capital with which he started. The cardinal rule—the rule without which all others are useless, and with which all others are half unnecessary—is not to advance extraordinary amounts on the credit *of single names*. It might seem that this was too obvious to need mention—that no one would ever violate a rule of which the reason is so obvious. But a little practical experience would soon show that there is no rule which in real business it is so difficult to observe. In the first place, there is the great practical difficulty of saying what is "an extraordinary amount." An amount which would be extravagant for one person, would be perfectly suitable for another. The limit is in each case a difficult matter of practical judgment, on which no theoretical line can be drawn—which must be left to the anxious prudence of the experienced man of business. And that prudence will not always be popular. It will be called "old-fashioned," "gone by." Young men will say, "Messrs Streatfeild—first-rate house—good, sir, "for *any amount*." And yet experience in the end will show that they are not good.

Not to rely for very large sums on the unsupported credit even of the best firms is the first maxim of bill-broking; and to determine the limits in each case will always be a delicate question, not to be solved correctly without a practised judgment, an habitual attention, and a disposition to caution, which must be given by nature, and which also require to be educated by long, careful, and, in some respects, painful experience.

The first rule has, however, one great advantage. Acting upon it is entirely in the power of the bill-broker. He knows what he has advanced, and he need not go beyond the amount he thinks best unless he chooses to do so. But our second rule has not that advantage. A bill-broker should not discount any extremely large amount unless he has some reason to believe that he knows something like the amount which the person for whom he is discounting discounts *elsewhere*. We are well aware of the very great difficulty of acting on this rule in practice, especially at present. In former times a trader had a sort of agreement with his banker to discount for him to a certain extent; he was not permitted by his banker to exceed that extent, and he ordinarily discounted no bills elsewhere. But at present many firms of excellent standing discount their bills wherever they can get them discounted at the cheapest rate, and in such cases it is excessively difficult to say how much they are under discount on the whole. Good men of business do not like to be asked questions on the subject; and fraudulent persons—the persons against whom all rules are especially intended to guard—will readily give false answers to all such inquiries. Nor can such false answers be very easily checked. All money-lenders, bankers, bill-brokers, or whatever they may be called, are in some sense rivals of one another. They do not now communicate, and are not likely hereafter to communicate, very freely with one another. We know that the difficulty of obtaining accurate information is extremely great. And in ordinary cases we should not think it necessary. If a bill-broker only discounts on the credit of a particular person what he thinks to be with reference to the means of that person a small or moderate amount, it would be needless trouble to take extreme pains to inquire how much that person had under discount in other places. But when a bill-broker has to deal with large figures and with very important names, we think he should satisfy himself as to the amount which has been advanced to the trader in question by other money-dealers as well as by himself. And if he find that he cannot obtain credible and satisfactory information on this subject, he should confine

his own discounts within reasonable and moderate limits. He should not advance great sums on the credit of individuals, unless he *believes* he knows approximately, if not exactly, to what extent they are using their credit to obtain advances from other lenders. And in acting on this rule as well as on the last, a cautious bill-broker will consider not only the amounts which are actually under discount *for* a particular person, but likewise those which he has advanced to other persons upon his acceptance, or upon bills with his endorsement. A bill-broker will consider how much he is relying upon the credit of the person in question: for the purposes of which we are speaking he will not regard the form in which such credit may have been given.

A third rule (the last general one which we shall now mention) is one which is simple in statement, but is much contested in practice. A bill-broker should endeavour to have as many names on the bills he discounts as he can. In former times—especially in particular parts of the country—there was far less difficulty in so doing than there is now. In Lancashire especially, and to some extent elsewhere, bills of exchange passed commonly from hand to hand as currency, and became covered with names as they went along. But now more convenient forms of currency—bank-notes and cheques—have almost superseded bills, and it is comparatively rare to find any that have upon them any very great number of endorsements. In practice, the most effectual expedient by which a bill-broker can obtain the largest number of good names to a bill is the expedient of *re*-discount. He can discount for bankers or other money-dealers bills which the latter have themselves discounted for their own customers. The Bank of France has made a strict rule on this subject. It will not take any bill unless it has three names on it. The consequence is, that other money-dealers discount bills with two names, and the Bank of France rediscounts them with the endorsement of these money-dealers. In this country the practice of rediscount has been brought into disrepute by two causes. First, in former times, banks in agricultural districts, who ought to have brought *money* to London, lent more than they could safely do in their respective localities, and brought the *bills* to London for rediscount. In such cases the presumption was that the bills were questionable, and that the bank's business was incautious. An agricultural district is in the present times especially a saving district; it cannot employ its own accumulations safely, and should in consequence send them to London. If, instead of so doing, a bank situated in such a district employs all its funds there, and sends bills to London for rediscount in order to gain more funds still, the irresistible presumption is that it is doing an unsound business. In former times this was done to a considerable extent, and was one cause for the unpopularity of the very name of rediscount. A second cause was the sort of business which was disclosed in the panic of 1857. It was then too much the practice in Lombard street—at least such is the common belief—to rediscount for such banks as the Borough Bank of Liverpool and the Western Bank of Scotland whatever bills they chose to send for that purpose. It was too much the practice to look solely to the bank, instead of looking to the bank as one of the endorsers, and of considering its credit in conjunction with that of the other names on the bill. A bank's indorsement has no particular virtue in it; bills which bear it must still be subjected to the ordinary rules of bill-broking. They should particularly be subjected to the rule to which we referred before. A bill-broker should not rediscount for any bank too much of any one man's paper; if he does, he is relying solely on the bank, and not on the credit of the bank's customer. He should so shape his operations, that *if* any calamity should happen to the bank, he should not have in his hands any more of any one person's acceptances than it was reasonably probable that person would be able to pay *from his own means*. In that case, the bill-broker would not lose a material sum—would not suffer even a large "lock-up" from the failure of a bank. The great majority of the bills rediscounted would be paid by the acceptors of them, and the bill-broker would only have to look to the bank for the exceptional minority which were not so paid.

On this subject we have still something to add, but we have exceeded our customary limits, and perhaps outstripped the patience of our readers, and we shall therefore postpone what more we have to say till next week, or the earliest opportunity that we can obtain. We do not apologise for directing the utmost possible attention to this subject at the present time. Frequent failures seem to warn us that the existing mode of giving credit is not entirely perfect, and we think it therefore of great moment to discuss at length the precise conditions under which credit ought to be given.

THE AUSTRIANISING LIBERALS.

There is a considerable section of the Liberal party who, like Mr Horsman and Mr Kinglake, are so much disgusted with France,—so profoundly, and we think justly, convinced that the most natural and perhaps the only enduring Continental alliance for England would be one formed with constitutional German Powers,—that they are already eager not only to see our Government confiding in the genuineness and thoroughness of the constitutional reforms recently initiated in Austria, but even to employ the moral influence of the English Government in order to preserve to Austria her Venetian possessions. That Lord John Russell has, indeed, already done his best to restrain the Sardinians from any rash attack on Venetia we are glad to believe; but we are glad only because we feel quite sure that the English Minister is prompted by no motive so strong as sympathy with Sardinia, and the newly-forming Italian Kingdom, in the representations which he has made. He believes, and quite justly, that a hasty offensive movement against Venetia, supported by Italian troops alone,—unless, at least, it were also backed by a Hungarian revolution which should divide the forces of the Empire,—could not, even though directed by the genius of Garibaldi, have the remotest chance of success. And he knows that if the attack were once made, and had failed,—nothing could prevent a reaction in which probably all Italy would be involved. In Austria itself such a victory would give strength to the despotic and aggressive party; and, unless resisted by France, her Generals would not lose the opportunity for retrieving the ground lost in Italy. Nay, even if prevented by France from breaking bounds in pursuit of the defeated foe, France would thereby acquire almost a right to dictate her own terms,—and what these terms would be we know enough of the Emperor's Italian policy to predict. All this is so true, and so likely to be soon forgotten by the Italians in the flush of their success, that we cannot regret that Lord John Russell's influence should be earnestly exerted to restrain Piedmont from encouraging or permitting any hasty and ill-advised attack on the Venetian territory. But we should, indeed, protest against this use of the English influence abroad, did we conceive that it were employed, as many of our Germanising Liberals would certainly have us employ it, in convincing Piedmont that Austria *ought* to keep Venetia, that it is essential to the independence of the Austrian Empire, and that the most we can ask from her is that she shall govern it without cruelty. On the contrary, we hold with the most profound conviction that Venetia can never be anything but a source of constant weakness, both civil and military, to Austria;—that if she is to keep it at all, she *must* grasp it with a grasp of iron;—and that England ought never to enter into any cordial relations with Austria, or place any confidence in her constitutional aspirations, until, besides throwing off the manacles of the Papal Concordat, she has either sold or been stripped of this exhausting appendage to her Empire, which at once fatally increases the tremendous deficiencies in her revenue, occupies her armies with a perpetual siege, and is a chronic incentive to tyranny which cannot but react on the temper of the home administration at Vienna.

Let us consider the arguments adduced by our English Austrianisers to reconcile English principles with the continued subjection of Venetia to Austria and its severance from the Italian Kingdom.

It is said, then, that unless we are willing to lay down that identity of language and race, and geographical position, are the only things which deserve to be taken into account as determining the limits of an independent State,—unless, in fact, a position be granted which would rob England of Malta, Gibraltar, Ireland, and India,—then there is as good a case for Austria's tenure of Venetia, as for the presence of any foreign yoke over a people alien in blood and language. This astounding assertion is made on the ground that the Italian slopes of the Austrian Tyrol (which is

included in the German Confederation) cannot be safely preserved if once the Quadrilateral is given up; — that the Quadrilateral itself is an indispensable defence to the German territory,—that the independence of Switzerland is of primary importance to Europe, and that Switzerland is 'outflanked if uncovered by the Quadrilateral,'—that the loss of these fortresses must necessarily be followed by the loss of the opposite bank of the Adriatic, which would lay open the very heart of Anstria to its enemies, and, in fine, that Austria would thus lose both in real strength and in weight in Europe.

Now, we need not say that we should be the last to adopt geographical continuity and identity of race as the true test of separate nationality. It would be simply ludicrous to adopt such a basis of argument as this in reasoning with practical people. There are many distinct races, with well-defined geographical limits too, which will find their highest welfare in being absorbed among a people of more practical and political genius. The very highest of nations have arisen from the fusion of a conquering with a conquered race,—the English among the number. What, then, are the tests which take Venetia out of the scope of this class of reasons?

We conclude it may be assumed that at least *more* consideration is due to the welfare of the subject people than to that of their conquerors. Could it be proved to the satisfaction of any large number of thoughtful Englishmen, that by abandoning India, or even Ireland, to the self-governing powers of the native population, we should confer a great political and moral boon on those countries,—a strong party would almost immediately spring up in Parliament in favour of these measures. We do not say that such reasonings would be at once victorious. Public pride, the passion of empire, would blind many of us in spite of the most startling evidence, and we should struggle long before we could accept the lesson. But a party, and a strong one, would soon form itself, and would yearly gain strength in favour of these measures, if all the evidence that is worth attending to were not in the most convincing manner opposed to such a conclusion Now will any man venture to say that this is true of Venetia?—that it is better for Venetia itself to be under Austrian rule, than to be united to a free Italy? The mere supposition is absurd. If there is one province in Italy which more than another is competent for self-government, is able to add stability and wisdom to the self-governing power of the rest of the Peninsula, that province is Venetia. It never belonged to Austria before the treaty of Campo Formio in 1797. The traditions of self-government have never completely died out in Venetia, and in 1848 the spirit, vigour, and self-restraint showed by the province of Venetia was paralleled nowhere else in Italy. If any province of Italy is conscious of the power to use freedom well,—that province is Venetia.

If, then, there be any weight in the arguments of the Austrianisers, they must go on this ground explicitly;—they must concede that the true interests of Venetia are absolutely sacrificed, and those of United Italy are endangered, through the occupation of Venetia and the Quadrilateral by an Austrian army; but they must assert that, for the sake of Austrian independence, that sacrifice is justifiable.

Now can any Englishman seriously attach more importance to the strength and independence of Austria, than to the strength and independence of a united Italy? Granting for a moment,—what we believe to be wholly false,—that Austria does gain by the possession of Venetia in military strength and European importance,—is there no reverse to the argument? What she gains, she gains at the expense of the Italian Kingdom; that is admitted. If the Quadrilateral is so important to Germany, it is in order either to attack Italy, or to defend Germany from the assault of Italy. Which alternative is the more likely, and the more anxious for an English statesman? Is there much chance that Italy, once united and constitutional, after her long sufferings from foreign domination, will begin to revenge on the Teutonic invaders what she has suffered at their hands, and to establish an Italian Kingdom in South Germany? Is that an alternative to provide against? Is it not, on the other hand, expressly because the Quadrilateral threatens Italy, because Victor Emmanuel will never be safe on the throne of Italy while Verona and Mantua are garrisoned by Austrian troops, —on this account far more than even for the sake of Venetia alone,—that we all wish to see Venetia wrested from Austrian hands?

As to Switzerland, we know not any reason why Switzerland should be safer with Austrian troops in the Quadrilateral than with Italian. If any Power is likely to respect Switzerland, and unlikely to venture on encroachment in that direction, were its respect for Switzerland ever so small, it is such a Power as we may hope to see in constitutional Italy.

But we entirely deny that it is the interest of Austria to keep Venetia. The Italian Tyrol belonged to Austria long before Venetia, and being in the main content enough under her rule, and even attached to it, there is no pretence for wresting it from her. And with the Italian Tyrol in her hands, Austria and the German Confederation are as safe as military strength can make them. It is simply idle for the Power that holds the passes of the Rhetian Alps, and possesses all their Southern slopes, to talk of military self-preservation as an imperative reason for holding also Venetia and the Quadrilateral. The pretence is even less honest than that put forth by France for taking Savoy. Sardinia keeps at least the Italian slopes of the Piedmontese Alps,—but even if Venetia were gone, Austria would hold both the passes and the Southern slopes which give her access into Italy, and which bar access into Germany against an Italian invader.

And, for the rest, what would not Austria gain by sacrificing Venetia?—the good-will of England,—the full confidence of the Liberal party in Prussia as well as of the Prussian Conservatives,—and the power to hold Hungary, which she must otherwise in all probability sacrifice. She would gain the purchase-money of a rich province, save an enormous annual expense, and regain a large army for her self-defence in the North. The English Austrianisers are doing Austria no service by their excuses for her Venetian tyranny. The day on which she should abandon Venetia would be a day of resurrection for the Austrian Empire.

POLITICAL COMPROMISES IN THE UNITED STATES.

THE PRESIDENTIAL ELECTION.

Lord Macaulay, in one of his essays, represents compromise as of the very essence and life of all political action. But never was this maxim illustrated in English politics as it is now illustrated every year in the democratic constitution of the United States. The main art of every political agitator in that great political arena is to discover some fresh modification of party-standards by which a common platform may be found for distinct parties. The reason is not far to seek. The Union itself has long been a gigantic compromise between States of diametrically opposite principles and institutions. The cry of preserving the Union at all hazards has been combined with both the Southern and Northern creeds; —combined with the Southern creed, it has resulted in the various forms of conservative democracy; combined with the Northern creed, in the various forms of conservative republicanism. The former party have owned themselves favourable to slavery, but conceded as much as possible to the prejudices and opinions of the North; the latter have avowed themselves unfavourable to it, but conceded, as the condition of prolonged union, various demands made by the State-legislatures of the South. And infinite varieties and shades of each form of compromise have sprung up,—ranging, on the one hand, from the disunionist party in the South, to the Breckenbridge, Bell, and Everett Whigism which is now trying to effect a coalition with Mr Douglas's democratic creed; and on the other, from Mr Abram Lincoln's party, who represent the spirit of compromise among the republicans, to the most impatient and audacious of the immediate abolitionists.

We do not wonder at, though we lament, the tenacious vitality which the spirit of compromise shows under such circumstances. To an Anglo-American, we must remember, love for the Union is equivalent to patriotism itself. Anything that endangers the federal bond, as much endangers the native country of the Anglo-American, as an invasion of Scotland would endanger England. Slavery is a prolific iniquity enough,—but it requires men of no ordinary type of mind to desire to put an end to it at the risk of lessening the whole force, dignity, and moral influence of their country by

a civil war and a disruption of the tie between North and South. Mr Hawthorne, perhaps the most distinguished literary man whom the States have yet produced,—himself a democrat, and the friend and biographer of President Pierce,—has expressed with remarkable clearness the attitude of mind from which those who think *first* of the greatness of America, and *next* of political principle, view the Slavery difficulty. He says:—

"With his [General Pierce's] view of the whole subject, whether looking at it through the medium of his conscience, his feelings, or his intellect, it was impossible for him not to take his stand as the unshaken advocate of Union, and of the mutual steps of compromise which that great object unquestionably demanded. The fiercest, the least scrupulous, and the most consistent of those who battle against Slavery recognise the same fact that he does. They see that merely human wisdom and human efforts cannot subvert it except by tearing to pieces the constitution, breaking the pledges which it sanctions, and severing into distracted fragments that common country which Providence brought into one nation through a continued miracle of almost two hundred years, from the first settlement of the American wilderness until the revolution. In the days when a young member of Congress, he first raised his voice against agitation, Pierce saw these perils and their consequences. He considered, too, that the evil would be certain, while the good was, at best, a contingency, and (to the clear, practical foresight with which he looked into the future) scarcely so much as that, attended as the movement was and must be, during its process, with the aggravated injury of those whose condition it aimed to ameliorate, and terminating in its possible triumph,—if such possibility there were,—with the ruin of two races which now dwelt together in greater peace and affection, it is not too much to say, than had elsewhere existed between the task-master and the serf. Of course, there is another view of all these matters. The theorist may take that view in his closet; the philanthropist by profession may strive to act upon it uncompromisingly, amid the tumult and warfare of his life. But the statesman of practical sagacity who loves his country as it is and evolves good from things as they exist, and who demands to feel his firm grasp upon a better reality before he quits the one already gained,—will be likely here, with all the greatest statesmen of America, to stand in the attitude of a conservative..... *And if the work of anti-slavery agitation, which it is undeniable, leaves most men who earnestly engage in it with only half a country in their affection,—if this work must be done, let others do it.*"

This same feeling which was so strongly at work when these words were written in 1852, has since been, and is still, on the increase,—and has produced a greater variety of modifications in the compromise between abstract attachment or dislike to Slavery, and fixed determination to keep the various States together in a single federation, than were ever conceived during a far longer period of time in any other political world. It has at last led men as earnest in opposition to Slavery as Senator Seward, and, we trust, the republican nominee for the Presidency Mr Abram Lincoln, to use expressions implying that they would not attempt to undermine, but rather acknowledge and sustain the institution of Slavery within the strict limits of the Slave States,—expressions which, if used honestly by them, would destroy the whole moral strength of their position. Mr Abram Lincoln is reported in our last despatches from the United States to have stated "emphatically that it was not his principle to touch "slavery where it exists, but to prevent its spread into ter-"ritories now free. He would protect the South in its insti-"tutions as they exist. Southerners did not comprehend the "position of republicans in regard to slavery:"—and Mr Seward is known to have frequently used language only too similar, though often also language quite inconsistent with it. Surely these gentlemen must see, or ought to see, that their only tenable ground as statesmen is to proclaim themselves,—not indeed for immediate abolition as the alternative of disunion, which would be as unstatesmanlike as it would be impracticable,—but for a series of measures all tending to a final, though gradual, extermination of the institution, as the alternative of disunion. If anything short of this be accepted by the republicans, they at once admit, with their opponents, that the Union is more important to them than the social principles which they advocate,—and this admission once made, it is a mere matter of arbitrary individual choice how much or how little concession they shall make to their opponents for the sake of truce.

We are still more concerned to see that this panic of patriotic zeal to avert the dangers of disunion should be driving such a man as Mr Everett into a coalition with the Douglas party. Something better might have been expected from him. Now, as it seems, he has come to terms with the creed of the party whose organ dares even to assert that the opponents of slavery oppose it simply in the spirit of license, and on the same ground on which they would advocate the dissolution of all moral bonds,—domestic, social, or political. The *New York Herald* writes thus:—

The same theory—freedom of human action—underlies all these movements. It is freedom for one man to appropriate the property of another; freedom for the slave to change his master; freedom for the child to refuse acknowledgment of parental authority; freedom for the wife to break her marriage vows whenever she elects to do so; freedom, in fact and in act, from all moral restraint.....Thus, if Lincoln is elected, he is to be considered as the chosen exponent of the idea that if any or all of the four millions of negroes held, according to ancient usage and modern local law, to service in the Southern States, become dissatisfied with their masters, they may of right take any means to put an end to the existing order of things in that section of the country. This most dangerous doctrine once admitted, there are no bounds by which it may be limited. All human authority may be defied, and men and women may give free and unrestricted rein to their unlawful desires. Liberty then becomes another name for license, and freedom means anarchy, civil war, and excess of all sorts.

And this is the organ of a party with which such men as Mr Everett, who lectures Lord Grey on his degrading misrepresentation of American politics, are not ashamed to unite! The spirit of compromise has so corrupted all the springs of American politics, that were it only for the sake of the new liberty which politicians would gain in speaking out their true principles, we should almost rejoice over a dissolution of the Union,—unless, indeed—and this we dare not hope—the republicans can gain so decisive a victory as will enable them to override the South—at once to limit and undermine slavery, and also to resist all attempts at disruption.

CAUSES OF THE LATE DEPRESSION IN SHIPPING.

The following extract from the Report of the Select Committee on Merchant Shipping will be interesting to our readers. The Committee shows, what has often been explained in the Economist, that the depression which lately existed in the shipping trade resulted not from the abolition of protection, but from other causes which they enumerate. We hope that, as freights have now much improved, we have heard the last of the futile lamentations of the shipowners over the loss of a protection which all the intelligent among them *know* can never be regained.

"But with these advantages in our favour, various causes since 1850 have conspired to interfere with the successful prosecution of shipping adventure. The Act of 1849, by throwing open the trade with our colonies and possessions, and by surrendering to foreigners privileges which British shipowners exclusively enjoyed, has, in the opinion of many of the witnesses, dealt a heavy blow to existing shipping interests. Whatever may have been the result of the policy of the Legislature, viewed in relation to the general interests of the empire, it could hardly be expected that those parties who considered themselves especially prejudiced by the change, would be convinced of its expediency and justice. And they have incessantly urged their complaints against those legislative arrangements which many of them still continue to denounce.

"Whatever foundation may exist for the complaints of those who impeach a policy which was only sanctioned by the Legislature after great deliberation, it appears that other causes in addition to those already mentioned have very materially tended to bring about the depression of shipping which now prevails. About the period when the Navigation Laws were repealed, the discoveries of the existence of gold in unparalleled abundance in the American hemisphere, and

in Australia, imparted a new excitement to shipping enterprise. A vast emigration and commerce thereby suddenly stimulated, caused a corresponding demand for shipping of the best class, and freights advanced considerably from their previously depressed state. The construction of larger ships of a greatly improved character was eagerly prosecuted. Capital was attracted towards numerous undertakings connected with shipping; inexperienced parties embarked in the business; and the building of vessels was promoted by speculative investments, resting not unfrequently upon an unsound system of banking. A serious reaction had commenced, when in 1854 France and England became involved in a war with Russia, and the sudden and extraordinary demand for shipping thence arising caused a rise in freights, so great that, in many instances, proprietors of first-class vessels realised fabulous profits. The demand for transport ships of all kinds at that time, and the diversion of these high-classed vessels from the ordinary channels of trade, which continued uninterrupted during hostilities, necessarily reacted favourably upon other descriptions of tonnage. All the witnesses admit that the business of a shipowner was, throughout that period, in a high degree prosperous. Excessive profits again encouraged excessive speculative adventures in shipping and ship-building. But, at the conclusion of the war in 1856, a great relapse occurred, and since that period no revival worthy of notice, until very recently, has dispelled the gloom which lowered over the fortunes of the shipowners.

"During the progress of the events to which we have thus rapidly adverted, the causes which operated upon British shipping having been of a general and world-wide character, extended their influence to foreign shipping. The opening of the ports of England, and of her colonial possessions in 1850, to the unrestricted competition of her maritime rivals, created a new and extensive field for their exertions. Capital invested in foreign shipping received a large accession. Foreign shipowners participated to a great extent in the vast increase of business resulting from the gold discoveries, which, as regards Australia, would have been otherwise confined to our own shipowners. The profits realised during the war in the Crimea, encouraged foreign shipowners to renewed efforts. Enormous additions were made to their tonnage, whether called into existence by the policy of Parliament, or by the operation of political and commercial events during the last ten years. At the termination of hostilities in Europe the superabundant tonnage of every foreign country was brought into competition with British shipping, and thereby aggravated, in a high degree, the evils of which British shipowners at present deplore the effects.

"Your Committee have had evidence placed before them showing how much the repeal of the Navigation Laws has augmented the foreign shipping frequenting our ports, as indeed might naturally be expected, for foreign ships were excluded altogether from many branches of our trade previous to 1849. It appears also that, although within the last ten years British shipping has increased absolutely to a much greater extent than during any corresponding antecedent period, its comparative increase has not kept pace with that of the foreign shipping employed in our home trade and in that of our colonies and possessions, and some remarkable instances are adduced of the great augmentation of foreign shipping frequenting our ports.

"It has been urged by many witnesses that, whilst British shipowners since 1850 have not increased the number of their ships in a degree proportionate to the natural and ordinary increase and requirements of our own country, foreigners, on the contrary, by a great over-production of shipping—brought into existence not to meet a correspondent advance in their own maritime commerce, but expressly for employment in those branches of the British carrying trade to which they were admitted by the repeal of the Navigation Laws—have contributed to overwhelm all branches of the carrying trade with a supply of tonnage far in excess of the demand for the general commerce of the world. A very serious depreciation in the market value of British, and also of foreign shipping, has undoubtedly taken place; but your Committee feel that this decline in value is mainly attributable to the excessive amount of tonnage which has been built in the United Kingdom and in foreign countries.

"The policy of the repeal of the Navigation Laws, and of the expediency of reconsidering that much-contested measure, has been prominently brought under the notice of your Committee; but whatever may have been the complaints preferred against the policy of the repeal of these laws in its general tendency, not one of the witnesses examined before your Committee has proposed to recur, in its entirety, to the restrictive system which prevailed previously to 1850. Some witnesses, anxious to find a remedy for the present distress, go so far as to enunciate the principle of making a reservation to British ships of our colonial trade, and advocate the re-establishment of a monopoly of the carrying trade to and from all our colonial possessions. But the present extent, diversified interests, and increasing power of our possessions abroad, offer insuperable obstacles to the reimposition of restrictions on their trade; and the growing independent feelings of our colonists would revolt against a system which would place the grower of British plantation sugar and coffee in the West Indies at a greater disadvantage than at present exists, especially as against the producer of slave-grown sugar and coffee in Brazil and Cuba. A serious proposal to revert to an exclusive colonial system of navigation, the grievance which led mainly to the separation from England of the vast territory constituting the United States, might endanger the tenure of our other possessions, now growing every day more and more powerful. Your Committee therefore, looking especially to our relations with Canada, our possessions in the East and West Indies, and, above all, in Australia, think it their duty unhesitatingly to declare their opinion that any proposal having for its object to re-establish an exclusive monopoly of the carrying trade to and from our colonial possessions, must, both on political and commercial grounds, be rejected as impracticable; and that while it would be unjust to our fellow-subjects in the colonies, it might embroil us with foreign Powers, to whom we are bound by existing treaties."

AN INQUIRY ON THE STAMP ACT.

We have received a request from J. H. C., to give our interpretation of the 17 sec. of the New Stamp Act. If our correspondent will state his difficulty we shall be happy to do our best to explain it:—

TO THE EDITOR OF THE ECONOMIST.

City, Aug. 30th, 1860.

Sir,—Will you be so kind as to enlighten the public with your interpretation of the following foggy section in the New Stamp Act which has just become law. 23 and 34. Vict. c. 111 sec. 17.

No draft, or order, writing or document for the payment or for entitling any person to the payment, by or through any banker, or person acting as a banker, of any sum of money, such draft, order, writing or document being sent or delivered by the person making or giving the same to the banker or person acting as a banker by or through whom the payment is to be made, and not to the person to whom such payment is to be made, or to any person on his behalf, shall be chargeable or be deemed to have been chargeable with any higher stamp duty than one penny, notwithstanding the said payment shall be or have been thereby directed to be made at any time after the date thereof, which duty of one penny may be denoted by an adhesive stamp to be cancelled as in the case of a draft or order on demand.

Agriculture.

IMPROVING PROSPECTS.

CORN AND CATTLE; BARNET FAIR.

A period of dry weather, extending now from Thursday the 30th of August, has considerably improved the farmers' prospects, and it is found that though the grain has not this year ripened in due season, still it has ripened, and should we have a dry September the greater part of our grain crops will be securely gathered into the stackyards. The harvest, however, is full five weeks later than that of last year, and at least three weeks more backward than in seasons which are not considered early. As is commonly the case where past apprehensions have been partially relieved, opinion goes into the opposite extreme predictions that the crops will not fall below the average, and statements that they are better than last year's crops are freely hazarded. We availed ourselves of two days at Barnet fair to compare the statements of farmers and others from different parts of the country with each other and with our own more limited observation. The general results seem to be these. On the very dry soils, the gravels and the sands which commonly

suffer from want of moisture in ordinary summers, the crops are said to be unusually abundant. One farmer, occupying sandy land in Leicestershire, told us that his corn crops had never been so good, and that his roots exceeded any thing he had before been able to grow. In Bedfordshire, from the reports of occupiers of similar soils, the crops are also very good. On chalk and other light soils, of a character less thirsty than we have before referred to, the plant is often thin, and though the ears are full, they are generally short and not thickset as in seasons when we have a happier combination of rain and sunshine than we have experienced during the past spring and summer. On the wide breadths of land which constitute the clays, the strong loams, and the innumerable combinations of clay and gravel with tenacious subsoils, and requiring drainage, the crops will be for the most part deficient. Exceptions there are, where the land has been well drained, and is in clean and good condition, and where the wheat will be much superior to that of last year. Then the heavy straw was much laid, and being followed by extremely hot sunshine, the corn never became completely developed. And this appears certain, the weight per bushel of wheat throughout the country will be heavier than last year's wheat. It appears that the early white wheats, of which large quantities have appeared in Mark lane, are more sprouted than was generally believed; and it seems that the grain of the wheat crop is considerably riper than the green condition of the straw would indicate, consequently many farmers began to reap when according to ordinary observation the crop was far too green. This, however, will render it necessary to keep the wheat longer in the field than in ordinary seasons. And the unusual growth of weeds, even on the best-farmed lands, will also delay the carrying of the crops. A large sheep-feeder remarked to us the other day that he had never known so much sheep feed on the stubbles as there would be this autumn, from our having had a wet autumn, a wet winter, and a wet summer in succession. These circumstances increase the anxiety of farmers for the continuance of the present dry weather. Peas and beans are large crops, though the beans are not corned at all in proportion to the bulk of straw, while peas have remained so long in the field, from constant wet, that they are much injured, and much of the crop shed on the ground. As regards roots, the turnips are good on dry land, but on the strong soils there was a difficulty both in preparing the land and afterwards in sowing the seed, while the hoeing of the root crops, even where a plant has been obtained, has been extremely ineffective. Mangold wurtzel, save on the very dry soils, is very bad, the plants even where clean making little or no progress, so that heavy weights cannot be generally grown this year, though the autumn should prove dry and fine. Where summer fallows are made the land is in a sad state, no weeds have been killed, and there cannot now be a sufficiently powerful sun to destroy them. If wheat, therefore, is sown on long-fallows, it must necessarily be very foul.

In the metropolitan meat markets there has been some abatement in the price of meat, more particularly in that of beef, but still prices are high, and consumption has been a good deal checked by what threatened not long since to become famine prices. We then indicated that some of the more active causes of high price were temporary, and it now appears that speculations founded on the expectation of still further advances have not proved profitable to the speculators. As might be expected from the state of the markets, an unusually large number of bullocks are said to be now in preparation in the grazing districts, but the abundance of pasturage induces the feeders to keep them from market until they have attained a full state of maturity.

This, indeed, our best graziers commonly do, unless the state of the season renders it difficult or impossible to keep them, and then, as a matter of necessity, half-fat beasts are hurried to market, overloading the markets with great numbers of out-of-conditioned animals. It is far more from necessity than choice that farmers sell half-fat stock, and is mainly dependent on the season. This is quite a different question from that, with which it is sometimes confused by writers and observers, namely, the bringing stock to market at an early age. Of course a young animal brought in a half-fat state to market shows to greater disadvantage than an older one in the same plight; but it is the season which, for the most part, sends us half-fat meat, whether the graziers be feeding young or old stock.

At Barnet great cattle fair there was a show of stock more numerous and better than usual, certainly far beyond the show of last year. Vast numbers were sold, and the general condition of the cattle was such, that we may fairly look, during the ensuing winter, not only for full supplies of well-fed meat, but also for an extra quantity of rough fat. The next season therefore promises to be a good one for the butchers, who make much of their profit from the rough fat. The three-year-old steers of the Shorthorn and Hereford breeds sold for from 18*l* to 21*l* each, and we met with one dealer who had sold 20 Shorthorn beasts to one farmer at 20*l* per head. The Devon and Scotch beasts also made relatively high prices, and were in active demand. The Welsh cattle, though proportionately high in price, did not go off with quite the same readiness as the Shorthorns, Herefords, and Devons. Horses of all sorts were numerous and good.

Literature.

THE CORNHILL MAGAZINE for September. Smith and Elder.

THIS popular periodical is certainly not at its most brilliant point in the present number: perhaps the writers had not yet renovated their strength with their vacation rambles, but spent the somewhat exhausted powers of the long session in the completion of their papers before they escaped from their toil. In the first article of this number Mr Thackeray prints his paper on George III., not certainly the most brilliant of the series; and next comes a continuation by Mr Ruskin of his crusade against "mercantile economy," as he calls the hypothetical science which has hitherto been termed political economy. Mr Ruskin spends much unnecessary labour on the demonstration that wealth may be accumulated in one person's hands by means which, though in no way at issue with the axioms of political economy, would yet be far from advantageous to the wealth of the community at large. The relative advantage gained by A over B *may be*, he shows, due to causes which diminish not only the joint wealth of A and B, but possibly the individual wealth of each, though tending to transfer much of B's wealth to A. If B be idle, A may gain from B much of his wealth, and yet be less rich in the end than he would have been had B worked,—so that his relative advantage over B is gained at the expense of absolute loss not only to B, but to A also. Hence, Mr Ruskin argues, *political* economy, which aims at economising the wealth of the community, is something entirely different from *mercantile* economy, which aims at teaching individuals to gain some relative advantage over each other.

"The art of becoming rich" in the common sense is not absolutely nor finally the art of accumulating much money for ourselves, but also of contriving that our neighbours shall have less. In accurate terms it is "the art of establishing the maximum inequality in our own favour." Now the establishment of such inequality cannot be shown in the abstract to be either advantageous or disadvantageous to the body of the community. The rash and absurd assumption that such inequalities are necessarily advantageous or disadvantageous to the body of the nation lies at the root of most of the popular fallacies on the subject of political economy. For the eternal and inevitable law on the matter is that the beneficialness of the inequality depends first on the methods by which it was accomplished, and secondly on the purposes to which it is applied. Inequalities of wealth, unjustly established, have assuredly injured the nation in which they exist during their establishment; and unjustly directed, they injure it yet more during their existence. But inequalities of wealth, justly established, benefit that nation in the course of their establishment; and nobly used, aid it yet more by their existence."

We are not aware that the proposition "that inequalities of wealth are necessarily advantageous," has ever been assumed by any sound economist. No one, as far as we know, has ever extolled the maxims of political economy on the ground of the inequalities they tend to produce. Much more might we say that the fundamental assumption of the science of exchanges is that both parties to the exchange must be benefited by the exchange,—otherwise it would not be made. No doubt it adds to this assumption that the welfare of the general community is best consulted by leaving the *relative* advantage to be determined by the competition of selfish interests,—under the limitations of course of those general laws of social *honesty* which the State can and must successfully enforce. Political Economy says: 'Let us trace out the results to the community at large of permitting the principle of personal advantage under the limitations of social honesty, to prevail,—and see whether the economical laws thus resulting will or will not prove to be more favourable to the accumulation of social wealth than any artificial restriction of those laws.' Political Economy does not profess to determine how far other considerations besides the principle of self-regard should affect commercial relations. It does not pretend to say that a master does *wrong* who offers higher wages than he need, or a labourer who accepts lower wages than he need. It only says: 'Let us assume that the mass of commercial transactions occurring, as they do, between strangers, will and ought to be regulated by the principle that a thing is in general *worth* the most that others are willing to give for it, and see if the unrestrained operation of this rule will not be far more beneficial to society than any general formula by which you could modify it.' We believe Mr Ruskin will try in vain to produce any such formula. We believe, moreover, that *ethically* the principle of value above stated is defensible as the sound one in the mass of commercial transactions. We believe that the external remuneration of a man's labour not only must be almost always measured by the strength of other men's desires for what it produces,—but that morally it is a sound and healthy providential law that it should be so remunerated, even in those cases where it happens that the remuneration is least adequately proportioned to its intrinsic nobility or value. It would take us too long to discuss with Mr Ruskin the grounds—not yet fully elaborated—on which he appears to dispute this law. But we are sure that he misrepresents political economy when he speaks of it as justifying all the inequalities which occur in the social economy. It only says thus much: 'Whatever evil may result from the unfettered action of the principle of each man doing the best he can for himself, such evils, so long as he keeps faithful to his contracts, are infinitely less than the evils which would result from any organised

interference with this principle. For the rest, let each man's conscience control this law as the light of his conscience and special circumstances best indicate.'

"Framley Parsonage" is continued with much power and humour. There is a useful and opportune account of the Druses and Maronites by some one who has an intimate knowledge of the subject, and a humorous little "Roundabout Paper" by Mr Thackeray on "Tunbridge Toys."

Macmillan's Magazine for September. Macmillan.

This also is not a very brilliant specimen of this Magazine's capacities. The best thing as usual is the continuation of "Tom Brown at Oxford," which is very lively. Professor Masson, the editor, contributes a thoughtful and interesting, but very fragmentary paper on Shelley, with some acute observations, but a very incomplete view of his character and poetry. Mr Henry Kingsley has written one of those highly animated papers which, like the society of riotous schoolboys, tends to inspire less vigorous men with a despondent sense of their own inadequate spirits. Yet it *is* fresh and vigorous.

There are some pretty verses by the author of "John Halifax," —an amusing magazine-paper on "Proposals by an Experienced Chaperone,"—and a painstaking account of the "Two Budgets of 1860" (Mr Gladstone's and Mr Wilson's Indian Budget) by Mr Porter; besides other papers on which we are unable to pronounce any judgment.

Dublin University Magazine. September. No. 333. Hurst and Blackett.

English Woman's Journal. September. No. 31. W. Kent and Co., Paternoster row.

The present number of the "Dublin University Magazine" contains more than the usual amount of agreeable and well-written articles upon a variety of subjects; none of which, however, call, either by their own merit or from their subject-matter, for more than a passing notice. That upon "Italian Regeneration" will be read with the most interest just now. It is chiefly a brief and encouraging survey of the past condition and present prospects of Italy. The leading idea is that, as Italy, by her centralisation, and her ambition first of temporal, and afterwards of spiritual dominion over other nations through Rome her head, has brought upon herself the retribution of subjection to the very nations over whom she once tyrannised, so her hopes for the future lie solely in her newly-awakened national life showing itself in a determined spirit of opposition to foreign aid or foreign intervention. The article is sensible, and to the point; but not otherwise remarkable. The first article, "Wanderings in Ireland," takes the reader among the wild and picturesque scenery of the extreme North-west coast,—a region little visited, and less written about, but worthy of being more widely known than it is at present. The writer succeeds in impressing upon his readers the admiration he himself feels; and concludes his paper with a curious contribution from the Rector of Glen-Columbkille of some traditions current in his parish, which, if they are, as asserted, well grounded and authenticated by the testimony of some persons still living who were children at the time the events were stated to have occurred, would lead to the belief that the Pretender lay concealed for some time among the wilds of Donegal, and finally sailed from its coast, and not, as generally supposed, from the coast of Scotland.

The "Work-a-day World of France," continued from former numbers, keeps up its former interest. It reveals a state of misery arising from drunkenness among the manufacturing population of such towns as Rouen, Lille, Rheims, that we have been used to look upon as peculiar to England and her beer and spirit-drinking people. "Paris Localities" describes many curious old "relics of ancient ages and illustrious persons," now fast disappearing under the hand of modern improvement. "A Political Chronicle" is chiefly noticeable for its belief in Napoleon the Third. It is rather curious to find a writer, who is not one of the peace-at-any-price party, asserting that in the Emperor's letter to Count Persigny "we are admitted into the confidence of the arbiter of the destinies of Europe upon his policy towards England, Italy, Turkey, and France; a confidence he does not extend to the great majority of inhabitants of the latter country. In fact Louis Napoleon, intimately acquainted as he is with the character of Englishmen, and, according to our belief, inclined to be their firm and friendly ally so long as he can possibly continue to be so, deals with them more like men than he does with his own subjects." It was for the edification of minds of this simple and confiding nature that the Emperor penned his singular and straightforward letter, and took them into his confidence with respect to his whole future policy. We have no space left to do more than name the remaining articles. A review of Lady Morgan's position as a writer; the beginning of a "History of the Knights of Malta," showing considerable research; and, among the lighter articles, a singularly inappropriate invocation to "Sweet September Rains." After a hot summer we might appreciate them better than we confess we are able to do just now.

This is a very fair number of the "English Woman's Journal." The end its founders have in view, the "collecting and presenting to the public facts and arguments relating to the industrial condition of women," is steadily pursued, and their zeal is tempered with discretion. The "Opinions of John Stuart Mill" is not so grave an article as its title would imply. The "opinions" are almost solely those that bear upon the effect of woman's labour on the well-being of the community; the writer does not attempt any more exhaustive view of Mr Mill's views of political economy. The best paper in this number is entitled "First Impressions of Algiers." It gives us a lively impression of that meeting point of African barbarism and French civilisation; where strange sacrifices are still carried on in lonely places for the propitiation of evil spirits, while Arabs and Catholic priests exchange pinches of snuff in omnibuses, and "crinolined ladies exchange civilities with turbaned Moors."

One of the most useful features of this Journal is the notice it bestows upon all the less-known charitable undertakings, of which most of its readers would otherwise remain ignorant. The Deakin Institution for the conferring of annuities upon elderly unmarried gentlewomen of straitened means forms the subject of one article in the present number. The learned Russian Madame de Swetchine, is replaced this month by the lively French poetess Delphine Gay in the biographical memoir that makes a part of almost every number.

The Banker's Magazine. Groombridge.

The September number of this periodical contains its customary amount of banking information, and contains, among other papers, one on the "Position and Prospects of the Money Market." The writer takes rather a gloomy view, writing, however, under the influence of we hope we may say the *late* bad weather. There is much truth, however, in the following:—

> The spirit of competition keeps every branch in a state of tension, and the small returns secured on a large expenditure render the necessity of seeking financial assistance a more universal element in every-day life than it was 10 or 15 years ago. Hence one reason for the average rate at which money is maintained, and the small pressure requisite to increase the demand.
>
> Although the Australian and Californian gold discoveries have greatly augmented the supply of bullion, the proportion of the increase of trade is largely in excess of the balance of the metallic reserve in the Bank; and as the note circulation of the country has undergone little or no change, bills have been much more freely introduced, by which there has been a great abuse of the credit system. This, nevertheless, when discovered, always reacts with great severity upon those who inaugurate it, and the branch of trade with which it may be connected.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

M. Michel Chevalier has obtained the great and well-deserved honour of being entertained by his fellow-citizens of Montpellier at a grand banquet, as an acknowledgment of his long and devoted services to the cause of commercial freedom. The banquet, which took place a few days back, was given in the name of the Commerce and Agriculture of the Department of the Herault, was presided over by the President of the Chamber of Commerce, and was attended by nearly all the local authorities and a considerable number of the principal personages of the town and neighbourhood. The Mayor of Montpellier, M. Pagezy, proposed the honourable gentleman's health in a neat speech, in the course of which he justly said:—

> Your name, Sir, will be joined with those of Gladstone and Cobden, and of some eminent statesmen of France, and will be blessed by our populations! We are all happy to be able to express to you at this moment our gratitude and affection!

The toast was drunk with immense enthusiasm; and M. Michel Chevalier, in reply, delivered an address which, like most of his speeches or writings, was remarkable alike for loftiness of thought and eloquence of language. I deeply regret that the small space at my disposal in your columns will not allow me to translate this harangue *in extenso*.

M. Michel Chevalier, after expressing his thanks, modestly declared that the honour of his share in bringing about the commercial treaty with England must not be ascribed to him personally, but to the enlightened population of the Herault, which had always supported his efforts to free the country from the burden of prohibition. He then proceeded to show that the Emperor himself had had a considerable share in effecting the recent commercial reforms, and that they are not only in accordance with, but flow from the principles on which his dynasty is based, inasmuch as they are destined to do good to all classes, and especially the lower. He then spoke as follows:—

> The liberty of commerce to which the Imperial Government is conducting us with prudence and circumspection to which everybody now renders homage, will contribute to assure to France and Europe a blessing not less precious, of which she feels all the importance, and which nevertheless seems always about to slip from us,—I speak of peace. You know with what vigour the leaven of national hatred is always ready to ferment in Europe. On pretexts often trifling even to puerility, nations, or the governments which represent them, put the hand on the hilt of the sword; and happy is the world when they do not draw the steel from the sheath! See, for example, what is passing in Europe now; the demon of discord is at work everywhere; governments are arming to defend themselves against dangers which with greater calm they would see to be imaginary. If the interests of nations were more closely bound up one with the other by a vast extension of commercial

exchange, is it not probable, is it not certain that this umbrage when it arises, would be dissipated, or at least would cease to be very dangerous?

M. Chevalier next said:—

Remark particularly what takes place between France and England. They are two great nations, to each of which the alliance of the other is necessary for its repose, as well as for its grandeur and glory. The alliance of France and England is, in fact, the guarantee of the general progress of civilisation. It assures to one and the other an admirable position,—an influence of which the like is unparalleled in history, inasmuch as it is not possible to exercise it against the liberty of other great civilised States, and it offers a rallying point to the generous instincts of other nations.

Yet, in the absence of reciprocal commercial liberty, the Anglo-French alliance seems constantly to be hanging only on a thread; it is at the mercy of the first incident—the first caprice of opinion. At this moment, for example, England is making the vastest warlike preparations; she has levied an unaccustomed number of soldiers; she has on the stocks a number of war vessels greater than at any time during the fierce conflict which marked the end of the eighteenth and the beginning of the nineteenth centuries; her militia is organised, and is being constantly exercised in order to gain warlike experience. The Queen, an illustrious Sovereign, as renowned for the elevation of her mind as for the generosity of her sentiments, gives way to the general movement; she passes reviews; she stimulates the exemplary ardour of her faithful subjects by going to fire with her own august hand at a mark in the midst of volunteers. Her ministers, who, however, are experienced statesmen, deliberate and act on pretended discoveries which have been revealed to them by some of those intriguers who are always to be found to deceive credulous governments. One day a plan of attack on London is sold to them as stolen from the Cabinet of the Emperor; on another, a pretended secret treaty between the Emperor and King Victor Emmanuel for vast aggrandisements of France is communicated to them.

Having said this, M. Michel Chevalier asks:—

What more could be done if the French nation displayed the most violent sentiments of hatred against Great Britain? What more could be done if the Emperor were in person at Bologne or Cherbourg, surrounded by 150,000 soldiers of Solferino, and with all his navy collected in order to recommence the enterprise of William the Conqueror?

He then asserts that France does nothing to justify the alarm which prevails in England:—

The French nation entertains the most placid disposition towards her neighbours in general, and the most friendly towards England in particular. Never was public opinion less excited than it is now. Our army is on the ordinary footing. Our naval preparations are on so small a scale that they have not enabled us to transport our troops to China and Syria. Our naval constructions are being effected on a plan which will require fourteen years to complete. The Emperor writes documents in which he recommends peace; he delivers speeches of which peace is the text; he negotiates not military alliances, but treaties of commerce destined to strengthen and consolidate peace. He goes about his States not as a chief of an army preparing for conquests, but as a sovereign anxious to raise the moral, intellectual, and material level of the populations.

M. Michel Chevalier concluded his brilliant oration as follows:—

England, gentlemen, is then at present the dupe of an illusion the most immense perhaps ever witnessed. We are, however, warranted in believing that the error will soon be dissipated, for it has gained such proportions that it must soon be recognised for what it is. It nevertheless presents perils. When a nation so haughty and powerful is armed to the teeth, we may fear that for the most insignificant motive it may be tempted to make use of its arms; and then gentlemen, what a shock, what a frightful catastrophe there will be!

Happily the treaty of commerce is concluded! In a few months, and even, in some of its parts, in a few weeks, it will be in activity. It cannot fail to excite between the two great nations of the West a conjunction of interests which will certainly be the counterpoise of the bellicose passions so strangely unchained. It was said long since—commerce is the bond of nations. Already in England, in several districts, a reaction to the war fever with which the country is afflicted exists. This reaction takes every day more consistency. Good sense, which is the principal quality of the English character, will resume its empire; and what will flow between the two peoples will be, not floods of blood, but torrents of generous wine, and the department of the Herault will willingly furnish a large part of them.

Such is the more important part of M. Michel Chevalier's speech. Although speaking to his own countrymen, the great economist seems to address Englishmen even more directly than they; and I am sure that in England his discourse will be read with the sympathy and admiration it deserves.

The Council General of the department of the Herault has voted an address to the Emperor, thanking him for the treaty of commerce; so also has that of the Charente Inferieure.

A recent letter stated that in consequence of the suspension of the sliding scale, the duty to be paid on the importation of wheat would only be 25c the hectolitre. The Customs department has just published a note setting forth what other sorts of grain, and the flour thereof, will have to pay. This note is as follows:—

	Grain. per hectolitre. (about 2¾ bushels.)		Flour. per 100 kilogs. (nearly 2 cwts.)	
	f	c	f	c
Wheat	0	25	0	50
Rye	0	15	0	32½
Maize	0	13¾	0	30
Barley	0	12½	0	30
Buckwheat	0	10	0	25
Oats	0	8¾	0	27½

Nothing has yet been done by the Government to remove the great grievance justly complained of by farmers, that the suspension of the sliding scale applies only to imports, leaving that part of it which affects exports in full force. This certainly is not fair. Complaints are also made that French vessels will not be able to compete with foreigners in bringing grain from the United States, inasmuch as under the shipping convention with the States they will have to pay 94 cents the ton as heretofore, a charge from which foreigners are exempt; and it is suggested that Government ought to reimburse that sum to French vessels which may undertake to import grain from the Union. Finally, it is suggested that the Government ought to reduce the duty on rice, which at present is 10f 80c the 100 kilogs (2 cwts) by foreign vessels—an excessive figure.

Despotic Governments have an off-hand way of dealing with money matters, which create surprise among people brought up under a different *regime*. The Emperor has just been paying a visit to Lyons, and to please the people there he decreed, without consulting any body, that "the tolls on the bridges over the Rhone should be abolished," and that "the State" should pay the owners an annual subvention equal to the present receipts until the Municipality of the city, having paid the losses occasioned by the inundations of some years back, shall be able to take on itself the outlay. From Lyons His Majesty went to Savoy, and there, to please his new subjects, he by decree granted 300,000f to certain towns and communes for improvements, 500,000f to the town of Chambery in exchange for some dilapidated barracks, 400,000f to a lunatic asylum; he also decreed the transfer to the Government of the expense of keeping in repair certain roads, the construction of a bridge at Ruffieux, and the repairing and fitting up of an old castle as a residence for himself. The semi-official journals call these acts proofs of "Imperial generosity": but it is mighty easy to be generous with the money of others, and the sums His Majesty awards so freely are taken for the treasury of the nation.

In consequence of the modification of the paper duties in England, large orders for paper have already been transmitted both to this country and to Belgium; and as in Spain likewise a reduction of duty has been effected, her consumers will most likely come here too. This will, of course, make paper dearer. But will not the public have the same right to demand that export of the article shall be prohibited, so as to keep prices at the present figure, as the paper-makers themselves have to insist on the maintenance of the prohibition to export rags in order to make their raw material cheap? This point of view did not strike the paper-makers when, by their clamours, they compelled the Government to let drop the Bill for allowing rags to be sent out of the country on payment of duty; but it will not be lost sight of by the public.

You are aware that a few months back there was established in this city an "Association for Commercial Reform," consisting of eminent economists, merchants, and others. In compliance with an appeal of one of its members, M. Le Pelletier de Saint Remy, as many as 98 landowners or merchants of the French West India colonies have adhered to the association. The commerce of these colonies is subjected to a host of restrictions which cripple its prosperity, and ought to be "reformed altogether."

The Bourse has again been very inactive during the whole week, and the following are the quotations:—

	Thursday, Aug. 30.		Thursday, Sept. 6.

Subjoined is an account of the markets:—

Flour, at *Paris*, has undergone a new decline: yesterday the quotations were 57f to 62f the sack of 157 kilogs. Four marks for the current month were 58f; November and December, 58f and 59f 25c.

Wheat, at *Paris*, has also declined. Yesterday, the quotation was 34f to 35f the sack of 120 kilogs for the best qualities of old; new, of which the supply was abundant, was 32f to 33f. At *Marseilles* also prices have fallen; and the same has been the case in 90 provincial markets; the decline in these latter varying from 40c to 3f 25c the hectolitre. In 33 provincial markets there has been a rise of from 14c to 4f 82c, and 17 have undergone no change.

Cotton.—The sale at *Havre*, in the week ending Friday, was 6,651 bales, and the import 2,491. Prices closed as in the preceding week; low New Orleans being consequently 82f, and very ordinary ditto, 92f. This week, a fair amount of business has been done, and the price of low New Orleans has not been changed.

Coffee.—The demand at *Havre*, in the week ending Friday, was animated, exceeding 20,000 sacks:—1,650 sacks Hayti Port-au-Prince, disposable, 78f to 79f the 50 kilogs in bond; 1,250 ditto, for delivery, same prices; 3,000 Jacmel, 78f; 320 Cape, 80f 50c to 81f 50c: 1,200

ditto, for delivery, 81f to 82f; 875 Gonaives, disposable, 81f 50c to 83f 50c (the latter price for 300 sacks of superior quality); 100 ditto, for delivery, 83f; 6,650 sacks Rio, not washed, disposable, 72f 50c to 80f 3,200 sacks ditto, for delivery, 72f to 74f; a small lot of Rio, washed, 85f; some of Laguayra, 86f 50c to 89f; some of Singapore, 108f duty paid; and of Ceylon, 106f to 109f. In addition, there were various sales of damaged by auction. The arrivals were nearly 10,000 sacks. This week, the sales have not been numerous: Hayti, disposable, 78f 50c to 80f the 50 kilogs in bond; Rio, not washed, 74f; Rio, washed, 89f. At *Nantes*, last week, the sales consisted of 240 sacks Malabar at 117f 50c; of a small lot of Reunion, and of a large quantity of damaged Java at 109f to 114f. This week, a small quantity of Malabar has been sold at 120f; a large lot of Bouthyn, 108f 50c to 109f; a small lot of Reunion, *fere pointue*, 130f 25c. At *Bordeaux*, last week, sales were numerous: 3,500 sacks Malabar at prices kept secret; a lot of Mysore, 122f; 352 sacks Macassar, 109f; various lots of Guayra, at 81f to 95f; and a quantity of Rio at various prices. This week, some Mysore has been sold at 116f; and some Malabar at prices not stated.

SUGAR.—At *Havre*, in the week ending Friday, the sales were only 400 hogsheads French West India at 49f to 49f 50c duty paid; 103 ditto for delivery, 49f 50c; a lot of "usine" at 51f, and another at 55f; and a quantity of Havana at 38f in bond. The arrivals exceeded 12,400 hogsheads. This week the sales have been unimportant: Havaoe, 37f 50c. At *Nantes*, last week, 555 sacks Reunion low quality weot at 49f, and some lots of "gros grain," 50f to 52f 50c; various lots of French West India at 44f 75c to 53f. This week, some rather large lots of Reunion "gros grain" have been sold at 56f 50c to 56f 75c. At *Bordeaux*, last week, the demand was rather active, at 48f for French West India; 52f 50c to 53f for Reunion. This week, some lots of French West India have been sold at prices not stated.

WOOL.—The demand at *Havre*, in the week ending Friday, amounted to 182 bales La Plata, unwashed, at 1f 10c to 3f 15c the kilog; 10 bales Germany, unwashed, 3f 10c; 30 sheepskins Buenos Ayres, unwashed, 1f 35c; and 8 ditto "rasons," 97½c. The arrivals were about 1,000 bales. This week, some Buenos Ayres unwashed have been sold at 170f to 242f 50c the 100 kilogs, and at 75c to 1f 35c the kilog.

INDIGO.—At *Havre*, in the week ending Friday, about 40 cases Bengal were sold at prices kept secret, and the arrivals were 68 cases from England. This week, 20 cases Bengal have been sold at prices not given. At *Bordeaux*, last week, 20 cases Madras and 16 Kurpah were sold: prices unchanged. This week some Kurpah and Madras have been sold: prices not mentioned.

HIDES.—At *Havre*, in the week ending Friday, 2,400 La Plata dry went at 127f to 141f the 50 kilogs duty paid; 2,300 ditto salted, 81f to 82f; 810 Rio Janeiro dry, 110f; 800 ditto salted, 62f 50c; 1,500 Pernambuco drysalted, 96f; 240 Arica dry, 110f; 1,146 New York salted, 54f 50c to 56f; 2,000 Western salted, 53f 50c; 1,000 New Orleans ditto, 52f 50c; 400 Minas dry, from Lisbon, 119f; 1,437 horse hides, 99f the 100 kilogs; and 260 dry ditto, 8f 75c the piece. The arrivals were about 15,000. This week, there have been several sales: Buenos Ayres dry cow, 80f to 85f the 50 kilogs duty paid, Itio Janeiro salted, 62f to 65f 50c; Pernambuco ditto, 67f 50c; Monte Video, 82f 50c.

TALLOW.—At *Havre*, in the week ending Friday, 220 casks Buenos Ayres went at 70f the 50 kilogs duty paid, and 50 pipes for delivery from London, 69f. The stock is described in the market reports as "completely null." No sales have been made this week. At *Paris*, last week, the 100 kilogs were 140f, a decline of 70c on last week's market.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 97f the hectolitre; and Montpellier, 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 130f; and beetroot, first quality, 105f.

BERLIN, Sept. 4.

Although the project to establish uniformity of weights and measures in this country has hitherto encountered serious and unexpected obstacles, it is not abandoned. The Hanoverian Government, in particular, is favourable to the much-needed reform, and it has resolved to propose to the Diet to adopt the French system,—changing, however, the names. Hitherto the French plan has not enjoyed much favour; more, however, from narrow-minded patriotism than from anything else.

BRUSSELS, Sept 5.

The Compagnie Generale de Materiels des Chemins de fer—Company for making railway *material*—held its annual meeting four days ago. Its profits for the year 1859-60 were represented to be 953,973f, whereas last year they were only 760,030f; they were sufficient to give a dividend of 10½ per cent. per paid-up share. Had the political situation of the year not been so bad, the Company would have gained much more. It is worthy of remark that this Company undertakes operations which a few years back would, at least to a great extent, have been confided to Englishmen. Thus it has recently built bridges over the Guadalquivir at Lora, and over the Garonne at Bordeaux; has constructed a large entrepot at Antwerp; and has now on hand important orders for railways in France, Russia, and Austria.

Correspondence.

THE MONEY MARKET.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I am in the habit of looking over the pages of the ECONOMIST, and have sometimes found in them useful suggestions in reference to the state and prospects of the money market. These suggestions, however, seem to me more valuable when they are founded on general facts, than when they rest on suppositions relating to the peculiar manner in which a particlar line of business is or should be conducted.

Allow me to illustrate the remark last made by alluding to one or two observations in the last number of the ECONOMIST, headed "Our Weak Point,—The State of Lombard street,"—a sufficiently ominous title, if correct. It is affirmed that "bill-brokers are obliged to use all their resources as profitably as they can," and the statement contained in a former number is reiterated, that it is nearly if not quite impossible for discount houses to obtain such information as will secure them from considerable loss, in which particular they are supposed to be placed in a much more unfavourable situation than bankers. If, by the first-mentioned remark, it is intended to imply that some of the principal bill-broking firms do not keep a large reserve in cash, in addition to their other resources for meeting such demands as may be made upon them, the statement is erroneous. No less erroneous, I believe, as the result of much experience, is the allegation with respect to the opportunity possessed by bill-brokers of judging with regard to the credit due to those in whom they place confidence. It could, I have no doubt, be proved that,—notwithstanding recent events in connection with firms in the leather trade, in which heavy losses have been sustained not by discount establishments alone,—the business of a bill-broker can be conducted on a large scale during a long series of years with an extremely small amount of loss. If the above correction to the remarks contained in the columns of the ECONOMIST be allowed, it will, I think, be admitted that some portion at least of the general reasoning on which the article alluded to is founded falls to the ground.

I submit that bill-brokers, like other traders, should be judged, not by the nature of their business, but by the prudence and success with which they conduct it. If, indeed, there are weak points that require alteration in the general mode of conducting the business, it is highly desirable that these should no longer exist; but, in order to judge perfectly in this matter, it may be needful to be more intimately acquainted with facts relating to the subject than are the generality of persons well informed on ordinary financial topics. Weak points might, perhaps, be found in many directions as well as among discount houses, and wherever these really exist, he does a good service to the community who is able and willing to point them out and to throw light upon the means for their removal.—I remain, respectfully,

ONE WHO HAS HAD LONG EXPERIENCE IN BILL-BROKING.

COMMERCIAL AND MISCELLANEOUS NEWS.

A commercial letter from Bombay dated the 7th ult. says:—The demand for piece goods has considerably declined, and transactions have only been effected at a great reduction of prices. Grey shirtings have found sales, to a very limited extent, at lower prices. Money continues abundant. Government securities are again lower—Fours are quoted at 83½; Fives at 97½; and Five-and-a-Halfs at 102½. Exchange has slightly advanced, in consequence of all the banks being sellers for large amounts against China remittances. A moderate amount of business has been done in metals. A decided improvement has taken place in the demand for tonnage, and a good many charters were effected during the fortnight; the influence of this has been felt in the rates for England, which have steadily advanced, although cargo is not yet abundant. We quote to-day for London:—Cotton, 2*l* 15s to 3*l*; and seeds, 2*l* 10s to 2*l* 12s 6d. For Liverpool:—Cotton, 2*l* 15s to 2*l* 17s 6d; and seeds, 2*l* 10s to 2*l* 12s 6d. Freights for China exhibit an improvement of a few rupees.

The official *Gazette* of Turin has published a Royal decree notifying a considerable reduction in the Piedmontese import duties on yarns, tissues, &c., of cotton, hemp, and other articles. Annexed is a list of the new charges compared with the old:—

REDUCTIONS made in the PIEDMONTESE TARIFF.

	Present Duty. L	c		Reduced Duty. L	c

The *Vienna Gazette* publishes an account of the receipts and expenses of 1859, as compared with 1858. The receipts in the former year were 283,088,383 Austrian florins, and in 1858 289,429,010fl, which, on the re-

duction for the share of Lombardy being made, were brought down to 279,331,979fl for one year, and 262,084,275fl for the other. The expenses were 533,718,327fl in 1859, 335,199,015fl in 1858, and, after deducting the share of Lombardy, 526,970,331fl and 322,378,544fl respectivley; there were, consequently, large deficits in both years, but they were made up by loans or other financial operations, which produced the extraordinary receipts of 325,875,222fl in 1859, and 122,678,175fl in 1858. Those operations, however, occasioned an extraordinary expense of 67,520,554fl in 1859, and 27,354,525fl in 1858.

The French Consul at Manchester, M. D. Kraatzer Rassarete, has made known to the merchants, manufacturers, and others interested in trade, that the French Government have opened a record office in Paris for the registering trade marks, in order to prevent imposition.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 25th day of August, 1860:—

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, Aug. 25.—Flour and Meal.—There prevailed a moderately active demand for State and Western flour during the the three days both for consumption and export, at about previous prices, until yesterday, when the market assumed a more buoyant tone, and all kinds advanced 10c to 15c per barrel, but chiefly on the lower grades, at which the sales were pretty heavy. Shipping grades of round hoop Ohio continue scarce, and are wanted. The movements in the West towards the seaboard cities continues very active. The market for Southern flour remained without noticeable change until yesterday, when, sympathising with the other kinds, there was more buoyancy, and purchasers operated freely at an advance of 10c to 20c per barrel, holders being very firm at the close of 'Change.

Export, from 1st to 21st August.

	1860 barrels		1859 barrels
Wheat Flour	137,142	.....	59,662

Grain.—There sprung up a lively demand for wheat on Wednesday last, both for local milling and export, since which time the market has been buoyant, and prices have tended in favour of the seller. The demand for corn has also been active, and the aggregate sales are heavier even than the large aggregate of the previous three days, while prices may be written 1c to 2c per bushel higher, and the market firm at the closo yesterday at the improvement; the sales are 311,000 bushels.

Export, from 1st to 21st August.

	1860 bushels		1859 bushels
Wheat	1,076,655	.....	1,823
Corn	83,015	.....	14,175

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Owing to the continuance of favourable weather and the somewhat rapid progress of harvest work in nearly all parts of the United Kingdom, great heaviness has prevailed in the demand for wheat in the whole of our leading markets, and prices have given way from 3s to 4s per qr. Foreign wheat has likewise met a very dull inquiry at 2s to 3s per qr less money. Barley, from its extreme scarcity, has supported previous rates, and malt has sold at the late improvement in value. Oats have ruled a shade lower; but no change has taken place in the value of either beans or peas. Flour has receded 1s to 2s per sack and barrel.

The new English wheats on offer here this week—about 1,000 qrs—have been disposed of at from 48s to 70s per qr. The new barleys have realised 44s to 46s. Our accounts from most parts of the country state that nearly or quite as much wheat has been grown this year as in 1859. The heavy lands have produced a very moderate yield; but the increase in that on the light lands is an important one. Advices from America—from whence large shipments continue to be made—state that the wheat harvest this year is the largest and best on record. One account says:—

The production in the Western States, which have the largest surplus for export, is shown by the following figures:—

States.	1858. Bushels.		1859. Bushels.		1860. Bushels.
Kentucky	8,500,000	.....	11,000,000	.....	9,000,000
Ohio	22,000,000	.....	26,000,000	.....	28,000,000
Indiana	13,000,000	.....	17,000,000	.....	19,000,000
Illinois	14,500,000	.....	20,000,000	.....	25,000,000
Wisconsin and Michigan	...	.....	...	.....	30,000,000
Total	58,000,000	.....	74,000,000	.....	111,000,000

The surplus for the present year in these States may be estimated as follows:—

	Bushels.
Crop, 1860	111,000,000
Consumption, 4½ bushels per head	50,000,000
Surplus crop 1860	61,000,000

The accounts from Ireland are very favourable, and very few of them state that the potato disease is general.

In Scotland, some portion of the wheat, barley, and oat crops has been carried, and most of our correspondents state that the potatoes are doing remarkably well. Already shipments have been commenced to London.

The few samples of English wheat on sale here to-day met a dull inquiry at about 2s per qr beneath Monday's decline. Foreign wheat, to sell, was 1s to 2s lower. All kinds of spring corn moved off heavily, and prices had a downward tendency. So little was doing in flour that the quotations were nominal.

The state of the floating trade is reported by Mr E. Rainford as follows:—Since the 30th ult., 31 cargoes of grain have arrived off coast for orders, consisting of 14 wheat, 1 rye, 9 maize, 3 barley, 4 beans, viz.:—Wheat, 4 cargoes from Berdianski, 5 Odessa, 4 Taganrog, 1 Leghorn; rye, 1 Odessa; maize, 1 Oltenitza, 5 Ibraila, 2 Sulina, 1 Fatza; barley, 1 Eupatoria, 1 Theodosia, 1 Berdianski; beans, 1 Alexandria, 1 Larache, 2 Mazagan. Of the above, 8 were sold before arrival. The demand for cargoes afloat is less active, and prices are lower. The following transactions are reported since this day week:—Wheat, arrived, Berdianski (2 cargoes) at 57s 6d; Marianople, 56s 9d; Taganrog Ghirka, 55s 6d and 56s; Odessa Ghirka, 55s; Bessarabian Ghirka, 55s 6d, all per 492 lbs; Polish Odessa, 52s 6d per 480 lbs; Egyptian Saide, 45s per imperial qr; on passage, new Odessa Ghirka, 59s 6d; Taganrog Ghirka, 53s 9d; ditto (August shipment), 53s per 492 lbs; Sandomirka at 57s 6d and about 57s 8½d per 480 lbs; Behara (due) at 43s per imperial qr; to be shipped in September and October, 5,000 to 6,000 qrs Taganrog Ghirka at 54s per 492 lbs. Rye, arrived, Cavala at 32s 3d; Odessa (partly imperfect) at 31s per 480 lbs. Maize, arrived, Fatza at 34s per 492 lbs; Ibraila at 32s 6d, 33s 2d, 33s 3d, and 33s, and Wallachian at 33s 3d per 480 lbs, mostly with more or less warmth; on passage, Galatz at 35s 6d per 492 lbs; Ibraila (B. L. just received) at 33s per 480 lbs. Barley, on passage, Odessa, 29s per 480 lbs; Egyptian at 26s 6d per imperial qr. Beans, arrived, Mazagan at 37s 3d per 480 lbs; Egyptian at 34s per imperial qr; on passage, Mazagan, for London direct, and nearly due, 37s per 480 lbs.

The London averages announced this week are:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 5th day of September, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,914,375	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	15,439,375
		Silver Bullion	...
	29,914,375		29,914,375

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14.553,000	Government Securities (including Dead Weight Annuity)	9,663,511
Rest	3,777,723	Other Securities	20,101,934
Public Deposits (including Exchequer, Savings Banks Commissioners of National Debt, and Dividend Accounts	6 496.821	Notes	8,484,285
Other Deposits	13,431,519	Gold and Silver Coin	730,672
Seven Day and other Bills	721,339		
	38,980,402		38,980,462

Dated the 6th September, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,151,429	Securities	29,687,445
Public Deposits	6,496,821	Coin and Bullion	16,170,047
Private Deposits	13,431,519		
	42,079,769		45,857,492

The balance of Assets above Liabilities being 3,777,723*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£274,043
An INCREASE of Public Deposits of	547,816
A DECREASE of Other Deposits of	736,657
An INCREASE of Government Securities of	20,113
An INCREASE of Other Securities of	105,208
An INCREASE of Bullion of	255,694
An INCREASE of Rest of	295,813
A DECREASE of Reserve of	32,611

The present Bank return is favourable. The bullion has again increased 255,694*l*. The reserve of notes has decreased to the extent of 32,611*l*, but the indebtedness of the Bank to the public as regard deposits has decreased by the sum of 181,841*l*. The large increase in the rest, viz., 295,813*l*, would indicate the carrying of the profits made by the Bank to that account prior to the payment of the dividends on Bank stock.

The increase of the other securities by the sum of 105,208*l* shows that the discount business of the Bank has increased from the extreme caution exercised in Lombard street. We presume that the next returns will show a diminution.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 20,742,345	£ 20,918,172	£ 20,784,037	£ 22 224 417	£ 22,151,429
Public deposits	8,885,786	7,087,314	7,535 733	7,789 691	6,496,821
Other deposits	9,106,676	9 369,219	12.267,046	13,067,400	13,431,519
Government securities	14,430,847	10,593 653	10,955,269	11,220,018	9,663,511
Other securities	11,700 259	18,351 990	15,362,692	19,916,870	20,101,934

Bank rate of discount	2½ p. c.	5½ p. c.	3 p. c.	2½ p. c.	4 p. c.
Price of Consols	96⅞	91	97	95¼	93⅛
Average price of wheat	43s 2d	58s 4d	45s 8d	44s 0d	60s 11d
Exchange on Paris (shrt)	25 30 35	25 17½ 25	25 20	25 10 15	25 12½ 20
— Amsterdam ditto	12 0½ 1	11 16 17	11 16½ 17	11 14⅛ 15½	11 14⅛ 15
— Hamburg (3months)	13 10⅛ 10½	13 8	13 8⅛ 9	13 5½ 6	13 5⅛ 6

In 1850, money was gradually increasing in demand in consequence of the impetus given to trade by the gold discoveries in California. Railway shares for the same reason were advancing in value.

In 1857, the Bank rate of discount was 5½ per cent., and, partly under the influence of gloomy financial advices from Paris and New York, was about to experience the run which reached its culminating point in the crisis of November. The news by each packet from India was looked for with apprehension.

In 1858, the bullion movement continued remarkably favourable. The money market was extremely easy, although a payment of 350,000*l* had just been made on the Turkish loan of 3,000,000*l*, and the final instalment of the first Indian Debenture loan was coming due. Numerous investments were being made in public securities, and Consols were at 97. The Atlantic Telegraph, after working a short time, was at fault, to the great disappointment of the public.

In 1859, the rate of money was very easy, the banks and money establishments not allowing more than 1½ to ¾ on deposits. 2,750,000*l* had been paid into the Indian Treasury on account of the Indian loan, which had risen to 3⅝ to ¾ premium. The Indian Council were lending money on Government securities at 2 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 2,593,583*l*; in 1857, a deficiency of 8,991,771*l*; in 1858, a deficiency of 3,095,646*l*; and in 1859, a deficiency of 5,949,470*l*. In 1860, the deficiency is 6,670,415*l*.

DISCOUNT AND MONEY MARKET.—The indications towards ease in the money market which we mentioned last week have been fully realised. We have to announce a decided fall in the rate of money in the discount market, the general rate in Lombard street being 3¾ per cent, and in some cases bills having short periods to run have been discounted at 3½. Money is very abundant among the discount houses, and the applications to the Bank have decidedly fallen off. Doubtless the fine weather has exercised a considerable influence on the money market, for anything that lowers the price of corn exercises a greater influence on it than almost any other cause. Large amounts of gold have been taken to the Bank of England; this, coupled with a less demand for discount, will tend materially to strengthen the position of the Bank, and tell on its reserve; and it is not improbable that the Bank, as the "other securities" fall off, may increase their "Government securities." As a further proof of increased ease in the money market, we hear of inquiry among bankers for long-dated paper, and this circumstance is one of the strongest evidences of faith in an easy money market. There has been a failure this week of no great importance. The bills falling due on the 4th were generally well met. We observe the greatest caution exercised among the discount houses; and we hope that an easier money market will not awaken that baneful spirit of competition among the dealers in money to obtain bills, or that encouragement will be given to facilitate any speculation in corn. We believe that to the caution that has been exercised by the discount houses since the lamentable failures in the leather trade, may be attributed the present more satisfactory state of the money market, and the avoidance of a crisis. The commercial world hope that advantage will be taken of the present calm to bring about an arrangement between the discount houses and the Bank of England, and that the Bank of England will place them on the same footing as the rest of the public.

The following are the rates of discount at

	Bank Rate. Per cent.	Open Market. Per cent.
Amsterdam	3	3
Berlin	4	4
Brussels	3	3
Frankfort	2	1¼
Hamburg	No Bank rate	1½
London	4	3½
Paris	3½	3
St Petersburg	5	5 to 5½
Vienna	5	4

ENGLISH FUNDS.—The ease in the money market, and the fine weather combined, have had a beneficial effect on the price of the funds; and Consols had risen at one time during the week fully ⅜ per cent. The settlement of the Consol account proved that the public have been absorbing stock,—for had it not been for bankers and others giving continuation from account to account on large quantities of stock, for the purpose, as we mentioned last week, of employing the money so raised in either discounting bills or lending it at call, the jobbers would evidently have been short of stock. The rate of continuation from account to account was about 2⅛ per cent; and, as the account is for five weeks, it is easily understood that raising money at 2⅛ per cent. on Consols, and discounting short bills at 3¾, or even lending it at 3 per cent. on call, leaves a sufficient margin of profit.

It is worthy of remark, and shows the stagnation that has

existed on the Stock Exchange, that for the last three accounts Consols have settled at precisely the same price. The extreme fluctuation this week in Consols for the account has been from 93¼ to 93⅜.

To-day there has been a large sale of stock, amounting to 230,000*l* Consols at 93¼, by the brokers for the Equitable Assurance Company. The market has been but slightly affected by it, although it has checked the advance.

We have no doubt insurance companies and trustees will take advantage of the new Act which allows them to invest in securities having the Government guarantee. Probably the sale above mentioned may have something to do with this; but the stocks having the Government guarantee to which the Act refers, being limited in amount and for the most part placed, it will not be found so easy an operation to invest in them, as many now suppose, without greatly influencing their price and approximating their value to Consols.

The rate of money in the Stock Exchange is 2 per cent. Consols close this afternoon 93¼ ⅜ for money, and 93⅜ ½ for the account; Exchequer Bills, 4s prem.; Reduced, 93⅜ ⅜; New 3 per Cents., 93¾.

Foreign Funds.—Mexican Bonds improved at one time to 21¾ 22, but have since receded into 21½ ¾, in consequence of no portion of the dividend having been forwarded by the agent in Mexico.

The annexed communication is from the Committee of Mexican Bondholders:—

The Committee have received advice from Mr Whitehead, dated Mexico, the 3rd ult., of a conducta being, after all, on the point of then leaving for Vera Cruz, but that Mr Mathews's opinion was so decidedly unfavourable as to the security it offered, that Mr Whitehead was unable to avail himself of it for the funds of the bondholders. Great as the accumulation of funds now is in the hands of English houses in the capital, only two are venturing to send some trifling amounts with it. So far as was known in the city of Mexico, General Miramon was still at Lagos. There was daily reports of his defeats and success, on which no reliance was placed.

The Mexican bondholders feel disappointment at the fact of no portion of the funds belonging to them which have so long lain at the city of Mexico having been sent forward by the conducta, which has safely reached Tampico with 520,000*l*. They must recollect, however, that if their agents had acted with less caution, and any untoward event had resulted, they would, probably, have been disposed to look at the circumstance with some severity.

Buenos Ayres Bonds have risen in consequence of the improved financial position of the country. We have reason to believe that a suggestion for the subdivision of the Buenos Ayres Active Six per Cent. Bonds from their present inconvenient amounts of 1,000*l* and 500*l*, into bonds of 100*l*, 200*l*, and 300*l*, has recently been laid before the Government of that State, and favourably entertained. Probably nothing is required but that a number of the principal bondholders should address a petition to this effect to the Government, and beg Messrs Baring Brothers and Co., its financial agents, to present it. A change of this kind would go far to popularise these bonds, the present large amount of each bond precluding small investments.

The tendency of French funds has been drooping. Rentes close this afternoon 67.95.

Peruvian Bonds are rather lower. In other foreign funds the transactions have been very limited.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

Bullion.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—The following amounts have arrived since our circular of 30th August:—151,000*l*, per Kangaroo, from New York; 35,000*l*, per Europa, from New York; 40,000*l*, per Adriatic, from New York; 158,000*l*, per Leaping Water, from Melbourne; and 34,000*l*, per Tyne, from the Brazils. Of recent arrivals, 380,000*l* has been sent to the Bank, and some amount has been taken for export. The following shipments were made, per Peninsular and Oriental Company's steamer of 4th inst.:—3,341*l* to Madras, and 4,735*l* to Singapore.

Silver.—We have no alteration whatever to report this week, there being no movement in the silver market. The shipments, per Peninsular and Oriental Company's steamer of 4th inst., in silver and dollars, amounted to 188,300*l*, viz.:—To Calcutta, 16,000*l*; Hong Kong, 101,515*l*; and Shanghai, 70,784*l*.

Mexican Dollars.—Our market has been quiet since the completion of orders for the China steamer leaving Southampton on 4th inst., and prices remain unaltered. Advices from New York allude to large amounts of silver and dollars being at Tampico and Vera Cruz ready for shipment. These may probably be expected, per Mexican steamer, due on 28th inst.

Exchange on India is without alteration. We quote drafts on Bombay and Calcutta by banks, at 60 days' sight, at 1s 11¾d to 2s per rupee; Madras, 1s 11¾d; bills with documents, 1s 11d to 1s 11¼d.

India Government Loan Notes have improved the last two days, and there has been a good demand at the low quotations. Five-and-a-Half per Cents. have improved from 101¾ to 102¼ to 102½; and Five per Cents. from 96½ to 96¾. The present abundance of money has probably led to the improvement reported above.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 78s per oz std; Spanish doubloons, 76s 3d to 76s 6d per oz, last price; South American doubloons, 74s 3d to 74s 6d per oz, last price; United States gold coin, 76s 2½d per oz, last price. Silver—Bar silver, 5s 1⅞d per oz std; bar silver, containing 5 grs of gold, 5s 1¾d per oz std; fine cake silver, 5s 6½d per oz; Mexican dollars, 5s 2½d per oz nominal; Spanish dollars (Carolus), 6s 2d per oz, last price.

No gold has been taken to the Bank since these returns.

Failures.—A heavy failure has taken place in the linen trade. The firm is that of Messrs Smith, Sinclair, and Co., and their liabilities are estimated at 140,000*l* or 150,000*l*. They have offices in Pancras lane and also in Upper Thames street and the New Corn Exchange, and their branch of business was that of factors and agents. They were sellers of linen goods for manufacturers at Dundee, and large buyer

of jute in the London market for the same establishments. Annexed is the circular issued:—

10 Pancras lane, London, E.C., Sept. 5.

The extraordinary stagnation under which our trade has suffered during the past few months, coupled with the pressure in the money market, has so embarrassed our operations that we have been reluctantly compelled to suspend payment.

We have placed our books in the hands of Mr C. F. Kemp, accountant, 7 Gresham street, with instructions to prepare a statement of our affairs, to submit to a general meeting of the creditors, which will be convened at the earliest possible period.

Meanwhile, soliciting your indulgence, we are, yours respectfully,
SMITH, SINCLAIR, and Co.

The trade reports for the past week refer to the suspension of Mr B. J. Eyre, of Sheffield, cutler, with liabilities for about 20,000*l*, and assets 15,000*l*; and of Mr William Banks, of Bilston, ironmaster, also with liabilities of 20,000*l*, and assets estimated to exceed that amount.

A small failure has been announced in the wine trade, the house being that of Messrs Pereira and Grant, of Tower street; Mr Mullaly is the accountant. About 10s in the pound is expected.

Subjoined is a summary of liabilities and assets of the late failures in the leather trade, by which it appears that the assets will not amount to more, on an average, than 5s 6d in the £, leaving a loss to the holders of the bills of the fallen firms of no less a sum than 1,471,589*l*.

MISCELLANEOUS.—It is stated for the information of our iron and steel merchants and manufacturers, that there is to be an exhibition at St Dizier, in the Marne, the headquarters of these goods in France, which will last from the 5th inst. till the 1st of October. As it is known that the manufacturers, founders, and others from the Marne, the Ardennes, and the Moselle, are resolved to endeavour to show on this occasion that they are equal to us in every respect, an opportunity is presented to our makers from Birmingham, Sheffield, &c., to prove their superiority. It appears that the exhibition is to be held in a large park, and that it is also to include a great variety of the products of France, and a succession of fêtes. Particulars may be obtained by writing to the Secretary of the Exposition, St Dizier, France.

The following are the days appointed for the shutting and re-opening of the transfer books at the Bank of England:—

Transfer Books.	Shut.	Re-open.
Bank Stock	Friday, Sept. 7	Friday, Oct. 19
3 per Cent. Reduced	Friday, Sept. 7	Friday, Oct. 19
New 3 per Cents.	Tuesday, Sept. 11	Tuesday, Oct. 23
Annuities, April 1885	Friday, Sept. 7	Friday, Oct. 19

At a meeting of the Railway Passengers Assurance Company, a dividend at the rate of 4 per cent. per annum was declared. The income of the Company during the half-year ended 30th June last continues to display an increase over the corresponding period of the previous year. The amount of premiums of insurance against railway accidents exclusively was 2,696*l* 4s 1d, and against accidents of every description 17,104*l* 1s, together 19,800*l* 5s 1d, against 15,177*l* 16s 11d in 1859. The cash received for premiums during the half-year, 18,226*l* 11s, added to the balance from last half-year, and to the interest on investments, 176*l* 6s, forms the sum of 26,692*l* 9s 4d to the credit of the revenue account. The disbursements for working expenses, commission, and Government duty, amount to 6,766*l* 10s 4d, and those for compensation to the large sum of 11,084*l* 9s. After payment of the interest to proprietors, and setting aside 500*l* towards the repayment of preliminary expenses, the cash invested as a reserve and in hand shows a balance of 7,988*l* 16s 9d, to which must be added the amount due from clearing-house and agents, 1,573*l* 14s 1d, leaving the balance of revenue account 9,562*l* 10s 10d.

The Adriatic has brought 32 tons of California silver ore from the Washoe mines. If these samples are equal to those alleged to have been previously raised, their total value should be about 20,000*l*.

The following circular has been addressed to the shareholders in the Danube and Black Sea Railway and Kustendjie Harbour Company (Limited):—

Offices, 24 Abingdon street, London, S.W., Sept. 4, 1860.

Sir,—I have the pleasure to inform you that a telegram received from Kustendjie announces that the line, which has been laid throughout, was on the 31st ultimo inspected by the Ottoman Commissioner, and that his report to the Imperial Government would be entirely satisfactory. The rolling stock lately despatched from this country will in due course arrive at Kustendjie in a few days from this time, and there is no reason to doubt that the arrangements for the conduct of any traffic which it would be reasonable to expect this year will be complete by the early part of next month.—I am, &c., FRANCIS J. PARKES, Secretary.

The New York money and stock markets continue to show great buoyancy. The traffic returns on the Western railways exhibit week by week a heavy increase. The rate of discount has slightly advanced, but money was generally in good supply at 6 per cent. Considerable remittances of specie would still take place to Europe by each packet. An offer of the vice-presidency of the Illinois Central Railway has been made to Governor Banks, of Massachusetts, and his acceptance of it is stated to be probable. The receipts of grain at Chicago were beyond all precedent, and as the Lake freights had rapidly advanced from the insufficiency of tonnage, the quantity to be despatched by railway would be proportionably augmented.

With reference to the market for American securities Messrs D. Bell, Son, and Co., report as follows:—

There has been during the past week a decided increase in the business in American securities. In State Stocks, United State Five and Six per Cent. and Pennsylvania Five per Cent. Bonds have been most in request. In railroad bonds and shares thers as also been an active business at generally improved prices. e

The present advices from America furnish the particulars of the decision of the Commissioners lately sent to Paraguay by the United States Government to report on the validity of the claims of Mr E. A. Hopkins against that State. Mr Hopkins was American consul there, and got up a company for steam navigation and other purposes. The thing soon collapsed, and Hopkins alleged that immense losses had been sustained through bad faith on the part of Paraguay. At first he and his party demanded 40,000*l*, and then 200,000*l*, as compensation. The Washington Cabinet were disposed to back his pretences by a strong display of force. They had the justice, however, to appoint a Commission of Inquiry, and the result seems to be highly creditable to the honour of the parties employed, and consequently to their country. They have decided not only that the claims of Mr Hopkins are fictitious, but that he is actually indebted to the Paraguayan Government. The New York papers express their satisfaction at the award, and describe the conduct of Mr Hopkins in very strong terms. Mr Hopkins since his withdrawal from Paraguay has become resident director of the Buenos Ayres Railway, lately introduced in London.

The Directors of the East India Company have this day issued a formal notice to the proprietors that, in accordance with the Act just passed, they have made arrangements with the Bank of England whereby transfers of the old (10½ per cent.) East India stock will henceforth be made, and the dividends thereon paid at that establishment, which has already taken charge of the business of a similar character connected with the other classes of Indian Government securities.

The half-yearly meeting of the Submarine Telegraph Company has just been held, when it was stated that the number of despatches sent by the Company's line was 78,713, which is an increase of 19,359 messages when compared with the previous half-year. After some discussion the report was adopted, and a dividend at the rate of 3 per cent. per annum was declared for the six months ending the 30th June last.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about at par, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is 110 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is slightly in favour of England; and, after making allowance for charges of transport and difference of interest, the present rate leaves a small profit on the importation of gold from the United States.

Imports of the week ..... 238,501 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a very poor show of English wheat at Mark lane today. Owing to the continuance of fine weather, and the rapid progress of harvest work, the trade was heavy in the extreme, and forced sales were effected at a decline in the quotations, compared with Monday last, of fully 2s per quarter. The fall in value, therefore, since the 27th ult., is now 6s per quarter. A few parcels of new wheat were exhibited in very middling condition. Spring corn was heavy, at drooping currencies. There were no buyers of flour, even at a reduction of 2s to 3s per sack. The imports from abroad amount to 9,920 quarters of wheat; 3,710 barley; 15,530 oats; 4,530 sacks and 940 barrels of flour.

At Liverpool, this morning, wheat gave way 2d per cental, and flour 1s per sack and barrel, with a dull market.

A report from Alexandria, dated the 26th of August, and forwarded by Messrs Briggs and Co., states that produce generally was advancing in price. Wheat had realised 32s 6d to 36s per quarter.

There has been great activity in the Liverpool cotton market this week; the sales are 95,000 bales, of which spinners took 56,000 bales, speculators 29,000 bales, and exporters 10,000 bales. Prices are ⅛d to ¼d higher. This improvement is based upon a feeling that the American crop has suffered from drought, and that the rains just set in may further damage the plant. However, the reports and opinions about the ultimate prospect of the crop are much divided and contradictory. Undoubtedly the American planters will exaggerate any damage done to their crop, as the opening prices of the season now about to take place will regulate, at least for some time, the value. In this market about 3,500 bales have been sold, at an advance for Surats of nearly ¼d. Tinnivelly Madras, being rather high, remained unchanged.

"Crop accounts are generally more hopeful since the recent fall of rain," observe Messrs Neill and Co., of New York. "The prospects have been improved, but it is impossible yet to say to what extent, as the effects of the rain will probably be found to vary according to the condition of the plant in different localities. Thus, where cotton had reached maturity, a new growth may be started, the result of which will be entirely dependent on future weather; while cotton that was still growing will receive new vigour and escape being forced to premature maturity. The accounts from the bottom land and prairie crops continue favourable, with an occasional complaint of rust since the rain. The rains appear to have been general, and in some quarters heavy, causing a considerable rise in the Mississippi, while the Alabama river has risen 12 to 15 feet by mail dates. The receipts of new cotton at New

Orleans now reach 5,250 bales, of which 1,700 bales were received in one cargo from Vicksburg. The quality, staple, and colour are, so far, very satisfactory."

We have received the following report of the state of the cotton trade at Bombay to the 7th ult., from Messrs Volkart Brothers:—

We have again to report an important decline in the prices of this article, and very few transactions, as the dull accounts from home prevent business for the European markets. Not a single bale has been purchased for this destination, and only some trifling lots were taken for China; there is, however, no inquiry worth mentioning for the latter market. The cotton now shipping is almost exclusively for account of native dealers, to whom the last quotations from China leave still a better result than sales on the spot. How long this state of things will continue remains to be seen: the last steamer has not brought much lower prices, but stocks had increased to about 35,000 to 40,000 bales, and a large quantity was still at sea, whilst the demand evinced no improvement, and it seems doubtful whether the market will be maintained. Some speculative inquiries were made lately, but they have ceased again since a couple of days, and resulted merely in a sale of 1,000 candies Dhollers, at 99 rs to 101 rs per November. The market closes very quiet, and we fully expect to see a further decline take place if the accounts from England remain bad. Stocks are computed at about 21,000 candies.

We have advices from New York to the 31st ult. Cotton was in fair demand, at full prices. Wheat had advanced 6 cents per bushel. At New Orleans, on the 30th ult., cotton advanced $\frac{1}{8}$ per lb; middling uplands was quoted at 10$\frac{5}{8}$c to 10$\frac{7}{8}$c.

The public sales of tea held this week have gone off slowly, and the quotations have had a downward tendency. In the private market the transactions have continued restricted.

IMPORT of TEA in London, from Jan. 1 to Sept. 1, 1860, and the STOCK on hand on Sept. 1, 1860, compared with the corresponding date in 1859.

Most kinds of raw sugar have sold somewhat freely at, in some instances, a slight improvement in value. Refined goods have commanded very full prices.

A slight advance has taken place in the value of some kinds of coffee, for which the inquiry has continued steady.

The annexed statistics are furnished by Messrs Trueman and Rouse:—

The fall in the price of wheat has produced considerable heaviness in the rice market, at fully 6d per cwt less money.

Fruit is still very dull, on easier terms. New Valentia raisins, however, are still held at 35s per cwt.

Messrs Churchill and Sim have published the annexed statement showing the stock of timber at the public docks on the 1st September:—

	1860.	1859.	1858.
Foreign deals ....pieces	1,010,000	797,000	1,302,000

United States pitch pine timber	3,400	5,500	4,100
East Indian teake	4,300	10,200	10,900

The business done in hemp and flax has been somewhat restricted. Prices, however, are fairly supported.

"The silk market during August," observes Mr Eaton, "was unsatisfactory, the reported advance of the rebels in China to the silk districts merely giving a firm tendency to prices, without creating any really active demand; it may, however, be reasonably hoped that, now the operatives in Spitalfields and Coventry have resumed work, trade may soon be restored to a more healthy position. The leading feature of this month's report is the closing in China of the silk season of 1859-1860, resulting in a deficiency in the shipments, as compared with the previous season, of about 14,000 bales, and the first arrival of new silk, though only to the extent of 800 bales."

* Including about 700 Korat and common sorts.

Messrs Bradbury and Cook refer to the last public sales of wool as follows:—

The second series of public sales of colonial wool contained the

following quantities:—Sydney, 23,394 bales; Port Philip and Portland Bay, 26,149; Van Diemen's Land, 10,671; Adelaide, 5,124; Cape, 12,076; New Zealand, 10,260; Swan River, 1,020; total colonial, 88,694 bales: Spanish, 1,496; Buenos Ayres, 766; German, 81; Russian Marino, 204; Sundries, 596; total, 3,143 bales. The healthy and sound position of the wool trade, generally, was never more apparent than at the commencement of these sales. The stocks of Australian and Cape in the hands of staplers and spinners were unusually small, and the high prices ruling in Germany have prevented importations from that country. It is also estimated that in consequence of the last severe and protracted winter there will be a deficiency of eight to ten per cent. in the weight of our home clip. This circumstance, and the extremely limited stocks o old wool left for consumption, caused the fairs throughout the country to open at higher rates than have been known for many years past. It is not, therefore, surprising to find colonial wool participating in the genera advance. The comparatively high prices of the May-June series were firmly maintained at the commencement of these sales; and notwithstanding the continuance of very unseasonable weather, all sound, good-conditioned wools were eagerly competed for to the close, at full rates. The demand for export has been less than usual, and may probably be accounted for by the extensive operations of continental buyers at the last series. The proportion of inferior bred and wasty wool has been greater than usual, and, in consequence, these classes met with less active competition. The bulk of the New Zealand sold was poor and tender stapled. The production is rapidly increasing, but it shows great falling off in character and breed. Neither is there any improvement in the condition and classification; and so long as this irregular packing continues, growers must suffer from the lower prices paid in consequence, as buyers cannot correctly estimate its value, and are therefore prevented bidding a full price. Cape wool was, throughout, scarce, and has been eagerly competed for, at an advance of about 1d per lb.

"We have had a quiet month in our wool market," observe Messrs Perkins and Robinson. "There has been a fair demand for current descriptions, and prices have been on the whole well supported; but owing to the protracted unseasonable weather, and the fears entertained for the safety of the harvest, there has not been much disposition to enter into large transactions, unless to supply immediate wants. Our stocks, however, continue in such a moderate compass, and there is so little prospect of large supplies coming forward from any quarter, that present prices appear likely to rule for some time to come, while with a few weeks of favourable weather we should possibly see an advance."

There has been a fair average business doing in rum, but without change in value. Brandy is held for rather more money, and grain spirits are tolerably firm. The Commissioners of Customs, by a minute under date the 14th ult., direct that the following regulations be in future observed for charging duties on foreign spirits:—"That in gauging casks of spirits of all sizes, the content be taken to the integral gallon, and the duty charged to the half gallon on all casks above the size of quarter casks. The quarter casks and casks of lesser size, and also ullage quantities under 30 gallons, be gauged in like manner, and the duty charged to the quarter of a gallon, viz., the quarter gallon to be charged when the rod indicates four-tenths, the half gallon when the rod indicates six-tenths, and three quarters of a gallon when the rod indicates eight-tenths. That in all cases the strength of spirits, whether over proof or under proof, be computed on the quantities so ascertained, and charged to the tenth of a gallon."

A few parcels of saltpetre have sold on former terms, but the demand is by no means active.

The state of the leather trade during the past month is thus referred to by Messrs Powell and Co.:—

The leather trade has been considerable: not any very extensive sales have been made, but a full average inquiry for all descriptions of goods for consumption, with an increased export demand, has existed; adequate, in almost all cases, to maintain the reduced rates quoted in our last price current. Some exceptional sales have perhaps been made where there has been a particular motive for realising, but we believe it is certain that the stocks of the bankrupt houses are not so large as to produce any general or permanent impression on the market. We, therefore, deem the position of the trade, under the circumstances of severe trial it has experienced, to be satisfactory. The favourable change in the weather will, doubtless, stimulate the home demand, and we are of opinion that, with the reduced operations of manufacturers, and the caution that dealers have exercised in purchasing, a steady and healthy trade may henceforth be expected. In raw goods an increased business has been done, of which a considerable proportion has been for exportation, with very little change in prices. The import of South American hides has been large, but the demand at existing rates has been limited. Australian hides have been the most saleable article; the stock of which, with a small import during the month, has been greatly reduced.

Scotch pig iron has moved off slowly, at 51s cash, mixed numbers. Straits tin has realised 132*l* full prompt.

The state of the tobacco trade is thus alluded to by Messrs Grant, Hodgson, and Co.:—

Demand during last month was of a limited character, resulting in the sale of about 800 hhds—viz., 470 hhds Kentucky stalps, 120 hhds Kentucky leaf, 4 hhds Virginia strips, 130 hhds Virginia leaf, and 80 hhds Maryland. As was fully anticipated, in consequence of the large sales effected in the two previous months, the market has continued steady for fine and choice descriptions, and holders of middling and ordinary parcels have not shown any desire to press sales at prices below current rates. There has been more inquiry for useful leaf for cutting purposes, and an improved business has been transacted; a few limited sales were also effected of good and fine sorts for exportation, both of Virginia and Kentucky. Imports, 4,524 hhds. Deliveries, 949 hhds, against 663 hhds in the corresponding month of last year. Stock, 17,997 hhds, against 15,089 hhds in 1859; 8,767 hhds in 1858; 9,566 hhds in 1857; 5,977 hhds in 1856; and 9,473 hhds in 1855.

The oil market is inactive, and linseed oil on the spot has declined to 30*l* 5s. Turpentine, however, is very firm in price, American, in barrels, having realised 31s 6d per cwt.

We have very little change to notice in the value of tallow. The demand, however, is much less active. P.Y.C., on the spot, is quoted at 52s; October to December, 52s; separate months, 52s 6d; January to March, 52s 6d to 52s 9d per cwt. From the annexed return, it will be seen that large shipments continue to be made at St Petersburg:—

"The general features of the money market," says the New York *Shipping List*, of the 25th ult., "may be said to be essentially unchanged, though it is clear that there is a gradual tendency to higher rates. The standard figure at bank for temporary loans is 6 per cent., while private lenders generally obtain 5½ to 6 on State and Federal stocks. The demand is fair, but by no means pressing. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5½ to 6
Do. other good securities	6 7
Prime endorsed bills, 60 to 90 days	6 6½
Do. 4 to 6 months	6 7
First class single signatures	6½ 7½
Other good bills	8 9
Names less known	9 10

The market for domestic dry goods remains without material alteration either in demand or prices. There are some complaints in regard to the Southern trade not being so large as was expected, but the Western trade has opened somewhat earlier and under more favourable auspices than for several years past. Foreign goods of nearly every description continue dull, and prices are nearly nominal, except for the most desirable offerings. The number of goods entered at the port during the past week were somewhat in advance of the corresponding week of 1859, though for the year thus far the decrease is considerable."

A large amount of business has been transacted in cotton this week. Speculators have operated freely, and exporters to a fair extent. The purchases of the trade have somewhat exceeded their consumption. The market has preserved a firm tone, and our quotations for middling American are raised 1-16d to ⅛d per lb. Egyptian do not yet show any improved tendency. Brazil are steady at former rates. East India have been taken freely by speculators, and have advanced ⅛d per lb. The sales to-day are 12,000 bales. The market continues firm. The reported export amounts to 9,970 bales, consisting of 1,440 American, and 8,530 East India.

MARKETS IN THE MANUFACTURING DISTRICTS

Our letters from the manufacturing districts state that the demand for cotton goods for shipment both to India and China continues very limited; nevertheless, that no change of importance has taken place in the quotations. The woollen trade is still firm, and the stocks of goods in warehouse are very limited for the time of year. Wool is selling at high rates, notwithstanding the large quantities disposed of at the public sales held in the metropolis. Iron has become much less active, but coals continue to support previous rates.

MANCHESTER, Sept 6.—Our market has been rather better in its leading portions. A fair business has been done in yarn in particular, water twist for Germany and the Mediterranean, and prices are in many cases ⅛d per lb higher. In cloth, a considerable business has been done in 36-inch for the Continent and South America. In 40-inch cloths, the tendency observed last week to extend sales for future delivery has induced a speculative demand for delivery at yet more distant dates; many of such purchases seem most probably intended for China, and though confined to a few hands, they have added materially to the strength of the market. In other articles there has been much steadiness, and, on the whole, an improvement.

BRADFORD.—Wool—A little firmness has been given to prices, and any conceding tendency checked. The colonial wool market is almost stagnant. For noils and brokes there is still a good demand. Yarns—The demand for worsted yarns keep steady. The export orders are yet being delivered, and the consumption by the home manufacturers is on a moderate scale. In prices there is no alteration for the present month's contracts. Pieces—The better weather has brought more buyers into the warehouses, and though the improvement has been slightly felt by the manufacturers, the merchants are so well stocked with goods that have been accumulating for some time back that they are able to supply all wants without troubling the manufacturers with many orders. The American houses have been buying recently, which causes more business, but they still act with great caution.

HALIFAX.—There is no improvement to notice in the state of the textile manufactures of this town and district. There is a good deal of caution used on all sides, and many of the yarn spinners, and also some of the manufacturers of worsted goods, are curtailing their work, so that if possible they may keep the market free from a glut.

HUDDERSFIELD.—Although we have not had a great deal doing in our market, there is a better feeling as regards the future, consequent upon the fineness of the weather, and the decline in the corn markets. We have had a fair number of buyers about the Cloth Hall and the warehouses, and on the whole the prospect for the autumn is much more cheering. Prices about the same.

LEEDS.—There was a fair attendance of buyers in the Cloth Halls, and a steady business was transacted in seasonable fabrics.

ROCHDALE.—The market for flannels and kindred fabrics has been moderate. There was a good inquiry for finished goods, of which there was no large quantity offering. Indeed, there are good orders on hand, and producers are well employed. Neither Saxonies nor Yorkshire goods are quite so much in demand, but prices are firm. The stocks of goods on hand are below an average for the season, and manufacturers are looking for continued briskness for the remainder of the year. The wool market was quiet, and not much business was done. Prices were a trifle easier.

BIRMINGHAM.—The general trade of this town continues to improve; from the adjoining districts the reports are less satisfactory. Another failure has occurred in the South Staffordshire iron trade. The liabilities will, it is said, be heavy.

LEICESTER.—The hosiery, as far as regards the home branch, is quiet, and there has not been much doing for several weeks past. A few shipping orders have been executed. At Hinckley and Loughborough trade is dull. In yarns there is still a downward tendency. Wools are by no means firm.

NOTTINGHAM.—The lace trade is equally depressed this week as last. There is very little doing in the plain department, either in stiff nets or Mechlins. As respects the fancy department, there is not an average amount of business doing, and there is not an immediate prospect of a revival in any branch. The silk department has not been more dull for several years. The quietness of the trade generally causes manufacturers to be exceedingly cautious as to what goods they finish, so that stocks may be kept low. In hosiery there is no improvement; nearly every branch is dull, and a great deal of machinery is unemployed. Yarns are not materially altered in price. Silks continues extremely dear.

BELFAST.—Flax—There was an active demand for flax in all the country markets last week. Yarns—The demand generally, both for home consumption and export, has been of a very moderate character, and transactions have been but limited; for power-loom purposes the demand has been steady. Although some spinners continue to hold forward orders, yet stocks on the whole may be reported as slightly on the increase. Prices of lines are firmly maintained. Tows, in some instances, are rather easier of purchase.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Welch bars, 5*l* 10s to 5*l* 12s. Rails, 5*l* 5s. Current prices of pig iron—Staffordshire cold blast, 4*l* 5s; best native hydrate pigs, 3*l* 12s 6d to 4*l*; first-class all mine grey forge pigs, 3*l* 7s 6d to 3*l* 12s 6d; good mine pigs, with a modicum of flue cinder, 2*l* 17s 6d to 3*l*;

mine pigs, deteriorated by cinder, 2*l* 12s 6d to 3*l*; Cleator Moor hæmatites, 3*l* 11s 6d to 3*l* 12s 6d; Workington hæmatites, 3*l* 11s to 3*l* 12s 6d; Kirkless Hall hæmatites. 3*l* 10s to 3*l* 12s 6d; Barrow hæmatites, 3*l* 12s 6d to 3*l* 15s; grey forge cinder pig iron, 2*l* 10s to 2*l* 15s; white forge cinder pigs, 2*l* 5s to 2*l* 10s; melters, Nos. 1, 2, and 3, 2*l* 15s to 2*l* 17s 6d; superior makes of all mine melting iron, 3*l* 7s 6d to 3*l* 17s 6d, according to make and quality. Favourite Shropshire and Forest of Dean brands, 4*l* 5s; northern hæmatites from 3*l* 10s to 3*l* 15s, according to brand and quality.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—There has been a steady demand this week, and prices occasionally show a further improvement of 6d per cwt. The market, although firm, is not very animated in the absence of speculative transactions. With diminished supplies of West India, the sales to yesterday (Thursday) amounted to 2,225 hhds, including the various parcels brought to auction. 351 casks Barbadoes partly sold: brown, 36s 6d to 37s 6d; yellow, 38s to 45s. 154 casks 400 barrels other kinds, chiefly Grenada: brown and yellow, 36s to 40s 6d per cwt. The week's delivery amounted to 4,700 tons, making a total increase for consumption of 10,550 tons since the commencement of the year. According to the latest returns, the stock at this port was 71,600 tons, against 75,000 tons in 1859.

Mauritius.—8,264 bags in the public sales principally found buyers: low dark to good brown, 32s 6d to 37s 6d; grainy brown to fine yellow, 39s to 45s 6d per cwt. Business has also been done by private contract.

Bengal.—780 bags partly sold at 45s to 47s 6d for grainy Bally, &c.; good yellow Gurpatta date being taken in at 43s per cwt.

Madras.—520 bags good to fine grainy yellow brought 44s to 46s. 1,877 bags native: brown and yellow, 33s to 35s 6d; low dark pasty brown, 29s to 29s 6d per cwt.

Foreign.—6,820 bags clayed Manilla, by auction, partly sold at 37s to 38s, being rather dearer. 5,650 boxes Havana were bought in at high prices, or withdrawn. 5,810 bags Siam all sold at 42s 6d to 46s 6d for soft greyish yellow to good white. Privately, 20,000 bags clayed Manilla are reported at 37s to 38s. Floating cargoes of Havana have sold for Gottenburg, No. 15, at 30s; No. 11½ to 12, at 27s 10½d; one, No. 10½, at 27s 3d for a near port; and one, No. 13, at 28s 3d.

Refined.—The market has been firm, and closes about 6d dearer than on Friday last, common goods selling at 50s per cwt. An advance being demanded for Dutch crushed, the sales have been rather limited.

Molasses.—A parcel of St Kitt's has sold at 18s per cwt.

Rum.—The market is firm, although less active than of late; and the sales have been rather limited during the week.

Cocoa.—At the public sales, 174 bags Trinidad partly sold at last week's prices, from 66s to 73s for grey to good red. 281 bags Grenada went at 61s 6d to 67s 6d. 40 barrels Bahia were bought in at 58s, and 50 bags Surinam at 75s per cwt.

Coffee.—Nearly all the parcels brought forward in the public sales have found buyers at full rates, and the market still presents a very firm appearance. 1,877 bags native Ceylon sold from 61s for very ordinary to 64s 6d for superior bold. 1,510 casks 300 barrels 1,415 bags plantation: fine fine ordinary to middling, 67s to 74s; good middling to good, 75s to 80s. 319 bags Costa Rica partly found purchasers at 65s 6d for fine fine ordinary mixed. 101 half-bales Mocha were bought in at 120s for small berry.

Tea.—The most important feature of the week has been the public sales on Tuesday and Wednesday. Of 27,900 packages contained in the catalogues, 11,650 packages found buyers, rather more than three-fourths of that quantity being printed "without reserve." Good black-leaf congou was rather cheaper, while some of the medium sorts went ½d to 1d per lb under the late value, and the better grades of green were cheaper. Further parcels will be brought forward to-day.

Rice.—Limited transactions have occurred, the market showing a downward tendency, and prices may be quoted 6d to 1s lower. By private contract, low middling white Bengal has realised 12s 6d to 12s 9d; fair Moulmein, 10s 6d. 5,371 bags Bengal, at public sale, were taken in: middling to fine, 13s 6d to 15s 6d per cwt.

Imports and Deliveries of Rice to September 1, with Stocks on hand.

Sago Flour.—118 bags were bought in at 17s 6d per cwt.

Spices.—Nutmegs and mace remain unaltered. A parcel of white pepper has sold by private contract at 6d cash, and partial inquiries prevail for Zanzibar cloves. 100 bags common mixed heavy Malabar pepper were bought in at 5d per lb. Liberal supplies of ginger continue to be brought forward. Cochin has further declined 3s to 5s, and Jamaica about the same. Of the former, 1,050 cases 290 bags about two-thirds sold: small to good, 46s to 61s; superior bold, 75s to 81s. 98 barrels Jamaica, ordinary to fine, 3*l* 8s to 7*l* 1s per cwt.

Saltpetre.—Very little business has been done this week by private contract, and the parcels brought to public sale, comprising 2,450 bags Bengal, were taken in: refraction 12 to 8, 40s to 42s 6d; 4½ to 3, 44s. 294 bags Madras, refraction 5½ to 2½, were withdrawn at 38s to 40s, since sold at 1s less; and a part of the Bengal, refraction 12 to 8½, at 40s to 41s 6d, and the fine at 43s 9d per cwt.

Imports and Deliveries of Saltpetre to September 1, with Stocks on hand.

Deliveries	11300	12500	10420	11450
Stock	6560	4700	4000	4630

Shellac maintains the late improvement, and the market is firm. Good button has sold at 10*l* 10s per cwt.

Dyestuffs.—No important change has occurred in prices this week. Small sales of turmeric have been made at 12s to 13s 6d. Gambier and Cutch are unaltered.

Logwood.—A cargo of St Domingo recently sold for exportation at 5*l* 5s. 95 tons redwood, by auction, were bought in at 5*l* 15s per ton.

Lac Dye.—32 chests common marks sold at 4¾d to 6¾d per lb.

Metals.—Nearly all descriptions remain inactive, but prices have experienced very little alteration during the week. Scotch pig iron has been sold to a moderate extent, and the last price paid for mixed Nos. was 51s per ton. The quotation of spelter is 20*l* 5s to 20*l* 10s, with a limited business doing. Stock on the 1st inst., 4,350 tons, against 5,200 tons in 1859. Tin remains firm: Banca, 136s to 136s 6d; good Straits, 131s 6d to 132s per cwt. British copper declined ¼d yesterday: sheet, 11¼d per lb; cake 4*l*, viz., 100*l* per ton.

Hemp.—The parcels of Manilla brought forward in the public sales on Wednesday, and comprising 1,800 bales, were chiefly taken in above the value, viz., 22*l* to 23*l* 10s. Several parcels have sold by private treaty, at lower prices. Clean Petersburg meets with moderate inquiries at 29*l* per ton. The jute market is firmer. 4,000 bales in the public sales went about 10s dearer: ordinary to fine, 13*l* 7s 6d to 20*l* 5s per ton.

Linseed.—The market has become quiet: Bombay, 56s 6d to 57s; Calcutta, afloat, 54s per quarter.

Turpentine.—Spirits, 31s 6d. Some rough, old import, has sold at 9s 3d per cwt.

Oils.—The most important feature to notice has been the large sales of rape. Foreign refined, 47s to 47s 6d; brown, 44s on the spot and for delivery. Linseed is in steady demand at 6d decline, viz, 30s 6d per cwt in all positions. Cocoa-nut has sold more readily for exportation: Ceylon, 47s; Cochin, 48s 6d to 49s. Palm is steady: fine, 45s per cwt. Olive maintains the improvement last quoted: Gallipoli has sold at 59*l* 10s; other kinds quoted 54*l* to 57*l* per tun.

Tallow.—Foreign has been dull during this week, prices showing a decline of 3d to 6d. First sort Petersburg on the spot, 51s 9d to 52s; for delivery in October to December, 52s; and for the first three months of 1861, 52s 6d per cwt.

Particulars of Tallow.—Monday, September 3.

POSTSCRIPT.

Friday Evening.

Sugar.—The market was very firm to-day, and floating cargoes inquired after at extreme prices. 810 casks West India found buyers. The public sales, comprising 2,900 bags Mauritius, 1,350 bags Bengal, and 868 bags Gurpatta date, went off at full prices. 4,000 bags low brown Bengal changed hands privately at 31s 3d. Several floating cargoes of foreign were said to have been sold privately for the United Kingdom.

Coffee.—460 casks 350 barrels and bags plantation Ceylon sold at full rates. 1,370 cases Neilgherry Hills realised 60s 6d to 81s per cwt.

Rice.—2,220 bags Bengal were taken in and since partly sold: middling white Bengal, 12s 10½d; broken Daces, 11s 9d per cwt.

Spices.—827 bags good Singapore black pepper realised 4¾d to 4¼d; 131 bags Singapore white, 6¼d to 6¾d per lb.

Safflower.—112 bales Bengal part sold at 5*l* 5s to 8*l* 5s per cwt.

Tallow.—All kinds close without alteration.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar, in some instances, for unstoved goods is 6d higher. Treacle continues scarce and in demand. The Dutch refiners having advanced their prices for crushed, has checked business here.

Green Fruit.—Market quiet. A slight improvement in the price of lemons; a parcel of Lisbon, per steamer, sold by Keeling and Hunt at public sale, went at an advance of 2s per package. Stock of all kinds light. The sales of West India pine apples have terminated for the season; the result has been unfavourable to the importers.

Dry Fruit.—An unexpected change has taken place in the position of the currant market. The new fruit arrived last week, and prices opened at 40s to 42s for good fruit, with some ordinary which was valued 38s in proportion. The sales were extremely limited, and in the face of large arrivals the trade importers in the first steamer sold their stock at public sale without reserve, causing a fall in prices of 4s to 6s. At a subsequent sale of some fruit owned by a merchant, 90 tons were bought in at 35s to 38s. These low rates will undoubtedly bring the article into very large consumption this winter. New fruit arrives in this country by steam fully a month before it is wanted, and the first cargoes, this year in particular, have been shipped off in such a hurried manner that dealers are not very favourably impressed with the quality. However, reports of what is coming on are most satisfactory, and the entire fruit crops have been gathered and stored without any rain.

Colonial and Foreign Wool.—Since close of the sales the market has remained firm.

Flax unaltered; not any sales made this week.

Hemp.—Market steady at our quotations; a limited amount of business doing this week.

COTTON.—Sales of cotton wool from Friday, 31st August, to Thursday, 6th September, inclusive:—2,200 bales Surat at 3d to 3½d for very ordinary seedy to fully fair Compta; 4d to 4½d for fair Dhollera and Oomra to good fair Dhollera; and 4⅝d for fully fair sawginned, 5d good fair new Broach, 3⅞d middling Broach; 1,300 bales Madras, 3½d to 3⅝d for middling fair to good fair Western; and 3d, 4⅜d, and 4⅞d for very ordinary seedy to fully fair Tinnivelly. A good demand has prevailed throughout the week, and prices of Surat are well maintained, and in some cases ⅛d per lb advance has been paid on Compta and Dhollera. Other kinds are less inquired for, and remain unchanged. A good business has been done in Tinnivelly and Western Madras at the extreme prices of last week, and the market closes with great firmness. P.S.—Market very firm. Sales to-day, 700 Surat, 4½d good fair new Dhollera; 5½d good new Broach.

TOBACCO.—There is a much firmer tone manifested by holders, in consequence of the continued reports of injury done to the growing crops by the long continued drought. It is reported that some parcels have been withdrawn from the market.

METALS.—There is no improvement to note in our metal markets, which are still without life. The low prices of copper having induced a little better inquiry, the smelters have raised the price ¼d per lb, since which we have heard of no transactions in English.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	54	3
Fat by ditto	2	9
Yellow Russian	53	6
Melted stuff	40	0
Rough ditto	23	6
Greaves	20	0
Good dregs	7	0

Imports this week 3,705 casks.

PROVISIONS.

We have no alterations to note in the bacon market. Six on board is still made for best marks. Inferior meat is very slow of sale. Hamburg is in fair demand. Butter moves off briskly at better prices.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 3.—The total imports of foreign stock into London last week amounted to 13,707 head. In the corresponding week in 1859 we received 12,659; in 1858, 10,673; in 1857, 11,404; in 1856, 7,805; in 1855, 7,873; and in 1854, 10,105 head.

From our own grazing districts the receipts of beasts fresh up were very large, and of greatly improved quality. All breeds met a very dull sale, at a fall in value of from 2d to 4d per 8 lbs, the general top figure for beef being 4s 10d per 8 lbs, and a clearance was not effected. With sheep we were somewhat heavily supplied, and the demand for them was very inactive, at a fall in value of from 2d to 4d per 8 lbs. There was a dull sale for lambs, at 4d per 8 lbs less money. Calves changed hands slowly, at Thursday's decline in value.

SUPPLIES.	Sept. 6, 1858.	Sept. 5, 1859.	Sept. 3, 1860.
Beasts	6523	5270	6090
Sheep and Lambs	26900	29650	30100
Calves	280	212	300
Pigs	740	520	280

THURSDAY, Sept. 6.—To-day's market was very scantily supplied with beasts fresh up. The demand, however, for all breeds ruled very inactive, at Monday's decline in value. Sheep—the show of which was moderate—changed hands slowly, on former terms. We have to report a dull inquiry for lambs, at barely stationary prices. Prime calves were steady; but inferior veal was very dull, at previous rates.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	2	5	4
Second quality ditto	3	4	3	8	Large coarse calves	3	10	4	6
Prime large oxen	3	10	4	6	Prime small ditto	4	8	5	0

Coarse and inferior sheep	3	6	3	10	Small porkers	4	8	5	0
Second quality ditto	4	0	4	6	Suckling calves...each	19	0	22	0
Prime coarse-woolled do.	4	8	5	0	Quarter old store pigs	23	0	31	0

Lambs, 5s 0d to 6s 0d.

Total supply—Beasts, 1,150; sheep and lambs, 10,500; calves, 350; pigs, 312.
Foreign supply—Beasts, 736; sheep, 3,000; calves, 210.

NEWGATE AND LEADENHALL.

FRIDAY, Sept. 7.—Rather large supplies of each kind of meat are on sale here to-day. Prime pork is rather dearer; but other descriptions of meat are drooping in price.

Per 8 lbs by the carcass.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	0	Mutton, inferior	3	0	3	6
Middling ditto	3	4	3	8	— middling	3	8	4	4

Prime small	4	2	4	4	Large pork	4	0	4	6
Veal	4	0	4	8	Small pork	4	8	5	4

Lamb, 4s 8d to 5s 6d.

HOP MARKET.

BOROUGH, Monday, Sept. 3.—The reports from the different districts of the plantations are on the whole worse, and the determined character of the blight has become more fully confirmed. The duty stands at 50,000*l*. The trade continues active, and prices buoyant. A pocket of the new growth, very immature and inferior in quality, has arrived at market, and been sold at 22*l* per cwt. Mid and East Kents, 170s, 210s, 210s; Weald of Kents, 160s, 190s, 220s; Sussex, 140s, 160s, 190s.

FRIDAY, Sept. 7.—The accounts still come very bad from most parts of the plantations; the market is quiet, but firm at late prices. Duty, 45,000*l* to 50,000*l*.

THE BINE.—The recent favourable change in the weather has caused an improvement in those grounds where there previously existed any promise of hops. Where the plantations appeared to be blighted the warm sunshine has completed the work of destruction. In a few favoured localities it is expected that the yield may be a 2 or 3 cwt per acre. In others the produce will scarcely be worth picking, and in some grounds it is said will be left absolutely to their fate, as past doing anything with.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 3.—The arrivals of potatoes coastwise and by land carriage since Monday last have been moderate. The demand is steady, and prices are well supported. York Regents, 155s to 180s; Shaws, 90s to 115s; other kinds, 70s to 90s per ton.

WATERSIDE, Thursday, Sept. 6.—The supplies at this market to-day, coastwise and by rail, were below the average, with a fair demand at the annexed quotations:—York Regents, from 130s to 150s; Shaws, from 90s to 110s; Middlings, from 60s to 80s per ton; inferior qualities, various.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 10s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 10s to 1*l* 16s per load. A moderate demand.

CUMBERLAND.—Meadow hay, 2*l* 15s to 5*l* 5s; clover, 3*l* 10s to 6*l*; and straw, 1*l* 10s to 1*l* 18s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 10s to 5*l* 0s; clover, 3*l* 15s to 6*l* 6s; and straw, 1*l* 10s to 1*l* 16s per load. A fair demand.

COAL MARKET.

FRIDAY, Sept. 7.—Wall's-end:—Hetton 19s 6d—Haswell 19s 6d—Stewart's 19s 6d—Hartlepool 19s 3d—Braddyll's Hetton 18s 3d—Russell Hettons 18s 3d—Durham 17s—Kellee 18s 9d—Eden Main 17s 9d—Shincliffe 18s—Trimdon Thornley 17s—Harlon 17s 9d—Thornley 17s—Hedley 17s 6d—Holywell Main 16s—Newton Main 14s 9d—Tanfield Moor Bates 13s 3d—Buddle's Hartley 16s 3d—Clark's West 16s—Straker's 16s 3d—Davidson's Hartley 16s 9d—Hastings' Hartley 16s 9d—Howard's Hartley 16s 6d—Lambert's Hartley 16s 3d—Whilridge 15s 6d. Ships at market, 94.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 7.—There is no improvement yet to notice in the demand, the uncertainty about the harvest still influencing buyers in their operations, which are kept within the smallest compass possible. The next public sales here will commence on the 19th inst., consisting chiefly of East India wool; probably about 14,000 bales of these, and a few thousand bales of other low descriptions.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 7.—Grain market most inactive. Wheat 2d down since Tuesday; flour 1s lower; beans quiet, but steady; Indian corn freely offered at 34s for Galatz and mixed American. Barometer giving way.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 7.—The demand for manufactured iron during the past week has been to a fair extent, at about previous rates. There has been more firmness in Scotch pig iron, occasioned by the improved prospect of the harvest. Copper was yesterday advanced 2*l* per ton on tile and cake copper, and ¼d per lb on manufactured. Lead continues dull. Most other metals remain without alteration.

The Gazette.

TUESDAY, Aug. 28.

BANKRUPTS.

J. Clarke, Kidderminster and Bewdley, tanner.
C. Botten, Crawford passage, Clerkenwell, brass founder.
R. Buttle, Long acre, tailor.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic returns of railways in the United Kingdom for the week ending Aug. 25 amounted to 572,150*l*, and for the corresponding week of last year to 544,730*l*, showing an increase of 27,420*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 247,468*l*, and for the corresponding period of 1859 to 242,956*l*, showing an increase of 4,512*l*.

CALEDONIAN.—The directors of this company state in their report that the accounts show a balance of 104,861*l*, which, after payment of 31,455*l*, the dividends on the preference stock and shares, would leave 73,405*l*. The directors recommend a dividend on the ordinary stock at the rate of 4½ per cent. per annum, which would absorb 65,930*l*, and leave a surplus of 7,475*l* to be added to the contingent fund, which would then amount to 16, 616*l*.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Sept. 3.—The railway market opened buoyantly this morning, and experienced a further general advance, from which a partial reaction took place before the close. Indian descriptions were also firm. Foreign railways were rather dull. In American securities the shares of the Illinois Central were again higher. New York and Erie shares, New York Central, and Michigan Central also advanced. Mines, although inactive, showed a rather stronger tendency. Joint stock banks were likewise in better demand, London and South African especially improved to ½ to ¼ dis. In miscellaneous descriptions, London Discount and National Discount were firmer. Victoria debentures, new, left off at 109¾ to 110; Canadian Five per Cents, 101¼ to 102; Ocean Marine Insurance, 2⅛ to ¼ pm.; Universal, ¼ to ⅜ pm.; London and Provincial, ⅛ dis.

TUESDAY, Sept. 4.—In the railway market to-day the principal feature was a decline of ½ per cent. in Lancashire and Yorkshire stock, on the announcement of the serious accident on that line. Several other descriptions were also lower, especially South-Western, North-Eastern, North British, and South-Eastern. The market closed with rather a dull tendency. In the colonial market a reduction took place in Canadian descriptions, especially Great Western shares and Grand Trunk stock. The latter closed at 31½ to ¾, or ⅜ per cent. lower than yesterday. Foreign descriptions were again unsteady. Lombardo-Venetian left off rather heavily at 1 to ⅞ dis. American securities fully maintained the late advance, and in some cases, particularly the bonds of the Michigan Central and New York Central, the final quotations showed a fresh improvement. Mines were little dealt in, but closed firmly. Joint stock banks experienced no alteration of importance. In the miscellaneous market, National Discount shares were quoted a fraction higher. Victoria debentures, new, left off at 110; Canadian Five per Cents., 102.

WEDNESDAY, Sept. 5.—The railway market opened firmly this morning, most of the leading stocks being quoted at an advance, but towards the afternoon a partial reaction took place. The final prices, however, were in several cases higher than yesterday, especially as regards London and North-Western, Midland, Lancashire and Yorkshire, North British, and Sheffield. Caledonian and Eastern Counties were rather flat. In the colonial market, Great Western of Canada and Grand Trunk receded, the latter closing heavily at 30 to ½, or more than 1 per cent. lower. Atlantic and St Lawrence shares, on the other hand, improved, and Indian descriptions were steady. Foreign railways continued neglected, and the only change of importance was a decline in South Austrian and Lombardo-Venetian. In American securities, Illinois Central shares relapsed; Pennsylvania Central bonds were also weaker; while Michigan Central continued firm. The transactions in mines were more numerous, and one or two descriptions were quoted higher. In miscellaneous descriptions the shares of the Great Ship Company were flat, the ordinary at 7s 6d to 8s, and the preference at 5s discount.

THURSDAY, Sept. 6. In the railway market to-day the principal transactions were in Lancashire and Yorkshire stock, at an advance of ¾ per cent. London and North-Western and North-Eastern descriptions also improved; while North British, Caledonian, and Sheffield were rather flat. The general business was unimportant. In the colonial market, Buffalo and Lake Huron receded. Great Western of Canada shares, on the other hand, partially rallied, leaving off at 13½, while Grand Trunk stock remained without recovery at 30 to ½. Foreign descriptions continued with a dull tendency, especially South Austrian and Lombardo-Venetian, in which a fresh fall took place to 1⅜ to 1½ dis. In American railway securities the bonds and shares of the Michigan Central and the bonds of the New York and Erie and Pennsylvania Central improved. There was no change of importance in mines.

FRIDAY, Sept. 7.—The railway share market to-day was very inactive, and in a few instances the lack of business prejudiced prices. A reduction of ¼ to ⅜ per cent. took place in several of the principal stocks.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

Free for Six Stamps.

ENGLISH, FRENCH, AND AMERICAN MODE OF TREATING DISEASE.—Proving the fallacy of the former, the non-success of the other, and the unequalled efficacy of the latter, as demonstrated in thousands of cases, whereby the sufferer can easily cure himself privately, safely, and at a trifling cost, without the aid of the Faculty with their mineral poisons. The New Mode has been recently introduced into Great Britain by an eminent practitioner, who has studied in the three kingdoms, and holds from each distinguished Titles and Diplomas, including that of the National Academy of Sciences, Paris, who approve the new Self-Cure Discovery, which is sent free to any address on receipt of six stamps by the Doctor's private secretary, Wm Hill, Esq., M.A., 27 Alfred place, Bedford square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hipe being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly London.

Price of a single Truss. 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER, 228 Piccadilly, London

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.—— Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Hidlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II. MARRIAGE: its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HOLLOWAY'S OINTMENT AND PILLS.—Whooping Cough, Colds, Pneumonia.—These infantile disorders were the terrors of parents, who knew the impossibility of administering medicine internally to children, till Professor Holloway discovered his invaluable Ointment. This Ointment rubbed externally on the throat and chest, passes through the skin, and penetrates to the affected tissues without causing the irritability and feverishness always produced by a child's repugnance to medicine, and which vastly procrastinates the cure. No inconvenience or difficulty attaches to this treatment, by which thousands of children are annually saved, or secured against future pulmonary disease. In all disorders to which childhood is particularly liable, parents, guardians, and nurses may with confidence resort to Holloway's Ointment, which, when practicable, should be assisted by his purifying Pills.

FIRST-CLASS EDUCATION, at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary, according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements. Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

Just published, price 1s; by post, 1s 1d; sealed, 1s 6d,

DR BRIGHT'S MANUAL ON SPERMATORRHŒA, &c. With Cases and Drawings from Life, &c., &c. Licentiate of the College of Physicians, Member of the Royal College of Surgeons, &c., &c.

Contents:—Modern Treatment of Diseases of the Kidneys, Bladder, Prostrate Gland—Desire for Solitude—Groundless Fears, &c.; showing how these supposed incurable maladies may be effectually eradicated by the most simple means. Published and sold by J. Allen, 20 Warwick lane, Paternoster row, London.

THE HUMAN HAIR

Just published, price 1d, the 76th edition of

GRIMSTONE'S THREE MINUTES' ADVICE on the Growth, Cultivation, and Preservation of the Human Hair. This unique little work contains two engravings and many letters of undoubted authority, proving Grimstone's Aromatic Regenerator to be the only article that will produce a new growth of human hair, eyebrows, moustachios, whiskers, with a new growth of hair upon bald places. Sold in triangular bottles, 4s, 7s, and 11s. This size contains four of the 4s size; by post 12s, case and postage included

Grimstone's Eye-Snuff for exportation. Sold in Jars 8s per lb; or in Tin Canisters, 8d, 1s 3d, 2s 4d, 4s 6d and 8s 6d. His Medicated Eye-Snuff, samples 1s 1½d 2s 9d, and 4s 6d. This snuff is intended for Ladies or Gentlemen who are not Snuff Takers. All letters to William Grimstone, merchant, 52 High street, Bloomsbury.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

MR CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row; and Mann, 39 Cornhill, London.

MEDICAL ADVICE.

DR LA'MERT, HONORARY Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., may be CONSULTED on the Functional Derangements of the Nervous and Reproductive System, and on the various forms of Local and Constitutional Debility, from Eleven till Two, and from Six till Eight, at his residence,

37 BEDFORD SQUARE, London.

The 71st Edition—SELF-PRESERVATION: An Essay on the Secret Infirmities of Youth and Maturity, price 6d, or sent free in an envelope, by Mann, 39 Cornhill, or by the Author, for Seven stamps.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, Social, and Physical Relations—Happy and Unhappy Unions—Conjugal Anticipations and Disappointments—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence—Its History, Causes, and Moral Consequences—The Sterility of Age.

Dr La'Mert is the only registered and legally qualified medical practitioner who has been engaged exclusively, for upwards of 20 years, in the treatment of these special disorders.

SEQUELIN'S OIL.—This vegetable preparation is most successful as an instantaneous restorative, strengthening weak hair, opening pores of the skin, most effectual in the growth of hair, eyebrows, whiskers, and moustaches, &c., preventing its falling off, giving also brightness, softness, and keeping its natural colour, and checking the most obstinate baldness in two months. One bottle is sufficient. Price 6s and 10s. The money returned if not effectual. Sold by the Inventor, Sequelin, 40 Wharton street, Lloyd square, W.C., London.

ICE, AND REFRIGERATORS FOR preserving Ice and cooling Wine, Butter, Cream, Water, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY (new removed to 140 Strand, W.C.), of the best make and at the lowest cash prices. No agents are appointed in London for the sale of the Company's Ice or Refrigerators. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2s 6d, 5s, 9s, and upwards, forwarded any distance into the country by "goods" train, without perceptible waste. Wine-coolers, ice-cream machines, Ice planes for cherry-cobblers, freezers, moulds, &c. Detailed printed particulars may be had, by post, on application to the Wenham Lake Ice Company, 140 Strand, London, W.C

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

ON SPINAL AND OTHER DEFORMITIES.
PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
London: John Churchill and may be had of all booksellers.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.
CHEAP, LIGHT AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

TOURISTS AND EXCURSIONISTS are specially provided for at
E. MOSES and SON'S,
MERCHANT TAILORS, HATTERS, HOSIERS, BOOTMAKERS, &c.,
Corner of MINORIES and ALDGATE, and
NEW OXFORD STREET, Corner of HART STREET.
And Bradford and Sheffield, Yorkshire.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.
Just published, gratis, or post free for one stamp, to be had of all agents and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. and B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their Manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable oilmen, grocers, &c., and wholesale of Crosse and Blackwell, 21 Soho square, London.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS, appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and her Majesty's mails. The following, or other vessels are appointed to sail from Liverpool:—
PERSIA, for NEW YORK direct, Saturday, Sept. 15.
ARABIA, for BOSTON, Saturday, Sept. 22.
*AFRICA, for NEW YORK direct, Saturday, Sept. 29.
*Taking Passengers and Goods for Nassau and Havana, to be transferred at New York on board R.M.S.S. Karnak.
Passage money, including steward's fee and provisions, but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.
For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

STEAM SHIPS.—The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—
HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2l; fore, 11s.
HARBURG—Every Sunday.
ROTTERDAM—Every Tuesday, Thursday, and Saturday, at 11 morning. Chief cabin, 1l 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.
ANTWERP, BRUSSELS, and the RHINE—The Moselle and Dolphin every Tuesday and Thursday, at 12 noon. Chief cabin, 1l 7s; fore, 20s. Brussels, 22s 3d. Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at noon.
OSTEND, BRUSSELS, and the RHINE—Every Wednesday and Saturday morning. Sept. 12 at 10; 15 at 12 noon. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 18s; fore, 14s. Brussels, 20s 3d. Cologne, 34s.
HAVRE—From St Katharine's Wharf, Thursday and Sunday. Sept. 9 at 5; 13 at 10. Chief cabin, 14s; fore, 10s. London to Paris, 1l.
PARIS, via CALAIS, direct—From London Bridge Wharf, every Wednesday and Saturday morning. Sept. 12 at 10; 15 at 12 noon. Chief cabin, 14s; fore, 10s. London to Paris, 17s 8d.
BOULOGNE—From London Bridge Wharf, every Tuesday, Thursday, Friday, and Sunday morning. Sept. 9 at 6; 11 at 8; 13 at 11; 14 at 12 noon. Chief cabin, 14s; fore, 10s. London to Paris, 16s.
EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday; at 10 morning. Fares: chief cabin, 25s; return, 37s 6d: fore, 15s; return, 22s 6d; deck, 10s; which fares include all pier dues at London and Grenton.
HULL—From London Bridge Wharf, every Wednesday and Saturday, at Eight morning. Chief cabin, 6s 6d return, 10s: fore cabin, 4s; return, 6s.
NEWCASTLE—From Newcastle Steam Wharf, 272 Wapping, every Wednesday and Sunday, at 10 morning. Chief cabin, 8s; return ticket, 12s: fore, 5s; return, 7s 6d.
YARMOUTH—From London Bridge Wharf, every Wednesday and Saturday, at Four afternoon. Saloon, 8s; return, 12s: fore cabin, 5s; return, 7s 6d.
MARGATE and RAMSGATE—From London Bridge Wharf, daily, at 10 morning, Sundays excepted; calling at Blackwall and Tilbury piers.
MARGATE and BACK Sunday at 9.7 morning, from Fenchurch street station, returning at ½-past 3 afternoon (one fare).
MARGATE, RAMSGATE, and HERNE BAY—Via Thames Haven, from Fenchurch street Station.
Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street; and St Katharine Wharf.

MIDDLESEX COUNTY LUNATIC ASYLUM, Colney Hatch.—To Millers, &c.—The Committee of Visitors of this Asylum will meet there on Tuesday, the 18th instant, at 2 o'clock, to open tenders for the supply of the best Household Flour, for the three or six calendar months from the 1st of October next. Tenders for each period are to be sent in, sealed up, addressed to the Committee of Visitors, at the Asylum, by One o'clock on the 18th instant, and the contractors or their authorised agents are requested to attend there at Two. The Committee do not bind themselves to accept the lowest or any of the tenders. Forms of tender may be obtained on application at the Asylum, and no tender will be noticed unless made on the proper form.
J. S. SKAIFE, Clerk.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.
The Brewery, Burton-on-Trent, April 30, 1860.

JULLIEN FUND.
Committee Room—30 New Bond street.
The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.
The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchell	Mr W. Duncan Davison
Mr W. R. Sams	Mr Julius Benedict
Mr Thomas Chappell	Mr A. Blumenthal

London and County Bank, Hanover square
Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.
April, 25th, 1860.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

FURNISH YOUR HOUSE
WITH THE BEST ARTICLES

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

TRADE B/P MARK.
BROWN AND POLSON'S
PATENT CORN FLOUR.
The LANCET states,
"This is superior to anything of the kind known."

RECIPE FOR SUMMER FRUIT PIE.—Boil the flour with milk for four minutes, then pour it over the stewed fruit, and brown it in the oven or before the fire. This is very lightsome and much preferred to the ordinary pie crust.—BROWN and POLSON, Manufacturers to Her Majesty the Queen, Paisley, Dublin, Manchester, and 23 Ironmonger lane, London.

DINNEFORD'S
PURE FLUID MAGNESIA
has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.
Prepared by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London Bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR KAHN'S MUSEUM NOW OPEN.

HARVEY'S FISH SAUCE.—Notice of Injunction.—The admirers of this celebrated Fish Sauce are particularly requested to observe that none is genuine but that which bears the back label with the name of WILLIAM LAZENBY, as well as the front label signed "Elizabeth Lazenby," and that for further security, on the neck of every bottle of the Genuine Sauce will henceforward appear an additional label, printed in green and red, as follows:—"This notice will be affixed to Lazenby's Harvey's Sauce, prepared at the original warehouse, in addition to the well-known labels, which are protected against imitation by a perpetual injunction in Chancery of 9th July, 1858."
6 Edwards street, Portman square, London.

TO VOLUNTEERS AND THE PUBLIC.
WILSON'S BREECH-LOADING RIFLE.
Mr THOMAS WILSON begs to call the attention of Volunteers and the Public to his New BREECH-LOADING RIFLE, and to state that he has committed the management of the patent to Messrs Rebone Brothers and Co., of 47 Broad street, Birmingham, to whom all inquiries or other communications may be addressed.
This Rifle is well adapted for all branches of Her Majesty's service, and is pronounced by the highest authority to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—
1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.
2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.
3rd It is easy to manufacture, and can be made entirely by machinery.
4th. It is so constructed that accident from careless loading or otherwise is impossible.
5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly for firing without the aid of tools. This facility would be occasionally valuable in rendering the gun useless to an enemy or mutinous troops
6th. The action is always in good order, requiring no adjustment in use.
7th. The action is equally applicable to single and double-barrel guns, and may be used for sporting as well as military purposes.
8th. The principle can be applied to all ready-made Enfield guns at an immense saving to the country.
Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.
A pattern may now be seen at Mr Lancaster's, No. 151 New Bond street, and at Mr Pritchett's, No. 86 St James's street, London, as well as at Messrs Rebone Brothers and Co., 47 Broad street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

A FINE HEAD OF HAIR. Whiskers or Moustache permanently obtained by OLDRIDGE'S BALM of COLUMBIA, which prevents the hair turning grey, and the first application causes it to curl beautifully, frees it from scurf, stops it from falling off, and if bald soon restores it again, and promotes the growth of new hair. Price 3s 6d, 6s, and 11s per bottle.—Ask for "Oldridge's Balm," No. 22 Wellington street, Strand, W.C.

THE DEATH OF THE RIGHT HONOURABLE JAMES WILSON.

"It is with the most sincere regret that we announce the death of the Right Hon. James Wilson, Financial Member of the Indian Council in Calcutta. Mr Wilson had from his first arrival in India suffered from the effects of the climate, and had been advised to retire for a time to the Hills. His anxiety, however, to bring into operation the important measures he had initiated for the reform of the Indian system of finance induced him to remain in Calcutta, and he has fallen a sacrifice to his high sense of public duty. His loss will be severely felt in India, and it will be most difficult to find a man capable of filling the place left vacant by his sudden and lamentable death."—*Times.*

The conductors of this journal do not feel that they can at present do more than record this mournful event in the words of others. It has come too suddenly upon them. If they should themselves say anything on the subject, it must be hereafter and deliberately.

THE COTTON SUPPLY OF GREAT BRITAIN.

ABOUT ten years ago (Dec. 1, 1849) we called attention, in an elaborate paper which was subsequently reprinted in a separate supplement, to the importation and consumption of cotton in this country. We then showed that the prospects were not satisfactory, inasmuch as the consumption was steadily increasing while the supply from all quarters was rather diminishing than otherwise; and we concluded therefrom not only that an advance of price was to be looked for, but that such an advance was indispensable in order adequately to stimulate both production and transmission to Great Britain;—without which our yearly increasing demand could not be met. The following figures will show that our prognostic proved correct; that a considerable rise took place; and that this rise has been followed by an augmented and, for the present it would appear, an adequate supply:—

I.—Average Price per lb of Middling Orleans and Fair Surats in Liverpool.

	Orleans.	Surats.
	d.	d.
From 1840–1844	5	4.06
1845—1849	4.8	3.70
1850—1854	5.95	4.20
1855–1859	6.83	4.85

The two principal quarters from which our supply of cotton is derived are, as is well known, the United States and the East Indies. A considerable quantity of long-stapled cotton has always been sent us from Egypt, Brazil, the West Indian Islands, and some small amount of a very fair quality has of late been imported from Port Natal, Australia, and the West Coast of Africa; but the total aggregate supply from all these quarters has increased only 100,000 bales per annum,—cotton not being the principal production in any of these countries. The following will show our average annual supply from these districts for the last ten years:—

II.—Average Importation annually from Egypt, Brazil, and Miscellaneous Countries.

	bales.
1840—1844	159,400
1845—1849	153.000
1850—1854	245,300
1855—1859	243,600

The production of cotton in India is always enormous, much being exported to China and much consumed at home, besides what is sent to Great Britain. This being the case, our supply from this quarter will obviously depend upon the price. A very low price will not pay for transmission to the port of shipment over the bad or non-existing roads of the interior. A moderate price secures to the Chinese as well as to the home consumer their usual proportion of the crop. But a high price in Liverpool brings to this country an almost unlimited supply; and if the quality were equal to the quantity, we might soon become comparatively independent of the American production. A great improvement has unquestionably taken place in the character of native Surat cotton during the last ten years, both in cleanliness and length of fibre (or *staple*, as it is technically termed), and some of a superior order grown from American seed is now regularly forwarded; but the mass of the East Indian bales retain their old peculiarities, being, in comparison with Orleans cotton, short, dry, seedy, and wasteful in the working. Under the impulse of the high prices of late years, however, it will be seen that our importations have largely increased.

III.—Average Annual Importation of East India Cotton.

	bales.
1840—1844	233,460
1845–1849	179,850
1850—1854	330,000
1855—1859	482,500

Compared with the five years from 1845—1849, then, our supply of cotton from all quarters *other than* North America has considerably more than doubled, and now reaches nearly three quarters of a million bales. But as our entire consumption exceeded last year two millions and a quarter, it is plain that we are still dependent on the United States for the principal portion of our supply. Let us see, therefore, what has been, and what is likely to be, our supply from thence.

It is obvious that the quantity we can receive from this source must depend upon two circumstances—the entire quantity grown,—and the quantity required for home consumption and for exportation to countries other than Great Britain.

There is little fluctuation from year to year in the number of acres devoted to cotton in the United States. There is, properly speaking, no competing crop through the greater portion of the States. Low prices of cotton and high prices of sugar, obtaining for several years, would no doubt occasion some transference of cultivation, and has done so every

now and then. The same may be said in reference to rice and Indian corn, to a limited extent:—when cotton is very high, it may pay the planter better to purchase provisions for his negroes than to grow them on his own estate. But these causes of fluctuation in the amount of land devoted to cotton are casual and not widely influential. It nearly always pays the planter to grow and send forward as much cotton as he can, for his negroes must be fed whether working or idle, and the price of cotton has never been so low as not to repay the cost of cleaning, packing, and transmission. The crop, therefore, depends *first* on the number of negroes, and *secondly* on the favourable or unfavourable nature of the season. We pointed out in the article referred to, which appeared ten years ago, that, on the average, the increase in the crop bore a very exact and continuous ratio to the increase in the slave population of America—a bale per negro being then the usual average. The negroes increase at the rate of about 3 per cent. per annum. Let us see whether the old proportion holds. In 1850, an average cotton crop was 2,350,000 bales:—

IV.

	Crop calculated on an increase of 3 per cent. per annum. bales.	Actual Crop. bales.
1849—50	2,350,000	2,096,700
1850—51	2,420,000	2,355,000
1851—52	2,492,000	3,015,000
1852—53	2,567,000	3,263,000
1853—54	2,645,000	2,930,000
1854—55	2,725,000	2,847,000
1855—56	2,806,000	3,528,000
1856—57	2,890,000	2,940,000
1857—58	2,977,000	3,114,000
1858—59	3,066,000	3,851,000
1859—60	3,158,000	4,475,000

It will be seen that the old proportion *did* obtain—or nearly so—till within the last two years—that is the average crop increased at rather more than the negro ratio of increase. The actual crops of 1856-7 and 1857-8 were within 100,000 bales of what we calculated it should be. The two last years, however, have yielded a wholly unusual and disproportionate increase—far beyond what even the most favourable weather could account for; the crop of 1858-9 being three quarters of a million of bales beyond the average, and that of 1859-60 (the cotton year terminates on the first of September) one million and a quarter. To what cause are we to attribute this sudden start forward in the productive powers of the cotton plantations of the United States?

Two causes have combined. The high prices which have prevailed for some time have led to *closer picking* than usual, cotton having been sent forward so low in quality and so dirty in condition that in ordinary years it would have been thrown aside as refuse. But the principal cause, which has upset all ordinary calculations, and which will make all future estimates for some time to come conjectural and hazardous, is undoubtedly the introduction of *guano*. The high price of negroes (whose value has been greatly augmented within the last few years) and the increasing difficulty of finding suitable virgin soil, have led to the application of this stimulating manure on an extensive scale. The result has been most striking and encouraging. We have even heard of cases where the produce per acre has been doubled by its use. But instances of this sort are probably exceptional. Still there is no doubt that the future estimates of the average American cotton crop must be very materially enlarged. If the present season had been a favourable one—which is by no means the case—the amount to be expected was by many placed as high as *five millions* of bales.

Let us now inquire what proportion of the crop of American cotton is received by Great Britain. The following table shows the mode in which this crop has been disposed of during the last ten years—given *in thousands of bales*:—

V.

	Total Crop. bales.	Sent to England. bales.	Sent to other Countries. bales.	Consumed in the United States. bales.	Proportion per cent. of Crop received by England. bales.
1849—1854	13,657	7,533	3,344	2,780	55
1855—1859	16,280	8,830	4,310	3,140	54

We may, therefore, fairly anticipate that out of a crop of 4,500,000 bales—which we may, it is believed, assume to be a moderate estimate of the future average of American production—this country will receive two million and a half. Our entire annual supply will, therefore, in ensuing years probably range as follows:—

VI.

	bales.
American cotton	2,500,000
East Indian	500,000
Miscellaneous quarters	250,000
	3,250,000
Of which we shall re-export, judging by past average	400,000
Leaving for our own consumption	2,850,000

But as the supply of cotton from India is so much determined by the price here, we must be prepared to strike off at least 150,000 bales from this estimate, if Surats should recede much below 4d a lb for "fair."

Now during the last ten years the entire consumption of cotton in Great Britain has averaged as follows:—

	Bales per annum.
From 1849—1854	1,778,000
1855—1859	2,160,000

The consumption of the current year will probably reach 2,300,000 or 2,400,000 bales. It is plain, therefore, that at length and for the present, supply has overtaken demand, and a range of lower prices than have obtained during the last few years may be looked for.

In concluding this paper we will place side by side in a tabular form the ratio of supply and consumption during the last twenty years:—

VII.

	Average Annual Supply. bales.	Average Annual Consumption. bales.	Price of middling Orleans. per lb. d.	Price of fair Surat. per lb. d.
1840-1844	1,425,900	1,290,480	5	4.06
1845—1849	1,371,920	1,477,360	4.8	3.7
1850—1854	1,791,500	1,778,000	5.95	4.2
1855—1859	2,128,000	2,160,000	6.83	4.85
The year 1859	2,393.000	2,295,000	7.12	5.25

The "supply" in the first column represents the total importations after the re-exportations are deducted.

THE LESSON OF GARIBALDI'S SUCCESS.

NON-INTERVENTION AND ITS LIMITS.

The amazing and almost magical success of Garibaldi has formed a fitting subject for the eloquent comments of some of our contemporaries. It has been justly remarked that his progress in Italy resembles more that of some owner of a disenchanting talisman in the Arabian tales than the march of a military conqueror. At his approach ominous hosts of well-armed foes have suddenly been transformed to friends. The bristling bayonets not only fell before him, but the men who held them glided quietly into the ranks of his followers. Even a solitary ship-of-war which the flying King met on his voyage to Gaeta, and telegraphed to fall into his train, is said not only to have refused to comply, but to have cleared decks for action against the fallen Monarch when his Spanish convoy made some faint show of employing force. Such facts as these embody the truest though the most pungent epitaph on the fallen dynasty, and show with demonstrative force that the feeling of the whole nation was not only prepared, but fully *ripe* for the catastrophe which has taken place.

And, now, how do these facts bear upon the English policy of non-intervention which this journal was amongst the first to recommend,—and what lesson does it teach us as to the application of this policy in the immediate future? The present moment is a very critical one for a consideration of these matters. The King of Sardinia has been in a manner compelled, though no doubt far from reluctant, to enter the Roman States in order to protect the revolutionary party against the mercenary soldiers of the Pope who had repeated at Fossombrone the tragedy enacted last year at Perugia. The rule of non-intervention has, therefore, in its letter, though not in its spirit, been broken by him, and we cannot yet say to what consequences this may lead on the part of Austria. Apart from this, the Venetian question must soon—we trust not too soon—become so urgent as to harass our diplomatists; and should Austria succeed in defeating the army of united Italy, the result will be almost to *demand* the interposition of England, in order to avert the fatal recoil which would otherwise follow. Let us, therefore, consider for a moment the light thrown by the war of last year and the revolution of this, on the value, meaning, and limits of the principle for which we contend.

And, first, we are struck by the immeasurable gain to all

statesmen and diplomatists who really care to know how the tranquillity of Europe may best be assured, which ensues from the policy of non-intervention where it is capable of application. Compare the state of European opinion last year and this with regard to the real interests of Italy. Last year the cause of Italy was promoted by the intervention of an external champion;—this year it has been represented by a single soldier, who has had no aid except that which the Italians themselves have dared to lend him in the face of powerful armies and the most blood-thirsty generals. Last year a cry arose among many of the most liberal politicians in Europe that Italy was not ready, and not even universally willing, to accept the proffered boon of freedom. It was commonly stated and believed that Napoleon's army had precipitated a most dangerous and undesirable crisis; that the Italians were neither sufficiently united nor sufficiently self-restrained to use a liberty which, left to themselves, they could never have gained; in a word, that the tranquillity of Italy could never be maintained unless France should choose to exercise the same despotic supervision which she had just compelled Austria to withdraw. Such was the result, and the necessary result, of even that intervention which was needful to cancel the former system of intervention. No one knew the truth. No one felt sure that Italy was as universally sick of her servitude as was asserted. Still less did any one know whether she were fit for freedom,—whether she could be moderate in the hour of success,—whether she could obey rulers of her own choice after she had expelled the invader. There were many sincere and warm Liberals even in England who held these views. There are none anywhere now. Garibaldi has tested the true temper and mind of the nation as none but an unassisted Italian leader could have tested it. We *know* now that Victor Emmanuel is the chosen King of Italy. But Victor Emmanuel himself with an army at his back could never have learned it,—would never have been permitted to learn it,—with anything like the certainty with which all Europe now knows it. This is the great value of the principle of non-intervention, that nothing else *can* at once test the will and ability of a nation to take up its freedom. Had even Sardinia *set* the Peninsula free, all Europe would have rained invective on the unscrupulous ambition of the King. Now, though Sardinia is invading the Papal States, scarcely a single Liberal's voice is heard in condemnation. It has become so conspicuously evident that the will of Italy is to unite itself under Victor Emmanuel,—that no Italian soldiers, though highly paid to defend the existing *régimes*, can be induced to do so,—that nothing but the presence of mercenary foreigners stands between the will of the people of Italy and its quiet and orderly accomplishment;—all this, we say, is put so entirely beyond question by Garibaldi's progress through Naples and the sympathetic risings in the Roman States, that no one can speak of Sardinia's invasion as an act of lawless aggression without conscious insincerity. It is, indeed, an aggression on Lamoricière and his followers,—but it is the desire of all Roman, nay of all Italian hearts. This clear conviction Europe could only have attained through the observance of the principle of non-intervention.

And this brings us to our second comment on the events of the last two years in Italy:—that the principle of non-intervention is sacred and valuable only because foreign nations cannot otherwise judge truly of the real state of a people's mind. It is a sound general test of the national capacity for freedom, that a nation should,—in the absence of all foreign oppression—be able to communicate its own feeling so far to fellow-citizens, among the soldiers and seamen, as to paralyse the only instrument of oppression which a national Government possesses.

But the test is only of value as a test. There is no sacredness in the mere *rule* of non-intervention. Could we once learn, so as to satisfy any reasonable mind, that a nation's will and capacity suits it for freedom,—then we should be imperatively called on to lend our aid, whenever we have really the power, to secure to it that inestimable blessing. Now, this observation has an obvious and practical bearing on the policy of England in the immediate future. We do now know,—we have now learned by proofs that are amply satisfying to every candid mind in the nation,—Tory, Whig, or Radical,—that Italy is firmly united, and is capable of great self-control in proving her own fixed purpose as to the policy to be pursued. If, then, after this convincing evidence has been presented to us, the liberty of Italy should be again endangered by external causes, we shall have no longer any excuse for standing aloof as we did in the war of last year. Last year we could say sincerely that we could not tell how far Italy was ripe for self-government. We mistrusted entirely the designs of France. We doubted gravely the capacities of Italy; and we therefore wisely held aloof. But suppose that now,—with the evidence of what we have recently beheld before us,—a too hasty and unsuccessful invasion of Venetia should place Italy again at the mercy of the Austrian arms,—should we then be warranted in standing calmly by to see the whole tide of liberty rolling back again before the old oppressor?—or even in leaving it to France to impose her own conditions in return for her aid? We say, without hesitation, that our statesmen ought to be prepared for acting in such a crisis on their present full knowledge of the truth. It may be said, that if we only warn Sardinia of the grave danger of a premature attack on Venetia, our conscience will be acquitted, and we shall be under no obligation to retrieve disasters which we had fairly warned her to avoid. This may be enough as a mere reply to Sardinia. It would not be enough as a justification of our passivity in Europe. We now know the one condition, the only condition, of keeping Italy permanently tranquil,—to let her govern herself. By mighty efforts she has nearly attained the full status of political liberty. It would be a repudiation of public duty which English statesmen would not soon cease to repent, if they allowed what has been gained not only for Italy, but for the peace of Europe, to be sacrificed in consequence of a single act of Italian imprudence.

THE NEW ZEALAND WAR: AND THE CONDUCT OF VICTORIA.

The news from our Australian colonies will excite mingled feelings of pain and pride in the hearts of Englishmen. It is always a national sorrow to hear of any check to our arms when they are wielded in a pure cause,—and still more to hear of the waste of any English lives, however few, on a fruitless, especially if it be a needlessly and culpably fruitless, enterprise: and the New Zealand mails bring us news of such a check received, and of many gallant lives sacrificed in an encounter with the Maoris of New Plymouth in June last. On the other hand, it is a subject for more than satisfaction, for the purest kind of pride, to find that the British colonies all over the world, however legislatively and administratively independent of the Mother Country and of each other, are eager to discharge even at some serious cost the mutual duties which the ties of race, and the still stronger ties of patriotic feeling, impose; and of such a hearty practical recognition of the duties involved in British citizenship on the part of the colony of Victoria, the Australian mail brings us the most noble and gratifying proofs.

We learn from New Zealand that, after an interval of nearly three months, the smouldering war between the natives and the New Plymouth settlers respecting the block of ground on the Waitara river, in the neighbourhood of the settlement, had broken out with new vehemence in June last. The renewal of hostilities was provoked by the natives. They fired from a fort on a reconnoitreing party of the 40th Regiment, thereby determining our sluggish commander to punish the insult; and the tardy attempt to take the fort resulted in a serious check to the British force. This is the worst news we have yet received. The Waitara engagement of the 28th March, though it was marked by the grossest mismanagement, and, apparently at least, misconduct, on the part of the British commanders, Colonel Gold and Colonel Murray, was in effect a victory, though an indecisive one; since the native fort which was the bone of contention was stormed successfully by the naval brigade. But the engagement of which we now hear as having taken place in the last week in June, and which was equally marked by unaccountable and culpable delay on the part of Colonel Gold in supporting an apparently well-planned expedition, has met with defeat, though an indecisive one; since the British detachment being vastly outnumbered by the Maoris, who poured in from the interior during the engagement in great force, retired in good order, though without effecting its purpose,

leaving 29 dead on the field, and having 33 wounded, of whom some have since died. Colonel Gold had large unused succours at his disposal, and is said to have been near the spot with 300 men, and deterred only by a swollen river from lending aid. The accounts state that our opponents, the Maoris, behaved with considerable gallantry, and,—a thing that is almost unknown in the history of our warfare with either Orientals or savage tribes,—sustained with courage and nerve a charge of British bayonets.

This, we need scarcely say, is very serious news. It needed only such a partial success as this to determine some of the most powerful Maori tribes, who were as yet wavering as to their course, to join the anti-British party of the Waitara chief, W. Kingi. We may almost regard a wide-spread rebellion of the principal Maori tribes as now certain. We must call to mind exactly what this means. In the Northern Island, which is the only one practically affected by a native rebellion, since the numbers of Maoris in the Southern islands are insignificant,—the male population of the settlers and the natives show the following relative numbers:—

MALE POPULATION* IN 1858.

	European Settlers.		Maoris (estimated.)
Province of Auckland	10,218	.....	22,000
— New Plymouth	1,414	.....	1,751
— Wellington (including Hawke's Bay)	7,587	.....	6,603
	19,219	.....	30,354

* The comparison is derived from the tables of New Zealand statistics, and includes males of all ages,—these statistics not furnishing us with the means of comparing the numbers of adults of both races.

We do not mean to imply that there is any immediate danger of a general combination among *all* the Maori tribes of the Northern Island. Some, no doubt, will find their advantage in taking part with the settlers. Many will successfully avoid taking a part at all till the struggle is ended in our favour. Still it is obvious that, were we even to suppose, what is far from true, that settler volunteers from the various settlements could concentrate and unite as rapidly as the various Maori tribes from the different provinces, even then, settler for native, the English in the Northern Island are vastly outnumbered,—in fact, the natives are three to two against us; and we shall see presently that even the generous and welcome aid sent from Victoria would not weigh much numerically in the balance, if anything like a general rising of all the natives capable of bearing arms were to be apprehended. Nor can we in the present case assume, as we usually may, that one stout English volunteer is worth in a military point of view several natives,—the Maoris being, by common consent and the testimony of their enemies, the most dauntless and skilful of savage warriors with whom the English have ever crossed arms. We repeat, then, that such a check as the British force unquestionably sustained in the last week of June must be regarded as involving very serious danger of a general outbreak among the Maoris, and that a general outbreak must be regarded as involving imminent danger to the very existence of some of the English settlements in the Northern Island.

And now, what measures have been taken to counteract and retrieve this reverse? In the first place, we hear that when the news was known at the seat of Government—Auckland—the Government determined to strip itself of troops, and send every available soldier to the seat of war at New Plymouth,—relying for their own safety, we conclude, on Auckland volunteers. But should a general rising of the native tribes be really imminent in the North, there would be no settlement in greater danger than that of Auckland, where, as we have seen, the proportion of natives to Europeans is by far greater than in any other province. At present, indeed, there may be reason to think that some of the Maori tribes belonging to the province of Auckland were disposed to join the rebels at Waitara, near New Plymouth. Still, were this war to take an altogether broader aspect, the natives would certainly turn on the least defended point; and if they saw Auckland stripped of its customary troops, might direct an effective attack in that direction.

Now let us see what the generous aid of Victoria has effected for New Plymouth. We learn that when the first news of this disaster reached Melbourne the movement of sympathy was universal and spontaneous. On the 18th of July "the "fast steamship City of Hobart was despatched to New "Plymouth, carrying Lieutenant-Colonel Leslie and 210 "officers and men of the 40th Regiment. Major-"General Pratt, Commander-in-Chief of Her Ma-"jesty's forces in Australasia, communicated to the "Governor his intention of proceeding to the seat of "war with his staff and the head-quarters of the 40th. "This announcement gave great satisfaction to the colony, "and the colonial armed steamer, Victoria, which had been "placed at the service of the New Zealand Government, and "which had brought over the despatches, was again placed "at the Major-General's service, and sailed on Tuesday last, "the 24th inst., with General Pratt, the staff, and about 50 "men of the 40th. Only a few sick men and boys of the "regiment are left in Melbourne; and the Volunteer Rifles "have responded in the most loyal manner to the call to take "up the garrison duty hitherto performed by the military. "This duty they undertook a fortnight ago, and their only "complaint is the non-arrival of the arms so long expected "from England. The Assembly took up the subject, and, on "the motion of Mr Wilson Grey, one of the ultra-democratic "members, voted an additional sum of 5,000*l* to provide "prizes for the best marksmen among the Volunteers, the "erection of butts, the formation of bands, &c.; while "the Ministry brought in a Bill to increase the number "of the Volunteer force from 2,000 to 10,000, and an-"nounced that should an emergency arise during the re-"cess they would be prepared to meet any expedition that "might be called for, trusting to the loyal feeling of the "House for a Bill of Indemnity next session." This is noble and prompt aid indeed,—above all praise. It increases the little army at New Plymouth by about 260 regular soldiers, and, what is far more important at the present juncture, by a General Officer and his staff, who, we may hope, is competent to redeem the sad bungling of his subordinates.

Should the New Plymouth war retain its present dimensions, we may well hope that the timely succour thus sent from Victoria may have brought it to a successful and speedy conclusion. But we must remember that the dimensions of the war may have, and but too probably have, been largely increased in consequence of the success achieved in June by the natives. In this case, General Pratt's aid, and that of the detachment of the 40th Regiment under his immediate command, would only bring temporary relief. And, in any case, it is obvious that it will be necessary for the New Zealand Government to have permanently at its disposal a force sufficient to extinguish all *hope* of insurrection amongst the natives,—sufficient to dictate, if necessary, both to natives and colonists, the relations that shall for the future exist between them. Under these circumstances, we cannot but anxiously recall the pledge virtually given by our Colonial Under-Secretary, Mr Chichester Fortescue, in the House of Commons, on the 21st August last, that such a force would be, or had been, provided. "He trusted "that the Governor, with his present able and temperate "Ministers, armed with all the moral and legal aid which Her "Majesty's Government could give them,—*and with the "physical force which was already, or soon would be, at their "disposal*,—might be able to prevent the horrors of civil "war, to reconcile the Queen's subjects of both races, and "promote the progress and prosperity of the one, without "sacrificing the rights and happiness of the other." We earnestly trust that the assurance here given may by this time have been satisfactorily fulfilled,—certainly not, as we have seen, before it was needed.

Amidst all the food for anxiety and regret which the present aspect of things in New Zealand affords, two themes for sincere and pure rejoicing present themselves to the English nation:—first, that the democratic constitutions of our distant dependencies have as yet in no way engendered indifference or even coolness in the loyalty of their affection for the Crown, or in their willingness to make costly sacrifices both of wealth and personal convenience for the sake of other members of the great brotherhood of free British colonies in their time of need:—next, that the enthusiasm and disinterestedness of the recent Volunteer movement in Great Britain has been able to infect so strongly our fellow-countrymen at the antipodes;—a similar body of men at New Plymouth having displayed in the engagement of 28th March an enterprise, skill, and general efficiency equal to that of regularly trained troops,—and another still more recent body having now

sprung up at Melbourne, to set free the regular garrison for those more urgent duties which await them on the scene of the Maori war. With a common spirit such as this spreading through the British communities of both hemispheres, we may feel assured that the unity of the British Empire is something more than a name.

THE BEST SUBJECTS OF EXAMINATION FOR THE LOWER OFFICES IN THE CIVIL SERVICE.

We have always believed that the test of competitive examinations, though it is far from perfect, is a vast improvement on the system of patronage which it has superseded. No evidence that we have hitherto seen has tended in any way to shake that conviction; but we must say that we do see reason to think that the kind of test applied should be more carefully adapted than it seems to be to the kind of service required. We have been accustomed to say that in the long run the energy and resolution which fits a man to succeed in life, will also fit him to pass creditably any ordinary and simple examination for which he has prepared himself. And we believe this to be strictly true. But there is clearly no reason why the examination should be limited to arithmetic, reading, and spelling, &c.,—if even it is always quite necessary to exact these acquirements as a condition *sine qua non* from such a class of persons as tidewaiters. There can be no possible reason for this very arbitrary limitation. There are many cases in which it is of far greater importance that a man should be strong, nimble, and *physically* energetic, than even that he should be master of his multiplication table, and know how to spell "surveyor" or "commissioner" with the right letters and the right number of them. The importance of some change of this kind is very strongly impressed upon us by a part of the evidence included in the Report from the Select Committee on Junior Appointments in the Civil Service. The evidence there given by the different officers of the Board of Customs certainly goes to show that the rejection of many men has been a consequence of the examination system, who would have been far more valuable officers than those who have succeeded and succeeded well. The number of replies to the circular of inquiry are pretty numerous, and we only find one entirely favourable to the new system. All the replies concerning tidewaiters, with one exception, run as follows: we extract four out of a considerable number:—

"As regards the office of tidewaiter, it must, I imagine, be admitted that something very different from mere school training is requisite, namely, the power to endure that exposure and to exercise that watchfulness, at all hours and seasons, which the office calls for. If, added to these indispensable physical qualities, the officer have, on admission, such a moderate share of education as will enable him to keep an ordinary tidewaiter's book, you have all that can reasonably be wished for. I do not mean to say that the mental acquirements demanded by the rules of the Civil Service Commissioners of the candidate for office are higher than are needed for the desired end; and I think it not unlikely that in England those rules will have the effect of securing better educated tidewaiters than were formerly admitted, but I fear it will be at the cost of a larger amount of sick pay. In England it certainly is not the lowest and most hardy classes that have even an elementary education; it is the class above them, namely, the skilled mechanic, or out-door clerk, who already earns his 20s or 25s per week. Now, when such men accept a tidewaiter's appointment, we often find their health succumbs to the arduous nature of his new employment. Therefore, if to secure a better educated class of men for tidewaiters (which I admit the civil service examination to be likely to effect in England), we should be obliged, as we find we are, to ascend in the scale of society, and seek among the less robust and less hardy classes, we shall find, I apprehend, that our gain in intelligence is balanced by the loss in usefulness; that a great expense for sick pay, or for the employment of extra men to take the places of officers off duty from sickness, will follow."

"As regards the general question, whether the officers, as a body, are found to possess more intelligence and usefulness in the discharge of their duty than the class of persons admitted previously to May, 1855, I would observe, that as respects tidewaiters, they are inferior physically, but educationally superior, and therefore, having reference to the duty required from them, they are, on the whole, inferior. As regards porters, with whom tidewaiters and weighers may compare, physical endurance with moderate education is the fitness desirable, and education advanced more than ordinarily would be deemed objectionable rather than the contrary."

"The Order in Council of 21 May, 1855, has raised the educational test, but has not touched upon the question of the physical aptitude for such offices as those now under examination, and I am of opinion that the higher the educational standard, the less likely it is that we shall get men in other respects fitted for outdoor officers. If the examination were also competitive, the lower grades of the service would doubtless soon be filled by clerks and shopmen to the exclusion of seamen, &c.; but the present system of nomination, to a certain extent, prevents this. The men admitted as tidewaiters since May, 1855, were of the following trades, &c.:—One seaman, three blacksmiths, two grocers, one clerk, one pipemaker, one weaver, one butcher, one shoemaker, one tailor."

"The tide surveyor reports favourably of the tidewaiters; but regrets (and I fully concur with him) that the examinations now required to be passed by these officers keeps out of the service the strong, hardy, and sturdy young man; referring to a tidewaiter now on probation, he said, "He does pretty well, sir, but he was a linendraper's assistant;" this is certainly not the class of man out of which to make a good tidewaiter."

Now this is testimony which ought not to be slighted. It does not touch the question of pass examination, scarcely even of competitive examination, but it does render very essential the consideration of the kind of examination required. It is at least essential for such men as these that they should be athletic and capable of considerable exertion. Why should not their qualifications be tested by either rowing or gymnastic exercises, or any other sufficient test,—and the results of it enter into the decision of the examiner as much as the answers in reading, writing, and arithmetic? It is idle to say that *marks* cannot be adequately assigned for a rowing match or a gymnastic feat. Marks are but the auxiliaries of an examiner in testing the candidate's performance, and if their use leads to foolish universal rules which practically stand in the way of applying the most efficient tests, they are injurious instead of advantageous. But, in fact, no one would find any difficulty in applying the mark-system,—with that courageous roughness of approximation which all good examiners know to be essential to a sound use of the system,—to even physical exercises of this kind. We have ourselves known it applied to an examination in vocal music, with, we believe, that general acknowledgment of just results which is the only test of a correct observance of any system. And, certainly, performances in vocal music are not easier to value on a mark-system, than performances in a skiff or on cross-poles. An examiner who aims at pedantic precision in a mark-system,—at apportioning every single unit in his marks to some observed modicum of excellence,—will be sure to abuse that system, and bring out less correct results than he otherwise might. And for any judges who are not pedantic precisians, it would be quite possible to combine the results of a trial in some physical exercise with the results of the ordinary examination in book-subjects.

The point is one of some importance even in the higher examinations. A certain proficiency in riding and swimming might very well be exacted from the candidates for the Indian services. There can be no doubt that not only good physical health, which is already requisite, but also physical habits, involving, to a certain extent, out-of-door tastes and muscular development, are no less essential to a first-rate Indian revenue collector or magistrate, than those acquirements which can be gained from books. If it is desirable for the efficiency of the public service to test men at all, whether by absolute or competitive tests, it is at least as desirable that those tests should, as nearly as possible, correspond to the duties expected from the candidates.

MR WILSON'S DEATH.

(From the Times of 13th September.)

The climate of India has been busy with the men to whom we looked for the regeneration of a system evidently breaking down under its own inherent defects. Scarcely has the grave closed over Sir Henry Ward and all the hopes and aspirations connected with his appointment to the government of Madras, when we are called upon to record the loss of a man who filled the most prominent situation in India, and to whom we, at least—and, we believe, the great majority of the community in England and in our Eastern Empire,—looked as the regenerator of the finances of India. Mr Wilson has sunk under the combined effects of a climate to which his constitution was unsuited, and the cares and anxieties of a position of almost unexampled difficulty, labour, and responsibility. He had just life enough given him to carry through the Indian Legislature his great scheme for remodelling the taxation of the country. The complement to that scheme,—the reorganisation of the revenue department, the establishment of an efficient central check on expenditure,—we fear he had not

time to realise. With him is gone down to the grave a vast amount of knowledge and experience of the principles and details of all subjects connected with finance, together with an acquaintance with the affairs of India sufficient to make that knowledge thoroughly applicable and available. * * *

Things in India had arrived at a great crisis. The mutiny was quelled, but the deficit assumed proportions more formidable than the mutiny itself. Indian finance began to be regarded with something like despair. The received doctrine was, that the revenue was and always must be derived entirely from the rent of land; that it was therefore inelastic, and that in case of a deficiency there was no other alternative but to economise or to borrow. It was felt that the time had arrived when something decisive should be done, and Mr Wilson was by common consent selected as the man most capable of dealing with the emergency. His proceedings since his arrival in India are too recent to require minute recapitulation. He set himself to work with the greatest zeal and energy; he traversed India from Calcutta to Lahore, and returned again to Calcutta, after having communicated freely with the principal civil servants and the most influential natives, and having gained from them a most valuable mass of information on the possibilities of taxation. He lost no time in turning his knowledge to account, and very speedily produced two schemes —the one for a Government paper currency, the other for an Income Tax and a Tax on Trade, which received the approbation of the great majority of the European community. Notwithstanding the opposition which so unexpectedly started up in Madras, and which added a danger that no one could have calculated upon, these measures have produced hitherto no serious disturbance, and seem, so far as we may yet judge, likely to be crowned with complete success. The tone of their opponents is visibly lowered, and those who talked most about their danger now content themselves with insisting upon their impolicy. He carried his measures through the endless delays of the Indian Council during the hottest and most oppressive season of the year with untiring energy, though it must have been a heavy aggravation of his labours to spend so many weary days in forcing his Bills through a body composed of the officials of the Government which had delegated to him the responsibility of its finances. Mr Wilson suffered severely from the effects of the Indian climate, and was advised to seek for health in a Hill Station, but he felt the arduous nature of the duty he had undertaken too strongly to allow any personal consideration whatever to interfere with it. To that sense of duty he has sacrificed his valuable life.

It was melancholy to lose a man qualified like Sir Henry Ward for the discharge of a great public trust; it was a source of bitter disappointment to find that a man possessing so many of the qualities of a first-rate Indian Administrator as Sir Charles Trevelyan should throw away his power of usefulness in a crusade against the measures he was bound to support; but these losses, great as they are, are not irreparable. We can find men to fill the Government of Madras in whose ability to discharge its duties with prudence and vigour we can feel every confidence, but we look around in vain for the man whom we should place in the situation which, by the consent of all, Mr Wilson was thoroughly competent to fill. We may, perhaps, find some one conversant with English finance, we can easily find persons conversant with Indian affairs; but a man combining knowledge of both in the same degree as Mr Wilson we cannot expect to find. No worthier panegyric can be passed on the public servant we have lost than this,—that he has gone, and left no successor.

Agriculture.

MEAT SUPPLIES.

Apprehension about our grain crops having been somewhat allayed by the fortnight's fine weather we have enjoyed, public opinion naturally reverts to the question of our supplies of meat, with which, earlier in the season, it was so much occupied. At the recent fairs and cattle markets, neat stock has appeared in greater numbers and in better condition than was generally expected, and though the prices of store animals have not reached the high range dealers anticipated from the extreme rates for which fat meat has sold throughout the present year, the advances obtained on the prices of last autumn have been considerable. It is said that much of the cattle trade at Barnet fair took place between dealers, many of them having bought up large herds of cattle at very high prices, which they could not again realise at Barnet, and consequently that many of the sales there were made at a loss. This is probably correct, for such are the ordinary incidents of any great activity and unusually high prices in any trade. But as regards the breeders of cattle, the sales of the present season must be deemed remunerating and satisfactory, and such as will give a beneficial impulse to cattle breeding. The great sheep fairs in England have scarcely commenced, but at Falkirk Tryst the Cheviot sheep were one-third and black-faced one-half less than at the September Tryst of last year, but the sheep were in much better condition, and sold for from 3s to 5s per head more than in 1859. It is said the abundant supply of autumn pasturage kept back many sheep, and probably the necessity of repairing some of the losses the flocks sustained in the past winter and spring had even more to do with the short supply.

From such particular details, let us proceed to more general considerations of the subject of our meat supplies. For the present we may be satisfied that the influence of high prices is doing its usual and proper work on our farmers, and is inducing them to make considerable efforts to increase their stocks of cattle, and the numbers and quality of the beasts bought by our graziers will guarantee us against scarcity for the ensuing season.

Still we have a growing demand for consumption, and the greater or less power of our agriculturists to meet that demand is justly the subject of general interest. And on this matter some fallacies prevail from which even able statistical writers do not escape. In the recent number of the Royal Agricultural Society's Journal, Mr Robert Herbert, in his paper on "Statistics of Live Stock and Dead Meat for Consumption in the Metropolis," enters fully into the "causes which have led to the recent excitement in the demand for beasts, not only in London, but throughout the provinces," and he institutes an inquiry "whether the grazing community have not acted upon a false principle, which may eventually be prejudicial to the interest of the consumers."

He says, and the statistical tables he gives prove it, "that not a few of our original breeds have fallen off considerably in number even in our best districts," and "they have given place to a race of animals cross-bred, chiefly between Scots and Shorthorns. In point of fact, crossing has now become so general, that fully half the beasts disposed of in our various markets consists of other than pure breeds. That the new system has paid remarkably well is quite evident from its rapid extension, and from the enormous weight which the crosses have attained in a much shorter period than the pure-bred animals." And in subsequent passages too long to quote, but which will repay a careful perusal, he suggests a doubt whether the early maturity at which all our stock breeders aim has "produced an increased supply of really consumable food," or whether "the weight of meat has not diminished in consequence of the increased amount of fat." On this point we shall have a word or two to say presently.

After referring to the increase of population, and the growing prosperity of that population, as circumstances sure to perpetuate a constantly advancing demand for meat, he says:—"To meet the demand thus enormously increased, *stock has been prematurely forced for sale*, and in too many instances disposed of *immediately on its becoming marketable*." And again, after stating that sheep as well as cattle are brought to a state of great maturity at an early age, he says:—"There is much reason to apprehend that, unless the old proportions of fat and lean are restored, and the supply largely increased, we shall not be able to keep pace with the demand."

There is no doubt that crossing both cattle and sheep, forms one of the methods by which the breeders of stock for the butcher attain the early maturity about which some needless apprehension is expressed. In cattle, this is largely resorted to in Scotland, and the result is, that in the place of pure-bred animals of the slow-feeding Scotch breeds, beasts crossed with the Shorthorn are brought to market one or two years earlier, and of greater bulk than could formerly be accomplished. Now, though the proportion of fat to lean meat may be somewhat greater than in the older pure Scots, it will be found that the consumable meat is also greater. But when we turn to the breeder and grazier, what do we find? Why, that instead of keeping his beasts four or five years, he sells them fat at two-and-a-half or three years old. For a smaller weight of food, and in less time, he obtains more money for his early-matured beasts than he formerly received for his pure Scots. Assuming only one year in four to be saved by the early maturity of cattle, and the farmer to keep only the same number he used to keep, we have a gain of one-fourth in the number of beasts he can bring to market, while confessedly, in the case of Scots, the weight of each beast per head is also increased. And this is equally applicable to pure-bred cattle, where, by careful management, they have attained early maturity. The reason why cross-bred cattle form the most conspicuous examples of early maturity in the meat markets, is, that the quickest mode of getting early maturity is found to be to use a Shorthorn bull to females of breeds less rapidly developed. But the best breeders of all our different pure breeds are gradually attaining some of that early maturity for their cattle for which the Shorthorns are so justly famous. So with sheep, it is a shorter process to cross two breeds, one of them, such as the Cotswold or Leicester, having attained very early maturity, than to obtain the same results with pure-bred sheep. All breeds of sheep, however, are being gradually improved in the same direction.

So far, then, from seeking to revert to the old and slow-feeding stock, which probably had more—sometimes too much—lean than our improved stock, our farmers must and will proceed in the track which they have found most profitable to themselves, as well as best for the consumers of meat. Why should not a farmer force an animal which he can render marketable at an early age, when by so doing he makes a profit upon rearing and feeding it, and has room for another on which to repeat the process? This is not prematurely forcing the stock for sale. That is only done when from bad seasons or other unlooked-for causes his food runs short, and then he has no option but to send some of his

tock to market prematurely, that is in half-fat condition. We nay be assured that our improving breeders and farmers are quite ight in seeking early maturity, and that by so doing, and in following out their own interests, they will best supply the present and ncreasing demand for meat.

IMPLEMENT MAKERS AND IMPLEMENT PRIZES.

One of the imperfections necessarily incident to a competitive trial of implements and machinery, is that results may be obtained inperior to those to be derived from similiar machines when in use on the farm. That machines shown may be adapted rather for such temporary and limited trials than for sheer hard work is also to be anticipated. Such things seem to be necessary and inevitable to the prize system. All that can be tested in short periods is the principle. This is one of the imperfections of prize giving, and we do not see how any other tests than the mechanical one in use by the Royal Agricultural Society can be applied. Thus the amount of steam generated from a given quantity of coal, or of power consumed as indicated by the dynanometer, would seem to be the best, if not the only tests which can be applied to steam-engines at an agricultural meeting. It is possible that great excellence on these points may be attained for a short exhibition at the sacrifice of more substantial merits, such as safety, durability, or simplicity, for the purposes of a real working engine, but how is that to be avoided? We have read with attention a paper in "Newton's Journal of Arts," which professes to set forth the reasons of the principal agricultural implement manufacturers who have for the present withdrawn from exhibiting at the Royal Agricultural Society's yearly show. They are thus summarised:—"1. That the Society has broken faith with the exhibitors, in departing from the quadrennial system of trials mutually agreed upon. 2. That the prize sheets are so indefinitely worded, that makers are in the dark as to the kinds of machines the Society desires to encourage. 3. That the trials are unsatisfactory and the awards capricious; inasmuch as the time devoted to the trials is necessarily very limited, and no fixed principles of judging are laid down for the guidance of the judges. 4. That the exhibitors have no power to object to the appointment of the judges, whether on the ground of their incompetency, or their business relations, or to the choice of the consulting engineer, who stands in the position of umpire. 5. That the reports of the trials are meagre, inaccurate, and incomplete, and published so long after the show as to be of little service either to the public or the trade. 6. That the expenses of exhibiting and competing for prizes have increased so greatly, that the business resulting from attendance at the Royal Agricultural Show is not commensurate with the outlay."

Now most of these are sufficiently vague and not very explanatory, but from other portions of the paper we are inclined to suspect that these great firms, who have derived no small portion of their greatness from successful competition and constant exhibition at the Society's shows, feeling strong on their legs, wish to discountenance all further competition, save the ordinary and natural competition of trade. This is quite intelligible, and is perhaps in the main a sound view of the subject, but still it can scarcely be expected that the Council of the Society, which has been to some extent at least the ladder by which these firms have mounted to eminence, should be content to be thus quietly kicked down. Thus it is said "it is no secret to those who have mixed much with inventors and makers of agricultural implements, that for years they have expressed discontent at the frequently recurring contests, in which they are expected, like prize-fighters, to be always ready to jeopardise their hard-earned reputations by entering into competition with all comers. The mental labour and anxiety attendant on the efforts which firms of repute felt it necessary to make, to retain their position, not merely as manufacturers of the best implements in their several specialties, but also of those which could win prizes, superadded to the ordinary cares of a large manufactory, were found to be so wearing, to say nothing of the personal attendance at the shows, and consequent absence from their works thereby occasioned," that a deputation of manufacturers in 1855 brought this matter under the consideration of the Society's Council. Then it was arranged that implements and machines should be arranged in classes, and competition in each class only take place once in three or four years.

Now it seems what the manufacturers ask for is "that trials of agricultural machinery should be of longer continuance than heretofore, and conducted as much as possible in the manner and under the same circumstances that such machinery will be used in the ordinary practice of farming." This may look plausible enough, but how can trials at an agricultural show be so conducted? At the same time the Council of the Society, undertaking to offer prizes, should, so far as they reasonably can, meet the views of the manufacturers. Perhaps it may be found the prizes have done all they can for steam-engines, as applied to thrashing and analogous purposes, and that there is really no use in offering such prizes any longer. These engines may have become so generally known and used, that further improvements in them had best be left to the competition of makers and the discrimination of their customers. These and other questions may usefully engage the Council's deliberations. By some means or other, the agricultural public ought to have the opportunity of inspecting at the Society's show the machinery of the great firms, who object to the arrangements which until lately have been supposed to be entirely successful.

COMMERCIAL LITERATURE.

French Wines and Vineyards. By Cyrus Redding. Houlston and Wright, 65 Paternoster row.

This book is useful at the present juncture when a new taste has to be created for the light and pure wines of France, and they have to compete not only with the wines of Spain and Portugal, but with ale and porter and cider. Mr Redding gives a concise history of the introduction of the vine into France; and it would appear that in the year 1844 a catalogue was published when the different varieties reached two thousand. The vicissitudes they have undergone are astonishing, sometimes being ordered to be rooted up under the idea that corn was rendered dearer in consequence of the number of vines planted. It was not till the Revolution of 1789 that the proprietors of the soil obtained their just rights over their property, and the industrious cultivator was left to do what he liked with his own. The result of this non-interference has been that the vine produce of France has been for some years worth 28,000,000*l* sterling, and corn has been produced sufficient for the increased population.

Mr Cyrus Redding gives a very succinct description of the different wine-producing grapes, where they are grown, the sorts best calculated for vine culture, and their methods of training and culture, and also the diseases to which they are subject and their remedies. He gives tables of the alcoholic strength of the wines of France, of the English consumption from 1675 to 1859, and of the duties levied from 1787 to 1861:—from 1809 to 1813 it amounted to no less than 19s 8½d per gallon. It would appear, according to a valuable table compiled by Mr James in his work on "The Wine Duties considered Financially and Socially," that the effect of these high duties on consumption was most pernicious, as from 1787 to 1794 the number of bottles consumed per head were 2 9-10, whereas from 1840 to 1851 the consumption was only 1 3-10 per head, and the only effect was to drive people to drink spirits for economy's sake. This volume seems to have been collated with much care, and gives a vast amount of useful and instructive information.

Fenn on the Funds. Wilson, Royal Exchange.

This is a standard work, which has already gone through seven editions, and has been revised and brought down to the present time. That such a work as this is required by the public, and may be consulted with advantage by every one before they invest, is made manifest by a condensed statement it gives of some of the principal securities dealt in, and which amount to no less a sum than 1,288,750,000*l*, viz:—

	£
British funded and unfunded debt	805,000,000
British railway shares and debentures	325,500,000
Indian railway shares held in England	26,500,000
Colonial Government securities	16,000,000
Indian home bond debt	6,800,000
London joint stock banks	15,500,000
Irish and Scotch banks	12,750,000
Bank stock	14,500,000
Insurance companies	15,000,000
Mines, British and foreign	10,000,000
Steam companies	5,000,000
Telegraph companies	9,000,000
Docks, canals, waterworks, bridges	20,500,000
Gas companies	6,700,000
	1,288,750,000

Any one who reads this list, large as it is in amount, will perceive at once that foreign securities, both funds and railways, &c., in which the public are so deeply interested, are not included in it; but this work gives a succinct account of them, and also contains a mass of statistical details and facts compiled with a care and a precision highly creditable to Mr Simmonds, who has edited this new edition. A very valuable tabular statement is given at the end of the volume, of the population, revenue, debt, and foreign commerce of the principal countries and colonies, which is brought down and compiled from official documents to the close of 1858; and, what is more, there is an index of the contents of the volume, alphabetically arranged, which saves both time and trouble. As a matter of course those connected with the Stock Exchange consult this volume as a book of reference; but it is a most useful book for every one to possess, especially men in business; for when they know its contents, they will be pretty well versed not only in the securities dealt in on the English Stock Exchange, but in those of foreign countries.

The Commercial Handbook. Sampson Low and Co.

This little book explains briefly and concisely the terms and phraseology adopted by the trading and commercial world, and will be very useful, especially to those who are about to commence business.

STATISTICAL BOOK-KEEPING. Longman, Brown, and Co.

IN a commercial country like England, keeping correct accounts is a positive necessity, not to say duty; for on correct accounts and a clear method of keeping them must depend how far the merchant and shopkeeper, and we may add all public companies, can ascertain the precise position of their affairs; and, generally speaking, it is to the absence of proper accounts that much of the ruin and bankruptcy, private and public, which we daily witness, is to be traced.

The great desideratum of a system of book-keeping is simplicity, so that those who run may read, and reading, understand. Whether Mr Krepps' system of Statistical Book-Keeping will simplify the present approved method of double entry we almost doubt, but doubtless if it will, merchants and companies will adopt it. Mr Krepps defines his system in the following words:—"The statistical method *epitomises* a mass of *complex facts*, and gradually and perspicuously *evolves* final results." To "evolve" is to disentangle. If Mr Krepps' system does this, it would be invaluable to railway companies.

GAS CONSUMERS' MANUAL. Weale, High Holborn.

THIS manual is intended to enable gas consumers and the officers of gas companies readily to refer to the recent Act regulating the measurement of gas, and to explain the object and intention of the principal sections, and thereby facilitate the reading of the Act, which, without this aid, would to the uninitiated not be altogether an easy task. We have to remember that in the case of an aeriform body, it is by no means easy to know the exact quantity consumed, since, for want of a legal criterion and inspection, what was called a cubit foot of gas has been found to differ, when measured by meters of one manufacturer as compared with those of another, as much as three per cent. This the recent Act professes to remedy, and the present work to elucidate.

GENERAL LITERATURE.

THE PAST AND FUTURE OF BRITISH RELATIONS IN CHINA. By CAPTAIN SHERARD OSBORN, C.B., Author of "A Cruise in Japanese Waters," &c.

A RETROSPECT from a political point of view of our relations with China is so little gratifying, that the English people may very naturally feel heartily sick of the whole affair. Treaties wrung with delay and difficulty from wily and slippery diplomatists, only to be artfully evaded, or treacherously broken;—insolent and contemptuous treatment at the hands of petty mandarins, who think to gratify their own pride of race and the arrogance of their Emperor by insulting the barbarians;—local squabbles perpetually arising, and rolling up every now and then into the dimensions of a national war;—these are some of the most apparent fruits of our intercourse with an obstinate and incomprehensible people. There are, however, other points of which we are by no means weary, in spite of the unpleasant accompaniments described above: the tea and silk which in the face of all difficulties we import in ever-increasing quantities, and our share in the 100 millions sterling of yearly trade between Europe and India on the one hand, and the Celestial Empire on the other.

If this be so—if we will and ought to continue our trade with China, it becomes us to face the difficulties that meet us, and not to grow tired of Chinese politics, because they are complicated, expensive, and troublesome, before we have fixed our future commercial relations upon a more solid and intelligible basis.

There will, we imagine, be little difference of opinion as to the chief points to be desired in such a settlement. A decided, and if possible friendly understanding with the Chinese Government,—greater freedom of intercourse with the seaports,—the opening up of interior markets,—and such an arrangement of custom dues as shall be advantageous and equitable to both nations, and can be thoroughly and practically enforced,—are some of the most important among them. But, when we come to the question of how these desirable ends are to be reached, we are met by an endless variety of opinion, and by a conflict of voices, among which the chief point of agreement is in that censure of our past policy and general conduct with which Englishmen delight to blacken themselves in the eyes of other nations.

Amongst these conflicting voices, that too often "darken counsel by words without knowledge," Captain Osborn's deserves a quiet hearing. He is practical and straightforward, and has had personal experience of a people who are not to be comprehended by Western intellects in any other way, nor easily so, even then; who, indeed, can never be comprehended while we persist in judging them by rules drawn from our knowledge of human nature as we find it in Western nations. We cannot endorse all Captain Osborn's opinions; but we are quite inclined to agree with him in his estimate of the Chinese character, and of the course of conduct on our part that will have most effect upon Chinese understandings.

The experience acquired in two wars, and a prolonged service on the coast of China, has given Captain Osborn opportunities for forming a not hasty judgment. We fully believe also that in what he has now published, he has, as he asserts in his preface, "pandered to neither clique, office, nor cloth, and striven to think and write as one who consulted alone the glory and interests of his Queen and country." If, nevertheless, a little professional ardour adds vigour to his pleadings for that prompt action which his judgment dictates it will hardly be considered an inexcusable element in him.

We will now as briefly, and as much as possible in the author's own words, give the conclusions at which he arrives, and the grounds upon which they are founded. In so doing we shall follow his own method, which is to give the results of his experience in a concentrated form, and to test them by a few plain and direct appeals to actual facts, adding but brief criticism.

The first conclusion to which he comes is, that whatever may be in our eyes the sensible view of any subject, the direct opposite to that is certain to be the obstinate conviction of the Chinese mind. "I never remember any European who took an European, and I grant, rational view of China, who was in the end, right." This opinion he supports in a manner at once convincing and amusing, although the mirth is chiefly at our own expense. "I can hardly remember," he says, "any instance of my going to a Chinaman, and expressing an opinion, that his reply did not commence with the words—'My no thinkee so'; and then, in his way, he generally told you that exactly the contrary would be the case. If the question was a Chinese one he was generally right, unless we used force, and made things come round to our view of the case. In short, the European in China appears to me to be ever singing a song about the Flowery Land and its people, to which the native, standing by, strikes in with a chorus of 'My no thinkee so.'"

The second conclusion to which this peculiarity of Chinese mental vision brings our author is, that "force rather than argument, necessity rather than conviction, is the only rule by which a Chinaman can be made to agree with an European." This force he would have applied within the bounds of reason and justice (upon this point he imperatively insists), and he turns back to all our past history in connection with China to show that reasonable demands and just offers alone are not sufficient to make their way against the obstinate prejudices, not of the people, for they are willing and eager to trade, but of the Emperor and of his officials. "With such a people I maintain it is folly to say that they will 'break before they will bend.' They are only Asiatics; make them do a thing—compel them to advance—and they will do it as well as any of us; but consult their prejudices or their ease, and good-bye to any change or advancement. Bear that in mind,—treat them as children; make them do what we know is for their benefit, as well as our own, and all difficulties with China are at an end." "We always come to this in the long run with China: the sword, or a threat of the sword, has invariably decided every dispute, however trivial, with these people. Turn to the consular records at the five ports; they are civil establishments, but when did they succeed in carrying a point without threatening force? Think how many times the Bocca Tigris has been stormed, how many times Canton has been attacked by us, and how often the threat of stopping the imperial grain fleet has been used, and it will, I think, be generally acknowledged, that in the end we have had to say to John Chinaman, 'You must do so and so,' instead of hoping and begging he would act as we thought right. European diplomacy in China amounts to a just appreciation of what is right, what is to the interest of European civilisation, and then a skilful application of force, not reason."

To the arguments of those who point to Russia and America as obtaining by peaceful means fully as great advantages as we have obtained by dint of force, he returns a plain denial of the fact. The moral pressure was the same in both cases, he says, but "we at any rate were frank and above-board,; they were merely humbugs, taking advantage of force, without acknowledging that they were indebted to it for all they acquired from the Chinese."

If force, therefore, is to be used, and the question is no longer a matter of mere debate, it should be used, Captain Osborn thinks, promptly and effectually; delay that emboldens, and forbearance that is invariably misinterpreted, are not, he says, real humanity. The consideration of this question leads the author into a severe reflection upon those who have, according to him, played this part from interested motives, and "induced our statesmen to steer a middle course, which has, up to this day, signally failed."

They beg us to let things be. Provided we correct a few of the most glaring defects of the old tariff, they would be well content to see the streams of commerce flow as they do at present. They want us to accept as inevitable a chronic state of petty hostility between consuls and mandarins, a triennial war, periodic captures of Canton, burnings of British mercantile dwellings, and exaction of large indemnifications. They allow that it may be an inconvenience to the Exchequer, an injustice and hardship to the tax-payer at home, to pay the expenses of these petty wars. But is not that better, their wisdom tells them, than an extension of British relations with China which shall stop all smuggling? Is not that better than an immense influx of fresh merchants and fresh capital, with an increased competition, lower prices, and lower profits? It is true that the imports of England into China are as nothing compared to the exports, and the balance of trade against us at Shanghai in 1859 amounted to five and a quarter millions; but what care they? Their profits consist in the export of tea and silk; and the more limited the area from which tea and silk are drawn, the more scarce the article may be made to appear, and the higher the price that can be exacted. Never did monopoly establish herself more firmly under the guise of free trade than she has done in the trade of the five ports of China,—never were specious arguments more plentiful on behalf of a close corporation than will be, and have been, advanced by those directly interested in the present trade in China.....I do not mean for a moment to say that the Anglo-Chinese traders are worse than other monopolists; I merely desire

to point out that their instincts are the preservation of present profits—not the interests of this empire, of Christianity, or civilisation.

Captain Osborn can scarcely help knowing that if this is directed against the mercantile community of England, it is extremely unfair. It is true that many of our merchants have witnessed with dismay, as a class, the progress of a policy in China, which, if continued, cannot but lead us into exactly the same position into which a similar policy led us in India. They know that the real question at issue must be ultimately this:—Are we or are we not prepared to accept many and grave inconveniences in our commercial relations with China, rather than pursue a course which must eventually lead us into assuming the responsibilities of a second Oriental government when one is more than we can well manage?

Captain Osborn next proceeds to explain, by means of revenue returns, the Chinese census, and an excellent map, his reasons for thinking that the rapid extension of trade which will follow an energetic and determined policy at Pekin will more than repay us for our present expense and the pain and annoyance of a third series of allied operations. Here we think he quite makes good his case, but he omits to notice the obviously logical inference of this policy,—viz., that if we are to take away from the Chinese the power and will to thwart us, we must ultimately take it upon us to govern them ourselves. This was forced upon us in India, as it will be forced upon us, if we pursue a similar course, in China. "Since we have traded with four instead of one province in China, the tea trade of Britain has more than tripled." All this tea comes from a limited area in the South-East. Large tea-growing regions beyond are virtually cut off from us by the expenses of carriage and the vexatious imposts of local governments. "To have cheap tea we must buy our teas upon the tea-farms, and pay one fair tax instead of a dozen irregular ones." As a proof of how we gain by proximity to the tea-bearing districts, we are informed that "every chest of tea embarked at Foo-Chow-Foo escapes with exactly thirteen shillings less transit tax than those passing to Shanghai." The case with regard to our imports—a matter of great importance, not only as increasing the market for our manufactures, but as checking the drain upon our silver currency—is even worse. A vast population in the Northern parts of China, where the coldness of the climate would render our woollen and cotton goods extremely welcome, are placed entirely beyond our reach. A piece of grey calico that "sold at Shanghai for 4d a yard, cost at Hankow 6½d," an increase of 2½d a yard, or 6s 4d per piece, that increased price being simply due to a land and water transit of about six hundred miles into China; and the material would have treble that distance to travel before it could reach the further borders of the Empire. Yet in spite of its price the material was selling, and, we were told, was much in use for many common purposes." "It is truly monstrous to suppose, if our merchants find it worth while to export a distance of 17,000 miles a piece of manufacture to Shanghai, and retail it there for 12s, that a Chinese broker is to carry it only 600 miles into the interior, and extort from his countrymen 18s 4d for it. It is this extortion, and not the handloom industry of China, which has so long left unfulfilled the just expectations of Great Britain in relation to her export trade with China." "At present our trading stations are situated on the remote confines of a land as large as Europe, the interior of which, beyond that we know it to be very fertile and very populous, we are supremely ignorant of. We are required to land woollens in the tropics for the use of a people living in a remote corner of the empire where the winters are most severe." "As yet we have no seaport, no access to all that portion of China inhabited by some two hundred millions of souls, in which the severity of the winter renders it likely that they need our woollens."

We might, if our space permitted, add much more bearing upon the future prospects of our trade with China; but for this, as well as for a graphic and succinct account of the expedition up the Peiho under Lord Elgin, the appearance and condition of the people, and the aspect of the country, and for a variety of information, both commercial and general, we must refer our readers to the book itself. We will only add that it is a collection of papers formerly contributed to "Blackwood's Magazine," thoroughly revised, and largely added to by the writer. Captain Osborn is a gallant officer, and has a natural leaning to the straightforward policy of forcibly *insisting* on fair dealings on the part of the Chinese. He does not sufficiently consider that to insist on anything with Orientals means practically to encroach constantly on the governing power until you shake it to the ground, and are obliged to take up its responsibilities yourself.

GARIBALDI: an Autobiography. Edited by ALEXANDRE DUMAS. Translated by WILLIAM ROBSON. London: Routledge. 1860.

THE name of Alexandre Dumas is rather a doubtful passport to any work whose merit depends on historical accuracy; but the volume before us bears such unmistakeable evidences of genuineness, that we are disposed to credit the great romancist with having, in all essential respects, confined himself to honestly editing the materials given to him. The chief portion of the work is autobiographical, and was given to Dumas by Garibaldi before setting out on his present campaign. It is supplemented in several places by short narratives written by Garibaldi's companions, by extracts from Italian historians, and by notes from the Editor. Altogether it forms a valuable collection of historical details, and presents to us the graphic outline of a strongly-marked character, not faultless, but thoroughly genuine, noble and single-minded. Unfortunately, the charm of the book is considerably marred by the wretchedness of the translation, which is faulty and slovenly to an unpardonable degree. Mistakes of print also abound, and some of the dates are so inconsistent as to introduce hopeless confusion into the narrative. A letter of Garibaldi's is given twice over, at p. 214 and at p. 225, with differences of detail which, though not important, show that some other hand besides the General's own must have been employed upon it; whether it be M. Dumas' or Mr Robson's, we cannot say.

To pass from the English version to the book itself. Joseph Garibaldi was born at Nice, on the 22nd of July, 1807. His father was a sailor, and the son of a sailor, and young Garibaldi became a swimmer so early that he "feels as if he had been born amphibious." His feats in this line have been remarkable through life. His mother was a woman of deep tenderness and piety, and her son speaks of her with strong and reverent affection. It is a pleasing trait in his robust boyhood that he always felt great pity for everything that was weak or suffering, so much so that once, when quite a child, having accidentally pulled off an insect's foot, he shut himself up and cried for hours. His father wished him to enter one of the learned professions, but his own intense passion for the sea prevailed over his parents' objections, and he became a sailor. Much, however, as he enjoyed his profession, there was a deeper passion beneath. In all his Mediterranean voyages, he tells us,—

> For ever tormented by a profound instinct of patriotism, in no circumstance of my life did I cease to demand, whether of men, whether of events, or whether even of books which could initiate me in the mysteries of the resurrection of Italy; but up to the age of 24 years this search was in vain, I fatigued myself uselessly.
>
> At length, in a voyage to Taganrog, I met, on board my vessel, with an Italian patriot, who was the first to give me some notion of the manner in which things were going on in Italy. There was a glimmer of light for our unhappy country.
>
> I declare aloud, that Christopher Columbus was not less happy when lost in the middle of the Atlantic Ocean, threatened by his companions, of whom he had demanded three days more, he heard the cry of "Land!" than I was on hearing the word *Country* pronounced, and on seeing in the horizon the first pharos lit by the French Revolution of 1830. There were really men then engaged in the redemption of Italy!

Three years later, in 1834, having been accessary to an abortive insurrection in Piedmont, he was sentenced to death by the Government of Charles Albert. After several hairbreadth escapes and varied adventures, he engaged himself as second on board a French brig which was just setting out for Rio Janeiro. There he entered into the service of the Republic of Rio Grande, then at war with Brazil, and fought gallantly by sea and land for eight years. In 1839 or 1840, he married, an event which brought less interruption to his warlike life than might be supposed, his wife being of an amazonian disposition, and frequently fighting by his side, or otherwise assisting his military occupations. At last the Rio Grande war came to an end, and Garibaldi, after a short interval, spent first in bullock driving, and then in teaching mathematics, took service under the Republic of Montevideo, then struggling against Rosas, the infamous tyrant of Buenos Ayres,—a service in which he spent six years. Then the news came over the Atlantic that Italy was once more rising out of her slavery, and in March, 1848, Garibaldi hastened home. Here ceases the first portion of the autobiography, which occupies two-thirds of the volume. The remainder is a series of fragments by different hands. Colonel Medici contributes a narrative of Garibaldi's Lombard campaign in 1848; after which we have fragmentary accounts of the siege of Rome by Vecchi, Emilio Dandolo, Garibaldi himself, and Dr Bertani. These episodes are deeply and painfully interesting, and will be valuable to the future historian as well as to the student of Italian politics. In their present form, however, they stand rather as an incomplete postscript to the early autobiography of Garibaldi, which is complete in itself. The details of South American conflicts are of course infinitely less interesting than those which concern such a nation as Italy, but as the interest of the former is all concentrated on Garibaldi and his brave compatriots, his simple and spirited narrative tells us nearly all we care to hear. What is most striking in this record is the under-current of patriotic passion which flows through it. The sorrows of Italy are ever present to the writer's mind, and although apparently cut off from all hope of serving her in any direct method, his devotion finds ceaseless occasions of indirect service. To his fellow-exiles, numbers of whom had emigrated to South America, Garibaldi was a constant friend and helper. In the Montevidean war he organised some hundreds of them into an Italian legion, whose heroic bravery soon became the terror of the enemy. Their uniform was of the national Italian tri-colour, their flag "was of black stuff, with Vesuvius painted upon it, as emblematical of Italy, and of the revolutions it contained within its bosom," and when praising their valour, Garibaldi "thanked them in the name of Italy." It is fortunate that such a leader, so happily blending heroism, good sense, and kindliness, should have been preserved for his country's present need. From the record of his antecedents contained in this volume, we gain increased confidence that he will wisely and worthily fulfil his great task.

NEW MUSIC.

MEEK TWILIGHT. Prize Glee, for Four Voices. Composed by G. W. MARTIN. Nos. 1135-36 of the Musical Treasury. London: the Music-Publishing Company (Limited), 10 St Peter's hill, St Paul's, E.C.

A QUIET glee for male voices, of average merit and somewhat old-fashioned style. There are some careless errata in the last line of p. 4 and the first line of p. 7; besides two or three awkward progressions which seem to show the hand of a novice.

THE OBERON WALTZ, on Airs in Weber's celebrated Opera. Composed and arranged by W. WILSON. Nos. 1157-8 of the Musical Treasury. London: the Music-Publishing Company.

THE beautiful airs here arranged from "Oberon" are peculiarly suited for dance-music, especially the "Mermaid's Song." The present version is graceful and easy.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

In about a fortnight, I am informed, the duties which the Superior Council of Commerce has resolved to impose on British goods to be imported into France under the commercial treaty will be made kown. It is considered desirable for the present to keep them secret; but I have been told that they have been adopted in a very liberal spirit,—that in fact, on the whole, they are more moderate than was to have been expected. This being the case, the treaty, notwithstanding all the abuse it has encountered, will be of real value to England. As to France, its importance is immense, if only because it breaks down prohibitions.

The whole of the evidence taken before the Council has not yet been put into type. The last batch of it which I have had the opportunity of looking over was relative to the woollen trade. From it I find that the representatives of the different branches of this trade claim protection varying from 10 to 30 per cent. against English competition, and that they do so for the reasons urged on behalf of other manufactures, namely, that the English have cheaper machinery, more skilful and industrious workmen, cheaper fuel, more abundant capital, and larger markets. Yet this trade was obliged to make the admission that it exports to an enormous amount annually, that in many foreign markets it sustains an energetic competition with the English, and has driven them altogether away from some, and that even certain descriptions of its productions are largely sold at London! The witnesses were asked why, if they are able to compete with and even beat the English abroad, they want protection at home. They could not answer satisfactorily, but nevertheless coolly repeated their demand for high protecting duties. It is, however, worthy of remark that one —alas! he was the only one—of the cloth-makers examined,—M. Cormouls, of the Tarn, declared that in his opinion free trade in his branch of industry would be desirable, inasmuch as it would cause France to make greater progress than she has yet done. He expressed, too, the belief that the French will always beat the English in the superior and elegant descriptions of goods; but that in the coarser sorts the English will always outstrip them. On the part of the English, delegates from Bradford, Leicester, Paisley, and Halifax were heard, and they showed very clearly from "facts and figures" that the woollen trade in France needs little or no protection; they also, on the whole, pronounced in favour of *ad valorem* in preference to specific duties.

The resolutions adopted by some of the Councils-General of the Departments in the present session are beginning to be known. The Council of the Loire Inferieure calls for the execution of new roads and railways as indispensable to manufactures and agriculture under the recent commercial reforms; and the Council of the Loire makes a similar demand in order to sell more readily its coal, which it says will, under the treaty, be subjected to the competition of the English.

The Discount Bank (Comptoir d'Escompte) has obtained authorisation from the Government to issue 40,000 shares of 500f to complete its nominal capital. The object of this issue is to enable the Bank to embark in business with China, by establishing a branch at Shanghai. The French, you are aware, have long been complaining that they were obliged to employ English banks to conduct their financial operations with China and the adjacent countries, which operations they set down at about 8,000,000*l* sterling per annum; and they doubt not that the Discount Bank will, to use their own language, "emancipate them from the tribute" they have heretofore paid to the English. This "tribute," according to some persons, is not less than from 9 to 10 per cent. on the capital engaged; but these figures seem exaggerated.

The shareholders of the Union des Gaz held a meeting the day before yesterday. From the report presented by the Directors, it appeared that the receipts of the year ending the 30th June were 919,000f, and the outgoings 861,000f, leaving a balance of 58,000f. But the Company has heavy debts, and is under obligations to the holders of bonds which it cannot fulfil. It has also on its have some unprofitable contracts—one relative to the gas works of Milan.

M. de Lesseps, President of the Company of the Isthmus of Suez Ship Canal, whose zeal is indefatigable, has published in the newspapers a letter in reply to some observations of Lord Palmerston, in one of the last sittings of the House of Commons. M. de Lesseps affirms, in contradiction to the noble lord, that it is not true that a certain number of shares in the enterprise were put down to the Viceroy of Egypt without the Prince's knowledge, but that it was by a direct understanding with His Highness that the latter "took to his account the shares reserved to the foreign bankers who were prevented by circumstances from fulfilling their engagements." M. de Lesseps adds that the Viceroy has since sanctioned that arrangement by an express agreement. Next, he asserts that Lord Palmerston was quite in the wrong in saying that the canal cannot be executed except at an expense of time and money which no Company can bear; for that the execution will be effected in a much shorter time and at much less expense than had been calculated on. Lastly, M. de Lesseps declares that it is not correct, as stated by Lord Palmerston, that the loan which the Viceroy of Egypt has just contracted in Paris has been rendered necessary by his subscription to the canal: the loan, he says, has nothing to do with the canal, and has been raised on advantageous terms to pay off the existing debt, in order to render the burden on the country for interest lighter than at present. M. de Lesseps concludes by asserting that his enterprise "never presented better guarantees of success than it does now," and by complaining of the "inveterate malevolence" which Lord Palmerston manifests to it.

The following comparison between the Budgets of France of 1847 and 1860, which is extracted from a well-written article in the *Journal des Economistes*, may be of interest to some readers:—

	1847. Millions. f		1860. Millions. f
Credits accorded by the primitive budget and by special laws	1,708		1,824
Public debt	387		560
Justice and worship	66	Justice	27

War	355		339
Marine	114		129
Finances	20		19
Algeria and colonies	...		38
	1,203		1,406

In a recent letter it was stated that petitions for the complete abolition of the sliding scale on grain were being signed, though the scale has, as you are aware, been suspended as regards imports. The President, Vice-Presidents, and principal members of the "Association for Commercial Reform," recently established in this city, have just addressed a letter to the Minister of Commerce, in which they show that without complete liberty the trade in corn can never be carried on in a satisfactory manner, and that such liberty would be advantageous to shipping, railways, and consumers, without occasioning any inconvenience whatsoever to agriculture. In proof of this, they point to the example of England, and, accordingly, they pray that the sliding scale may be definitively got rid of. The gentlemen who have signed this letter rank among the most distinguished commercial men of France—M. Dollfus, of Mulhouse; M. Adam, of Boulogne-sur-Mer; M. Arles Dufour, of Lyons; Count de Kergorlay, of the department of La Manche; and M. Pastre, and M. Basse, the last two Presidents of the Chamber of Commerce of Marseilles and Bordeaux.

On the subject of the crops, an agriculturist journal, which is a good authority, says:—"In a week the harvest will be completely terminated in France. From all parts of the country our letters agree in representing it as a good ordinary one as regards quantity; but the quality is indifferent. Some time must pass yet before all the wheat can be ground into flour, and a good deal cannot be ground at all until the frosts shall have dried it."

Some time back you were informed that negotiations were in progress between France and Belgium for the conclusion of a treaty of commerce: they are, it appears, advancing satisfactorily. With the Zollverein, also (in spite of a first refusal of an offer made by France), negotiations for a similar treaty have been commenced; but they do not make much progress.

It is stated that MM. Pereire have taken in hand the long pending enterprise of establishing regular steam navigation between New York and Havre, and Nantes and the West Indies,—an enter-

prise to which the Government is prepared to give a very liberal subvention. It is thought likely that those gentlemen will reorganise their Compagnie Generale Maritime, so as to enable it to carry out this great affair.

Business on the Bourse continues in the same tame state as for weeks past, that is to say, very dull. The quotations are as follow:—

The following is an account of the markets:—

Flour.—At *Paris*, during the past week, the market has been calm; and yesterday the quotations were 56f to 61f the sack of 159 kilogs. Four marks were 57f for the present month, 57f 50c for October, 57f to 57f 50c for other periods. All these prices are below those of last week.

Wheat at *Paris*, yesterday, was less offered than in the preceding week: prices were 32f to 35f the sack of 120 kilogs for old and new—a fall on last week's quotations. At *Marseilles*, also, prices are lower. In provincial markets the fall is almost general, as many as 110 of them presenting a decline of from 25c to 3f 50c the hectolitre; nine only a rise, varying from 49c to 3f 75c. In 19 markets there has been no change.

Cotton.—At *Havre*, in the week ending Friday, the sales were 8,539 bales, and the arrivals the unusual low quantity of 176 bales—and that from Liverpool. The closing quotations left low New Orleans at 82f the 50 kilogs, and very ordinary ditto at 92f. The total sales in the month of August were 36,600 bales, and the stock on the 1st of the present month was rather more than 200,000. This week, business has been very active, and prices generally have risen. Yesterday, low New Orleans was 83f.

Coffee.—The sales at *Havre*, in the week ending Friday, were 2,800 sacks Hayti Port-au-Prince, disposable and for delivery, 78 f50c to 80f the 50 kilogs in bond; 300 sacks Gonaives for delivery, 83f; 75 ditto, disposable, 82f 50c: 1,200 sacks Rio, not washed, 74f; 46 ditto, washed, 69f; 160 sacks Malabar, 107f duty paid; and a small lot of Ceylon plantation, 123f ditto. Some lots of damaged Hayti and Rio were also sold by auction. The arrivals were about 8,800 sacks. The stock on the 1st of the present month was (excluding that in the Customs) 5,462 tons. This week, a fair amount of business has been done: Hayti Port-au-Prince, 80f in bond; Gonaives, 82f 50c to 83f; Rio, 73f 50c to 77f 50c; Santos, 75f 50c. At *Bordeaux*, last week, 365 sacks Laguayra "grage" went at 95f the 50 kilogs in bond; 530 sacks Rio 77f to 78ff; 252 sacks damaged Macassar, 109f duty paid. This week, a small lot of Rio, washed, has been sold at 85f; and one of Santiago at prices not stated. At *Nantes*, last week, 40 bales Reunion "fève pointue" went at 126f 25c duty paid; 242 sacks Malabar, 117f 50c; and 1,440 sacks Java damaged, 109f to 114f. This week, a lot of Padang has been disposed of, but the price is kept secret.

Sugar.—At *Havre*, in the week ending Friday, business was unimportant. 200 casks Havana went at 37f 50c the 50 kilogs in bond, and no sales of French West India were made. The arrivals were 824 hogsheads French West India, and 2,089 casks Havana. This week, the sole sale has been a lot of Pernambuco. At *Nantes*, last week, the closing prices were, per 50 kilogs, 53f 50c for Mauritius, in bond; 52f to 52f 50c Reunion; 49f French West India. The business done was not very important. This week, some Guadaloupe "usine" has been sold at 52f 50c; some Reunion at 51f. At *Bordeaux*, last week, 660 casks French West India went at 47f 50c to 48f 25c the 50 kilogs, duty paid; 132 casks ditto "usine," part at 61f, the rest at prices kept secret; 2,430 bales Reunion, 52f 50c to 53f; and a lot of San Yago at previous quotations. This week, some West India has been disposed of at 48f, and a quantity of Havana at prices not stated.

Indigo.—At *Havre*, in the week ending Friday, about 40 cases Bengal were sold at prices kept secret. The arrivals were 18 cases from England. The stock on the 1st September was 1,680 cases. The sales this week have been 43 cases Bengal, at 8f 80c to 10f 35c the ½-kilog. At *Bordeaux*, last week, the sales were only 24 cases Kurpah, Madras, and Bengal, at prices previously established. This week, some Kurpah, Guatemala, and Bengal have been sold; prices not stated.

Hides.—The transactions at *Havre*, in the week ending Friday, were: 975 La Plata dry, 134f to 150f the 50 kilogs duty paid; 4,500 ditto salted, 80f for cow, 85f for oxen; 200 Rio Grande salted, 75f; 2,140 Rio Janeiro salted, 62f 50c to 65f; 1,366 Pernambuco dry, 110f; 1,800 ditto, salted for delivery, 67f 50c; 1,400 Valparaiso salted (damaged), 65f; 631 Gonaives drysalted, 69f; 2,410 New Orleans salted, disposable, 53f 50c; 1,000 ditto for delivery, 52f 50c; 1,045 New York salted, disposable, 55f 75c to 56f; 500 Algerian salted, 47f 50c; also 1,400 horse salted La Plata, 100f the 100 kilogs duty paid. The arrivals were about 10,000. This week, sales have been limited: Pernambuco drysalted 91f; Buenos Ayres salted, 82f 50c; Monte Video ox, 82f to 85f.

Wool.—At *Havre*, in the week ending Friday, the demand was not very active: 20 bales La Plata unwashed, 1f 70c to 2f 60c the kilog; 80 ditto sheepskins, part at 75c to 1f 50c, part at prices kept secret. The arrivals were not large. This week, some lots of Buenos Ayres unwashed have been sold, part at 150f to 245f the 100 kilogs, part at 1f 50c the kilog.

Tallow.—There were no sales at *Havre* in the week ending Friday, and the arrivals were 508 casks from St Petersburg. Nothing has been done this week at *Paris*: yesterday, the 100 kilogs were 140f 20c, a rise on last quotations.

Spirits.—At *Paris*, yesterday, 3-6 of 90 deg. was 103f the hectolitre; Montpellier of 86 deg., 135f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 130f, and beetroot, first quality, 108f.

COMMERCIAL AND MISCELLANEOUS NEWS.

By the present mail, we have received the annexed commercial intelligence from Calcutta:—Import Market.—A general dulness has prevailed in our market during the whole of the last fortnight, and transactions, both in piece goods and yarns, have been moderate at continually lower rates. Buyers are very cautious in their purchases, not only because the demand is limited, but also on account of the great disposition of importers to realise. The future prospects of the market do not promise any immediate improvement in prices. Metals are very dull, at lower and almost nominal rates. Government Securities.—Beyond a few purchases by the banks and agency houses for constituents, and the usual jobbery between native dealers, the transactions in Government securities have been of a very limited character. The Five-and-a-Half per Cents. are nominally 102-4 to 104-8; the Five per Cents., 96-8; and the Four per Cents., 82. Money Market.—Money is still abundant at former rates, and as the large amount which has been locked up in the salt lottery will soon be again available, no present improvement can be looked for.

Statement of the clearances of the principal articles from Calcutta for Great Britain from the 19th July to the 7th August, 1860, inclusive, compared with the corresponding period in 1859:—

	1860. London.	Liverpool.	1859. London.	Liverpool.
Saltpetre ....maunds	11,584	6,516	24,082	1,318

The amount of gold-dust imported into the Sydney branch of the Royal Mint during the half-year ending the 30th of June, 1859, for the purpose of coinage, was 143,184 ounces; and the quantity of coin issued was 340,500 sovereigns and 341,000 half-sovereigns; total value, 510,500*l*. During the corresponding half of the present year the quantity of gold-dust received was 260,448 ounces, and the coin issued 760,500 sovereigns and 156,000 half-sovereigns; total value, 838,500*l*. The increase in the business of the Mint is very satisfactory, the revenue for the half-year of 1860 being 6,289*l* 4s 8d against 4,190*l* 19s 9d in 1859, which is equal to an increase of 50 per cent. The following will show the amounts of gold-dust received from the Western, Southern, and Northern gold-fields during the first six months of the years 1859 and 1860:—1859—Western, 60,522 ounces; Southern, 50,275 ounces; Northern, 26,344 ounces. 1860—Western, 62,220 ounces; Southern, 95,096 ounces; Northern, 25,774 ounces. From this statement it will be found that there is an increase of 1,698 ounces, or 2½ per cent., on the yield from the Western gold-fields; but from the Southern, including Kiandra, the increase is very large, being over 44,821 ounces, or 89 per cent. On the return of the Northern gold-fields, however, there is a slight decrease of 570 ounces, or nearly 2 per cent.

Statement of gold received from the gold-fields at Melbourne, by escort during the twelve months ended 30th June, 1860, compared with the totals received during the previous twelve months:—

Months.	1858-9. ozs.	dwts.	1859-60. ozs.	dwts.

Advices by the present mail state that the crops at St Vincent were looking exceedingly well. A good deal of rain had fallen, and sickness to a considerable extent prevailed throughout the island. From Trinidad there is no news of importance. The crops were looking well, and the island was healthy. The weather at Barbadoes continued showery, which the planters had taken advantage of; the crops were looking most favourable, and good results were anticipated. The produce shipped to date amounted to—sugar, 396,610 hhds, 3,348 tierces, 8,697 barrels; molasses, 17,529 puncheons, 508 hhds, 1,259 barrels; rum, 392 puncheons, and 528 hhds; cotton, 112 bales; and 94 gourds of aloes. At Demerara the British Guiana Bank had declared a dividend for the half-year at the rate of 8 per cent. per annum. The weather continued dry. Rain was much wanted in some districts of the colony, and the development of the cane plants has, in consequence, been affected by it. The exports for the fortnight have been—sugar, 852 hhds, 25 tierces, 24½ barrels; rum 380 puncheons, 19 hhds, 5 barrels; timber, 12,340 foot; shingles, 27,500 In the market all kinds of provisions were plentiful, and prices had receded. Mess pork in demand; stock light. Produce coming in but slowly; tonnage in supply for sugar. In Jamaica the crops are looking well. Sugar ranges from 17s to 20s, according to quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 30.—FLOUR AND MEAL.—There has been an increased demand for State and Western flour since the date of our last review, under which the market has assumed a more buoyant tone, while all kinds have appreciated from 10c to 20c per barrel, chiefly on the better grades of shipping brands, which have been freely dealt in at the improvement. The demand has been alike good for consumption and export. Transactions during the three days comprise 40,000 barrels, of which 15,000 were placed yesterday, the market closing firmly at the advance noted above. Canada flour is also in good request, and the lower grades are 15c per barrel higher; the sales are 2,000 barrels, including 750 yesterday, at from 5.25 dols to 7.50 dols per barrel. Southern flour was quiet until yesterday, when there sprung up an active demand, and nearly all kinds appreciated 10c to 15c per barrel, at which the sales were heavier than for a long time previously.

EXPORT, from 1st to 28th August.

	1860 barrels		185 barrels
Wheat Flour	290,142	.....	70,645

GRAIN.—There continues an active demand for all kinds of wheat, and, in consequence of a moderate supply and light receipts, holders have been enabled to obtain a considerable advance upon the closing quotations of Friday last, at which transactions have been tolerably heavy, both for local milling and shipment. The sales since Friday aggregate 256,000 bushels, of which 84,100 changed hands yesterday, including 600 red Tennessee at 1.32 dol; 30,000 winter red Western, 1.26 dol to 1.34 dol; 28,000 white Indiana, 1.32 dol to 1.40 dol; 1,900 white Michigan, 1.40 dol to 1.55 dol; 1,600 red Iowa, 1.26 dol to 1.30 dol; 6,400 white Canada, 1.35 dol; and 15,600 Chicago Spring, 1.21 dol to 1.25 dol. Corn has also been more active, and the receipts not having been sufficient to meet the wants of the trade, prices have advanced about two cents per bushel; the sales since Friday comprise 215,000 bushels, closing firmly at 72c to 80c for Southern white, 68c to 70c for ditto yellow, 64c to 66c for mixed ditto, 69c to 70c for round yellow, 68c to 75c for ditto white, 63½c to 64c for mixed Western, and 62c to 63c for unsound.

EXPORT, from 1st to 28th August.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the leading markets held this week have been very scantily supplied with English wheat of last year's growth; nevertheless, the demand for both red and white parcels has ruled very inactive, and prices have had a drooping tendency. The supplies of new wheats have increased to some extent; but from the poor condition in which they have appeared, the inquiry for them has been much depressed, at 2s to fully 3s per quarter less money. Foreign wheats have participated in the heaviness, and the quotations have given way about 2s per quarter. Both old and new barleys have changed hands slowly, but without leading to much change in price. The condition of some of the new barleys has been tolerably fine. Malt has moved of slowly, at barely stationary prices. Owing to large arrivals from abroad, the oat trade has been in a most inactive state, at a decline in value of from 6d to 1s per quarter. Beans and peas have supported previous rates; but the value of flour has given way from 2s to 3s per 280 lbs.

Such has been the rapidity of harvest-work during the last fortnight, that fully two-thirds of the wheat crop have now been carried. Another ten days of fine weather will nearly complete the harvest in this country. In Scotland, large quantities of produce have been secured in good condition, and the accounts from thence in reference to the potato crop are very favourable. The growth appears to be unusually large, and of excellent quality. The demand for wheat and nearly all other kinds of produce has been much restricted, and prices generally have had a drooping tendency.

In Ireland, the bulk of the crops has been carried; but our advices state that disease is general amongst the potatoes. The corn trade has been devoid of animation, and prices generally have had a drooping tendency. Very few shipments have been made to England

Throughout the North of Europe, harvest-work is progressing steadily; but most accounts agree in stating that the yield of the new wheats is only moderate. The trade for most articles has fallen off, and prices have not been supported. Letters from America continue to confirm the statements previously transmitted, that the yield of the crops generally is very large. From a statement in another column, it will be seen that immense quantities of wheat, maize, and flour continue to be shipped to this country.

The few dry samples of English wheat on sale here, to-day, were disposed of without difficulty at Monday's prices; but low and damp qualities were very dull, and rather cheaper. Foreign wheat was inactive; nevertheless, the quotations were firm. No change took place in the value of either barley or malt. Oats, beans, and peas commanded previous rates; but flour was a dull inquiry.

Mr Edward Rainford furnishes the following information in reference to the floating trade:—There have been 46 arrivals off coast for orders since the 6th inst., consisting of 25 cargoes of wheat, 12 maize, 3 barley, 2 oats, and 4 beans, viz.:—Wheat, 11 cargoes from Taganrog, 3 Marianople, 4 Odessa, 2 Galatz, 3 Berdianski, 1 Constantinople, 1 Marseilles; maize, 5 Ibraila, 2 Galatz, 3 Sulina, 1 Constantinople, 1 Dervani; barley, 2 Ibraila, 1 Taganrog; oats, 1 Ibraila, 1 Odessa; beans, 3 Mazagan, 1 Alexandria. About half of the above were disposed of previous to arrival. The business in grain afloat has been only moderate this week, buyers being cautious till more is known regarding the crops in this country. The following prices have been paid since this day week, prices varying with quality, condition, &c.:—Wheat, arrived, Berdianski, 55s 3d; Marianople, 56s 6d; Taganrog Ghirka, 52s 6d to 53s; Odessa Ghirka, 52s 6d to 53s; on passage, Taganrog Ghirka, 3 cargoes, at 53s, all per 492 lbs; Sandomirka, a cargo, at 55s per 480 lbs, and 1 at 54s 6d per imperial quarter B. L. quantity tale quale; shipping or to be shipped by the end of October, Taganrog Ghirka at 53s per 492 lbs. Maize, on passage, Galatz at 35s and 34s 6d per 492 lbs; arrived, Foxanian, not perfect condition, 33s 3d per 480 lbs. Barley, arrived, partly imperfect, at 27s per 400 lbs. Oats, arrived, Theodosian, 19s 6d per imperial quarter. Beans, on passage, Egyptian at 35s, and Mazagan at 36s, per 480 lbs.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 12th day of September, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,950,915	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	15,475,915
		Silver Bullion	...
	29,950,915		29,950,915

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,663,511
Rest	3,780,493	Other Securities	19,812,757
Public Deposits (including Exchequer, Savings Banks Commissioners of National Debt, and Dividend Accounts	6,843,436	Notes	9,146,830
Other Deposits	13,462,663	Gold and Silver Coin	757,287
Seven Day and other Bills	740,793		
	39,380,385		39,380,385

Dated the 13th September, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,541,878	Securities	29,398,268
Public Deposits	6,843,436	Coin and Bullion	16,233,202
Private Deposits	13,462,663		
	41,850,977		45,631,476

The balance of Assets above Liabilities being 3,780,493*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£706,551
AN INCREASE of Public Deposits of	346,615
AN INCREASE of Other Deposits of	31,144
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	289,177
AN INCREASE of Bullion of	63,155
AN INCREASE of Rest of	2,770
AN INCREASE of Reserve of	689,160

The present Bank return is the most favourable that has appeared for some time past. The decrease in the circulation amounts to 706,551*l*, and the increase of bullion to 63,155*l*. Both these circumstances tend to strengthen the position of the Bank, but the most favourable features are the decrease in other securities of 289,177*l*, and the increase of the reserve of 689,160*l*. It is probable that the next return's will show a still further decrease in the other securities.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
	£	£	£	£	£
Circulation, including bank post bills	20,506,228	19,636,270	20,913,550	21,919,652	21,544,878
Public deposits	3,488,907	7,658,478	8,041,078	8,508,922	6,843,436
Other deposits	9,082,865	9,189,187	12,201,959	13,074,640	13,462,663
Government securities	14,433,230	10,593 651	10,970,514	11,220,018	9,663,511
Other securities	11,908 694	18,664 052	15,311,274	18,957,161	19,812,757

Price of Consols	96⅞	90¼	97¼	95¼	93⅛
Average price of wheat	42s 10d	55s 8d	45s 1d	42s 9d	62s 10d
Exchange on Paris (short)	25 30 35	25 17½ 25	25 15 20	25 12½ 7½	25 12½ 20
— Amsterdam ditto	12 9½ 0½	11 16 16½	11 16 17	11 14½ 15	11 13½ 14
— Hamburg (3 months)	13 10 10½	13 7½ 8	13 8½	13 5½ 13	13 5½ 6

In 1850, a marked increase was observable in trade, and railway securities, which had been so long depressed, attracted the attention of capitalists, and a considerable rise in prices was the consequence.

In 1857, the first mutterings of the coming commercial storm were heard. The advices from the Continent, especially from Germany, and the United States, were of a gloomy character. The money markets abroad were becoming tighter. The Bank of Amsterdam had just raised the rate of discount from 4½ to 5 per cent., an unusually high point in that market. Very large shipments of silver were being made to India partly on Government account. The latest intelligence from the East announced that the rebels had been defeated by General Havelock, and that the British in Lucknow and Agra still held out.

In 1858, the enormous accumulation of gold was causing the funds to rise. Money in Lombard street was only worth 2½ per cent. The second Indian debenture loan, issued at the reserved price of 97, was quoted 98⅛. The first particulars respecting the proposed new concession of the Lombardo-Venetian Railway had been published.

In 1859, news had been received from China of the disastrous repulse sustained by Admiral Hope on the Peiho, and the certainty of a war with China in consequence. Notwithstanding the funds rose to 95½. In consequence of the abundance of money, the rate being 2½ in Lombard street, a great proportion of the Indian loan, viz., 3,250,000*l* out of 5,000,000*l*, had been paid to the Council of India, while in strictness the instalments actually due only amounted to 1,000,000*l*.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 2,875,829*l*; in 1857, a deficiency of 9,483,865*l*; in 1858, a deficiency of 3,109,315*l*; and in 1859, a deficiency of 5,882,521*l*. In 1860, the deficiency is 6,350,094*l*.

DISCOUNT AND MONEY MARKET.—There has been a very easy money market during the week. The current rate of discount has been 3¾ per cent., but short-dated bills have been discounted at 3½. We may mention as perhaps the best indication of the state of the money market, that the discount houses have lowered the rate at which they take money at notice from 3½ to 3¼ per cent. The rate at call remains as before, viz., 3 per cent. In the Stock Exchange the supply of money is very abundant at 2 per cent. The demand for discount at the Bank of England has been very limited. To-day there has been a very active demand in Lombard street at 3¾.

ENGLISH FUNDS.—The fluctuations in the English funds during the week have not exceeded ¼ per cent., the price of Consols having ranged between 93⅜ to ¼ and 93⅝ ½. The transactions have been most limited in extent. Exchequer bills are 1s to 4s pm. Consols close to-day 93¼ ⅜, with a firm market, and French 3 per Cent. Rentes, 67.85, which is rather better than yesterday. The dealers, consequently, attach no importance to the French Ambassador having left Turin.

This day's *Moniteur* publishes the usual monthly return of the Bank of France, which shows the following results, as compared with the August return:—

DECREASE.	Francs.	
Cash in hand	18½	millions.
Bills discounted, not yet due	11½	millions.
Bank notes	12½	millions.
Current accounts	15	millions.
INCREASE.		
Treasury balance	2½	millions.
Advances	¾	millions.

FOREIGN FUNDS.—The transactions in foreign funds have been of a most limited nature; the prices have been almost stationary.

The following are the rates of discount at

	Bank Rate. Per cent.	Open Market. Per cent.
Amsterdam	3	3
Berlin	4	4
Brussels	3	3
Frankfort	2	1¾
Hamburg	No Bank rate	2¼
London	4	3¾
Paris	3½	3

RAILWAYS.—The settlement of the fortnightly share account took place to-day; and although rather higher rates of continuation were asked at the commencement of the account by the dealers in shares, such is the abundance of money that the speculators for a rise were enabled to take stock out of the market.

The consequence was that the rate of continuation on Midland stock fell from ⅜ per cent. to borrowers of the stock. On North-Western, Lancashire and Yorkshire, Caledonian, the continuation was about ¼ per cent. Great Western stock was decidedly scarce. The public continue to invest to a moderate extent, and as the receipts continue very good, the price of most of the principal lines has been well maintained, especially of Midland, Lancashire and Yorkshire, Great Western, and the London, Chatham, and Dover. Lombardo-Venetian shares have fallen to 1⅞ ¾ discount.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

RAILWAYS.	Closing prices last Friday.	Closing prices this day.
Bristol and Exeter	100 2 xd	100 2
Caledonian	94 ½	91½ 2½ xd

BULLION.—We subjoin Messrs Pixley, Abell, and Langt ley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—The arrivals since our circular of the 6th instant have been:—111,000*l*, per Shannon, from the West Indies; 182,000*l*, per Edinburgh, from New York; 81,000*l*, per Persia, from New York; and 53,100*l*, per Hammonia, from New York. Some amount was taken for export, but the greater proportion will ultimately be sent to the Bank of England. The exports have been:—21,129*l* to the Brazils, per Oneida; 35,000*l* to Bombay, per Delta; and 800*l* to Alexandria, per Delta. The following vessels are on their way from Melbourne:—Maidstone, sailed 7th June, with 195,000*l*; Blue Jacket, sailed 17th June, with 125,000*l*; Dover Castle, with 228,000*l*; Orwell, with 151,000*l*; Red Jacket, with 152,000*l*; Norfolk, with 90,000*l*; and Malta, with 91,040*l*. The two first-named ships may be considered due. The amount paid into the Bank since the date of our last circular is 84,000*l*.

Silver.—There have been no operations of moment since the 6th instant; a few sales have, however, been effected at 61½d per oz standard. The East India and China letters delivered to-day have apparently brought few orders, so far as we can tell at present. 14,000*l* has been shipped to the Brazils, per Oneida; and 1,820*l* in silver coin has arrived, per Sultan, from the Peninsula

Mexican Dollars.—Owing to the absolute scarcity of Mexican dollars, there have been hardly any operations during the past week. A small quantity has been disposed of at 62⅜d per oz, but the market may be now considered as nearly, if not quite, cleared.

Exchange on Bombay and Calcutta remains unaltered; banks 60 days' sight drafts being 2s to 1s 11⅞d per rupee. Documented bills, 1s 11d to 1s 11¼d. Rupee loan interest drafts, 1s 11⅜d.

India Government loan notes are not so good as at date of our last; we quote Five-and-a-Half per Cents., 102 to 102½; Five per Cents., 96 to 96½. Since the letters from Calcutta were this morning delivered, sellers have predominated.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 76s 3d to 76s 6d per oz, last price; South American doubloons, 74s 3d to 74s 6d per oz, last price; United States gold coin, 76s 2½d per oz, last price. Silver—Bar silver, 5s 1⅝d per oz std, last price; bar silver, containing 5 grs of gold, 5s 1⅜d per oz std, last price; fine cake silver, 5s 6¼d per oz, last price; Mexican dollars, 5s 2⅜d per oz, nominal; Spanish dollars (Carolus), 6s 2d per oz, last price.

FAILURES.—At a meeting of creditors of Mr A. W. Simpson, of Arthur street, East India merchant, a statement was submitted by Mr Wryghte, accountant, showing liabilities for 6,493*l*, and assets estimated at 6,075*l*, leaving a deficiency of only 418*l*. It was stated there were no accommodation bills, and no property pledged except advances on shipments, which had been applied in payment of the same as received. After explanations the creditors consented to accept an assignment to a committee, and await remittances to wind up the affair.

The letters from Holland mention the failure of a large shipowner at Dordrecht for about 100,000*l*.

The failure has been announced of Mr Peter Brown, wholesale carpet warehouseman, of 11, Basinghall street. The liabilities are estimated at 35,000*l*. Messrs Coleman and Co. are the accountants.

In the Bankruptcy Court, Mr Benjamin Gibbs, leather merchant, of Bermondsey, applied for his certificate. This is the first application of the kind in connection with the recent failures in the leather trade. The official assignee reports that the bankrupt commenced business in the year 1856, with very little capital. It was stated on behalf of the General Discount Company and the Mercantile Discount Company, who are creditors, that the bankrupt has been put forward as the puppet of Messrs Hooper and Parkinson, a view in which Mr Commissioner Goulburn concurred. His honour characterised the system pursued as "vicious and wicked," and said that "If it did not involve charges of fraud, it came very near to it." As he regarded Messrs Hooper and Parkinson as the principals, he declined to decide this case until their conduct has been fully investigated. Mr Gibbs' application was therefore adjourned for three months, with protection.

Accounts from Melbourne mention that Mr Henri J. Hart had suspended payment, with liabilities amounting to 15,000*l*, and with scarcely any assets. Other houses have obtained renewals. At Sydney, Messrs. J. N. Fairhurst and Co., Bensusan and Haes, Betteridge and Hayden, W. Jolly and Co., and Bowden and Peden, had stopped, but the aggregate liabilities were not above 120,000*l*.

MISCELLANEOUS.—Advices from St Petersburg describe an increase of financial pressure. The bank rate for money was nominally 6½ per cent., but 7 and 8 per cent. was freely given in the open market. Under these circumstances the produce markets were heavy. The discount on the paper currency is equal to between 8 and 10 per cent.

The New York advices this week describe the formal opening of the first section, 33 miles, of the Atlantic and Great Western Railway, a broad gauge line, which, on its completion, will connect the New York and Erie with all the principal Western and Southern roads. To the bond and shareholders of the Erie, of whom there are a large number in England, the event is important, Representatives of M. de Salamanca, the Spanish banker, and of the Duke de Rianzares attended on the occasion, the new line being largely supported by these capitalists. With regard to the Illinois Central, the traffic returns continued satisfactory, and Governor Banks, of Massachusetts, had definitively accepted the appointment offered to him.

With reference to the market for American securities, Mr E. F. Satterthwaite reports as follows:—"The demand for American securities in London continues good, and a considerable amount of business has been transacted. United States Five per Cents. have been freely taken at 93, and the market cleared of all offering at that price. The Six per Cents. command 98 to 99. The speculation in Illinois shares has received a check from sales to realise, influenced, to some extent, by the fine weather here, which has come just in time to stop any further advance in corn, and which must produce its effect on the price of corn in America. The shares declined this morning on the pressure of the account to 19½ discount, closing exactly 16½. First class railroad bonds continue very scarce."

The disputes between Mr Scott Russell and the Great Ship Company, relating to the Great Eastern, have at length been decided by the arbitrators, Messrs Hawkshaw, M'Lean, and Fowler, awarding him the sum of 18,000*l.*

Another auction of the foreign redeemable (Passive) debt of Spain will take place at Madrid on the 29th inst. The sum assigned by the Government for the purpose is 986,940 reals.

The mercantile telegrams from China are dated Hong Kong, July 25. The rates of exchange remained at 4s 10d Kong Kong, and 6s 8d Shanghai. The demand for manufactured goods showed no improvement. Silk was firm. Tea also was higher at Foochow. The attack on the Taku forts was expected to occur some time between the 20th and the 25th of July.

The following communication has been addressed to the Bank of England, ordering the deduction of Indian income tax from the enfaced paper endorsed "Interest subject to the reduction of income tax," held on this side. It created great surprise. Indian and English income tax will now be charged on the same stock—that is to say, from the dividends henceforth to be paid the Bank will deduct 8 per cent. :—

Gentlemen,—I am directed by the Secretary of State for India in Council to acquaint you that information has been received from India that the Income Tax Act has been passed by the Legislature there, and, in accordance with the provisions of the said Act, I am to request that you will give directions for the deduction of 4 per cent. income tax on all interest due on and after the 31st of August last, in respect of promissory notes endorsed "Interest subject to the deduction of income tax;" and also in respect of stock created by the registration of promissory notes which have been so endorsed.—I have the honour to be, gentlemen, your obedient servant, J. C. Melvill.

India Office, Sept. 6.

This notice regarding the imposition of the Indian tax on income from which the English income tax has already been deducted, specified that the charge was to take effect on all interest due on and after the 31st ult. The Bank had already issued bills to a considerable amount for interest due on the 31st of August, and it has accordingly been represented to the India Council that great inconvenience would result if the new amount of tax were required to be reclaimed. In reply, the India Council have notified that the dividends of the 31st of August last will now be exempted, and that the tax will be enforced on all that fall due after that date. Annexed is the communication on the point:—

India Office, E.C., Sept. 7.

Gentlemen,—I am directed by the Secretary of State for India in Council to acknowledge the receipt of your letter of this day's date, and to acquaint you in reply that Sir Charles Wood acquiesces in the proposition therein contained, that the Indian income tax should be levied only on interest that will fall due after the 31st of August last.—I have the honour to be, gentlemen, your obedient servant, J. C. Melvill.

To the Governor and Deputy-Governor of the Bank of England.

The surprise of the public at the announcement that the native Indian securities are to pay both Indian and English income tax will appear reasonable on referring to the following report of some remarks on the matter which took place in the House of Commons shortly before the close of the Session :—

Income Tax upon Indian Securities.

Lord R. Cecil asked the Secretary of State for India whether it was intended to subject any Indian securities, held by residents in England, to income tax in India as well as in England.

Sir C. Wood replied that if the income was received in England it would pay the tax here, but if it was received in India, then the tax would be paid in India.

It is stated that the Oriental Bank Corporation intend to dispute the legality of the deduction of English income-tax from the dividends on Rupee paper, on the ground that those dividends are not paid in England but in India, the transaction here being simply to furnish the holder with a bill on Calcutta for the amount.

In order to throw as much light as possible on this subject, we may observe that in the case of Turkish Bonds guaranteed by England and Colonial Bonds, the Bank of England do not deduct the income tax, but simply require the subjoined declaration to be made:—

To the Governor and Company of the Bank of England.

hereby declare that the Bonds, amounting to £ to which the Coupons, specified at foot, refer, and which became due on the 18 , are to the best of knowledge and belief in the possession of and are bonâ fide the property of a foreigner residing abroad, and that no *British subject*, or foreigner resident in Great Britain, is interested in such Bonds in any way whatever; and therefore claim exemption from the income tax thereon, and engage to furnish further evidence of the right to such exemption if requested by the Commissioners of Inland Revenue, and also to hold you harmless from any claim which may be made upon you in consequence of the payment in full of the said Coupons.

The effect of levying the double income tax will probably be to send the enfaced paper back to India. We understand that on an attempt being made to deduct the income tax from the bills given by the Bank of England on Calcutta, they have been returned to this country protested.

A half-yearly court of the Bank of England took place yesterday, Mr Bonamy Dobree, the Governor, presiding. The net profits in the six months ending the 31st of August were stated to be 710,143*l.*, making the "Rest" on that day 3,736,139*l.*, out of which a dividend for the half-year was declared at the rate of 5 per cent. free of income tax. The "Rest" will then stand at 3,008,489*l.* In reply to a question it was mentioned that the large increase in the "Rest" shown in the last account arises from the usual addition at the end of the half-year of the calculated accruing interest on the numerous investments held by the Bank. The present dividend being in excess of the last will, under the Act 7th George III., chapter 48, require the customary confirmation by ballot.

The dates from South Australia by the present mail are from Adelaide, July 26. In the circular of Messrs P. Levi and Co. it is stated that "shipments to this colony are fully up to the average, and much beyond our requirements. Even if considerably diminished, they would then be quite ample for our wants at the present time, more especially as the immense stocks on hand in Melbourne, and the forced sales which take place there, have a natural tendency to keep down the price of nearly every article of import here." Business continued dull. The country, except in one or two localities, had been deluged with rain, and no doubt was entertained that the forthcoming harvest would prove most abundant. Copper had declined to 100*l.* per ton. Burra Burra shares had advanced from 143*l.* to 147*l.* The banks were buyers of bills on England at par, and sellers at 2 per cent. premium.

In a letter on the experiments which have been for some time in progress for the distillation of spirit from roots, under the sanction of the Inland Revenue, Sir Thomas Parkyns seeks to correct an impression likely to arise from the recent report of the Commissioners, that the attempt will not prove successful. He attributes the difficulties hitherto met with partly to a neglect of some of the requisite conditions of the system of M. Leplay, the patentee, and partly to the bankruptcy of the machine-makers who had contracted to furnish the plant for some of the distilleries, and who had been paid in advance. With respect to the average yield of spirit to be obtained, Sir Thomas Parkyns points out that, instead of being limited to 11 gallons per ton, it would probably range from 17 to 18 gallons, if Silesian sugar beet were used instead of globe mangold.

A Company entitled the Anglo-Spanish Smelting and Silver Mining Company has issued a prospectus, and proposes to raise a capital of 360,000*l.* in 72,000 shares of 5*l.* each, to work 38 silver mines in Spain. It would appear from the prospectus that 131,705*l.* has been spent on the mines, and that they are to be sold to the Company for 19,329 paid-up shares, and 39,809*l.* in cash. For full particulars of the undertaking we refer to the prospectus.

A prospectus has been issued by a Company entitled the Mirkside Pig Iron Company (limited), with a capital of 30,000*l.* in shares of 5*l.* each, for the purpose of working and developing a mineral property in the valley of the Esk, near Whitby, in Yorkshire. The property is held under a lease for an unexpired term of 60 years at a royalty of 6d per ton of 22½ cwst, which is proposed to be made over to the Company for the sum of 7,500*l.*, payable in the shares of the Company. It is proposed to erect smelting houses, and it is estimated that 15,000 tons of pig iron will be sold annually, from which it is expected to derive 12 or 15 per cent. on the whole capital, besides additional profits from the sale of ore. We refer to the prospectus for further particulars.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about at par, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 425½ per mark, and the short exchange on London is 13.4¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 4-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 110 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is slightly in favour of England; and, after making allowance for charges of transport and difference of interest, the present rate leaves a small profit on the importation of gold from the United States.

The Commercial Times.

Letters for Bermuda.—On the 1st of October next and thenceforward, letters addressed to Bermuda postage unpaid will be charged with an additional rate of sixpence each letter, besides the usual postage; and letters posted insufficiently prepaid will also be charged with the amount deficient, and with sixpence additional.

Mails for Monte Video and Buenos Ayres by French Packets from Bordeaux.—In connection with the monthly line of French mail packets between Bordeaux and the Brazils, which was established in May last, a branch line has now been organised between Rio de Janeiro and the ports of Monte Viedo and Buenos Ayres. Commencing, therefore, with the mail appointed to be despatched from Bordeaux on the 25th instant, letters, newspapers, and other printed papers addressed to the Republic of Uruguay and the Argentine Confederation may be forwarded once a month by the French packets. Letters, &c., to be thus sent must be posted in London not later than the morning of the 24th of each month.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The few fine samples of English wheat on sale at Mark lane this morning were disposed of at quite Monday's currency; but inferior qualities were very dull, and again rather cheaper. Most of the latter disposed of on that day has been refused by the millers on the ground that it is wholly unfit for present use. Holders of foreign wheat were firm; but the business doing was by no means extensive. Spring corn supported previous rates, with a fair demand; but the transactions in flour were much restricted. The imports from abroad are again liberal, viz., 15,790 quarters of wheat; 2,770 barley; 23,240 oats; 1,500 sacks and 70 barrels of flour.

At Liverpool to-day there was was an improved feeling in the general tone of the grain trade, at full prices.

Messrs Briggs and Co., of Alexandria, writing on the 5th inst., thus report the state of the grain trade:—

Prices of grain during the past week underwent a gradual but steady rise, until the arrival on the 2nd inst, of the Austrian steamer from Trieste, with telegraphic advices from England to the 25th ult., which at once produced a further smart advance, equal to about 1s 6d per quarter f.o.b. Beans have also improved in value, though not to the same extent as wheat. Linseed in good demand and very firm. The following transactions have been entered into for forward delivery:—25,000 ardebs (15,625 quarters) Saide wheat for delivery in September and October at 37s per qr f.o.b.; 5,000 ditto Saide beans, Pacha's produce, at 27s per qr f.o.b. The following are the sales of produce available for immediate shipment, with present prices, free on board:—Wheat, Saide, privats trade produce, 23,070 qrs, 38s to 39s 4d, ditto, Pacha's, 6,250 qrs, 39s, to 40s; Behera, red, 10,640 qrs, 36s to 37s 6d; ditto, white, 1,340 qrs, 38s to 38s 10d; beans, Saide, 8,500 qrs, 27s to 27s 6d; ditto, Behera, 1,540 qrs, 25s to 25s 10d; barley, 1,700 qrs, 20s to 21s; lentils, 435 qrs, 26s 6d to 27s; peas, 280 qrs, 25s 6d to 26s 6d; linseed, 2,420 qrs, 41s to 43s per qr. Freights continue very firm, say for beans to the United Kingdom for orders 7s to 7s 6d, and other grain or seed in proportion. To a direct port, 6s to 6s 6d. To Liverpool by steamer, 8s to 8s 6d per quarter f.o.b. By sailing vessel, 6s 6d to 7s. Exchange, owing to the scarcity of money, has declined, and paper on London at three months' date at the close of the mail with difficulty finds takers at 95¾ per £. Marseilles, 5f 28c per dollar of T. P. 20.

A very large business has been this week transacted in the Liverpool cotton market. The sales sum up 116,220 bales, of which spinners took 77,000 bales, speculators 14,000 bales, and exporters 25,000 bales. Quotations are raised ⅛d to ¼d per lb. It appears doubtful that the American crop accounts warrant such an excitement and rise in prices as Liverpool business has shown the last three weeks. The reports of damage from drought in the higher lands are very contradictory, varying from 1 to 500,000 bales. This great difference proves exaggeration. Planters have now on the opening of the new season an interest to see prices higher, and the same may be said of the houses in the American ports to whom chiefly the very large stock in Liverpool belongs; and it is currently reported that the latter, to strengthen their reports about injury to the new crop, have operated in Liverpool.

On looking at the statistics of this important article, there can certainly be no fear, unless an early frost blightens prospects, to see high prices. From the statistical tables it appears that the stocks in:—

	1859. Bales.		1860. Bales.
England, Aug. 31, were	666,000	against	1,162,000
Havre, Trieste, Bremen, Hamburg, Antwarp, Holland	133,000	—	283,000
American ports	116,000	—	149,000
	915,000	—	1,594,000

The new season will therefore open with a surplus stock of about 679,000 bales.

According to the same tables, the consumption of America and the Continent have been unchanged. Only in this country the increase is about 5,000 bales per week, or 250,000 bales for the year, whilst the present crop will result in an increase of very near 100,000 bales over last crop. Such figures must remove all fear for scarcity and high prices.

The estimates of the new crop were, till four weeks ago, when the reports about damage from drought were spread, for five millions of bales; some even went beyond this great total. These great crops are chiefly resulting from the large increase of new land, where the yield from richness of soil has been very large.

Time must show now how much the drought has curtailed the hitherto circulated estimates. An early frost ought to be watched with more anxiety, however, if the opinion of five million bales will be curtailed one *million*; even then the above-named stocks will assist to keep a surplus fully adequate to the consumption.

The advices at hand from the United States, in reference to the cotton crop, are favourable. New cotton is coming forward rapidly at New Orleans.

The demand for nearly all kinds of tea has continued inactive, but without leading to any quotable change in value.

We have received the annexed commercial information from Hong Kong, dated July 26:—

Tea.—The market for new congous opened on the 7th inst. at 34½ taels, and settlements to date amount to 49 chops and 8 chops of contract tea. The quality generally is rather superior to last season, though a few chops show signs of hasty preparation, being rather mixed and stalky. Arrivals to date are 76 chops. Settlements—49 chops of new congous, 1 chop old ditto, and 8 chops contract. Prices—Oopacks, fine to finest, 32 to 35 taels; Oonabens, fine, 28 to 29½ taels; common, 25 taels; Tayshan congous, 5,000 half-chests, at 21 to 25½ taels. Scented Orange Pekoe—14,000 boxes sold; stock, 20,000 boxes: fine to finest, 35 to 36 taels; fine, 29 to 33 taels: medium, 25 to 28 taels; common, 21 to 22 taels. Scented Caper—Sales, 12,000 boxes; stock, about 30,000 boxes: fine to finest, 28 to 32 taels; fine, 26 to 28 taels; common, 18 to 22 taels. Canton gunpowder and imperial, 3,000 boxes, at 20 to 24 taels. Amoy advices are to the 17th inst. Tea.—During the fortnight a large business has been done. Settlements are as follows:—Oolongs, 7,402 half-chests, at 21.50 dols to 28.50 dols; congoo, 5,370 half chests, at 14 dols to 26 dols; orange pekoe, 2,200 half-chests, at 17 dols to 20 dols; Ankoi, 1,528 half-chests, at 14 dols to 16 dols; plain caper, 1,550 boxes, at 15½ dols to 16 dols. Foochow advices are to the 16th inst. Tea.—A considerable business has been done during the fortnight, and an advance on last quotations have been established. Arrivals have been moderate, consisting of second crop. The supplies of clean to good common have fallen short of the requirements, and, from the brisk demand for these grades for the colonial and American markets, all available parcels are readily taken at extreme prices. These kinds are proportionately dearer than the better descriptions, as shown from the quotations. Souchongs have been taken to a fair extent for the Continent and United States. In Oolongs transactions have been chiefly for America. A few thousand boxes of scented have been sold at full prices. On comparing prices with those of the 30th ultimo, there is an advance of 1 to 1½ taels on common to good common congou. Flavoury kinds are dearer; Souchong and Oolong show no alteration. Sales to the 15th inst.:—Congou, 33,000 chests, at 11 taels short, for "low dust," to 29 taels for Kaisow, the lower grades for America and the colonies; Souchong, 5,400 chests, at 22 to 40 taels, short; Oolong, 13,300 half-chests, at 25 to 28 taels, short, for fair to good cargo; Pekoe, 650 chests, at 30 to 40 taels; scented teas, 4,000 boxes, at 29 to 38 taels for fine to finest. Stocks on the 16th inst.—Congou, 15,000 chests; Souchong, 5,000 chests; Oolong, 3,000 half-chests; Pekoe, 600 chests; scented teas, 2,000 boxes. Quotations are,—Congou—Very low to good ordinary, 11 to 17 taels, short; common to good common, 17.5 to 19.5 taels, short; flavoury to Kaisow kinds, 20.5 to 25 taels, short; Kaisow, 26 to 29 taels, short; Souchong, fair to medium, 22 to 27 taels, short; Souchong, fine to finest, 30 to 40 taels, short; Oolong, fair to good, 20½ to 28 taels, short; Pekoe, medium to finest, 30 to 50 taels, short; scented teas, fine to finest, 29 to 38 taels, short. Shanghai advices are to the 15th inst. Silk.—Notwithstanding the near neighbourhood of the rebels, 6,494 bales have come to market, of which 5,000 bales have found buyers. Prices have advanced 10 taels, and the following are the quotations:—Tsatlee, No. 1, 430 taels; No. 2, 410 taels; No. 3, 390 taels; No. 4, 375 taels; and inferior, 350 to 370 taels. Tayeaam, Nos. 1 and 2 (no transactions); No. 3, 320 taels; No. 4 and inferior (no transactions). Total export of silk from China to Europe is 1,607 bales, against 1,856 last year, or a decrease for this season of 249 bales. Tea.—About 1,500 chests black have been settled during the fortnigh', consisting of almost entirely Shanghai fired congous; rates paid, 14 to 16 taels. Stock about 5,000 chests. No arrival of new crop, the route being still closed, and not even a muster had been received Green Teas.—About 1,500 half-chests sold, principally Japan growth. Stock, 3,000 half-chests. Total export of tea from China to Great Britain is 3,091,800 lbs, against last year 1,358,800 lbs, or an increase for this season of 1,733,000 lbs. To the United States the export is 128,000 lbs, against nothing to same date last year.

On the whole, a full average business has been passing in the coffee market at full currencies, although the supply on offer is rather extensive.

Messrs Volkart Brothers, of Ceylon, have forwarded the following report of the coffee market to the 16th ult.:—

The weather has continued most favourable for curing and shipping produce. The disposal of the present season's crop to date is as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	406,141	against last year,	cwts	320,168
Foreign Ports	30,391	—	—	38,995
Australia and India.....	10,870	—	—	7,515
	447,402			366,678

NATIVE COFFEE.

To Great Britain.....cwts	83,286	against last year,	cwts	66,120
Foreign Ports.....	67,269	—	—	117,747
Australia and India.....	3,640	—	—	7,271
	154,195			191,138

The weather continues extremely unfavourable for the growing crops. On the hills there have been a few showers during the last three weeks, but the valleys have again been without rain; the result is, nearly the whole of the native crop is lost, and much low plantation. Even the crops on the higher elevations are in a critical position, and an immediate fall of rain can alone prevent serious loss. In Colombo the drought continues as intense as ever. Plantation coffee, low, nominal; ditto, mountain, 11s 3d to 11s 6d per bushel; native coffee, unpicked, 48s to 49s per cwt.

The demand for raw sugar has been moderately active, and prices generally have been well supported. Refined goods, however, have changed hands slowly, at barely late rates.

Rice has met a dull inquiry; nevertheless, the fluctuations in prices have not been extensive.

"Since our last advices of the 10th of July," observe M. Arles Dufour and Co., of Lyons, whose communication is dated the 11th inst., "transactions in silk have been rather limited; nevertheless prices have remained firm, which is to be attributed to the continuing scarcity of raw and thrown silk of all descriptions. It is true that the silk of the last European crop is only beginning to make its appearance, and that the arrival of Chinas has been delayed by the disturbances which are raging in the silk producing countries. On the other hand, news from the United States give us the hope that orders for the spring will this year assume their usual importance."

The state of the indigo market at Calcutta to the 8th ult., is thus reported by Messrs Moran and Co.:—

Our accounts from the indigo districts are as follows, but as a general remark with regard to the weather which has prevailed in Lower Bengal during the past month, we may say that up to the 24th July rain was rather urgently required both to bring on the early sown plant and for the purpose of manufactoring. From that date to the close of the month more rain fell than was desirable, which reduced the produce and caused weeds to spring up very rapidly amongst the late sowings. The yield continues poor, but a few days of such weather as we have had here lately will no doubt improve it. The districts of Kishnaghur and Jessore have suffered greatly from the impunity with which ryots have broken through their engagements, and allowed their cattle to graze down the plant; and, instead of planters reaping a fine crop and producing such an amount of indigo as weather and other contingent circumstances combined would have given them this year, had the ryots worked quietly instead of being instigated by ill-disposed persons to turn against planters, and encouraged in their acts by the palpable bias of the Government of Bengal in their favour, they will scarcely exceed their very poor outturn of last year by 2,000 or 3,000 maunds, and for next year we must be prepared to see the cultivation much reduced. Dacca, Furridpore, and Mymensingh will close with 1,500 or 2,000 maunds more than they made last season. Rajshye, Bordwan, and Midnapore may also do a little better, but all other districts will, we believe, fall short of their last year's outturn. Tirhoot has been getting poor produce, and is in want of some good heavy showers, and much plant which suffered so badly from the protracted drought and hot wind, to which we alluded in our circular of the 2nd June, will, it is reported, come to nothing. We have received no estimate of the probable outturn of the different factories as yet, but are under the impression that Tirhoot and Chuprah will turn out about last year's quantity or a little more. The Benares Provinces are badly off. The Khoonties of last year have died away to a great extent owing to the very late setting in of the rain. The new sowings from the same cause were effected so late, and the rains during the latter part of July have been so heavy, that the young plant is becoming choked with weeds which it is impossible to remove until there is a change for the better in the weather, and we must expect a very poor result from this division of the indigo cultivation. From the Doab all we know is that the weather until very lately was and had been for many months so hot and dry as to make it a matter of surprise how any vegetable life could withstand it, excepting where irrigation was resorted to. It is usual with us at this date every year to give some idea as to the probable outturn of the season, and for the present we give 1,02,000 or 1,06,000 maunds as likely to be about the ultimate amount of the crop. Exports of indigo from Nov. 1, 1859, to the evening of the 6th current:—To Great Britain, 18,902; Havre and Bordeaux, 5,186; Foreign Europe, 64; America, 1,495; Gulf, &c., 1,751; sundry ports, 11—total, 27,409 chests.

There has been very little business doing in any kind of wool this week, yet holders of all kinds continue very firm, and prices are freely supported. In the value of hemp, flax, &c., the fluctuations have been trifling. The dealings in fruit and saltpetre have been unimportant.

Scotch pig iron has realised 51s 3d to 51s 6d cash mixed numbers. Fine Straits tin has sold at 132*l*, and Banca 137*l* per ton.

The current value of linseed oil, on the spot, is 30s per cwt. Tallow has shown more firmness, at 52s 6d on the spot, 52s 9d October to December, and 53s January to March, notwithstanding the continued heavy shipments from St Petersburg.

"Money is stiffening up a little," says the New York *Shipping List* of the 29th ult. "The demand is more active under the stimulus of the fall trade, and for temporary loans, 6 per cent. is the rate commonly paid—that is to say, 1 per cent. higher than was asked a few days ago. There are occasional operations at a lower figure, it is true, but the borrowers are favourite parties. The discount houses say choice paper is scarce; leading names pass at 6 to 7 per cent. Long paper is less in favour. In the general market there is nothing like stringency, the slightly higher rates we are recording being but the result of natural and foreseen causes. We quote:—

	Per cent. per annum.	
Loans on call, stock securities	6	to ...
Do. other good securities	6	7
Prime endorsed bills, 60 to 90 days	6	6½
Do. 4 to 6 months.....	6	7
First class single signatures	6½	7½
Other good bills	8	9
Names less known	9	10

There has been a fair amount of business done in dry goods. The market is buoyant, and though stocks are pretty heavy, they are not considered excessive, and it is not likely that so many goods will be run off at auction during the fall and winter months as there were last year, while from prevailing indications prices will be far less irregular. There is a fair amount of business doing with the West, but more activity is looked for from that quarter before the close of the fall season, and when the bulk of the bountiful harvest of 1860 shall have been converted into cash. Of the market for foreign goods there is but little to say. The demand continues light for all fabrics, but for the most part previous prices for all desirable makes are fully supported. Undesirable goods, which have been accumulating for so long a time, are still very hard of sale, and holders are obliged to accept of ruinously low rates in some instances, in order to dispose of them. The auction sales during the week have been unimportant."

The cotton market has been very animated during the past week, and a large amount of business has been done by all classes of buyers. An advance of ⅛d to ¼d per lb was at once obtained in the ordinary and middling grades of American, and has been since steadily maintained, though at the close the excitement had somewhat abated. In Egyptian a fair business has been done at recent rates. Brazil have partially advanced ⅛d per lb. East India must be quoted ¼d per lb higher. The sales to-day are 10,000 bales. The market is quieter, but firm. The reported export amounts to 14,290 bales, consisting of 3,050 American, 1,600 Brazil, and 9,640 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for cotton goods for shipment to India has increased to some extent during the present week, and, in some instances, the quotations have had an upward tendency. For China, the transactions have exceeded those for some time past. The French and German houses have purchased goods rather more freely; but the demand has been by no means active. The home trade, generally, continues very firm, but without leading to much change in value. The iron trade has shown signs of improvement, although the stocks have become heavy. Coals have sold somewhat steadily for the time of year.

MANCHESTER, Sept. 13.—Last week this market showed decisive signs of improvement; this week the improvement has been extended and developed. Transactions have been very large, and prices have risen considerably. In yarns for the home trade demand has been animated to cover orders taken for cloth, and now that spinners are well engaged higher prices are quoted than buyers for the moment seem disposed to follow up. Most descriptions of cloth are in a similar position in respect of contracts and prices; shirtings, printers, madapollams, and most sorts of longcloths and T'cloths, may be said to have been cleared off, and prices to have taken a corresponding rise. Buying has been general for India, China, America, and the Continent. Yesterday, the extremely unfavourable accounts from Calcutta were received, but they have barely checked the tendency to further advance, and the market remains firm at the higher rates of the week.

BRADFORD.—Wool—The fine weather has continued through another week, and with it the improved tone in the wool market noted last week. Confidence is gradually being restored in this branch of our trade, and there is a fair inquiry for all classes of wool. We have no real change in the yarn market. Spinners are well employed, and no stocks on the market. Prices are firm, with a tendency upwards. The improved weather has given a better tone to the piece trade, although we cannot report any increased demand to-day; the impression is prevalent that ere long goods will be wanted. In prices there is no alteration, but a check is given to any further reduction at present.

ROCHDALE.—Though there is little local inquiry for wool, there is not only considerable firmness in price, but in some instances slight additions have been made to last week's rates. We have heard of 5s per pack more being paid, but the case was exceptional. Middling and low short wools are much wanted, and would command an advance.

LEEDS.—Since the return of fine weather and the improved reports through the country of the better prospects of the harvest, a steady business has been done in our Cloth Halls. There is no alteration in prices, and the stock of seasonable goods being low, the mills continue in full employment. Business has rather improved in the warehouses, and there is a little more doing by the foreign houses than has been the case lately.

HALIFAX.—There appears to be a shade better feeling in the staple trades of this town and district. Yarns and wool are firm in price. The holders of wool are a little stiffer in their demands than they were a week or ten days ago.

HUDDERSFIELD.—Our market continues with little alteration, the attendance of buyers and the business done having been about the same as we have been accustomed to for the last two or three weeks.

LEICESTER.—The bright weather, which we have had during the last few days, has imparted an improved tone to our staple trade; and the prospects of the autumn trade are satisfactory. We have no material alteration in the details of local manufacturing prospects to notice this week.

GLASGOW.—There is an improved feeling in the wool trade. Spinners are buying much more readily, and prices remain high. There has been a good business done in laid Highland at full rates. Laid Cheviots are more inquired for than has been the case for a month or two back.

BELFAST.—In the markets of the County Armagh district there was a good demand for flax, with an upward tendency in prices. The small quantity of low-priced new flax which appeared in Cookstown was very inferior in point of quality, owing in a great measure to insufficient watering and defective scutching. With a limited demand from manufacturers, stocks of yarns in general continue slightly to increase. This remark applies especially to light line warps and tow wefts, and does not apply to the middle numbers of line wefts, which are scarce. Yarns suitable for powerlooms meet a tolerably steady demand; for export rather more business doing. Prices are without change, but a tendency towards lower figures for some numbers has become apparent.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; best hydrate pigs, 3*l* 12s 6d to 4*l*; first-class all mine grey forge pigs, 3*l* 7s 6d to 3*l* 12s 6d; good mine pigs, with a modicum of flue cinder, 2*l* 17s 6d to 3*l*; mine pigs, deteriorated by cinder, 2*l* 12s 6d to 3*l*; Cleator Moor hæmatites, 3*l* 11s 6d to 3*l* 12s 6d; Workington hæmatites, 3*l* 11s to 3*l* 12s 6d; Kirkless Hall hæmatites, 3*l* 10s to 3*l* 12s 6d; Barrow hæmatites, 3*l* 12s 6d to 3*l* 15s; grey forge cinder pig iron, 2*l* 10s to 2*l* 15s; white forge cinder pigs, 2*l* 5s to 2*l* 10s; melters, Nos. 1, 2, and 3, 2*l* 15s to 2*l* 17s 6d; superior makes of all mine melting iron, 3*l* 7s 6d to 3*l* 17s 6d, according to make and quality. Favourite Shropshire and Forest of Dean brands, 4*l* 5s; northern hæmatites, from 3*l* 10s to 3*l* 15s, according to brand and quality.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—Moderate transactions have taken place at fully former rates for the better qualities, while soft sugars scarcely maintained their recent value. The market generally is, however, less animated than on Friday last. West India continues to meet with ready buyers, the quantity sold to yesterday reaching 2170 casks, and previous rates have been refused for floating cargoes of foreign. By auction, 422 casks Barbadoes went from 36s 6d to 44s 6d. A few lots of other West India obtained the former quotations. The total deliveries last week were 4,910 tons, and those for home use exceed the previous season's by 11,050 tons to this date. The stock in London remains stationary, being 71,500 tons, against 76,500 tons in the preceding year.

Mauritius.—Of 9,260 bags brought forward in the public sales a great deal sold, but soft and low kinds, comprising the bulk, did not quite support their late value: low to good brown, 32s 6d to 38s; grey to good middling yellow, 38s 6d to 42s; grainy sorts, 42s to 46s; yellow, 46s 6d to 47s per cwt.

Bengal.—1,720 bags chiefly sold as follows: grainy yellow Bally, 45s 6d to 46s; bright Gurpatta date, 43s to 43s 6d. 1,600 bags low date Bengal changed hands privately at 31s to 31s 6d per cwt.

Madras.—1,800 bags dark Jaggery sold by auction at 31s 6d. 8,217 bags other kinds chiefly met with purchasers: native brown, 33s to 34s 6d; yellow, 35s to 37s; pasty brown and yellow, 29s to 32s 6d per cwt.

Manilla.—8,000 bags clayed have sold privately at 38s to 38s 6d per cwt.

Foreign.—By auction, 1,530 boxes Havana were bought in above the value. 210 casks Cuba sold from 37s 6d to 43s 6d for soft brown to good yellow. 958 casks 245 barrels Porto Rico partly sold: yellow, 41s to 47s 6d; brown and grey, 38s 6d to 42s. 1,482 baskets Java partly sold at 45s for fine strong grey; the remainder taken in at 42s 6d to 45s 6d. 800 boxes Havana have sold by private contract, Nos. 10 to 14, at 41s to 45s. A floating cargo of Havana, No. 11, is reported at 28s for the Clyde.

Refined.—The demand for dry goods has been less active than of late, but prices remain without alteration. Low to middling qualities may be quoted 50s to 50s 6d; crushed, 47s to 49s; low to fine pieces, 42s to 46s 6d per cwt. The advanced rates asked for Dutch crushed has prevented further business.

Molasses.—There have been several parcels sold at 6d to 1s advance, common to fine West India ranging from 18s to 20s per cwt, and the market is nearly cleared.

Rum.—Several sales have been effected during the week, at about previous rates: Leewards, 1s 7d; Demerara, 1s 10d to 1s 10½d; Mauritius, 1s 6d; and Penang, 1s 6d, proof. Jamaica has sold from 3s 9d to 4s 8d per gallon, according to quality. The stock of West India amounts to 23,150 puns, against 21,800 puns, and the total stock is 28,650 puns 4,700 bhds, against 27,850 puns 6,950 bhds in 1859.

Cocoa remains without alteration. 213 bags Trinidad were bought in at 60s to 75s. 36 bags Grenada partly sold at 62s to 63s per cwt. Former prices have been paid for Trinidad by private contract.

Tea.—The market has not been influenced by the news from China, and very little business is reported by private contract. 828 packages at public sale went at the extreme valuations, including a portion offered "without reserve."

Coffee.—Moderate supplies have been brought forward, which chiefly found buyers at the full valuations, and rather above for native Ceylon. 36 casks 2,000 bags of the latter sold from 63s to 64s. 555 casks 310 barrels and bags plantation went off with spirit: low middling to good, 70s to 77s 6d. A small parcel of good short berry Mocha obtained 118s to 120s. 191 cases 1,280 bags other kinds went as follows: Neilgherry, 84s to 90s 6d; Tellicherry, 70s to 72s; Malabar, 65s 6d to 70s; brown Java kinds, low and ordinary, 58s 6d to 61s. 33 casks 40 barrels Jamaica, 60s 6d to 78s. 300 bags Guatemala, 62s to 65s 6d. 225 bags Rio, partly out of condition, went from 49s to 54s. A floating cargo of Santos has sold for a near port at 60s per cwt.

Rice.—Partial inquiries prevail at the recent decline established, but the transactions have been of very moderate extent. By private contract, Bengal has sold at 14s 6d to 15s for fine; good Ballam at 11s; good pinky Madras at 11s 3d; soft grain kinds 10s to 10s 6d. A floating cargo of Rangoon has been disposed of at 11s. The public sales comprised 6,301 bags Madras, which sold at 10s 6d to 11s 4½d for broken pinky to good white grain. 872 bags Bengal: middling white, 12s 6d to 13s; middling cargo, short prompt, 10s per cwt.

Imports and Deliveries of Rice to September 8, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons

Stock	43000	69300	91550	47250

Sago.—328 boxes were taken in at 16s to 16s 6d per cwt for medium to good bold grain.

Spices.—55 cases nutmegs, of old import, in second hands, were mostly bought in. 764 bags pimento partly sold at the previous value, viz, 3¾d to 3½d for middling to good. Small sales have been made in black pepper privately at previous rates: Malabar, 4¾d; Singapore, 4½d per lb. 121 cases mixed and wormy Cochin ginger have sold at 43s to 49s, being 2s to 4s cheaper. 261 barrels Jamaica, 3l to 7l 5s. 1,400 bags African, at 35s 6d to 36s per cwt, went 1s to 1s 6d per cwt lower.

Saltpetre.—The market is firmer. A few contracts have been made in Bengal, at 39s to 44s, for refraction 13 to 4¼. By auction, 552 bags Bombay, refraction 5¼ to 4¾, went at 36s 6d to 37s per cwt.

Imports and Deliveries of Saltpetre to September 8, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons
Imported	9150	13350	7200	11550
Delivered	8900	12400	10100	8500
Stock	4120	3200	3260	5100

Cochineal has been inactive. 94 bags Honduras silver, offered by auction, were bought in at 3s 6d to 3s 7d per lb.

Other Dyestuffs.—More inquiry prevails for Cutch, at 27s. Gambier remains quiet, at 17s 6d to 18s. Safflower and turmeric are without further change.

Dyewoods.—Red Saunders has sold at 5l 15s to 5l 17s 6d. Jamaica fustic bought in at 5l 15s per ton.

Drugs, &c.—Button shellac has advanced fully 5s, common dark quality selling at 10l. At the fortnightly sales, yesterday, prices showed little variation. About 1,200 cases castor oil sold at the previous value. Camphor was bought in at 7l 10s to 8l per cwt.

Jute.—On Wednesday, 2,808 bales sold with less spirit than last week, but prices did not show any change. Common to fine marks, 13l 10s to 21l per ton.

Metals.—There has been a general want of animation in the market this week. The most prominent feature to notice is the further advance of ¼d per lb upon British copper. Scotch pig iron remains dull; mixed Nos. closing at 51s 3d per ton. Manufactured descriptions are unchanged, owing to the advices from Holland. Tin is firmer: good Straits has sold at 131s 6d to 132s; Banca, 136s 6d to 137s per cwt. Few transactions are reported in spelter.

Hides.—The public sales of East India, yesterday, went off steadily, and the demand for export kinds was particularly good, and common kinds went ½d per lb dearer. Of 160,000 hides, the bulk found purchasers, and prices showed little variation to notice.

Linseed.—Unusually extensive sales have been made in Calcutta afloat, at 54s. Stocks are light, and the quotations on the spot may be considered 55s 6d to 56s 6d and 57s for Bombay; 54s per quarter for Black Sea.

Turpentine.—Spirits have sold more freely, at 31s 6d for American. Old rough quoted 8s 6d to 9s; new, 9s per cwt. Imports, 1,500 barrels.

Oils.—A limited business is passing in olive, at 55l to 60l: one cargo of Gioja has sold at 58l 10s. Sperm can be obtained on rather lower terms, viz., 106l to 107l per tun. Common fish oils are quiet. Linseed has been in steady demand, but with an increased supply purchases can now be made at 30s in all positions. Extensive purchases have been made in rape oil, but at lower rates: refined, 46s to 46s 6d; brown, 43s to 43s 6d. Cocoa-nut remains quiet, at last week's quotations. A moderate inquiry exists for palm, fine bringing 45s per cwt.

Tallow.—A better feeling has pervaded the market, and prices have advanced 3d to 6d. This morning, the closing quotations of foreign are as follows:—1st sort Petersburg Y.C., 52s 6d; to the end of the year, the same; first three months of 1861, 53s to 53s 3d per cwt.

Particulars of Tallow.—Monday, September 10.

POSTSCRIPT.

Friday Evening.

Sugar.—The market closes without animation. The sales of West India for the week reach 2,600 hhds. Native Madras is dull, other kinds unaltered, and a fair proportion of 4,322 bags Mauritius and 3,950 bags Bengal met with purchasers. 6,624 bags Madras Jaggery realised 31s 6d. 1,354 bags native were bought in or withdrawn, and 1,582 boxes Havana were mostly bought in. Privately some further business was done in the latter description.

Coffee.—341 bags superior native sold at 64s to 64s 6d. 128 casks 252 barrels and bags plantation went at full prices. 67 casks Jamaica: good middling to fine realised 78s to 98s 6d. A few lots of Mocha: long berry, 110s to 126s. 766 bags African, part sold at 80s. 935 cases 1,174 bags Neilgherry, 65s 6d to 74s. 1,300 bags Malabar, 65s to 66s 6d per cwt.

Rice.—1,898 bags white Bengal were chiefly taken in at 13s to 15s, a few lots old selling at 12s 6d. Business has been done in Rangoon at 10s 6d per cwt.

Saltpetre.—670 bags Bombay were sold: refraction, 6⅞ to 43, at 37s 6d to 38s; 11¼ per cent. Bengal sold at 39s 6d per cwt to-day.

Cochineal.—472 bags only partly sold. Honduras silver, 2s 6d to 3s 8d; black, 3s 3d to 3s 7d; Teneriffe black, 3s 7d; Lima grain, 2s 9d to 3s 3d per lb.

Lac Dye.—191 chests were taken in: fine, 2s 4d; good marks, 1s 2d to 1s 3½d; low and common, 1d to 5d per lb.

Oil.—1,240 casks palm part sold at 36s to 46s 3d. 219 casks cocoanut: Cochin, 49s; Ceylon, 46s 9d to 47s per cwt. 208 tuns seal part sold at 32l to 34l. 175 tuns Southern, 31l to 34l per tun.

Tallow.—Town advanced to 55s, against 54s 3d per cwt last Friday.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar has been rather dull this week. No material alteration to note as respects prices. Treacle in good demand and scarce. The accounts from Holland advise large sales of crushed at advanced prices, principally for Italy. Some sales have been made here for about 200 tons of V. O. and B & H No. 1, at 32s 9d f. o. b. in Holland.

Green Fruit.—Little business doing, home-growth fruits being preferred to foreign. Lemons unaltered in value; some Lisbon sold by Keeling and Hunt at public sale went at similar prices obtained last week. Accounts from the Azores report favourably of the forthcoming crop of oranges, but short from Spain.

Dry Fruit.—The currant market has been further depressed by the arrival of about 2,000 tons of new fruit this week by steamers, and by great eagerness in importers to force off their fruit before sailing ships

come in with fruit at much lower freights. The Rokeby's cargo was offered by auction on landing, but without success, as buyers naturally expect to see such precipitation on the part of importers to be followed by further decline in prices. Old fruit is being brought out more freely, and has again declined 1s to 2s: Vortizzas, 23s to 25s; other sorts offered at 20s to 22s. These prices will eventually lead to an extensive trade, but at present there is no confidence whatever on the part of buyers. New Valentia raisins continue to arrive, and sell at 33s, which low price will bring on a large consumption, though it may be retarded by the temporary abundance of our home-grown fruits.

COLONIAL AND FOREIGN WOOL.—The market remains without change.

FLAX unaltered.

HEMP,—Market quiet this week, and but little business doing.

COTTON.—Sales of cotton wool from Friday, 7th September, to Thursday, 13th, inclusive:—8,800 bales Surat, at 3d to 3 11-16d for ordinary to fully fair Compta, 3¼d to 4¼d for middling Oomrawattee to good fair Dhollera and Oomrawattee, 4¼d for very good Dhollera, 5d to 5⅛d and 5¼d for good fair to good Brosch, and 4⅞d to 4⅞d for fully fair to good sawginned; 2,000 bales Madras, at 3¼d to 3½d for middling fair to fully fair Western, 3⅝d for good fair Northern, and 4d to 5d for middling to good fair Tinnivelly. Great activity has prevailed throughout the week, and an extensive business has been transacted at an advance of fully ⅛d per lb on Surat and Western Madras. Good fair Tinnivelly is unchanged in price, several hundred bales having been sold at 5d per lb. The market closes with great firmness. P.S. Good demand to-day: Sales, 1,800 Surat, at 3¼d to 4¼d, being very fair prices.

SILK.—Trade a shade quieter since the arrival of the China mail, advising fresh settlements of 5,000 bales, but prices unchanged.

TOBACCO.—The improved demand, at slightly advanced prices, consequent on the unfavourable intelligence received of the growing crop in the United States, has subsided; and although several parcels have been withdrawn from sale, the trade have not been induced to purchase to any extent.

LEATHER AND HIDES.—Since our last, there has been no improvement in the leather trade: a want of activity has prevailed, for which possibly the sale of stock, by order of the assignees of bankrupt firms, may in a great measure account. There is, however, a continuous inquiry, to some extent, for nearly all articles, and the quotations of last week are generally supported. At Leadenhall, on Tuesday, there was a moderate supply of fresh goods, but a limited demand. Best English butts of heavy weights and heavy harness hides were the articles most scarce and in request.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	0
Fat by ditto	2	9½
Yellow Russian	54	0
Melted stuff	41	0
Rough ditto	24	0
Greaves	20	0
Good dregs	7	0

Imports this week 6,576 casks.

PROVISIONS.

Bacon is still on the decline: the finest brands can now be purchased at 74s landed. Friesland in good demand, at 114s.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 10.—The total imports of foreign stock into London last week amounted to 13,599 head. In the corresponding week in 1859 we received 13,269; in 1858, 12,028; in 1857, 9,309; in 1856, 7,578; in 1855, 10,370; and in 1854, 10,088 head.

From our own grazing districts the receipts of beasts fresh up were very moderate, and in comparatively poor condition. Most breeds sold at fully last week's prices, but the demand for them was by no means active. The best Scots realised quite 5s per 8 lbs. The supply of sheep being considerably less than on Monday last, the mutton trade was somewhat active, at an improvement in the currencies of 2d per 8 lbs. The best Downs sold at 5s 6d per 8 lbs. The lamb trade is now nearly over; however, to-day it ruled steady at full prices. We had a fair inquiry for calves, the supply of which was good, at previous rates.

Supplies.	Sept 13, 1858.	Sept. 12, 1859.	Sept. 10, 1860.
Beasts	5624	5290	5100
Sheep and Lambs	23960	29130	24300
Calves	160	220	204
Pigs	396	550	440

THURSDAY, Sept. 13.—To-day's market was but moderately supplied with beasts, and nearly all breeds sold steadily, at full Monday's quotations. The show of sheep was rather limited, and the mutton trade ruled firm, at extreme rates. The best old Downs commanded quite 5s 6d per 8 lbs. The few lambs on offer changed hands steadily, at full currencies. Calves, the supply of which was only moderate, were in good request, at an advance in the quotations of 2d per 8 lbs.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	0	3	4	Prime Southdown sheep	5	4	5	6
Second quality ditto	3	6	3	10	Large coarse calves	4	2	4	8

Prime coarse-woolled do.	4	10	5	2	Quarter old store pigs	23	0	30	0

Lambs, 5s 0d to 6s 0d.

Total supply—Beasts, 1,000; sheep and lambs, 8,260; calves, 340; pigs, 330.
Foreign supply—Beasts, 580; sheep, 1,500; calves, 212.

NEWGATE AND LEADENHALL.

FRIDAY, Sept. 14.—The supplies of meat are less extensive. Prime qualities move off steadily at very full prices, but other kinds are dull at our quotations.

Per 8 lbs by the carcass.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	4	Mutton, inferior	3	4	3	10
Middling ditto	3	6	3	8	— middling	4	0	4	4

Lamb, 4s 8d to 5s 2d.

HOP MARKET.

BOROUGH, Monday, Sept. 10.—The more favourable weather of the past week has benefited the plantations of any promise in the Weald of Kent and Sussex; but from Mid and East Kent the reports show no improvement. The duty has fluctuated between 50,000*l* and 60,000*l*. We have rather less business doing in our market, but prices are maintained with firmness. Mid and East Kents, 170s, 210s, 240s; Weald of Kents, 160s, 190s, 220s; Sussex, 140s, 169s, 190s.

FRIDAY, Sept. 14.—The accounts come worse this morning. Duty down to 45,000*l*. Market again advancing. One pocket of new Sussex arrived yesterday, and sold at 16*l* 16s per cwt.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 10.—Several parcels of potatoes have arrived from Scotland in good condition; but the supplies of English are moderate. The demand rules steady, as follows:—Kent and Essex Regents, 100s to 150s; York ditto, 120s to 140s; Scotch ditto, 100s to 120s; Bedfords, 120s to 140s per ton.

WATERSIDE, Thursday, Sept. 13.—The arrivals of home-grown potatoes have been limited, coastwise and by land conveyance, since our last report, and trade consequently is rather brisk, at fully the subjoined quotations:—York Regents, from 120s to 150s; Kent and Essex ditto, from 120s to 140s; Scotch ditto, from 120s to 130s; Middlings, from 50s to 70s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 10s to 5*l* 15s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. A steady demand.

CUMBERLAND.—Meadow hay, 2*l* 15s to 5*l* 15s; clover, 4*l* to 6*l*; and straw, 1*l* 11s to 2*l* per load. Trade firm.

WHITECHAPEL.—Meadow hay, 2*l* 12s to 5*l* 12s; clover, 3*l* 15s to 6*l* 6s; and straw, 1*l* 10s to 2*l* per load. Supply moderate, and trade steady.

COAL MARKET.

FRIDAY, Sept. 14.—Walls End Hough Hall, 18s; Cassop, 19s 3d; Kelloc, 19s 3d; Acorn Close, 19s: Framwellgate, 19s; Tanfield Moor Butes, 13s 9d; Craghead Steam, 14s 9d; Davidson's Hartley, 16s; Hastings' Hartley, 16s; Howard's Hartley, 15s 9d. 21 ships at market.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY Sept. 14.—The grain market more steady, and a slight advance obtained for good descriptions of wheat and flour. Indian corn 3d dearer; Ibrail, 33s 6d; mixed American and Galatz, 34s. Beans firm, and other articles steady. Weather fine after rain.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 14.—There has not been much doing here this week, as the proximity of our public sales, which will commence on the 19th inst. and last until the end of this month, has the tendency of keeping buyers out of the market until then. The quantity to be offered is stated to be 15,000 bales East India, and 9,000 bales low wools of miscellaneous description.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic returns of railways in the United Kingdom for the week ending Sept. 1 amounted to 581,795*l*, and for the corresponding week of last year to 533,320*l*, showing an increase of 48,475*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 254,147*l*, and for the corresponding period of 1859 to 238,189*l*, showing an increase of 15,958*l*.

CALEDONIAN AND DUMBARTONSHIRE JUNCTION. — The half-yearly meeting of this company was held in Glasgow on Wednesday. The report stated that the traffic for the half-year ending the 31st of July last amounted to 8,023*l*, against 7,233*l* last year, showing an increase of 780*l*. The working expenses were 3,070*l*, against 2,629*l*, showing an increase of 441*l*. The working expenses were 40 per cent. of the receipts, being the same proportion as last year. The net balance for dividend was 5,349*l*. The Board recommended payment of a dividend at the rate of 4½ per cent. per annum, which would absorb 4,404*l*, and leave to be carried forward 945*l*, the addition to the reserve being 220*l*. The sum expended on capital account amounted to 259,740*l*.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Sept. 10.—The railway market was heavy to-day in sympathy with Consols, and most of the leading descriptions closed ¼ to ½ per cent. lower, Midland and South-Eastern being the flattest. North-Eastern stocks were less affected, receding only ¼ per cent., and North British was exceptionally firm. In colonial descriptions a reduction took place in Atlantic and St Lawrence, Buffalo and Lake Huron, Great Western of Canada, and Grand Trunk. East Indian was also dull, at 99½ to 100. The principal change in the foreign market was a fresh decline in South Austrian and Lombardo-Venetian. American securities further relapsed, especially those of the New York Central, New York and Erie, and Illinois Central. The shares of the latter were last quoted 17½ to 17 dis. Mines were more actively dealt in, and the final quotations again showed an occasional improvement. In joint stock banks, Australian shares were firmer. No alteration of importance occurred in miscellaneous descriptions.

TUESDAY, Sept. 11.—The railway market showed more firmness this afternoon, several stocks having rallied from yesterday's decline. Lancashire and Yorkshire and Great Western especially advanced ⅛ per cent. Eastern Counties was rather flat. London, Chatham, and Dover preference steadily maintained the late improvement. In colonial descriptions, Great Western of Canada shares improved to 13½ to ¼. East Indian was also higher, while Grand Trunk receded in the afternoon to 29 to ½. Foreign railways continued dull, and South Austrian and Lombardo-Venetian were heavy. A further reaction took place in Illinois Central shares, the last price being 19 to 18 discount. There were few transactions in mines, but the market retained a good upward tendency. Joint stock banks and miscellaneous descriptions closed about the same as yesterday. Victoria debentures, new, were last quoted 110; Canadian Five per Cents., 102; Ocean Marine Insurance, 2 pm.

WEDNESDAY, Sept. 12.—In the railway market there was little business doing apart from the settlement, which commenced to-day. The final quotations, however, generally showed a rise. Lancashire and Yorkshire and Great Western were in good demand for delivery, especially the latter, and advanced 1¼ per cent., the last prices being 112½ to ¾ and 72½ to ¾. Colonial descriptions were inactive, the only material change being an advance in Grand Trunk of Canada to 29¼ to ¾. Great Western shares remain at 13½ to ¾. In the foreign market, Lombardo-Venetian were again flat, at 1⅞ to 1½ dis. New York and Erie bonds also advanced. Few transactions were recorded in mines, but prices continued firm.

THURSDAY, Sept. 13.—The railway market was again firm to-day, especially during the latest hours of business. The principal demand was for Midland, which advanced more than 1½ per cent. Great Western and York and North Midland also improved about 1, and other stocks ¼ to ½. Colonial railways were steady at former prices. In the foreign market a fresh decline took place in South Austrian and Lombardo-Venetian, the final quotation being 1½ to ¾ dis. Illinois Central shares improved to 15 to 14 dis.; and New York and Erie to 28½ to 29½. A moderate business was transacted in mines, and some tendency to reaction was shown. In miscellaneous descriptions, Victoria Dock, Scottish Australian Investment, Australian Agricultural, and Berlin Waterworks were quoted higher.

FRIDAY, Sept. 14.—In the railway share market to-day some flatness prevailed, in sympathy with that in the funds. In several instances a reduction of ¼ to ⅜ per cent. took place. Eastern Counties and Midland stocks form an exception; the former rose ⅜, and the latter ⅜ per cent. The transactions in Midland were extensive. Lombardo-Venetian Railway shares remained heavy at 1⅛ to 1¼ dis. The Indian lines were quiet.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant, WM. BLACK.

NEW THEATRE ROYAL ADELPHI.
Sole Proprietor and Manager, Mr B. Webster.
Great success of Mr Dion Bourcicault, and Miss Agnes Robertson. On Monday and during the week, THE LOAN OF A LOVER. Messrs W. Smith, Billington, Romer, C. J. Smith; and Miss E. Thorne. THE COLLEEN BAWN. Messrs D. Bourcicault, D. Fisher, Billington, Falconer, Stevenson C. J. Smith, Romer; Miss Agnes Robertson, Woolgar, Mrs Billington, Chatterly. And MUSIC HATH CHARMS. Mr D. Fisher, and Miss K. Kelly. Commence at 7.

FREDERICK DENT,
Chronometer, Watch and Clock Maker to the Queen and Prince Consort, and the maker of the Great Clock of the Houses of Parliament, 61 Strand, and 34 Royal Exchange. No connection with 33 Cockspur street.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

HARVEY'S FISH SAUCE.—
Notice of Injunction.—The admirers of this celebrated Fish Sauce are particularly requested to observe that none is genuine but that which bears the back label with the name of WILLIAM LAZENBY, as well as the front label signed "Elizabeth Lazenby," and that for further security, on the neck of every bottle of the Genuine Sauce will henceforward appear an additional label, printed in green and red, as follows:—"This notice will be affixed to Lazenby's Harvey's Sauce, prepared at the original warehouse, in addition to the well-known labels, which are protected against imitation by a perpetual injunction in Chancery of 9th July, 1858."
6 Edwards street, Portman square, London.

TRADE B/P MARK.
BROWN AND POLSON'S
PATENT CORN FLOUR.
The LANCET states,
"This is superior to anything of the kind known."

RECIPE FOR SUMMER FRUIT PIE.—Boil the flour with milk for four minutes, then pour it over the stewed fruit, and brown it in the oven or before the fire. This is very lightsome and much preferred to the ordinary pie crust.—BROWN and POLSON, Manufacturers to Her Majesty the Queen, Paisley, Dublin, Manchester, and 23 Ironmonger lane, London.

DR KAHN'S MUSEUM,
Opposite the Haymarket, OPEN DAILY from twelve to five, and from seven to ten. Popular Lectures at three and eight. Admission 1s. Dr Kahn's "Treatise on the Philosophy of Marriage," sent post free for 13 stamps from the author's address, 17 Harley street, Cavendish square.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 6 Burton crescent, Tavistock square, London, W.C.

Free for Six Stamps.
ENGLISH, FRENCH, AND AMERICAN MODE of TREATING DISEASE.—Proving the fallacy of the former, the non-success of the other, and the unequalled efficacy of the latter, as demonstrated in thousands of cases, whereby the sufferer can easily cure himself privately, safely, and at a trifling cost, without the aid of the Faculty with their mineral poisons. The New Mode has been recently introduced into Great Britain by an eminent practitioner, who has studied in the three kingdoms, and holds from each distinguished Titles and Diplomas, including that of the National Academy of Sciences, Paris, who approve the new Self-Cure Discovery, which is sent free to any address on receipt of six stamps by the Doctor's private secretary, Wm. Hill, Esq., M.A., 27 Alfred place, Bedford square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly London.
Price of a single Truss. 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases o WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price rom 7s 6d to 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 50,000 cures:—
Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 80 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 50,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. H. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HOLLOWAY'S OINTMENT AND PILLS.—Pleasure to the Healthy.—There are many ailments, which, without endangering life, sadly prevent its enjoyment. The patient says he "is neither ill nor well;" things once pleasing to him now cease to be pleasurable. Let such an individual try the corrective powers of Holloway's medicaments. When this Ointment is rubbed over the stomach, liver, or kidneys, it penetrates and regulates each function that is disordered, expels all noxious matters, and adjusts the secretions of every organ respectively so as to secure happiness to the healthy. Nausea, bilious attacks, sick headache, and diarrhœa all succumb to this treatment, aided by the proper use of Holloway's Pills; the appropriate doses of which are printed to accompany each box

FIRST-CLASS EDUCATION,
at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary, according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

Just published, price 1s; by post, 1s 1d; sealed, 1s 6d,
DR BRIGHT'S MANUAL ON SPERMATORRHŒA, &c. With Cases and Drawings from Life, &c., &c. Licentiate of the College of Physicians, Member of the Royal College of Surgeons, &c., &c.
Contents:—Modern Treatment of Diseases of the Kidneys, Bladder, Prostrate Gland—Desire for Solitude—Groundless Fears, &c.; showing how these supposed incurable maladies may be effectually eradicated by the most simple means. Published and sold by J. Allen, 20 Warwick lane, Paternoster row, London.

THE HUMAN HAIR
Just published, price 1d, the 76th edition of
GRIMSTONE'S THREE MINUTES' ADVICE on the Growth, Cultivation, and Preservation of the Human Hair. This unique little work contains two engravings and many letters of undoubted authority, proving Grimstone's Aromatic Regenerator to be the only article that will produce a new growth of human hair, eyebrows, moustachios, whiskers, with a new growth of hair upon bald places. Sold in triangular bottles, 4s, 7s, and 11s. This size contains four of the 4s size; by post 12s, case and postage included
Grimstone's Eye-Snuff for exportation. Sold in Jars 8s per lb; or in Tin Canisters, 8d, 1s 3d. 2s 4d, 4s 6d and 8s 6d. His Medicated Eye-Snuff, samples 1s 1½d 2s 9d, and 4s 6d. This snuff is intended for Ladies or Gentlemen who are not Snuff Takers. All letters to William Grimstone, merchant, 52 High street, Bloomsbury.

TO THE NERVOUS AND DEBILITATED.
Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By J. L. CURTIS, 15 Albemarle street, Piccadilly, London.
CONTENTS.
INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.
CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.
CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.
CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.
CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.
The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.
MR CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.
Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London.

MEDICAL ADVICE.
DR LA'MERT, HONORARY Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., may be CONSULTED on the Functional Derangements of the Nervous and Reproductive System, and on the various forms of Local and Constitutional Debility, from Eleven till Two, and from Six till Eight, at his residence,
37 BEDFORD SQUARE, London.
The 71st Edition—SELF-PRESERVATION: An Essay on the Secret Infirmities of Youth and Maturity, price 6d, or sent free, in an envelope, by Mann, 39 Cornhill, or by the Author, for Seven stamps.
CONTENTS.
SECTION I.—The Physiology of the Generative Organs.
SECTION II.—Puberty—Manhood—The Morale o Generative Physiology—True and False Morality.
SECTION III.—Marriage in its Moral, Social, and Physical Relations—Happy and Unhappy Unions—Conjugal Anticipations and Disappointments—How to secure Healthy Offspring.
SECTION IV.—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.
SECTION V.—Spermatorrhœa, or Chronic Impotence—Its History, Causes, and Moral Consequences—The Sterility of Age.
Dr La'Mert is the only registered and legally qualified medical practitioner who has been engaged exclusively, for upwards of 20 years, in the treatment of these special disorders.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

SHIRTS.—FORD'S EUREKAS.—

Patterns of the new coloured Shirtings to select from, on receipt of Six Stamps.

Richard Ford, 38 Poultry, London.

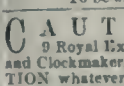
PIESSE AND LUBIN'S SWEET SCENTS.



—FRANGIPANNI, KISS-ME-QUICK, WHITE-ROSE, and others from every flower that breathes a fragrance; in bottles 2s 6d each, or three in a case 7s. Sold by every Fashionable Druggist and Perfumer in all parts of the world.
Laboratory of Flowers, 2 New Bond street, London.

EAU-DE-VIE.—THIS PURE PALE BRANDY,

though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery

CAUTION.—FRENCH,

9 Royal Exchange, London, Chronometer, Watch, and Clockmaker, established 1810, has NO CONNECTION whatever, and never had any, with the CITY OBSERVATORY, carried on by Mr Jacob French, since 1834, as jeweller and watchmaker. Mr Jacob French sold his premises in July last to Mr Bennett, of 64 and 65 Cheapside. The words "Late French" in his advertisements being calculated to mislead the public renders this caution necessary.

STEAM SHIPS.—

The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2l; fore, 1l 5s.

HARBURG—Every Sunday.

ROTTERDAM—Every Tuesday, Thursday, and Saturday, at 11 morning. Chief cabin, 1l 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.

ANTWERP, BRUSSELS, and the RHINE—The Mosselle and Dolphin every Tuesday and Thursday, at 12 noon. Chief cabin, 1l 7s; fore, 20s. Brussels, 22s 3d. Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, and the RHINE—Every Wednesday and Saturday morning. Sept. 15 at 12 noon; 19 at 3; 22 at 6. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 18s; fore, 14s. Brussels, 20s 3d. Cologne, 34s.

HAVRE—From St Katharine's Wharf, every Thursday. Sept. 20 at 3; 27 at 10. Chief cabin, 14s; fore, 10s. London to Paris, £1.

PARIS, via CALAIS, direct—From London Bridge Wharf, every Wednesday and Saturday morning. Sept. 15 at 12 noon; 19 at 3. Chief cabin, 14s; fore, 10s. London to Paris, 17s 6d.

BOULOGNE—From London Bridge Wharf, every Tuesday, Thursday, Friday, and Sunday morning. Sept. 16 at 1; 18 at 2; 20 at 4; 21 at 5. Chief cabin, 14s; fore, 10s. London to Paris, 16s.

EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday; at 10 morning. Fares: chief cabin, 25s; return, 37s 6d; fore, 15s; return, 22s 6d; deck, 10s; which fares include all pier dues at London and Granton.

HULL—From London Bridge Wharf, every Wednesday and Saturday, at Eight morning Chief cabin, 6s 6d return, 10s; fore cabin, 4s; return, 6s.

NEWCASTLE—From Newcastle Steam Wharf, 272 Wapping, every Wednesday and Sunday, at 10 morning. Chief cabin, 8s; return ticket, 12s: fore, 5s; return, 7s 6d.

YARMOUTH—From London Bridge Wharf, every Wednesday and Saturday, at Four afternoon. Saloon, 8s return, 12s: fore cabin, 5s; return, 7s 6d.

MARGATE and RAMSGATE—From London Bridge Wharf, daily, at 10 morning, Sundays excepted; calling at Blackwall and Tilbury piers.

MARGATE and BACK Sunday at 9.7 morning, from Fenchurch street station and Thames Haven, returning at ½-past 3 afternoon (one fare).

MARGATE, RAMSGATE, and HERNE BAY—Via Thames Haven, from Fenchurch street Station.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street; and St Katharine Wharf.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

IMPERIAL AND ROYAL AUSTRIAN DANUBE STEAM NAVIGATION COMPANY OF VIENNA.

TABLE OF DEPARTURES FOR 1860.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and her Majesty's mails. The following, or other vessels, are appointed to sail from Liverpool:—

ARABIA, for BOSTON, Saturday, Sept. 22.
*AFRICA, for NEW YORK direct, Saturday, Sept. 29.
*Taking Passengers and Goods for Nassau and Havana, to be transferred at New York on board H.M.S.S. Karnak.
CANADA, for BOSTON, Saturday, Oct. 6.

Passage money, including steward's fee and provisions, but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.

For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

DINNEFORD'S

PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepared by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in
HER MAJESTY'S LAUNDRY.
And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.
WOTHERSPOON and CO., Glasgow and London.

POMMERY'S CHAMPAGNE.—

Extra Sorts Creaming and Sparkling.—Agents in London, A. Kniep and Co., 22 Basinghall street; Paris, 18 Boulevart des Italiens.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

LONDON	61 King William st. City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.

DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.
The Brewery, Burton-on-Trent, April 30, 1860.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

MODERATE PRICES WITH GENERAL EXCELLENCE.

E. MOSES AND SON

can confidently assert that they possess advantages and facilities which are quite beyond the reach of any other House in the Trade, and are thereby enabled to offer a REALLY GOOD ARTICLE AT A VERY LOW PRICE. The most skilful Cutters are employed, and durability of material and workmanship may be relied on.

The BESPOKE TAILORING DEPARTMENT is almost daily replenished from the best Home and Foreign Markets.

The READY-MADE CLOTHING DEPARTMENTS are furnished with an immense assortment of goods for all classes, and all occupations.

The HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE DEPARTMENTS, contain a carefully selected stock of the best and newest Manufactures.

N.B.—Should any article not be approved of, it will be exchanged, or the money returned.

Gratis on Application or Post Free.—E. MOSES and SON'S Book for the present Season, containing "The Growth of an Important Branch of British Industry," with rules for Self-measurement, and list of prices. Also (just published), an elaborate Plan of their City Premises.

Corner of MINORIES and ALDGATE, and NEW OXFORD STREET, Corner of HART STREET.

Special Notice.—E. Moses and Son's Establishments will be closed on Monday and Tuesday, the 17th and 18th inst., and will be re-opened as usual on Wednesday morning.

THE "INDISPENSABLE" SUIT,

made in various colours and patterns, and particularly adapted for WALKING, RIDING, TRAVELLING, and BUSINESS. This is universally acknowledged to be the most comfortable and serviceable suit ever introduced. Price from 35s. To be obtained of
E. MOSES and SON,
Corner of MINORIES and ALDGATE, and NEW OXFORD STREET, Corner of HART STREET.
Also Bradford and Sheffield, Yorkshire.

TOURISTS AND EXCURSIONISTS

are specially provided for at
E. MOSES and SON'S,
MERCHANT TAILORS, HATTERS, HOSIERS, BOOTMAKERS, &c.,
Corner of MINORIES and ALDGATE, and NEW OXFORD STREET, Corner of HART STREET.
And Bradford and Sheffield, Yorkshire.

THE MIRKSIDE PIG IRON COMPANY. (Limited.)

Capital £30,000, in 6,000 Shares of £5 each.
(With power to increase.)

To be incorporated under the Joint Stock Companies Acts, and liability limited to amount of Subscription.

No deposit on application, but a payment of 10s per share on allotment.

SECRETARY—Mr Robert Smith.

OFFICES—12 Copthall court, E.C.

PROSPECTUS.

This Company has been formed for the purpose of acquiring and developing a valuable mineral property, situated on the Egton Estate, in the Valley of the Esk, near Whitby, Yorkshire.

The property referred to consists of about 300 acres of mineral, and contains three valuable measures or seams of nearly solid iron ore. The Whitby and Pickering Railway is connected by siding with the property, and affords direct communication with the great iron works of the Leeds, Masbro', Derbyshire, and Staffordshire Districts.

The Cleveland district is now so well known to afford iron stone of such superior quality and in such abundance that it may be considered sufficient simply to refer to the reports (for which see Appendix) of Professor Phillips of Oxford; Dr Merryweather of Whitby; Wm. Evans, Esq., Sub-manager of the Dowlais Iron Works, Cardiff; and others. Professor Phillips, who carefully inspected the district, estimates the yield of iron stone per acre to be from twenty to thirty thousand tons, and that the quantity is apparently inexhaustible. As to the quality of the ore, it may be stated that it is free from sulphur and phosphorus, that the iron stone may safely be calcined to produce 35 per cent. of pure metallic iron, and that the iron manufactured from it is, in all respects, equal to that produced by the best Staffordshire works.

The great limestone formation is within a very short distance, and limestone of excellent quality can be had delivered at the works at from 2s to 2s 6d per ton, coal at 6s per ton, and coke at 13s 3d per ton. The ores can be raised at the works, including every charge for winning, royalty, &c. for 2s 6d per ton of 24 cwts, satisfactorily proving that pig iron of the very best quality can be manufactured at these works at a cost of from 40s to 42s per ton. The miners' on this property has already been worked to some extent, and the stone found (on admixture with the other ores of the district) to yield pig iron of very superior quality.

Such being the facilities enjoyed by the Company for the manufacture of iron, it is proposed, in addition to the selling of ore, for which there is a great and increasing demand at remunerative rates, to erect smelting furnaces for manufacturing pig iron derived from the ore in the Pecton and Avicola lands.

Assuming two blast furnaces to be erected and at work, the quantity of pig iron manufactured would, at a moderate estimate, amount to 15,000 tons annually. This would yield, even at the present low price of iron, a clear annual profit equal to a dividend of from 12 to 15 per cent. upon the whole capital of £30,000. In addition to this, however, a considerable profit will arise from the sale of ore, for which there is a constant and increasing demand at remunerative rates.

The Directors have been fortunate enough to secure the services, as Manager of the Works, of a Gentleman, for many years connected with one of the largest iron producing firms in England.

The property is held under lease from the trustees of the late Robt. Cary Elwes, Esq., for an unexpired term of 60 years, at a royalty of 6d per ton of 22½ cwt.

The lease of the property, together with calcining floors, tram-rails laid thereto and in the drifts, carpenters and smiths shops', plant, and railway connecting the works with the main line of the Whitby and Pickering Railway, will be transferred to the Company for the sum of £7,500, the whole of which it has been agreed to accept in paid-up shares of the Company, no cash payment being required by the vendors.

No shareholder will incur any liability beyond the amount of the shares allotted to him. The Directors propose to proceed with the works so soon as a sufficient amount of capital has been subscribed as will, in their opinion, justify the undertaking.

Applications for shares must be made in the annexed form. Due notice of allotment of shares will be given, when a payment of ten shillings per share must be made. Further calls will be of moderate amount, and at intervals of not less than three months.

Prospectuses, &c., and all necessary information, may be had of the Secretary, at the temporary offices of the Company, where also specimens of the ores may be seen.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Mirkside Pig Iron Company, Limited.

Gentlemen,—I request you to allot me shares in the above Company, and I hereby bind myself to accept the same, or any less number which may be allotted to me, to pay the deposit and calls thereon, and to sign the Memorandum and Articles of Association when required to do so.

PROSPECTUS.

Mining enterprise, under all circumstances, must be considered in the light of a speculation, rendered more or less safe, however, by the care given in selection by capable and respectable persons. It is certain that these undertakings, when judiciously chosen and properly conducted, offer a very sure means of legitimate speculation, approaching as near to the form of investment as any business purely speculative can. Holding these opinions, the Directors determined, before bringing the present undertaking before the public, to send their Secretary to visit the locality, to obtain samples of ore, and, in fact, to verify all statements made. He was accompanied by an engineer of much local knowledge, whose report can be had at the office.

The Company is established for the purpose of working extensive silver mines, 33 in number (subject only to the usual small Government tax), comprising a surface extent of 607 acres, with many houses and necessary plant thereon, situate close to the town of Hiendelaencina.

These mines are situate at a distance of 62 miles north of Madrid, and are within 10 miles of the Madrid and Saragossa Railway, with which they are in direct communication. Their position will be seen by reference to the accompanying map.

There has been expended a sum of upwards of £131,705 in developing the mines; the work done consists in sinking numerous shafts, driving various levels, crosscuts, and adits, to the extent of 2,385 fathoms, under the superintendence of Government inspectors, to prove the existence of the lodes so successfully worked by the adjoining proprietors, and in the erection of houses, works, &c. A contract has been entered into for their purchase on behalf of the Company, for 19,339 paid-up shares, to be delivered upon legal possession of the mines being given to the Company, and £39,809 cash by instalments. The shares are not to be transferable in the books of the Company until after the expiration of four months from their delivery.

Important quantities of ore have already been extracted from the Company's Mines Fuerza, Observadora, Desemparados, Pizarro, Josefina, &c., smelted in the neighbourhood, and assayed at the Royal Mining College of Madrid. These have proved in every instance exceedingly rich, the ore yielding on an average from 87 to 110 ounces of silver per ton, and in some instances as much as 33 per cent.

Reports, together with a detailed list of expenditure on each mine, amounting to the above £131,705, properly certified, can be seen, or copies obtained at the Company's offices.

Evidence of the great mineral value of the district of Hiendelaencina is supported by reference to the following mines (see extract from enclosed translation of leading article on Spanish mines), whose shares, originally issued in 1844 at sums varying from £5 to £15, have been sold at Madrid at the following prices:—

San Carlos (per share)	£1,500		
Relampago	ditto	1,400	Present dividend about £10 per month.
Artistas	ditto	1,300	
Suerte	ditto	1,000	

These mines are situate upon the same lodes, and in the immediate vicinity of the Company's mines, as shown in the plan on the prospectus.

A conditional contract has been entered into by this Company, for the purchase of the well-known and extensive freehold smelting establishment called Santa Theresa. The premises cover an extent of 5 acres, and were erected at a cost of £125,000, including all the machinery, a monopoly by Royal grant of water power, equal to 170 horses, obtained by a fall of 100 feet from a large and inexhaustible lake, blast furnace, smelting furnaces, and other extensive plant, &c., as well as houses for managers, foremen, and workmen, all in perfect order and completeness. These works are situate on the river Bornoba, and possess the advantage of being near the mines of the Company, and the Madrid and Saragossa Railway. Wood for fuel can be obtained in any quantity and at little cost.

The Directors have the option of purchasing the above smelting establishment by the arbitration of engineers, in lieu of the present conditional contract. Whatever may be the amount of the award, the proprietor binds himself to accept payment of one-half in paid-up shares of the Company, and none of these shares are to be transferable until after the expiration of four months from the day of issue.

It has been determined that one of the Directors shall leave immediately for Spain to superintend all arrangements required, and the local management will be carried on under their close and constant personal inspection.

All charges for promotion, advertisements, brokers' commission, share certificates, and seals of the Company, besides all preliminary, legal, and other expenses, up to and including the costs and fees of registration of the Company, have been defined and agreed for at one per cent. upon the nominal capital of the Company. In the event of no allotment being made, the deposit money will be returned less 1s per share.

Profits.—The shareholders shall in the first instance receive an annual interest of £6 per cent., payable half-yearly. The balance to be divided as follows:—5 per cent. reserve fund, 80 per cent. to the shareholders, 10 per cent. Directors' remuneration, 5 per cent. General Manager.

Applications for shares in the usual form may be sent through the brokers or secretary of the Company. A deposit of 10s on each share applied for must be previously paid to the bankers of the Company.

ARMY CONTRACTS.—

Tenders will be received at this Office until Noon on the 13th of October, from persons who may be willing to enter into Contracts for the supply of

FORAGE,

in such quantities as may be required, for the use of Her Majesty's Land Forces stationed in the following places, for twelve months, from 1st November, 1860:—

1. Hyde Park, Kensington, Regent's Park, and Horse Guards.
2. Hounslow and Kneller Hall.
3. Hampton Coort.
4. Windsor.
5. Brighton.
6. Sandhurst.
7. Enfield.

Tenders must be made for each of the above mentioned stations as separately grouped and numbered.

Forms of tender and conditions of contract may be obtained on application at this office, by letter or in person, between the hours of Ten and Four o'clock.

Tenders on the printed forms must be properly filled up and signed, and delivered at the undermentioned office under closed envelope (marked on the outside, "Tender for Commissariat Supplies"), before noon on the 13th of October next.

W. T. POWER, Deputy Commissary-General.

Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

SOYER'S SULTANA SAUCE

Relish, Succulente, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

THE JUDGES AT THE DIFFERENT

Agricultural shows held lately have come to the conclusion that Cattle Condiment is an article which they can on longer do without in the economical production of butchers' meat. During the past month, four first-class prizes have been awarded to Joseph Thorley, (the inventor and sole proprietor of "Thorley's Food for Cattle"), for his discovery of a Condiment which enables animals of all kinds to extract more nourishment from hay and straw seasoned with it than unseasoned food, although the latter may contain a much greater amount of alimentary matter. A pamphlet free on application. — Address, Thorley's Steam Mills, Caledonian road, King's cross, N

TO VOLUNTEERS AND THE PUBLIC.

WILSON'S BREECH-LOADING RIFLE.

Mr THOMAS WILSON begs to call the attention of Volunteers and the Public to his New BREECH-LOADING RIFLE, and to state that he has committed the management of the patent to Messrs Rabone Brothers and Co., of 47 Broad street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's service, and is pronounced by the highest authority to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading or otherwise is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly for firing without the aid of tools. This facility would be occasionally valuable in rendering the gun useless to an enemy or mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr Lancaster's, No. 151 New Bond street, and at Mr Pritchetts, No. 86 St James's street, London, as well as at Messrs Rabone Brothers and Co., 47 Broad street, Birmingham. Every information as to cost and other details can be obtained at either of the places named

The Political Economist.

We feel that a fuller Memoir of the Right Hon. James Wilson than can be given within the limits of an article is due to the readers of the journal which he founded. We therefore intend to publish, as soon as possible, *a Supplement to the* ECONOMIST *containing a brief account of his career, and a short sketch of his character, derived from authentic sources. Due notice will be given of the precise date at which this Supplement will appear.*

THE IMMINENT PERIL OF ITALY.

THE Mazzinian party are on the high road to ruin the prospects of Italy. The news received from all quarters is of a character to excite the most anxious apprehensions in every true friend to Italian liberty. And the English Government we fear will not long be able either to resist or conscientiously deprecate the intervention of France, if the men whom Garibaldi's Mazzinian friends are now inducing him to put at the head of affairs are permitted to throw the whole Peninsula into such a chaos as it presented in 1848. The loyalty and moderation of Garibaldi had till quite recently filled English statesmen with confidence and admiration. Now all, for the moment at least, looks changed or changing. The appointments made immediately on Garibaldi's first landing at Naples gave, indeed, great satisfaction; such was the confirmation of Liborio Romano in the Ministry of the Interior, the appointment of General Cosenz to the War Department, and of Scialoja to the Finance. But more recently Bertani's disastrous influence appears to have prevailed over the public opinion of Naples. The nomination of the Marquis Pallavicini Trivulzio as pro-dictator of Naples must greatly widen the breach with Cavour; the appointment of Libertini—a man entirely unknown to the better classes of Neapolitan society—to the responsible post of Governor of the Bank of Naples (a post for the due administration of which the most solid guarantees have usually been exacted), is an offence to public expectation in Naples for which there appears to be no intelligible motive. The substitution of Saffi for Dupretis in the pro-dictatorship of Sicily is the most fatal Mazzinian step yet taken. And the mission of Cattaneo,—who is not a Neapolitan, and is a pure Mazzinian in politics, and is said to be the only man in the kingdom still unfavourable to annexation,—to represent the Provisional Government of Naples in London, has naturally caused grave apprehensions. Indeed these later appointments are only too likely to result in the resignation of Romano and Scialoja, if not of Cosenz.

The policy which these appointments indicate is not doubtful. They mean a speedy collision with France at Rome, a mad haste to bring down Austria from her Venetian fortresses, and a general challenge to the conservative feeling and traditions of the newly rescued provinces. If there is any extraneous influence at all which can convince Garibaldi of the dangerous character of these tendencies, it is that of England. There is we believe some reason to suppose that under English advice he had modified his rash programme concerning the proclamation of Victor Emmanuel from the Quirinal. The sincerity of English sympathy he does not doubt. And, if he can be persuaded to rely on our mediation with France, and on our representations of the certain results of a conflict with the French garrison of Rome, should he be so rash as to hazard it, he may yet be induced to concur in that more prudent policy as regards France and Rome, which the Sardinian Government has even hazarded an invasion of the Roman States in order to keep safe in its own hands. England will do much for Italy if she can persuade Garibaldi not to let his faith lead him into blind fanaticism,—not to brave again the irresistible power to which even he was obliged to succumb in 1849. And she may do something more, if she can also persuade him to consult not only the public opinion, but the *amour propre* of Naples during his temporary dictatorship, and not hazard at the very first moment, at the impulse of political sectarianism, that harmony of purpose among the Italian States which is now exposed to far more risk than was possible at any earlier stage of the revolution.

That a profound loyalty to Victor Emmanuel is at the basis of all Garibaldi's actions, no one for a moment doubts. The readiness with which he authorised the Sardinian minister Villamarina to occupy the forts of Naples with Sardinian troops, and delivered over the Neapolitan fleet to the Sardinian Admiral, shows how absolutely he identifies the King of Sardinia, even while surrounded by his present advisers, with the cause for which he is fighting. But he has quarrelled desperately with Cavour; ever since the annexation of Nice he has inveighed vehemently against the wickedness of diplomacy; he is so religious a believer in the coming unity of Italy that he cannot see the danger of sweeping it, in the natural way, of all opponents, even though, as in the case of the French garrison at Rome, these opponents represent the power of a mighty empire; and he is, therefore, only too willing to lend ear to Bertani and his Mazzinian friends, who persuade him that if once he annexes the Two Sicilies to Sardinia, his scheme of extending his conquests to Rome and Venetia will be thwarted by Count Cavour and the friends of a "diplomatic" method of procedure.

Again, if the reasons which probably induce Garibaldi to postpone the annexation of Naples are in themselves exceedingly dangerous, the proximate results of that delay are scarcely less so. The Neapolitan kingdom is in a state of complete disorganisation and effervescence. The Bourbons have not ruled so long without leaving the seeds of reactionary plots thickly strewn behind them. A disbanded army of nearly 100,000 men, to which the remnant of 20,000 now at Gaeta will probably soon be added, is dispersed over the

country. The cowardly reactionary nobles who deserted the King in his need, are already intriguing at Paris with Murat.

In such a condition of things, it cannot be subject for much wonder that the Neapolitans cry out unanimously for annexation as the only immediate prospect of a re-established authority and a strong administration. The well-tried Government of Sardinia would be a comparatively solid authority to rest upon during the dangerous process of new organisation which must now begin. With the kingdom itself in a chaos, and a network of conspiracies outside it, the Neapolitans naturally wish to be rid of that apology for a ruling power called a Provisional Government, and to substitute as soon as possible the germ of an established order, the rallying point of a true though new loyalty, and of a patriotic conservatism.

We believe there is but one escape from the perils of the present position. If Saffi is to rule in Sicily, Bertani practically at Naples, and Garibaldi to direct his military movements so as to excite the anger of France and provoke the immediate intervention of Austria, all is lost. Moreover, discontents will rapidly spring up in Sicily and Naples themselves. Saffi can never gain the sympathies of the Sicilians. The cry for annexation will be louder and louder, and the natural answer to it on the part of the Mazzinians will be revolutionary measures like those of 1848. If Garibaldi does not at once stop short in this course, the Sardinian Government ought now to do in the South as they have done in Umbria,—to defeat the King's army at Gaeta, and occupy Naples and Sicily, with or without Garibaldi's consent. This seems to us almost the only hope of avoiding the coming chaos. It will be the only mode of securing the sympathy of England. It will be the only chance of preventing Garibaldi from throwing away all that he has so nobly gained for Italy. We do not know that English statesmen can be expected to advise so audacious a policy. But we are sure they would feel the sincerest satisfaction in supporting even such measures, rather than permit either of the fatal alternatives,—Mazzinianism rampant in Italy and drawing down upon itself inevitable ruin,—or the triumph of French influence and intervention over the principle of Italian unity and independence. On the events of the next few weeks must depend almost entirely the fortunes of the Peninsula, whether, namely, the great events we have beheld are to lead up to their natural issue in the unity and independence of Italy,—or shall terminate rather in reaction, disaster, and a renewed period of restless revolutionary effort kept down by restored princes and foreign interventions.

THE BILL-BROKERS AND THE BANK OF ENGLAND.

THE IMPORTANCE TO THE COUNTRY OF A BUSINESS-LIKE ARRANGEMENT BETWEEN THEM.

On the whole, the course of the season should mitigate our apprehensions for the coming autumn and winter. The harvest at home is better than could have been hoped; the supplies from abroad are ample: it would be folly to give way to very gloomy anticipations. But at the same time we must bear in mind the possibility of dearer money. The corn which will be imported here must be costly, and must be paid for. How much will be paid for in gold and how much not, it is impossible now to say. In a few weeks we shall be better able to form an accurate judgment. But it is possible that a good deal of the exceptional import of food this year will be paid for in coin, and in that case it is probable that money will be dearer.

In the event of a rapid or material rise in the rate of interest, it is undeniable that the unsatisfactory state of the relations between the Bank of England and the bill-brokers would assume an importance which it has not had hitherto. We shall annex to this article a valuable letter from "A Country Bank Manager," who states clearly and concisely the apprehensions which we have good reason to know are very generally entertained on this subject by bankers. Ever since 1857, whenever money has risen, or tended to rise, there has been much needless uneasiness from this cause. The public—the banking public especially—are much annoyed by it; and every considerate man of business will agree that if it is to be settled at all, it should be settled soon. The present time is peculiarly favourable to a proper and business-like arrangement. It is a period of calm when the subject can be duly and fully considered, and yet there is enough of diffused apprehension in the minds of mercantile men to induce them really to consider it. In a time without anxiety we shall never think of the subject; in a time of great anxiety, we shall never think of it quietly and rightly; and it is, therefore, right to think of it now.

The bill-brokers of London have in their deposits an important part of the banking reserve of the country. From all districts, and especially from districts which cannot adequately employ their own funds, money finds its way to London, and much of it is invested in good bills of exchange through the agency of the bill-brokers, who know which bills are good and which are bad. It has been fancifully said that such intermediate dealers were the *tasters* for the entire community; and it is certain that, in practice, they discriminate, on behalf of the public, good mercantile securities from bad,—of course not perfectly, but much better than the public could do it for themselves. It is needless to dwell either on the delicacy or on the importance of the machinery by which the money of the saving classes is thus distributed among the industrial classes. It is delicate because it rests upon credit, which is only an *opinion*, and opinion is the most transitory thing in the world. It is indefinitely important, for the greatness of England depends on the unequalled economy with which every sixpence of her wealth is used, as much as on the absolute amount of that wealth itself. These observations are old, but we should bear in mind their consequences. Nothing could be more unwise than to prop up an unsound system of credit by misleading palliatives; but, on the other hand, it is equally unwise to expose to any needless and unnecessary risk a machinery which is more refined in its nature than any other, which is more easily set wrong, which produces more disastrous effects when it is so, by whatever cause it may be.

There can be scarcely a doubt that the present relations between the Bank and the brokers *do* threaten the machinery of credit with a needless, and it may fairly be said, with a vexatious disturbance. The known want of harmony of itself causes some uneasy feeling. We know that two of the most important component elements in our system of credit are disunited: we know that unfortunate events—unfortunate *errors*—on which we remarked at the time, have made the feelings of some brokers at least more than sufficiently apparent; and at every crisis—we do not mean at every panic, but at every epoch of change, however slight—the trading community, the banking community more particularly, inquire rather anxiously whether these feelings will display themselves again or whether they will not. The mere fact of disunion—especially of notorious disunion—is a source of weakness on occasions when it is particularly necessary to be strong, at moments of critical change when many people *will* be talking, and when it is advisable they should have as little as possible to talk about.

Moreover, as we have recently remarked, the present rule of the Bank of England places the bill-brokers in a difficulty which no conduct of theirs can entirely remove. Even though the bill-brokers act on the very best principles,—even if they keep, as we believe the best of them do, a large reserve on loan on the Stock Exchange, or in immediately convertible securities, or even in cash itself,—they would still be exposed to a certain apprehension which may be, which has a tendency to be, very injurious to the general public. It will be said: 'These bill-brokers are not the same people 'they used to be. They cannot go to the Bank of England. 'Formerly they used to have peculiar influence there. Now 'they have none. There is *a feeling*, &c., &c., &c.' And though we know this sort of apprehension to be very exaggerated, if not very unreasonable, we believe that under some circumstances that are by no means impossible the public might suffer from it materially and even seriously. If we think that the present rule of the Bank of England should be modified, the nature of that rule is the best guide we can take in considering what the modification should be. That rule admits of an exception. At certain periods of the year, when the Bank of England is exceptionally rich and the bill-brokers exceptionally poor, the bill-brokers are permitted to rediscount. But are these the only periods on which the Bank of England has an unusual wealth and the

rest of the money market an unsual poverty? Not so, most certainly. Every time of anxiety tends to weaken the brokers and to strengthen the Bank of England. The autumn of 1857 is rich in instruction on this subject.

	£
On the 29th August, 1857, when the rate of interest was 5½ per cent., the private deposits were	9,705,366
On the 23rd December, when the rate of interest was 10 per cent., the private deposits were	15,151,818

showing an increase of nearly six millions during the very weeks of panic and when money was most wanted. We are able to analyse the nature of this balance in part, and the result is most interesting. The most sensitive money, if we may use that expression—the kind of money most likely to be affected by alarm—the reserve of bankers—increased the fastest at the Bank of England. The "bankers' balances" were :—

	£
5th September	2,622,000
30th December	6,373,000

showing an increase of nearly 150 per cent.

We have no means of exhibiting with the same precise accuracy the movement of the deposits with the brokers during the same period, but we know that there was a great pressure on them, and their *re*discounts were very large. We have in the Appendix to the Report of the Committee on Bank Acts an analysis of the discounts and advances of the Bank of England during October, November, and December, 1857. They were as follows :—

	£	£
Scotch Banks.		
London	1,297,000	
Country	...	
		1,297,000
English Banks and Bankers.		
London	1,076,000	
Country	5,998,000	
		7,074,000
Bill-Brokers and Discount Companies.		
London	9,456,000	
Country	...	
		9,456,000
		17,827,000
Total Merchants and Traders.		
London	14,440,000	
Country	3,535,000	
		17,975,000
		35,802,000

showing that the discount houses had obtained nine millions and a half from the Bank during the period. It is evident, therefore, that a period of anxiety is in its effects exactly analogous to the periods of exception, in which *at present* the Bank permits the brokers to rediscount. In plain English, it is a period when the Bank is unusually rich and the brokers are unusually poor.

The extreme facilities formerly given to the brokers indisputably led to want of caution on their part. The events of 1857 proved it. On some occasions since some of the bill-brokers have not acted wisely. On such occasions we have not hesitated to express strong disapprobation. But the occasional faults of individuals should not blind us to the permanent interest of the public. If it be true that the extreme restrictions which are now imposed on the bill-brokers expose them and expose the public to a serious risk which *no caution on their part can avoid*, it is time we should consider whether better rules cannot be found, whether a reasonable and business-like arrangement be not possible. We have more than once sketched the outline of one, and should rejoice to hear that it had been adopted.

The following is the letter above alluded to :—

TO THE EDITOR OF THE ECONOMIST.

SIR,—I venture to confirm, from my limited experience as a country banker, some of the remarks in your last journal in reference to the probable result of the action of bankers on the reserves in the hands of bill-brokers should another panic ensue.

It has been hitherto a principle acted on by some, and probably many country bankers, that short bills of exchange are the best security they can hold,—better than the funds or even Exchequer bills,—because the per centage of loss on realisation in times of panic may be expected to be much greater with the latter class of securities than on short bills of exchange.

If a banker be charged 12 per cent. per annum for the rediscount of a two months' bill, the loss to him, that is, the difference between the rate he has charged for the discount of this bill, and the rate charged to him for the rediscount, will seldom exceed 6 per cent. per annum, or on a two months' bill 1 per cent. on the amount of the bill.

On the other hand, as bankers' investments in the funds are commonly made when money is abundant and the funds high in price, the realisation of *this* species of security in times of panic (when the prices of stocks are low) may not improbably entail a loss of 10 per cent. on the sum realised.

An investment may readily be made under such circumstances at 95. and be realised at 85.

I believe, therefore, that bills of exchange have been the favourite security for bankers' floating reserves, and that to a smaller extent deposits with the bill-brokers have been also deservedly in favour.

Now, let there be an apprehension like that you suppose in your last, viz., that circumstances may arise which would render it safer for bankers to have their reserves in their own coffers, or even in the Bank of England, rather than with the bill-brokers ; not only would such a feeling tend to cripple the bill-brokers, by causing the withdrawal of the deposits with them, but it would occasion a sudden rush for discount accommodation earlier than has hitherto been the case,—for hitherto no banker having first-class short bills has been unable to obtain the discount of such paper at *some* rate.

A refusal, or apprehended refusal, on the part of the bill-brokers to rediscount good short bills, would be followed by the refusal of bankers themselves to discount for their customers; and this must inevitably lead to the general suspension of payments by merchants and manufacturers, who are now depending from day to day on *their* bills being discounted to meet their own acceptances and engagements.

The difficulty is not met by supposing that the bankers' paper could find its way into the Bank of England without the intervention of the bill-brokers.

The Bank of England refuse to rediscount equally for bankers of issue as they do for the bill-brokers.

I am not speaking now of those bankers only who are day by day in the discount market, but of those also who are ordinarily independent of the accommodation rendered by these brokers, but who in panic times look to their bills of exchange as an available reserve to meet an extraordinary contingency.

I am induced thus to trouble you by noticing what took place in a certain district with which I am acquainted in 1857.

There were fears of a run on one or more of the banks in the district alluded to, consequent on heavy commercial failures. The adjacent bankers considered it needful to be very amply prepared.

No Bank of England branch is near.

Nothing but ample supplies of cash seemed sufficient in the event of a sudden run, and these were procured and held during the whole period of the panic to many times the ordinary amount.

Doubtless, this is what occurred in other places in degree, and such proceedings must add greatly to the virulence of the panic, though apparently unavoidable.

Now, what I fear is, that the apprehension of the bill-brokers being unable to give the facilities which have been hitherto relied on in extraordinary times, will occasion earlier runs upon them both for deposits and discounts than in past times, an earlier setting in of panic, and more intensity whilst it lasts, leading to mischief amongst the mercantile classes. If I am in error in these ideas, I am far from standing alone, and I know of no pen more likely than your own to set me right.—I am, Sir, yours respectfully,

Sept. 6, 1860. A COUNTRY BANK MANAGER.

It is, we believe, a question how far the Bank of England would make a distinction hereafter between banks of issue and banks not of issue. She certainly ought not to do so, because the Governor, Mr Weguelin, stated before the last Committee of the House of Commons that she did not now wish to supersede the country circulation. Still, as far as we are aware, the old rule has not been formally rescinded. In other respects, the remarks of our correspondent appear to us to be very sound and very much to the purpose.

THE AMENDED TARIFF.

Now that the simplified tariff enacted last session has been brought into full operation, our readers will be glad to have this tariff presented to them in a concise and classified shape. Till this year, Customs duties were levied on about 150 principal articles, most of them subdivided in the tariff into further different heads, so that 400 articles were separately chargeable with duty. Now, as will be seen, the articles liable to duty may all be reduced under 12 principal divisions, —and in reality under 10 only; since one division contains merely those duties which are required to countervail those laid by the Inland Revenue on the same commodities produced at home; and those contained in another will cease and determine in eighteen months or less. We here give the remaining ten principal divisions, which thus properly con-

stitute the Customs Tariff of Great Britain, with the amount of duty received under each of them in the year 1859:—

	£
I. Fermented liquors	4,425,000
II. Sugar	6,285,000
III. Tobacco	5,574,000
IV. Tea	5,409,000
V. Coffee	431,000
VI. Cocoa	15,000
VII. Grain and flour	533,000
VIII. Fruit	565,000
IX. Timber	615,000
X. Pepper	111,000

AMENDED TARIFF.—23 and 24 VICT., Chap. CX.

	£	s	d	
I.—Fermented Liquors:—				
1. Beer and ale	1	0	0	per barrel
2. Chloroform	0	3	0	per lb
3. Essence of spruce	10	0	0	per hundred
4. Varnish containing spirit	0	12	0	per gallon
5. Vinegar	0	0	3	—
Pickles in vinegar	0	0	1	—
6. Brandy, Geneva, Rum from non-producing countries, Unenumerated plain spirits	0	10	5	—
7. Rum and similar spirits from producing countries	0	10	2	—
Rum shrub, and other liqueurs from India and the colonies				
8. Perfumed spirits, Eau de Cologne, Mixed and sweetened spirits unenumerated	0	14	0	—
9. Wine—and lees of wine—*(foreign)*—till Dec. 31, 1860	0	3	0	—
Wine thereafter—if containing less than 18 degrees of proof spirit	0	1	0	—
Less than 26 degrees	0	1	9	—
Less than 40 degrees	0	2	5	—
Less than 45 degrees	0	2	11	—
If in bottles, and containing less than 40 degrees spirit	0	2	5	—
Wine, and lees of wine *(colonial)*	0	2	9	— and 5 per cent.

N.B.—All wine containing 45 per cent. of proof spirit, to be charged as spirits.

	£	s	d	
II.—Sugar:—				
1. Sugar candy and refined	0	18	4	per cwt
2. White clayed	0	16	0	—
3. Yellow muscovado	0	13	10	—
4. Brown muscovado	0	12	8	—
5. Cane juice or melado	0	10	4	—
6. Molasses	0	5	0	—
Succades and confectionary	0	0	2	per lb
III.—Tobacco:—				
1. Unmanufactured	0	3	0	per lb
2. Manufactured and cigars	0	9	0	—
3. Snuff	0	6	0	—
With 5 per cent. thereon.				
IV.—Tea	0	1	5	per lb
V.—Coffee:—				
1. Green coffee	0	0	3	per lb
2. Kiln-dried, washed or ground	0	0	4	—
3. Raw or dried chicory	0	6	0	per cwt
4. Roasted or ground chicory	0	0	4	per lb
VI.—Cocoa:—				
1. Raw cocoa	0	0	1	per lb
2. Cocoa paste or chocolate	0	0	2	—
3. Cocoa shells or husks	0	2	0	per cwt
VII.—Corn and Grain:—				
1. Wheat and all grain*	0	1	0	per quarter
2. Flour and meal of all sorts	0	0	4½	per cwt
VIII.—Fruit:—				
Dried, but not succades or preserves	0	7	0	per cwt
IX.—Timber:—				
1. Hewn timber, Firewood, Lathwood, Staves under 72 inches in length, Teak wood, Other woods for shipbuilding	0	1	0	per load
2. Wood, sawn or split, Hoops, Shovel hilts, Staves exceeding 72 inches	0	2	0	—

(*Except rice, which is free.)

	£	s	d	
3. Furniture and hard woods	0	1	0	per ton
4. Foreign-built ships	0	1	0	—
X.—Duties to Countervail Excise Duties:—				
1. *Poper.* Brown paper, Stained paper, Waste paper, Mill boards, Books since 1801, Prints	0	16	0	per cwt
Paste board, Colonial and other privileged books, Colonial prints	0	15	0	—
(Either 0½d each, or 1½d bound per dozen, at the option of the importer.)				
2. *Malt*	1	5	0	per quarter.
3. *Hops.*				
Till December 31, 1860	2	5	0	per cwt
From January 1 to December 31, 1861	1	0	0	—
Thereafter	0	15	0	—
4. Plate—Gold	0	17	0	per oz troy
Silver	0	1	6	—
5. Playing cards	0	15	0	per dozen packs
6. Dice	1	1	0	per pair

N.B.—Properly speaking, the duty on spirits ought to be placed in this list, as it is now virtually the same as the Excise duty on home-made spirits.

XI.—Pepper	0	0	6	per lb
XII.—Terminable Duties:—				
1. Hats and bonnets (till March 31, 1861)	0	1	3	—
2. Corks (cut) (till March 31, 1862)	0	0	3	—

N B.—Besides the above, *one penny per package*, or other unit of entry (usually about *one quarter per cent.* on the value), is levied on all important articles except corn and timber; *one shilling and sixpence* on every export bill of lading; *one eighth per cent* addition to the duty on all *tobacco* delivered from bonded warehouses; and *one quarter per cent.* on all other goods so delivered.

THE COMPTOIR D'ESCOMPTE AND THE CHINA TRADE.

It is an almost amusing example of the difference between the monetary world of France and of England, that the *Comptoir d'Escompte* (the National Discount Company of Paris) is about to establish a branch at Shanghai, and to deprive the English of that place of the "tribute" they now exact from the French in all exchange operations. This Company is no doubt the largest discount establishment in France (the Bank of France only excepted), but an Englishman acquainted with its resources is surprised to hear of its undertaking operations at such a distance. On the 31st August last its means were as follows:—

	£
Paid-up Capital	800,000
Ditto of Sous-Comptoirs	161,276
Reserve Fund	166,332
Deposit Accounts	1,454,404
Drafts in Circulation	84,628
Deposits in the Provinces, &c.	608,056
Sundries	40,264
	3,314,960

which is certainly not a very large sum of money. We may test our ideas by comparing it with the funds of Lombard street. The Governor of the Bank stated before the Committee of 1858—"We knew that one broker had 5 mil" "lions of deposits, and we were led to believe that another" "had between 8 and 10 millions. There was one with 4" "another with 3½, and a third above 8." It would certainly seem to *our* notions that such a Company as the Comptoir d'Escompte *ought* to have full scope for all its available means nearer home than Shanghai. It is true that it is to add 800,000*l* to its capital; but how does that sum seem when compared with the funds of very many banks in countries where the system of credit is more developed than in France.

The history of this Discount Company is one of the most curious phenomena in the French money market. It was created by a decree of the Provisional Government just when, by the combined efforts of the panic of 1847 and the revolution of 1848, the principal bill-brokers of Paris had suspended payments. It appears to have commenced business with a capital of 103,480*l*, of which 40,000*l* was supplied by the Government, and to have had recourse to very curious

expedients to augment its resources. One of them is particularly remarkable. In addition to the ordinary interest, it deducted 5 per cent, from all bills which it discounted, and it carried that 5 per cent. to capital to the credit of the parties for whom it discounted. In the crisis of 1848, when bills were hardly negotiable at all, it was possible to do this, and in that manner it added largely to its capital. The success of the Company has been considerable, though measured by the idea of the English discount market it may not seem much. In the year ending 31st July, they discounted 24,000,000*l* of bills,—not a very extraordinary sum, perhaps, but large as compared with those with which they began. These were—

	£
1848 (four months and a half)...	3,720,000
1848-49	3,920,000
1849-50	5,160,000
1850-51	8,440,000

It is very characteristic of France, that so useful an establishment should owe its establishment to the intervention of the State in the extreme crisis of a revolution.

It is characteristic of France, also, that this Company should engage, or endeavour to engage, in business at Shanghai. The system of trade in France is a sound though incomplete one. Credit is very little diffused there; business is a ready-money business. In consequence, France does not suffer as we suffer not unfrequently from commercial panics and critical disturbances of credit. But, on the other hand, the division of labour is far less perfectly understood in France than it is here. What would be thought of a London bill-broker establishing a "branch" at Shanghai to conduct exchange transactions with England? It would be thought that he would be more likely to lose his business in London than to gain any in China.

INTERNATIONAL GENERAL AVERAGE.

It has been made an objection to the Association for the Promotion of Social Science, that it only deals with *showy* subjects. It has been spoken of as an opportunity for eloquent persons, and it has been hinted that when the eloquence has passed away, the world is very much where it was before. No such objection can be taken to one of the subjects which the meeting of the Association at Glasgow are considering this year. International General Average is not a showy subject; Lord Brougham himself could not be eloquent upon *that*: those who take up so dry a topic must do so, not because they hope to distinguish themselves, but because they are anxious to be of use,—not because they hope to obtain fame, but because they think they can promote a real public improvement.

The address of the Association on this subject is as follows:—

"National Association for the Promotion of Social Science,
3, Waterloo Place London, 3d May, 1860.

"Gentlemen,—The system of general average is one which, to prevent confusion and injustice, pre-eminently requires that the same principles should be acknowledged amongst the chief maritime nations. So far is this from being the case, however, that some of the most important rules vary not only in the same country, but in the same port. Uncertainty in law is always an evil; and, in regard to general average, the evil is peculiarly felt. The ship may be owned in one country, insured in another, her cargo owned and insured in several, and the port of destination, where the general average is made up, may be in a country which has different rules to any of the others. What is considered to be particular average on ship in one port is held to be general average in another, so that the owner of an outward bound ship may find himself unable to recover his loss either from his underwriters at home, or as general average abroad; or, on the other hand, he may be in a position to indemnify himself fraudulently twice over. A similar remark would apply to special charges on freight and on cargo. A very large proportion of the most important questions rests in England nominally upon the decision of that extremely vague authority 'the custom of Lloyds,' but really depends upon the idiosyncrasy of the particular adjuster who may be intrusted with the papers. Hence arise many cases where apparently injustice must be done to assurer or assured. Either the assured finds himself saddled with a loss against which he believed himself insured, or the underwriter pays one which was not considered in the premium.

"Much loss is occasioned to the mercantile community and to the country at large, and much valuable time is worse than wasted through business being impeded by misunderstandings and irritated feelings.

"A still more crying evil resulting from the present uncertainty of law and custom is the opening which it leaves for every sort of abuse. Attempts are daily being made to introduce charges of the most outrageous description which do not even go into the pocket of the shipowner, but which he feels himself helpless to resist from want of a law to appeal to; and he naturally considers himself hardly used should charges which he himself has paid be refused by his underwriters, though these last are obliged to refuse in justice to themselves and to prevent the innovation becoming a precedent.

"The evils of such a state of things are notorious and unquestioned, though it may be doubted whether many which are distinctly traceable to it, and are therefore removable, are clearly realised as proceeding from this source. Probably the chief reason which has hitherto prevented any general movement in favour of this reform, is an exaggerated estimate of the difficulties in the way of carrying it out. The difficulties are no doubt considerable, but they are far from being insuperable, and the importance of the end amply justifies an attempt to grapple with them. Both the assured and the underwriter are interested in placing their mutual relations upon a footing which would effect a saving of time and temper, and would secure them against the annoying pecuniary loss to which they are at present exposed.

"It is not of so much importance how the disputed points of general average are settled as that they should be settled. Most of the questions are in the end merely matters of account between one set of underwriters and another, and it would make little difference to any underwriter upon which interest it might be determined the charge should fall. It is true that there are points, such as the allowance of wages and provisions in a port of refuge, which would raise questions between shipowner and underwriter, but for the sake of both it is to the last degree desirable, that these should not be left as a bone of contention between assurer and assured, as they are at present, *e.g.* when goods to America are insured in England.

"The evils of the present system have already caused much dissatisfaction in America as well as in this country, and will become more and more intolerable as the commerce of the world increases, which it seems likely to do with a rapidity hitherto unexampled. The time, then, would seem to have come when an attempt should be made to remove this most unnecessary element of irritation between assured and underwriter.

"In the hope of coming to an understanding upon this question, the Council of the National Association for the Promotion of Social Science have determined that it shall be brought forward for discussion at their next meeting, at Glasgow, on Monday, September 24th next, and following days, and we earnestly trust that you will find it in your power to send representatives of your body to that meeting, as it is very desirable that delegates from the commercial bodies in different parts of the world which are chiefly interested should be present.—We are, gentlemen, your obedient servants,

"Brougham and Vaux, President of the Council (National Association for the Promotion of Social Science).
"George W. Hastings, General Secretary (National Association for the Promotion of Social Science).
"Duncan Dunbar, Chairman of the General Shipowners' Society, London.
"Thomas Baring, Chairman of Lloyd's, London.
"Wm. Wilson Saunders, Chairman of the Association for the Protection of Commercial Interests, &c., London.
"W. J. Tomlinson, Chairman of the Chamber of Commerce, Liverpool.
"F. A. Clint, Deputy-Chairman of the Shipowners' Association, Liverpool.
"Charles Langton, Chairman of the Underwriters' Association, Liverpool.
"Wm. M. Moss, Chairman of the Association for the Protection of Commercial Interests, &c., Liverpool.

"Allan Gilmore, Chairman of the Shipowners' Association, Glasgow.
"William P. Paton, Chairman of the Chamber of Commerce and Manufactures, Glasgow.
"Henry J. Atkinson, Chairman of the Shipping Committee of the Hull Chamber of Commerce and Shipping.
"Wm. Brown, Atkinson, and Co., Managers of the Humber and Hull Mutual Insurance Association.
"John Shute, Chairman of the Chamber of Commerce, Bristol."

We have more than once had to call the attention of our readers to the imperfect state of the law of general average. Very curious doctrines prevail with respect to it not only in this country, but in all countries. Complicated doctrines have grown up no one exactly knows how, just as the now abolished or half-abolished science of special pleading grew up in our law courts, full of the most refined distinctions, and the most ingenious subtleties, but quite apart from the real life, quite separate from the substantial facts of the shipping world. The effect of all these intellectual puzzles has been that scarcely any shipowner now knows how this 'average statement' is made up. It is a mystery to him. An 'able gentleman,' perhaps in London *stated* it for him; but when he asked the 'gentleman' about some of the details, he did not understand the 'gentleman,' and the 'gentleman' did not understand him. We are not exaggerating the perplexity with which some of the shipowners at the 'outports' speak of the intellectual efforts of the average stater. As the Council for the Promotion of Social Science very properly remarks, the difference between the theories of different nations makes the case worse. If the refinements of New York coincided with those of London, there would be a show of presumption that both were founded on good principles. But when they differ, we are set upon inquiring why they do so, and which is the best; and few underwriters, and still fewer shipowners, would be able to form a correct conclusion on these questions, or even to have an opinion at all. The intellectual refinements are too difficult.

Nor are the differences between the laws of foreign nations and our own laws mere matters of theory and of refinement. They are in several cases practical differences, which only require to be stated to be seen to be important. Thus when a vessel puts into a port of refuge for the preservation of herself, freight, and cargo, all necessary expenses at that port should, on the principle of general average, be divided between the three in proportion to their true respective values. Seamen's wages and provisions are among the heaviest of such expenses, and yet the English law says that they are not to be allowed as general average, and the American law says that they are to be so allowed. The French law adopts an intermediate and purely arbitrary line. It allows such expenses as general average when the vessel is chartered by the month, but not otherwise. Again, to confine ourselves to the single item of expenses at a port of refuge, when the cargo is unshipped and reshipped again in the same vessel, the American law very rationally charges the cost of the entire operations to general average, whenever it was in fact undertaken for the benefit of ship, freight, and cargo; but the English law perversely charges the whole expenses to *freight*, for what reason no one has ever been able clearly to explain.

These instances, which are only a few of those which might be alleged, show that the "Social Science Association" is in this case breaking ground on a new and useful topic; and we need not add that we very heartily wish them success.

THE AUSTRIANISING LIBERALS.

In another column will be found an able letter assailing an article in the Economist of the 8th inst. on the subject of the Austrianising party in England. Our reply need not be long. It is well for an intrinsically weak case to get into strong hands; nothing more adequately shows its inherent weakness; just as there is no better touchstone of an intrinsically strong case than to get into weak hands,—its independent strength peeping out through all the deficiencies in the treatment. We are glad, therefore, to hear the Austrian claim to Venetia so well put. After all what does it amount to but this:—'Might is right in all political questions, and we Englishmen, who have never hesitated to incur our full share of responsibility for the popularity of that ancient principle, cannot reproach Austria if she adheres to it also.' This is the sum and substance of our correspondent's reply. We would simply remind him that at all events the sympathies of a third party,—an impartial spectator,—as England is in the present case, may be permitted to be influenced by somewhat higher views. Granted,—what we are reluctant to grant,—that if the American war were to occur over again, England would act on the same principles as before; granted that in any case where our national *amour propre* is touched, we should cast to the winds the highest class of political considerations; does it follow that we are to deride these considerations when our national self-love is not touched,—when we are at liberty to give our sympathies and our aid to the cause which is intrinsically the noblest? Surely if the motives of English statesmen are indeed so universally and profoundly tainted with national selfishness as our correspondent exultingly asserts in all matters that affect directly the empire of England, we need not also be deprived of the poor satisfaction of casting our vote and giving our aid at the impulse of higher motives where selfish considerations are removed. Admit that our correspondent has made out that were we in the position of Austria, we should treat the Venetian question entirely as Austria does;—since we happen not to be in that position, but a more fortunate one, it is hard that we should not have the advantage of it. Our correspondent's argument would go to maintain that nations conscious of unscrupulousness themselves, are bound to be as unscrupulous in their sympathies, their admirations, and their motives for giving or withholding help, as they are in their own administrative practice. It is a new moral canon.

Our correspondent does not deny that it is a calamity, a calamity of the worst kind, to the people of Venetia to be broken off from the Italian Kingdom to which they naturally belong, and ground down under the oppressive domination of Austria. We should have thought that this settled the question. We ventured to say that there are but two points worth considering in the matter as affecting the English policy. These questions are, first,—Would it be a vast advantage to Venetia and to Italy that Venetia should be Italian? Secondly,—Would it be a great disadvantage to Austria that Venetia should be Italian? Our correspondent apparently agrees with us in answering the former question in the affirmative, but with an intellectual courage that strikes us with amazement, denies that it has any bearing on the question of English policy and sympathy. On the second question, he not only differs from us *in toto*, but maintains that it is the only one on which English policy ought to hinge. We differ with him on both points. Could we admit that it were a great national calamity to Austria to lose Venetia, we should, nevertheless, prefer that she should suffer that calamity than that Venetia should be sacrificed to German interests, and the Italian Kingdom weakened for the sake of so formidable a rival. Austria, we are told, is not aggressive,—has no instinct in that direction. The history of her reign in Italy had we thought established the contrary conclusion. We do not know what aggression is if the Austrian policy in Italy for the last hundred years at least has not deserved that name. If she retains the Quadrilateral and Venetia, she retains the means of re-entering on her old career at the first convenient moment. A kingdom tossing with the throes of a new organisation like Italy, will not for generations to come be in a position to offer an overwhelming front of resistance to such a base of operations as that which Austria occupies in Venetia.

But we sincerely believe that the true Austrian policy is to abandon Venetia. Military opinions may be brought to prove anything whatever. For hundreds of years Austria was safe in Germany without the Italian Quadrilateral. For a large portion of that time she held the Duchy of Lombardy itself. Venetia is a vast expense to her. It would be a vast gain to her to sell it. Her tenure of it deprives her justly or unjustly of the sympathy of the Liberal party both in Prussia and England. And if she be not *safe* without it, though holding the Tyrol and the Italian slopes of the Alps, then

must France be really in something more than imminent danger in her perilous position among the mountains of Savoy.

AUSTRIA AND THE ENGLISH LIBERALS.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I hope you will allow one who is not ashamed to be called one of the Austrianising Liberals to make a few remarks on your article of September 8.

You reproach us, first, with believing that the constitutional reforms recently initiated in Austria are sincere; and secondly, with thinking that the retention of Venetia by Austria is consistent with English principles.

I reply by asking, why should not every genuine lover of freedom welcome with joy and sympathy every movement of liberal life in Europe? Constitutional States are the only friends on whom England can rely; their number in Europe is soon counted:—is not the bare chance of a great Power becoming constitutional a fact deserving a kind greeting from every Englishman? When in 1830 a constitutional King ascended the throne of France, a burst of rejoicing broke forth from all England. We are all watching with eager sympathy the emancipation of Italy: why should the dawn of liberty in Austria meet only with coldness and incredulity at our hands? Is it that the people of Austria are less noble than the Italians; or that we care little for freedom, but much for the pleasurable excitement of hearing of the overthrow of dynasties and of the bloody adventures of a contest which comes off in the streets? Did our own peaceful revolution of 1832 merit no sympathy, no admiration from continental Europe?

What is the harm of our Government believing that Austria seeks to found a constitution? Is it the danger of being thought credulous simpletons? Let them be comforted. No man or statesman had need of being ashamed of having generously trusted the sight of incipient goodness in offenders? Often has such a confiding welcome alone made a successful return to rectitude possible. In the present case there are ample grounds for hope and confidence: the necessities of the situation; the very peril of Austria, from which a constitutional government is the only escape; the pledged word and even the fears of the Emperor; the Imperial decree forbidding all imposition or modification of taxes without the consent of the Imperial Council; the discussions on the nature of the new constitution; the protest against the Concordat, and the demand for complete equality of religious rights; the publicity of the proceedings, so far as it has not been restricted by the Hungarian members; the watchful and sustained interest of the nation and the press; the necessity for a constitution, recognised by every power in the State; and not least, the earnest and determined resolution of the Prime Minister, Count Rechberg.

But, it may be said, it is better that England should stand aloof, otherwise sympathy with Austria will involve her in some political misfortune. It is the interest and true policy of England, I most fully admit, not to have any special alliance with any foreign Power. Her wish ought to be and is that all should prosper, and to be thoroughly friendly towards all. But England cannot now remain indifferent with safety. The present Government and tendencies of France are a standing menace to civilisation. It compels every other State, as we were fairly warned by Lord Palmerston, to take precautions; and I feel the most entire confidence in asserting that there exists for England no ally so safe, so natural, so trustworthy, as a constitutional, liberal, and non-aggressive Austria.

It is feared that England may be committed to some false policy. Such an one may be found in respect either of Hungary or Venetia. As you do not speak of Hungary, I will say merely that there is not a man in England who would not be indignant at foreign intervention in Hungary; whilst the manifest efforts of the Magyar nobles in the Reichsrath to prevent the formation of a constitutional government for the whole Empire, and to revive the oppressive ascendancy of a dominant race in Hungary, should make us pause in thinking that the cause of freedom at this moment is on the Hungarian and not on the Austrian side.

But England, you say, must not countenance the retention of Venetia by Austria. You expressly give up "geographical continuity and identity of race, as the true test of nationality"; "it is simply ludicrous." You do wisely. Such principles would compel us to give up Lower Canada, India, Gibraltar, Malta, the Ionian Islands, and even Ireland. They would force France to disgorge Alsace and Lorraine; or rather would authorise her to swallow up Belgium, Holland, Switzerland, and large slices of Prussia and Bavaria. They would put almost every State of Europe into the crucible, and at least half a century of revolutions would be the cost of the unheard of happiness to be thus provided for mankind.

But if the Venetians are not to form a part of the new Kingdom of Italy, because they are Italians and march with Lombardy, upon what principle are they to be got away from Austria? You feel the difficulty: so you lay down a new principle of human nature, and a new law of political society; and you call upon Austria to be the first to carry these out in practice. You hint that "a party of thoughtful Englishmen" would be good enough to give up territories, if they thought the natives would be the "better" for it: and you assume that the welfare of subjects ought at least to be "more" considered than that of their masters. I venture to say, that no such party or principle has or ever will exist among men, till the millennium comes. Our own practice has always been the precise reverse. We granted independence to America only after a bloody struggle of seven years. When more recently the French Canadians thought they would be happier with independence and the *coutûme* de Paris than with Anglo-Saxon institutions, we taught them wisdom by Waterloo Generals. English garrisons summon Catholic Malta to sacrifice herself to the good of England, precisely as the Emperor Napoleon recommends Rome to sacrifice herself to the good of the Papacy. The Ionians detest us: they cry for union with their brethren on the mainland: we think of the strong harbour of Corfu: and our Liberals threaten them with military rule if they will not work with the parliament we gave them. The Hindoos hate our religion and our rule: we sabre and bayonet them into a proper sense of what is for their good. Who can dare to speak of Ireland? What answer have we given to every rising for emancipation from an oppressive sway, but bloodshed, confiscation, and subjugation? Has any Englishman ever proposed to grant separation to Ireland? Because no one, you may say, ever thought Ireland would be the happier for it: but no English or practical statesman ever did or ever will think that independence would benefit a country, whose retention is profitable or practicable. Some have talked of giving up India: but only because they doubted whether India would repay her cost. We shall be ready to grant separation to our colonies, whenever they choose to insist upon it: but then we know that we cannot keep them against their will, and that their value to us is chiefly commercial and would not be injured by separation.

So it has always been, and so it will ever be. Let us learn justice and charity towards others from our own history and practice.

But Venetia, you say, is a weakness and an expense to Austria, and she does not require it for her security. Of this the Austrians, and not we, are the fitting judges. Not Austria alone, but Germany also, declare that the Quadrilateral is the necessary condition of their safety. "The Rhine must be defended on the Po," said the Prussian Prime Minister and General Radowitz. You rely on the slopes of the Alps; but they are 300 miles long, have numerous passes, and would furnish a weaker and a more expensive defence, though guarded by 250,000 men, than the Quadrilateral with 100,000. Mountain defences can always be turned. A large fortress, capable of holding not a mere garrison to defend a pass, but a real army with an ample command of supplies and communications, cannot be found in a mountainous region. Strategists tell us, and I believe truly, that a force which holds the plain is master of the mountains also. Marshal Soult broke through the Pyrenees, though carefully guarded by Wellington's army, and all but routed it, before it had had time to concentrate. An impregnable fortress in the Venetian plain, in the centre of the circular Alps, and in the rear of all the passes, would render the invasion of Austria impracticable. Push back Austria to the slopes, and an irresistible force may quickly pass by one road or other into the heart of the monarchy. The Quadrilateral guards Trieste, a very important outlet of German commerce, and the Adriatic the seaboard of Hungary. It flanks Switzerland, which can never be enveloped by France whilst there is an Austrian army on the Mincio and the Adige. And if it is expensive, not the cession of it by Austria, but the transfer of a portion of the cost to Germany, would be the correct and logical remedy, on the German view. And that view must be refuted before Austria can be reasonably expected to part with the Quadrilateral.

But Venetia, you argue, is an Austrian gain at the expense of the Italian Kingdom. This begs the question at issue. Do not forget Gibraltar or even Canada. "I require the Quadrilateral for the protection of my country and Germany," says the Austrian. "It is mine," replies Sardinia. But how can she prove it to be hers, except upon the ground of geography or race, which you pronounce "ludicrous"? In truth you are misled, by not taking into account the vast alteration in Italy produced by the peace of Zurich. Austria has been compelled to renounce the old sin and crime of weighing with foreign bayonets on the independent States of Italy. If the Italian Kingdom is established, Austria will never again be able to guarantee impunity to tyrants, whose acts she did not control; just as England rendered the English settlers irresponsible in Ireland. A united Italy puts an end for ever to the most oppressive and intolerable of all systems. And this is the answer to the argument you so strongly urge, that "Victor Emmanuel will never be safe on the throne of Italy, while Verona and Mantua are garrisoned by Austrian troops." The stability of his throne rests entirely on the consolidation of Italy. When that great work is done, Austria becomes a non-Italian Power, and the Quadrilateral a purely defensive fortification. And there is every reason for believing that there will be far greater need for Austria to guard against Sardinia, than Sardinia against Austria; for Austria is essentially unaggressive by nature: and who shall say the same of Sardinia? Austria, indeed, on some future day was to try to recover Lombardy, as lost Austrian territory; but this would be something very different from an attempt to upset the Kingdom of Italy, and to restore the old order of things in the Peninsula. And as for abandoning the Quadrilateral now, whilst the state of

Italy is so precarious, and Sardinia is so dependent on France, in my opinion, an Austrian statesman would richly deserve impeachment who should propose so unpatriotic and so dangerous a measure. I have no feelings in common with a priest-ridden and despotical Austria; but I do think an ancient and great people in the honr of danger, seeking safety and strength from constitutional institutions, are entitled to sympathy from every Englishman.—I remain, Sir, your obedient servant, A TRUE LIBERAL.

Sept. 18, 1860.

CONTRACT NOTES.

THE annexed correspondence relates to the non-liability of contract notes of exchange brokers to the penny stamp duty:—

"TO THE COMMISSIONERS OF INLAND REVENUE (FOR SPECIAL PURPOSES).

"Gentlemen,—In the Act just passed, under the head of 'Contract Notes,' commencing with 'any note, memo., or writing, commonly called a contract note, &c., 1d is required to be affixed to all contracts relating to the sale or purchase of all public stock, funds, or securities. As the Act does not apply to contracts on the sale or purchase of bills of exchange, and a doubt exists in the minds of some banks and mercantile firms in the City, who call for the doty of 1d to be affixed to such contracts, I request to have the authority of the Commissioners of Inland Revenue to exempt the said contracts from this tax. In any emergency the sold and bought contract which has to be given to the seller and purchaser of bills of exchange could not possibly be liable to each a penny on the same transaction.—I have the honour to be, your obedient servant, "JAMES LOW.

"5, Austinfriars."

"Inland Revenue, Somerset House, London, Sept. 19.

"Sir,—Having laid before the Board of Inland Revenue your letter of the 13th instant, I am directed to acquaint you that if the contract note referred to by you does not relate to the sale or purchase of Government or other public stocks, funds, or securities, or to the stock, funds, or securities or share or shares of any joint stock or other public company, it is not liable to the 1d stamp imposed by the 23d and 24th of Victoria, chap. III.—I am, Sir, your obedient servant, C. HAY, Assistant Secretary.

"Mr James Low."

Agriculture.

AUTUMN AGRICULTURAL MEETINGS.

SENSE AND NONSENSE.

THE agricultural meetings of the present autumn have not hitherto been productive of anything bearing upon agriculture of the peculiar character we used to hear of at such gatherings. In fact husbandry has now become an ordinary trade, and save that on some of these occasions landowners assume to teach farmers how to farm and so forth, there is commonly nothing sufficiently remarkable said to get into the local papers. Still, the traditions of old opinions once held by the agricultural interest hang about these meetings like cobwebs of a past generation; and it is well to see that while there are some public men who cling to unwholesome prejudices, there are other and better men who deal with these subjects rationally. Thus, at "North-West Bucks Agricultural Association," Mr Hubbard, the Tory member for Buckingham town, disregarding the retrograde nonsense talked, covertly or openly, in favour of protection during the discussion of the French treaty, said: "The last quarter of a century had taught us a very important lesson. It had taught us that in agriculture, as well as in every other science, the English agriculturist had proved himself able to cope with all the world. Not many years ago it was said that if the Legislature removed from the English agriculturist the protection he had so long enjoyed, they would doom him to speedy destruction.....Yet, what had been the result of the removal of protection? If the soil of this country was less fruitful, it had been fertilised by the extensive and intelligent use of all artificial means for improving its fertility, until it had been rendered equal, if not superior, in its product to the soil of any other country under the sun; and if our climate was less genial, science had enabled us to confer upon ourselves advantages equal to those which other nations enjoyed naturally.....From these facts we might draw this moral, that any approach to class legislation *was not only a social crime but a practical blunder*.....They might depend upon it that there was no such thing to be found as one interest rising to wealth and eminence by that which constituted the disadvantage of another." This is sound sense and sound economy. And the application of these truths is wider than was pointed out by Mr Hubbard. They apply strictly to that predominance of the "landed interest" sought to be maintained by means which cripple agriculture, prevent the free transmission and ready purchase and sale of land, and foster a class of nominal proprietors of land whose utter inability to deal with land constitutes a chief obstacle to much agricultural and social improvement.

Very different was the utterance of another member of the same party. Mr Hardy, the Tory member for Leominster, coupled the Attorney General's Bankruptcy Bill with the Reform Bill of last session as measures for the defeat of which "the landed interest" was especially jubilant. At the Leominster agricultural meeting he said "the Reform Bill was pitched along with another which was to benefit the landed interest by making them bankrupts." Mr Hardy must have believed his hearers not to be aware that such of the "landed interest" as would have been made bankrupt had the Attorney General's bill passed, would have been those who were unable or unwilling to pay their debts. And why should "the landed interest" be exempted from that social duty? The truth is, that nominal ownership prevails so largely amongst the landowners, who cling to territorial influence long after the substance of their estates has passed into the hands of incumbrancers, that an apprehension exists that greater facilities to creditors might reduce many nominal owners of large estates to landowners of very modest dimensions. Of course, this sort of thing occurs daily with merchants, manufacturers, and other traders, and why should a different law be applied to "the landed interest"? Nothing, simply nothing, but the old feudal notion that the owners of land are the rulers, social and political, of the nation.

Some such notion seems to have been put forward at a meeting of the "East Cumberland Agricultural Society" by the Chancellor of the Diocese, who had said "that real statesmanship consisted in upholding land." What nonsense! Land the property of individuals must be upheld by their own good management, precisely as any other property must be upheld, and "statesmanship" has only to see that all owners of property are free to deal with their possessions as they think fit, provided they do not so deal with them as to injure their neighbours or injuriously affect society. But if statesmanship in this country has yet anything to do with land, it is not, in the sense of the reverend speaker, to uphold it, but rather to render it more completely an article of commerce than it is at present.

Sir James Graham, who is one of the most intelligent managers of landed property of the present day, at once objected to the Diocesan Chancellor's unsound proposition, and said: "As an owner of land and as a statesman, I contend that sound policy consists not in a vain attempt to uphold land as separate from commerce and from manufactures; but that real statesmanship consists in the absence of any attempt to favour one at the expense of the other, and in doing the best to promote the common good of our common country." And the meeting by their cheers signified an assent to these rational views.

Sir James then dealt with another question upon which we have had occasion to remark, namely, agricultural colleges. The Chairman and Mr Marshall, one of the county members, had expressed a wish to see a Northern Agricultural College established. "Now," said Sir James Graham, "I must say I dissent from that doctrine, and I dissent from it on the ground of experience. I believe that the very best teaching of agriculture—of practical agriculture—is to be found at this moment in the counties of Cumberland and Westmorland. That sounds like flattery. It is far from it. There is a college, to which reference has been made, in a midland county of England,—namely, the College at Cirencester. Now applications have been made to me repeatedly by great landowners in the South of England to recommend to them from this county of Cumberland and the neighbouring county of Westmorland persons well qualified to manage large estates." And he mentioned a young man who preferred to remain a tenant *on lease* of one of his own farms to acceptin the post of manager of the Home farm at Windsor, and other instances of the managers of estates being sought for in those and the adjoining North country districts, and added: "I am satisfied that the home of the Cumberland yeoman, and the education of the Cumberland farmer on a large scale, afford better training in the best system of agriculture than any college will produce." And, extending the remark to the large and good farmers throughout England, we have no doubt of its truth.

COMMERCIAL LITERATURE.

THE EXPERIENCE OF THE MUTUAL LIFE ASSURANCE COMPANY OF NEW YORK. New York. 1859.

IT is very gratifying to observe the progress that life assurance is making in the United States. We believe the Mutual Life Assurance Company of New York may be numbered among the oldest and most successful of the American companies. It was established in 1844, the number of policies then in force were 462, the amount assured thereby 1,611,718 dollars, and their assets 32,311 dollars. On the 1st February, 1859, the policies had increased to 10,993, the amount insured to 32,575,099 dollars, and the assets to 5,374,933 dollars.

The Mutual Company have published a very able report of their experience, in which vital statistics are collected from all quarters to which their business extends, and their observation and experience among those who have been assured in that company already embrace a larger number of persons than the entire population from which the Carlisle and Northampton tables wer

formed. Our readers are aware that these are the tables on which we chiefly rely in this country, in conjunction with the Actuaries' or Experience table which embraced the result of 17 of our principal offices. The experience of the New York Mutual is more favourable than the Actuaries' table, or than any other known table, in its pecuniary results and in its relative mortality, but it approaches more nearly to the Actuaries' than to the Carlisle or Northampton tables.

We may here observe—and perhaps our observation will have some weight with this rising institution—that we do not consider they have been sufficiently long established to be able as yet to speak with entire confidence, or to act on their own experience; for an assurance company ought certainly to be established for 30 years before it can speak positively as to the *results* of its experience. We advise it to proceed with the utmost caution. We in England know practically the fallacy of obtaining business by lowering premiums; and what we do not yet know we fear we shall soon learn, and that in a painful manner. Let the Mutual Company continue in the same prudent course, always remembering that the fundamental principles of life assurance are few and simple, resting upon the ascertained duration of human life, a proper selection in the lives assured, and a sufficient rate of premium to cover the risk taken. Those premiums, too, must be carefully and prudently invested.

Observations on Street Railways. Sampson Low and Co.

Mr Train, the author of these "Observations," has been called the Stephenson of Street Railways. When we see what has been accomplished by steam and locomotives, notwithstanding the most solemn predictions by men of profound science that neither the one nor the other could answer *practically* although the theory might be very plausible, we do not quite despair of seeing street railways introduced even into the heart of London. There are five City railways in New York, operating on a total length of 44 miles, constructed at the aggregate cost of 1,000,000 dols, which pay dividends of from 6 to 12 per cent., and are alleged to have carried 34,000,000 passengers in the year 1858. We rejoice to hear that Mr Train's plan is in course of trial at Birkenhead. If it succeeds there, it will gradually work its way up to London, and will persuade even the Corporation of London to try the system, which, if successful, would relieve our streets of their overcrowded traffic.

A Manual for the Use of Friendly Societies. Routledge.

This work is by Mr Charles Hardwick, who has had great experience on the subject on which he treats, having been Grand Master of the Independent Order of Odd Fellows, Manchester Unity, and the author of "The History, Present Position, and Social Importance of Friendly Societies." Mr Hardwick has devoted ten years of active literary exertion and eighteen years of practical experience to place in a true and popular light the advantages to be derived from these societies, and also to show the societies themselves the only proper basis for their operations, if they are to fulfil the advantages they profess to hold out to their members. When we consider the number of these societies, and the serious loss that will some day accrue to their members if conducted on erroneous principles, it would be well for their promoters to study Mr Hardwick's "Manual,' lest when the day of trial comes, they may be found wanting, and their members left without that provision on which they had reckoned.

Liverpool in 1859. London: Longman and Co. Liverpool: Benson. Manchester: George Simms.

Although this work is strictly confined to the port and town of Liverpool, and the harbour, docks, and commerce of the Mersey, still, be it remembered, it is Liverpool it describes, and Liverpool is the second commercial town in England. The information it contains seems to have been carefully collected, and treats of the Navigation, Commerce, Import and Export Trade, Lines of Railway, and Canal Communications, which connect Liverpool not only with the rest of England, but with the rest of the world. It gives also a variety of statistics of the town itself, and also of the growth and progress of Birkenhead. To all who wish to know anything about Liverpool we can recommend this work.

GENERAL LITERATURE.

Facts and Figures Relating to Vancouver's Island and British Columbia; showing What to Expect and How to Get there. By J. Despard Pemberton, Surveyor-General, V. I. Longman, Green, Longman, and Roberts.

So few works of any value have hitherto appeared upon British Columbia, that a volume written expressly to convey "authentic and reliable information" by one whose position gives him every advantage of personal knowledge and experience deserves a welcome as a timely and useful production. The "facts and figures" it contains are valuable and carefully selected; the general view of the colonies described is excellent; but of those details so interesting to the would-be emigrant, of what he is to expect when he reaches his long journey's end, there is very little. We would not emulate the moderation of the settler, quoted by Mr Pemberton, who simply desired to be told of a plot of land as near as possible to a new town, near a good harbour, or on a good river, where a brisk trade would be likely to arise, well supplied with fresh water, in a sunny aspect, looking South, well wooded, near the sea, and in a lovely country, as his family had a taste for salt water and the picturesque—with a quarry handy for building purposes, a coal mine, water power, and sundry other desiderata,—but it surely speaks forcibly of the way in which British Columbia has been passed over by the stream of emigration, that its Surveyor-General is forced to account for the brevity of his descriptions by the "scantiness of our information on the colonies in question."

The greater part, consequently, of our author's slender volume is given up to a discussion of the causes which account for the comparative failure of these our latest settlements, and of remedial measures. Want of roads or means of transit through a country for the most part hilly and heavily wooded, is one main cause assigned; but the chief, in Mr Pemberton's eyes, is the difficulty of communication with the mother country. This is very probably one great reason for the slowness of growth shown by a colony placed in a healthy, fertile region, whose climate and productions much resemble those of England; but we cannot think that it altogether accounts for it. It is true that there is no direct communication with England except by a five months' sail round Cape Horn, but British Columbia is in constant communication with San Francisco, from which it is only distant a five days' coasting voyage. If a seven weeks' journey over a circuitous route does not prevent the colonisation of California, why should a five days' further easy voyage in coasting steamers operate as an insuperable bar to the populating of Vancouver's Island and the opposite coast?

The emigrant once landed at New York, stands on an equal footing with the American emigrant to Oregon or Washington (both of which are reached through California), if we except that slight addition to his journey above mentioned. Yet the population of Oregon and Washington have increased greatly, while British Columbia has made little if any progress within the last few years. Mr Pemberton instances this contrast as a proof of the successful working of the American plan; viz., the making of large roads at Government expense. But the cases are not parallel, and no amount of road making on our part would make them so. The Americans, eager to possess themselves of the whole continent if possible, spare no pains to incorporate a new territory within their bounds. England has too many colonies to permit her to take an absorbing interest in any one; and her people, distracted by the number and contending advantages of the colonial homes that are open to them, are slow in recognising the value of a new one, unless it offers, as in the case of the gold-fields in Australia, a great and immediate inducement. Vancouver's Island and British Columbia are, as a colony, little more than ten years old: when their real merits shall be more widely known, they will have no cause, we feel sure, to complain of neglect.

However desirable a direct road through the British possessions in the North-West and Canada may be, and we do not deny its many advantages, we think Mr Pemberton has failed to make out a case for the interference of Government, or for its departure from that line of conduct which has in the end proved so beneficial to our numerous colonies,—the policy by which every new colony has been left as much as possible to its own exertions "to provide step by step for its own requirements."

The plan which Mr Pemberton advocates is shortly this,—that the British Government should encourage or suggest a company or contractor to make a line, running between Montreal and Hope Town on the Fraser River, viâ the Grand Trunk Railway of Canada,—two hypothetical railways between Chicago and Pembina on the Red River (these are to cost nothing, as the Americans are sure, in Mr Pemberton's opinion, to make them),—by steam up the Red River to Assiniboin,—from thence by waggon road to the Saseatchewan,—along its Southern branch by steam to the foot of the Rocky Mountains,—by waggon road again over the Vermilion Pass to Hope Town, and on to Victoria by the regularly plying steamers. "The advantages of this route," says Mr Pemberton, "might be summed up as follows—that by opening it in the cheap way suggested, while you connect together all the colonies of British North America, an emigrant from England could reach Victoria in one week shorter time than he can now do by Panama, the quickest and most expensive route." The disadvantages may be said, on the other hand, to be the frequent change of conveyance,—the complete failure, for the present at least, of that scheme for the construction of a railway connecting La Crosse with Pembina, upon which Mr Pemberton reckons for his transit through 450 miles of American territory,—and, most serious of all, the winter closing of the pass over the Rocky Mountains, by which all through traffic will be stopped for at least five months out of every year. When Mr Pemberton says, '*if* this line pays more than 12 per cent.,' we think he is taking a rather sanguine view of the whole affair.

To revert for a few words to the earlier part of this volume, we find there a very clear report of the capabilities of the colony. "Safe harbours and good anchorage are everywhere met with." Esquimault Harbour seems to have been wisely chosen as our naval depot for the Pacific; and Victoria Harbour is only a little inferior. With such natural advantages,—with a soil that produces "bushels of potatoes to a single stalk," "turnips as large as hassocks," and "radishes as large as beets," pears that rival the

Oregon pear which required five people to demolish it, and orchards that bear abundantly,—while in the open spaces and valleys between the hills, rich ground only requires clearing of the pine, oak, and maple that encumber it, to produce from twenty to forty bushels of wheat per acre,—with coal mines still unworked, and a market close at hand in San Francisco from which the colony draws all her own supplies,—it cannot be that British Columbia will long continue in the depressed state in which she now is, when the population of her chief town counts only 3,000, and that of her interior consists of miners who draw all their supplies from California and send back all their gains thither, "and farming population there is none."

The climate of the South part of Vancouver's Island and of the river valleys on the continent is as mild as that of Devonshire, while among the higher hills, or further North, a severe degree of cold is experienced. The territory is as yet so little surveyed that no correct estimate of the amount of good land can be formed, but from what has already been explored, Mr Pemberton is of opinion that far more will be found fitter for cultivation than has been hitherto supposed.

Of the land in either colony, the portion occupied, some thousands of acres only out of 150 millions, is so small compared with the whole, that a considerable time must elapse before settlers arriving shall find it difficult to obtain farm sites containing a sufficient quantity of open land. In addition to this, an ample supply of timber, for building, fencing, &c., is indispensable on a farm; and the quantity required for fuel alone is surprising.

With regard to the gold, which is widely distributed throughout British Columbia, Mr Pemberton believes that it yields to its workers an actual profit above that realised by the gold-diggers of California, but that the greater difficulties to be overcome, and the scarcity of means of living, much more of "creature comforts," "leads the miner to prefer California to British Columbia, notwithstanding the higher pay in the latter." A farming population that shall supply the miners on their own ground, and reap for themselves a harvest by so doing, similar to that reaped before now in Australia and California, is the great want that Mr Pemberton does his part to supply by the information and advice contained in this volume. The maps by which it is illustrated are numerous and good: in themselves alone they supply a want that many have felt in connection with our North-West American Colonies.

Reminiscences of an Old Sportsman. By Colonel J. P. Hamilton, K.H., Author of "Travels in the Interior of Columbia." Longman, Green, Longman, and Roberts.

When age speaks, its words should be listened to with a certain deference; but when age publishes, the case is not quite so clear. It may seem unfeeling and presumptuous to criticise the work of one whose years and experience give him a claim to be heard with respect upon his favourite topic; but if criticism is to be fettered by considerations of however amiable a kind in the free exercise of its judgment, within due bounds of courtesy, its functions are at an end. We could certainly wish that Colonel Hamilton had confined his "Reminiscences" within the circle of that more partial public who would have doubtless given a cordial reception to the volumes that have employed and amused his declining years, including twenty years of blindness, and thus spared us the necessity of any opinion favourable or unfavourable; but since he has sent them out upon a wider public, we must express our true opinion of their merits and of their defects.

When Colonel Hamilton keeps in any moderate degree to the matter in hand,—when he tells us of his own actual adventures, of the habits and history of his winged or four-footed game, of the good old-fashioned methods of sporting, and the changes that have arisen since his time,—when he tells us of his breezy walks over the heather, or his careful beating of the stubble-fields,—we find him more than readable; but he is unfortunately tedious and discursive beyond even what might reasonably have been expected. The good things of his book are overlaid with an undigested mass of anecdotes, authentic or doubtful, new and old; recollections of books and of conversations; long extracts from favourite books; and digressions into the private affairs of people whose concerns are far less interesting to the public than to the author. All that is worth saying could have been said in less than one volume; the rest is little else than the fond prolixity of one who lingers over a theme in which he finds a strong attraction, but to which he would do greater justice by using fewer words.

The author's "Reminiscences" of field sports at home have a degree of value attached to them by the minute and thorough acquaintance they show with the whole subject, through the long experience of an active life. Next to this part of his book, we may point out his account of a ten months' sporting vacation in the Island of Sardinia as one of the grains of salt that give savour to what is, on the whole, an insipid production. It may, perhaps, discourage some sportsman eager to taste the pleasures of the chase in Sardinia to be told that "A party undertaking a shooting expedition in Sardinia for a month or two should be provided with a man cook, an ample supply of dried provisions, such as hams, tongues, &c., and, what is of most importance, a stock of port, sherry, brandy, and rum, all of the best quality; also bark in case of ague." Colonel Hamilton was not so successful in the novel practice of boar-hunting as in most other field sports. In his first attempt at shooting the boar he hit the animal indeed, but carried off at the same time the eye-tooth of his host's favourite greyhound. An attempt he afterwards courageously made to bring in a boar on his own account ended even less prosperously. We will extract the passage as giving a fair specimen of the writer's style:—

I started for the place one fine morning in the beginning of December, with the thermometer about sixty degrees. Having walked nearly five miles and reached a ravine, both sides of which were rather steep and rugged, and covered with low brushwood, and a small stream running at the bottom, I found a short distance on my right the large wood before mentioned. I was walking very quietly along the ridge of this ravine, having no dog with me, and on examining the ground I distinctly saw the fresh marks of a boar. Proceeding cautiously, and looking towards the stream, I discovered a wild boar wallowing in some mud, and apparently sleeping. He was rather too far off for me to fire at him, and, whilst I was turning in my mind how to approach him, he suddenly turned his head, got sight of me, and started off at full speed. I was almost certain that he would direct his course up the steep ridge on the side where I stood, with the object of entering the forest; and observing that he ran a short distance up the stream before he began to ascend the height, I made all speed to meet him at the top, and salute him with my two barrels. But in my hurry and excitement, keeping my eyes fixed on the spot where I hoped to intercept him, and not looking on the ground, I came in contact with a large piece of rock, over which I tumbled headlong. My gun flew out of my hand, and I experienced the most excruciating pain from a bad wound on my right shin, which completely disabled me from further pursuit, and I lay for some time in a most uncomfortable state upon the ground, sadly vexed at having missed my intended victim. After the pain in my leg had in some degree subsided, my first care was to regain my gun, and I received some consolation by finding that my Joe Manton had not been damaged by the concussion. I had now no alternative but to hobble home, and recount my misfortune to my brother sportsmen, who regretted much the accident, and my failure in providing them with some of the wild boar for our commissariat. As I was then in excellent condition, the wound soon healed, and in three or four days I was able to take the field again.

Popular Astronomy. A concise Elementary Treatise on the Sun, Planets, Satellites, and Comets. By O. M. Mitchel, LL.D., Author of "The Orbs of Heaven." Revised by the Rev. L. Tomlinson, M.A. London: Routledge. 1860.

The author of this book appears to be an American astronomer, attached to the Dudley Observatory at Albany. He tells us in his preface that he "has no other apology to present for offering to the public the following work on 'Popular Astronomy' than the marked favour with which his 'Orbs of Heaven' has been received." This remark is rather suggestive of "book-making," and from that sin the work before us cannot be pronounced free. There is a want of that regularity and fulness which would mark the narrations of a scientific writer who knew thoroughly what he had to tell and how he ought to tell it. We feel, rather, that we are listening to a man who, although he may know a great deal more than we do, has not fused his knowledge into an organic shape, but who tells us now a bit of this, and now a bit of that, sometimes dwelling on details at considerable length, and then again giving us the most tantalising glimpses of deeply interesting facts. He mixes together, too, what should be presented in distinct narratives,—the history of human discovery, and the statement of natural facts. Not till the chapters on the Sun, Mercury, and Venus have been completed, and he comes to describe the Earth, does he mention the Copernican system; and not till he reaches the chapter on Mars, does he add that the planetary orbits are not circular,—because it was in studying the motions of Mars that Kepler first discovered the elliptical nature of the planetary orbits. This mode of procedure is especially unsuited to the teaching of *popular* astronomy; for which the book is further unfitted by the frequent imperfections of its style.

The only specialities in the book which are of any value are the descriptions of some "new methods and new instruments, which have been introduced into the observatories at Cincinnati and at Albany,"—and the plates. Of these last, four are American. The series consists of views of the Sun, the Moon, Venus, Mars, Jupiter, Saturn, and Donati's comet. These plates, in which the ground is of a beautiful cobalt, form the chief attraction of the book. But learners should be warned that the contrast between the dark spots and the white surface of the orbs is far more glaring in these views than it is in reality.

The Uses of Animals in Relation to the Industry of Man: being a Course of Lectures delivered at the South Kensington Museum. By E. Lankester, M.D., F.R.S., Superintendent of the Animal Product and Food Collections. First Course. London: Robert Hardwicke, 192 Piccadilly. 1860.

This cheap little volume contains six lectures (on Silk, Wool, Leather, Bone, Soap, and Waste,) "which were delivered, by permission of the Committee of Council on Education, in the lecture-theatre of the South Kensington Museum. They were undertaken for the purpose of explaining, to those interested on the subject, the nature and objects of those animal products which are employed in the uses of daily life, a collection of which exists in the Museum." Dr Lankester says that his object was "more to

excite interest and lead to inquiry than in any manner to treat the respective subjects exhaustively." This modest aim has been fully realised in these very agreeable lectures. The information which they contain is presented in the most lucid, graceful, and entertaining manner, so as even to interest readers who do not particularly care about "animal products." And those readers who are fond of this branch of study, will be still more pleased with this instructive and reliable little work.

BOOKS RECEIVED.

Les Finances de L'Autriche. Paris: Guillaumin.——Mr Wilson, Lord Canning, and the Income tax. Calcutta: Roy.——Journal des Economistes. Paris: Guillaumin. ——Reply to Professor Tyndell's remarks in his work "On the Glaciers of the Alps." Black.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

In Paris, as at London, the lamentable news of Mr Wilson's death has caused a most painful sensation. Here, as at London, he was admired by the public as one of the first financial statesmen of the day, and he was loved by a large circle of private friends. One of the most distinguished of French economists, on hearing of his death, wrote me:—"I am profoundly affected! He has sunk beneath the excess of labour. He is a victim to conscience and to duty!" Several of the Paris newspapers have borne testimony to his talents and his worth, and have proclaimed that his death is a national calamity to England. The *Presse*, in particular, not content with speaking of him in a leading article, has published a splendid eulogium on him by its correspondent at London. It is really sad for every one to see so fine a genius struck down so suddenly in the midst of a great career.

M. J. E. Horn, one of the principal of continental economists, has just brought out a pamphlet entitled *Les Finances de l'Autriche*. Like all that emanates from his pen, it is tersely and eloquently written, and abounds in facts set forth with remarkable clearness. The facts are really startling:—From 1847 to 1858, that is the eve of the war in Italy, the ordinary disbursements of Austria increased rather more than 87½ per cent., and if to them be added what are called the extraordinary and special expenses, the increase was rather more than 142 per cent.! In no other country in Europe, as M. Horn remarks, has the augmentation of expenses been anything like so prodigious. The revenues increased likewise, but in nothing like that proportion, and the consequence is that at the end of 1858 the accumulated deficits were 1,181,303,496 florins. As to the debt, exclusive of those deficits, it is at the present time about 3,340,000,000 florins. In presence of such a situation as this, it would really seem that there is no other alternative than bankruptcy. Whoever is interested in any way in Austrian finance would do well to consult M. Horn's pamphlet.

An Imperial decree reduces to 10f the 100 kilogs (2 cwts) the import duty on stock fish caught by foreign vessels. That duty is to be applied whether the fish be fresh, dry, salted, or smoked.

The claim of the French Consul at Newcastle to have French ships, in virtue of the commercial treaty, relieved from certain local dues, has given rise to the remark that English ships in this country are, and for years have been, subject to local charges from which the vessels of other countries are exempt, and for which perhaps no legal justification could be produced. The suggestion has been made that the Governments of the two countries would do well to come to an explicit understanding that local dues on shipping shall, as far as possible, be abolished on both sides.

In some parts of the Continent attention is excited by the fact (mentioned in a previous number of the ECONOMIST) that the consumption of coffee is increasing much more rapidly than the production. I have before me a series of statistics on the subject which represent that last year the total consumption of Europe and the United States alone was 330,000 tons, whilst the production of all countries was but 312,000 tons; and which calculate the probable consumption of the present year at 337,000 tons, and the probable production at 274,000; and of next year the former at 313,000 tons, the latter at 345,000.

The Chamber of Commerce of Paris twelve years ago made a searching investigation into the situation of the different trades and manufactures exercised in Paris, and of the work-people engaged in them. By order of the Government a similar investigation is now being made; and the result of it will doubtless be the collection of a mass of statistical and other information, which will be extremely useful.

In anticipation of a large demand for paper from England, some companies are, it is said, being formed for the purpose of constructing mills on a larger scale than any that have hitherto existed in this country. In the province of Auvergne the manufacture of paper was in former days one of the principal occupations of the inhabitants; but when machinery came to be extensively employed, it was allowed to die away. An effort is, it appears, to be made to revive the trade in that province;—a thing which from local circumstances can, it is believed, be accomplished without much difficulty.

On the Bourse yesterday and to-day there was a certain degree of animation, and quotations have improved:—

The monthly Customs returns appeared yesterday. They show that the import duties for August were only 10,126,000f, whereas those of the corresponding month of last year were 14,293,801f, and those of the same month of the year before 14,244,580f; also that for the first eight months of the present year the duties were 89,513,000f, whereas for the same period of 1859 they were 127,056,177f, and of 1858, 127,505,172f. The decline is certainly important, but it is owing to the large reductions which have been made in the duties on coffee, cotton, wool, sugar, &c. The following is a detail of the *quantities* of the principal imports, and it will be seen that notwithstanding the decline in duties, it is, on the whole, far from unsatisfactory:—

	Eight months of 1860.	Eight months of 1859.	Eight months of 1858.
Oxen and sheep ..... head	330601	280410	233993

Indigo	1077	...	...

The last two items are new ones in the return of exports; they have been introduced in consequence of the recent modifications in the import duties, in order to show what precise quantities of the two articles imported are kept for consumption. Thus, if the quantity of cotton exported be deducted from that imported, the balance represents the quantity consumed.

The precious metals were as follow:—

SILVER.

	Eight months of 1860.	Eight months of 1859.	Eight months of 1858.
	f	f	f

The following is an account of the market:—

FLOUR.—At *Paris*, during the past week, business has been calm: yesterday, the prices were 56f to 60f the sack of 159 kilogs; four marks, 56f 50c to 57f for the present month; October, 57f. A public auction of flour took place yesterday, and 3,000 sacks went at prices varying from 45f to 58f 50c.

WHEAT.—The quantity offered at *Paris*, yesterday, was not large, but was greater than the demand. Nevertheless, prices improved for certain descriptions. Quotations were for old 34f to 35f the sack of 120 kilogs, and for ditto choice, 35f 50c to 36f; new, 32f to 34f, according to merit and dryness. At *Marseilles*, business of late has not been very active. As to the other provincial markets, 28 present a rise of from 12c to 1f 90c the hectolitre, 77 a fall of from 25c to the large figure of 6f, and 32 have undergone no change.

COTTON.—At *Havre*, in the week ending Friday, the sales were not less than 14,825 bales, and the closing quotations were 4f higher for the "very low" qualities, 1f to 2f for the "low" and the "very ordinary," other sorts being unchanged. Very low New Orleans was, consequently, 69f the 50 kilogs; low ditto, 83f; and very ordinary ditto, 93f. This week, a fair amount of business has been done, and yesterday low New Orleans was 82f and 83f.

COFFEE.—In the week ending Friday, at *Havre*, the demand was regular and prices very firm: 1,200 sacks Hayti Port-au-Prince went at 78f 25c to 80f the 50 kilogs in bond; 460 ditto Cayes for delivery, 78f; 1,094 Gonaives, 82f 50c to 83f; 3,100 sacks Rio not washed disposable, 72f 50c to 77f 50c; 555 ditto for delivery, 75f; 284 sacks ditto washed disposable, 84f to 92f; 580 sacks Santos, 75f 50c; 1,552 sacks Porto Rico, 86f to 95f. In addition, some lots of different sorts of damaged were sold by auction. The arrivals were unimportant. This week, sales have been very numerous: Hayti, 79f in bond; Cape, 82f; Cayes, 78f 50c; Gonaives, 82f 50c to 83f; Rio, 75f; Macassar, 112f 50c duty paid; Ceylon triage, 110f 50c; ditto, Ceylon native triage, 108f 50c to 110f; Malabar, 112f. At *Nantes*, last week, nothing was done beyond what was mentioned in last ECONOMIST. This week, a lot of Boutbyn has been offered for sale by auction, but not taken. At *Bordeaux*, last week, the sole sales were 99 sacks Rio washed and not washed, 79f to 85f the 50 kilogs; 1,500 sacks Malabar and some Santiago at, prices not stated. This week, a small lot of Santiago has also been taken: quotations not given. At *Marseilles*, last week, 7,000 sacks Rio went at 72f to 78f.

SUGAR.—At *Havre*, in the week ending Friday, 666 casks Havana went at 37f 50c to 37f 75c the 50 kilogs in bond; 1,875 sacks Pernambuco, for re-exportation, 3M. In French West India nothing was done, holders not being willing to accept the price offered, which was 49f 50c to 49f duty paid. This week, the sales have not been important: French West India, 49f 25c to 49f 50c. At *Bordeaux*, last week, 400 casks French West India went at 48f to 48f 50c; 795 casks Havana, 34f 75c: in Reunion nothing was done, but quotations were nominally 52f 50c to 53f. No sales have been made this week. At *Nantes*, last week, about 3,300 sacks Reunion went at 51f to 51f 50c the 50 kilogs, and a small lot of Guadeloupe "usine" at 54f 50c. This week, business has been active: French West India, 49f 50c to 51f 75c; Reunion (large quantities sold), 45f to 53f 25c.

INDIGO.—At *Havre*, in the week ending Friday, about 50 cases Bengal went at 8f 80c to 10f 35c the half-kilog. The arrivals were 17 cases from England. This week, 4 cases Madras and 7 Bengal have been sold: prices kept secret. At *Bordeaux*, last week, 44 cases Bengal, 28 Kurpah, and 15 Guatemala went at prices previously established. This week, some small lots of Bengal and Madras have been sold: prices not stated.

HIDES.—The demand at *Havre*, in the week ending Friday, was far from active: 558 Buenos Ayres dry hull went at 135f the 50 kilogs duty paid; 2,187 salted La Plata, 82f to 82f 50c cow, 85f oxen: 200 Pernambuco drysalted, 96f. In addition, some small lots of damaged were disposed of. The arrivals were nearly 20,000. The sales have not been large this week: Pernambuco drysalted, 96f; Valparaiso salted, ox 72f 50c, ditto cow, 69f; Montevideo salted, 72f to 82f; Minas dry, 122f duty paid; New York salted, 56f; New Orleans ditto, 34f 50c; Rio Janiero, 62f 50c.

WOOL.—At *Havre*, in the week ending Friday, 67 bales Buenos Ayres unwashed went at 1f 10c to 2f 75c the kilog. 17 bales La Plata sheep skins unwashed, 1f to 1f 60c. The arrivals exceeded 500 bales. This week, some small lots have been sold at the rate of 220f to 235f the 100 kilogs Buenos Ayres unwashed, and 237f 50c Montevideo; Buenos Ayres sheep skins, 97½c the kilog.

TALLOW.—No sales were made at *Havre* last week, and the arrivals consisted of 173 casks from St. Petersburg. This week, nothing has been done. At *Paris*, yesterday, the 100 kilogs were 142f 50c—a somewhat important rise on last week's quotations.

THE HAGUE, Sept 18.

The King, in a speech from the throne, yesterday, on opening the States-General, announced the presentation of bills for Customs reforms for the removal of the formalities on the transit of goods, and for the construction of new canals for uniting Rotterdam and Amsterdam with the sea. He stated also that the financial situation of the country is very satisfactory, and that the harvest will not be so bad as, from the heavy rains, was to have been feared.

BERLIN, Sept 18.

All the States of the Zollverein have at last, after considerable hesitation, consented to allow Prussia, in their name, to enter into negotiations with France for the conclusion of a commercial treaty.

ST PETERSBURG, Sept 12.

As a proof of the manufacturing progress of this country, it is stated that at the recent great fair of Nijni Novgorod an extraordinarily large quantity of iron, chiefly sheet, was offered for sale, and that it was readily disposed of at good prices.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday evening. The corresponding figures of last month and of the corresponding period in 1859 are added:—

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 19th day of September, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,073,460	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	15,598,460
		Silver Bullion	...
	36,073,460		36,073,460

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,663,511
Rest	3,784,978	Other Securities	19,575,078
Public Deposits (including Exchequer, Savings Banks Commissioners of National Debt, and Dividend Accounts	6,965,466	Notes	9,215,960
Other Deposits	13,179,934	Gold and Silver Coin	781,298
Seven Day and other Bills	752,469		
	39,235,847		39,235,847

Dated the 20th September, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,609,969	Securities	29,160,589
Public Deposits	6,965,466	Coin and Bullion	16,379,758
Private Deposits	13,179,934		
	41,755,369		45,540,347

The balance of Assets above Liabilities being 3,784,978*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£65,091
An INCREASE of Public Deposits of	122,630
A DECREASE of Other Deposits of	282,729
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	237,679
An INCREASE of Bullion of	146,556
An INCREASE of Rest of	4,485
An INCREASE of Reserve of	93,141

The present Bank returns, although favourable, are not so much so as the abundance of money would have led us to anticipate. There is an increase in the public deposits of 122,030*l*; but the decrease in other deposits amounts to 282,729*l*. The decrease in other securities amounts to 237,679*l*, which is small considering the Bank rate of discount is full ½ per cent. higher than in Lombard street. The increase of the bullion amounts to no more than the Bank purchased during the week; still the fact of an increase is favourable, the more especially as the reserve of notes has also increased to the extent of 93,141*l*. The position of the Bank has greatly increased during the last few weeks, the reserve amounting to nearly one-half of the deposits.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 20,102,132	£ 19,703,885	£ 20,775,264	£ 21,919,055	£ 21,609,969
Public deposits	10,222,879	8,045,099	8,740,684	8,792,598	6,965,466
Other deposits	8,968,161	9,002,621	12,049,489	13,219,882	13,179,934
Government securities	14,433,230	10,693 653	10,980,686	11,220,018	9,663,511
Other securities	12,158,839	18,962 051	15,227,063	19 317,820	19,575,078
Reserve of notes & coin	11,949,358	6,762,345	12,593,110	10,587,304	9,997,258
Coin and bullion	16,811,698	11 188 500	19,134,065	17,192,169	16,379,758
Bank rate of discount	2½ p. c.	5½ p. c.	3 p. c.	2½ p. c.	4 p. c.
Price of Consols	96¼	90¼	97¼	95⅜	93⅛
Average price of wheat	42s 7d	56s 9d	41s 11d	41s 11d	62s 11d
Exchange on Paris (short)	25 27½ 32½	25 20 25	25 15 20	25 10 15	25 15 20
— Amsterdam ditto	11 19½ 12	11 16 18½	11 16 16½	11 14½ 15	11 13½ 14
— Hamburg (3 months)	13 10½ 10½	13 8 8½	13 8½	13 5½ 6	13 5½ 6

In 1850, notwithstanding the great influx of gold, it was remarked that the money market in New York had tightened. This was accounted for both in America and England from the great impulse the gold discoveries had given to trade, and consequently to the demand for money for trading purposes. Railways were beginning to recover from their depression on account of anticipated larger receipts from traffic consequent on the expansion of trade.

In 1857, it was announced that the gallant Havelock, after pausing at Cawnpore, had resumed his march for the relief of the beleaguered garrison of Lucknow. Meetings were being held all over the country in aid of the Indian relief fund. In India a 5 per cent. loan for 3,000,000*l* had been opened with poor prospects.

In 1858, the treaty of peace with China had been published in the Paris *Moniteur*. The Bank of France had lowered their rate of discount from 3½ to 3 per cent., but the Bank of England had maintained their minimum at 3 per cent., although the bullion had reached 19,134,065*l*, and the reserve 13,593,110*l*.

In 1859, the Bank rate of discount was at 2½, notwithstanding the bullion and the reserve were considerably lower than the preceding year, being respectively 17,192,169*l* and 10,587,394*l*, and the other securities had risen from 15,227,068*l* to 19,317,020*l*. The instalments on the Indian and Russian loans were in course of payment.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 3,190,678*l*; in 1857, a deficiency of 9,959,427*l*; in 1858, a deficiency of 3,177,579*l*; and in 1859, a deficiency of 6,097,938*l*. In 1860, the deficiency is 6,396,144*l*.

DISCOUNT AND MONEY MARKET.—The tendency of the money market is still towards ease. Bullion continues to be taken to the Bank, and the imports greatly exceed the exports. We may mention that the deposits of the Joint Stock Banks at the Bank of England were never larger than at present,—a certain sign of the difficulty in employing capital. The rate of discount is 3½ to ¾ per cent., but the demand is evidently falling off, both in Lombard street and at the Bank of England.

It must be remembered that this is about the middle of the shutting of the transfer books of the Bank, and money is being withdrawn from the public, and paid into the Bank. Generally speaking, this circumstance alone creates a temporary demand at the Bank, but nothing of the sort at present exists; indeed it is thought by many that if the Bank act on the principles of other banks, and lower or raise the rate of money according to the simple rules of supply and demand, that a reduction of the rate of discount might be very reasonably expected, for the Bank of England are certainly charging their customers full ¼ or ½ per cent. more than they could get their bills discounted at in Lombard street.

The rate of money in the Stock Exchange is 1¾ to 2 per cent.; but the transactions are very limited. About 160,000*l* in gold has been sold to the Bank.

We understand that advices are in town stating that, according to present arrangements, 6,000,000 of dollars, or 1,200,000*l*, might be expected by the next West India packet, and large remittances are expected from Australia.

The following are the rates of discount at

	Bank Rate. Per cent.	Open Market. Per cent.
Amsterdam	3	3
Berlin	4	4
Brussels	3	3
Frankfort	2	1¾
Hamburg	No Bank rate	2¼
London	4	3¾
Paris	3½	3
St Petersburg	5	6¼
Vienna	5	4

ENGLISH FUNDS.—The market for English funds is decidedly firmer this week, and a rise of ¼ per cent. has been the result. The public, however, are doing but little either by way of investment or speculation. Consols have risen from 93⅛ to 93¼ ⅜ for money, and from 93¼ to 93⅜ ½ for the account. Exchequer Bills are 1s to 4s pm., with but little business doing. Their stationary price, notwithstanding the abundance of money, is remarkable; but this may be accounted for by the limited market there is for them. The last price of French funds is 68.50, being a rise of ⅝ per cent. during the week.

The public seem to be seeking Canadian and Australian Government Bonds, and prices are gradually improving. There is a stagnation in the market for Indian securities, caused in a great measure by the question of the double income tax.

FOREIGN FUNDS.—The market for foreign funds has been steady but firm. Spanish Certificates have improved to 6¼ ⅜ under the impression that Spain must recognise them before she can expect to be recognised as a first-rate Power. Mexican Bonds have risen to 22, there being some expect-

ation that the large amount of dollars accumulated in Mexico on the bondholders' account may be remitted by the next packet. It is high time they were. Austrian Five per Cent. Stock is quoted 48½ and ⅝; the idea among many is that Austria may be induced to sell Venetia, and thereby wipe off the enormous deficit which exists in her finances.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day :—

	Consols for Money		Consols for Account		Exchequer Bills

Railways.—The transactions in railway shares have been considerable ; the most prominent feature has been a rise of 10 per cent. in the shares of the London, Chatham, and Dover line. South-Eastern shares are about 2¾ lower, in consequence of the competition that may be reasonably expected whenever the London, Chatham, and Dover line is opened. Lancashire and Yorkshire are about 2 per cent. higher, and York and North Midland are about 3 per cent. higher, and both have risen about 7 per cent. within three weeks. London and North-Western have been steady, but to-day have advanced about 1 per cent. Altogether the railway market has been very firm. Lombardo-Venetian shares have improved from 2 1¾ to 1⅝ discount, in consequence of an improvement in the continental markets.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day :—

Bullion.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes :—

Gold.—We subjoin list of arrivals since our circular of the 13th instant :—The Glasgow, from New York, with 44,000*l*; the Hammonia, from New York, with 53,000*l*; the Shannon, from West Indies, with 43,500*l*; the Arabia, from Boston, with 17,000*l*; the Vanderbilt, from New York, with 27,500*l*; the Maidstone, from Melbourne, with 195,000*l*; the Blue Jacket, from Melbourne, with 125,000*l*; the Pera (steamer) at Southampton, ex Ottawa, from Melbourne, with 13,000*l*. The City of Baltimore, from New York, is also announced : details not known as yet. About 148,000*l* of above has been sent to the Bank of England. An active demand for gold has existed for the last few days, and the Bombay steamer from Southampton, of 27th instant, will probably have a considerable amount on board. The exports comprise :—65,000*l* per Sultan, for Cadiz ; 30,000*l* per Peninsular and Oriental Company's steamer Ripon, for Mauritius ; 7,201*l* per ditto, for Madras. In addition to the Australian gold ships specified in our last, the following vessels are stated as loading, with the approximate dates of departure : — The Swiftsure, to sail about 7th August ; the Water Nymph, to sail about 18th August ; the Sussex, to sail about 23rd August. The probable amounts on board are not stated.

Silver.—The transactions in silver have not been extensive. The "Shannon," from the West Indies, brought 65,500*l*. The quality suitable for China was sold at 61½d per ounce standard. Sales have, however, been effected at 61⅜d per ounce standard subsequently. Even at this price the supply is very limited, the stock on hand being exceedingly small. The Ripon, which left Southampton on the 20th inst., had on board 83,377*l*, of which 6,200*l* was for Calcutta, and 77,177*l* for China and the Straits.

Mexican Dollars.—A few Mexican dollars have arrived per Vanderbilt from New York, about 20,000*l* in value. The market is inactive, buyers awaiting the large arrivals expected towards the end of the month.

Exchange on Bombay and Calcutta continues 1s 11¾d to 2s for banks' drafts at sixty days' sight ; bills with documents, 1s 11d to 1s 11¼d ; banks' drafts on Madras, 1s 11¾d.

India Government Loan Notes remain unchanged. A rise of 1½ per cent. is advised from Bombay in yesterday's letters, but this has not been followed by any improvement here, owing to the uncertainty caused by the question of double income tax. We quote 5 per Cents. 96¼, and 5½ per Cents. 102¼.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std ; bar gold, fine, 77s 9¼d per oz std ; bar gold refinable, 77s 11d per oz std ; Spanish doubloons, 76s 3d to 76s 6d per oz, last price ; South American doubloons, 74s 3d to 74s 6d per oz, last price ; United States gold coin, 76s 2½d per oz, last price. Silver—Bar silver, 5s 1⅝d per oz std, last price ; bar silver, containing 5 grs of gold, 5s 1⅞d per oz std, last price ; fine cake silver, 5s 6¼d per oz, last price ; Mexican dollars, 5s 2⅝d per oz, nominal ; Spanish dollars (Carolus), 6s 2d per oz, last price.

Failures.—Messrs Cartali and Co., merchants, of Manchester, have stopped payment, with liabilities computed at about 40,000*l*. The assets will probably yield 10s in the pound, but some persons are sanguine enough to hope for payment in full.

A meeting has been held of the creditors of Mr C. Underwood, wholesale grocer, of Covent garden and other places. His liabilities amount to 8,000*l*, while his assets do not show more than 5s or 6s in the pound. It was determined to place the estate in the Court of Bankruptcy.

An examination meeting at the Court of Bankruptcy took place on the 18th inst., in the case of Streatfeild, Laurence, and Mortimore, of London, and Laurence, Mortimore, and Co., of Liverpool, in the leather trade, when it was stated the joint balance sheet of the London firm, which extends from January 1, 1857, to July 21, 1860, shows liabilities amounting to 982,656*l* 10s 11d. The joint balance sheet of the Liverpool firm shows liabilities to the extent of 329,701*l* 9s 4d. The assignees, it appears, had no objection to the bankrupts being allowed to pass their final examination on the accounts received. The total debts and liabilities of the two firms were 920,395*l* 8s 10d, and the total assets were 195,245*l* 5s 4d. There were three separate estates. A surplus was shown on the separate estate of Mr Laurence of 30,807*l* 13s 3d ; of Mr Mortimore, 34,649*l* 8s 8d ; and of Mr Schrader, 4,889*l* 9s 5d ; making a total surplus of 70,355*l* 11s 1d. After the failure of the bankrupts their losses were estimated at 271,357*l*, but there had been additional liabilities in consequence of the stoppage from other firms not paying their bills of 462,464*l*. A statement as to how the bankrupts' affairs had been mismanaged will be reserved for the certificate meeting.

At a meeting of the creditors of Messrs Walter Howell and Co., the distillers, of Bermondsey, the statement of their affairs on the 27th ult., prepared by Messrs Coleman, Turquand, Youngs, and Co., gave the liabilities at 38,963*l*, and the assets at 13,235*l*. It was elicited during the remarks that Mr Green, who suspended some time since, was the principal creditor. After Mr Howell had dissolved partnership with Mr Hale he had a capital of 2,000*l*, but he owed that gentleman 3,175*l*, and another party 500*l*, and was consequently then insolvent. Since July, 1855, the profits had been 50,421*l* ; the trade expenses, 33,800*l* ; the bad debts, 13,315*l* ; and the private drawings, 9,246*l*. A proposition was made, after some discussion, of 6s 8d in the pound,

which was carried by a show of hands, as follows:—2s 4d in three months, 2s 4d in six months, and 2s in twelve months, the last instalment secured in the usual manner. A great deal of dissatisfaction was expressed at the large private drawings, and several creditors refused to accept the proposed composition at present.

The following is to prevent an old and respectable establishment—the Family Endowment Life and Annuity Society—from being confounded with a concern which has lately failed:—

Family Endowment Life Assurance and Annuity Society,
Chief office, 42, New Bridge street, London, Sept. 18.

Sir,—You would be conferring a great favour if you would make it known that this Society has not and never had any connection whatever with the "Mitre Life Assurance and Family Endowment Society" of Pall Mall, now in the *Gazette*. Notwithstanding the words "Mitre" and "Pall Mall," we are constantly being asked whether this is, or whether we have any connection with, the concern referred to, and among those, particularly in the country, who observe only the words "Family Endowment Society," there is an impression abroad calculated to do this office much harm.—I am, &c.,

E. H. Galsworthy.

Miscellaneous.—The recent volume of "Reports of Secretaries of Embassy" contains an account from Mr Ward of the finances of Holland. The total revenue for 1859 was 6,211,715*l*, including 1,146,711*l* derived from the East Indian colonies. There was also a balance of 2,468,125*l* accruing from former years, making the whole sum accounted for as income 8,679,840*l*. The expenditure was 8,422,400*l*, including the extraordinary credits granted for the army and navy in consequence of the augmentation required by the state of Europe during the past year, and an appropriation of 1,338,532*l* to the redemption of the national debt. On the whole, the finances and trade of the country for the year presented a satisfactory average, although great loss and anxiety were occasioned by the heavy depreciation of Austrian securities, more than 40,000,000*l* of which are believed to be held by Dutch capitalists. The price of that portion on which the interest is not payable at Amsterdam, but at Vienna, declined from 77⅜ in January, to 31½ in May, while of that of which the dividends are payable at Amsterdam the range was from 87 in January, to 47 in May. Subsequently, however, there was a recovery, and these stocks at the end of the year stood respectively at 57 and 74⅞. The interest on the national debt of Holland now amounts to 2,576,384*l*, and the capital is as follows:—

	Florins.
Two-and-Half per Cent.	709,703,970
Three per Cent.	107,868,143
Three-and-a-Half per Cent.	17,958,000
Four per Cent.	208,573,600
Ditto (colonial debentures)	13,420,500

The only description of manufactured goods the produce of Netherlands industry exported to any extent is that of cotton piece-goods, and the only market for them is the Netherlands possessions in the Eastern Archipelago, where they are protected by differential duties.

The first importation of Continental hops of the growth of 1860 has arrived, consigned to Messrs Woolloton, and have been sold for brewing purposes at 14*l* 14s per cwt, duty paid. The quality and flavour are alleged to be excellent, and the curing appears to be as perfect as that of British hops. In consequence of the small crop this season in England, and the excessive prices expected, a large importation of foreign will take place, their strength and condition having been tested by consumers in 1854, the last year in which any considerable imports took place. On the 1st of January next, the Customs duty on foreign hops falls from 45s to 20s per cwt, being only 6s per cwt in excess of the excise chargeable on British hops of this year's growth.

The Agents General for the Crown Colonies notify that they have been authorised by the Government of the Cape of Good Hope to receive tenders until the 9th October for Six per Cent. Debentures to the amount of 200,000*l*; 100,000*l* is to be redeemed at the expiration of twenty years from the date of issue, and the remaining 100,000*l* at the expiration of thirty years from the same date. The debentures are for sums of 100*l* each. Principal and interest are payable in London.

Messrs Glass, Elliot, and Co., have manufactured about 1,000 miles of telegraphic cable to be used between Rangoon and Singapore. The distance is about 800 miles, but allowance has to be made for "slack," and for any casualties that may arise. In has not been finally decided, however, that the cable shall be laid between those points, although the idea of submerging it between Falmouth and Gibraltar appears to have been altogether abandoned by Government.

A special meeting of the General Discount Company was held on Wednesday, in order to take into consideration the winding up of the Company, and to receive the report of the Committee of Investigation who were appointed to aid the Directors in determining the course the Company ought to adopt in consequence of the heavy losses it had sustained through the failure of the houses in the leather trade. The report stated that the Company might consider their losses would absorb the whole of the unencumbered capital of the Company. The liabilities on bills discounted had now been reduced to about 30,000*l*, and under these circumstances it was considered advisable to make a voluntary subscription of 1*l* 10s a share; the contributions thus raised would meet the present liabilities, and a future meeting could decide in what way the Company might be remodelled. The report was unanimously adopted.

Messrs Baring Brothers and Co., and Glyn and Co., notify that they are now ready to commence the delivery of Canadian Consolidated Five per Cent. Bonds in exchange for the provisional receipts issued for that portion of the debt which was converted ex the July dividend.

The London and Westminster and London Joint Stock Banks announce the half-year's interest due Oct. 1 on Victoria Government Debentures.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about at par, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424½ per mark, and the short exchange on London is 13.4⅛ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 109⅞ per cent., which, when compared with the Mint par between the two countries, shows that the exchange is slightly in favour of England; and, after making allowance for charges of transport and difference of interest, the present rate leaves a small profit on the importation of gold from the United States.

The Commercial Times.

ACCELERATION OF MAILS TO AND FROM IRELAND, AND ALTERATION IN THE HOURS OF POSTING CORRESPONDENCE FOR IRELAND.—On the 1st October, and thenceforward, a day mail will be despatched to Ireland, Sunday excepted, by a train leaving Euston Station at 7.30 a.m., and will be due in Dublin in time for a late delivery the same evening, and in time to admit of correspondence for the provincial towns in Ireland being forwarded by the night mails out of Dublin the same evening. This mail will be in lieu of that now forwarded by the 5 p.m. train from Euston Station. A day mail will leave Dublin at 6.30 a.m., and will be due in London, Sundays excepted, in time for the last evening delivery, and in time for the night mails out of London. The mail which now leaves Dublin at 1.30 p.m. will be discontinued. The night mail to Ireland will be despatched from the Euston Station by a train at 8.30 p.m., and will be due in Dublin in time for an early morning delivery instead of for a mid-day delivery as at present, and in time also for the day mails out of Dublin. The evening mail which leaves Dublin at 7 p.m. will also be accelerated so as to be due in London in time for an earlier delivery on the following morning, and in time for the day mails out of London.

LETTERS FOR BRAZIL BY FRENCH PACKET FROM BORDEAUX.—On the 1st October next, and thenceforward, letters addressed to any part of Brazil, when forwarded by French packet from Bordeaux, may either be paid in advance to their place of destination, or the postage may be left to be paid on delivery of the letters, at the option of the sender.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The show of English wheat at Mark lane, to-day, was very limited, and most of the samples were in poor condition. The few fine dry qualities on offer were disposed of at 1s per quarter above Monday's currency; but other kinds changed hands slowly at that day's decline in value. Foreign wheat, the supply of which was moderately extensive, was in fair request, at 1s per quarter more money. All kinds of spring corn commanded extreme rates, with a good consumptive inquiry. The flour trade was steady. The imports from abroad have been liberal, viz., 26,510 quarters of wheat; 750 barley; 10,740 oats; 6,420 sacks and 32,270 barrels of flour.

At Liverpool, this morning, produce, generally, was on the advance in price.

The following report of the grain trade, dated Sept. 11, is forwarded by Messrs Briggs and Co., of Alexandria:—

The accounts of finer weather in England that have reached us since our last advices of 5th inst., together with the scarcity of money, and the excessively high rates of freight, have brought about a material decline in the value of all descriptions of grain and pulse. Linseed, on the other hand, is well sustained, with receipts comparatively small, and upward tendency in prices. The following are the sales since our last, and present value, free on board:—Wheat—Saide, 14,120 qrs, 36s 6d to 37s 6d; Behera, red, 7,870 qrs, 34s to 35s 6d; ditto, white, 728 qrs, 36s to 37s 4d: beans—Saide, 3,400 qrs, 26s 2d to 26s 10d; Behera, 1,340 qrs, 24s 6d to 25s 2d: barley, 1,420 qrs, 19s to 20s; lentils, 740 qrs, 26s 6d to 26s 9d; peas, 50 qrs, 25s to 26s; ceci, 130 qrs, 33s; linseed, 820 qrs, 42s to 44s per qr. Freights—Beans to the United Kingdom for orders, 7s 9d to 8s per qr, and other grain or seed in proportion; to a direct port, 7s to 7s 3d; grain to Liverpool by steamer, 8s; cotton, 5-16ths by sailing vessel, ½d by steamer.

Last week's excitement in the Liverpool cotton market has subsided, although the transactions since last Friday amount to 56,000 bales, of which spinners took 34,000 bales, speculators 15,000 bales, and exporters 7,000 bales. Quotations are unaltered. The sales were swelled by speculative purchases of American houses: if they were not by holding large stocks much interested in keeping or raising prices, their operations might have influenced a feeling that the coming crop had suffered seriously, but it seems the caution of spinners buying this week shows that rather the reverse opinion prevails. The surplus of this year's receipts will prove about 900,000 bales over last year's crop. Considering now that the consumption in America and the Continent has not increased since 1859, and the deliveries in this country are only 250,000 bales more than last year, the new season will open with a surplus stock of 650,000 bales. The present gigantic crop is the result—first, undoubtedly, of favourable weather, then increased land under cultivation, and the use of guano to assist exhausted soil. Quite six weeks ago no complaints of any kind were reported; then it was said the drought had done damage in the higher lands, which gave a stimulus to the market, and prices rose gradually ¼d to ⅜d per lb. Beneficial rains had meantime set in, and the reports are decidedly more favourable, particularly from the most important districts of New Orleans; these better accounts are borne out by the quietness in the American markets. However, if the high lands produce less, will that not be made up by new land and improved cultivation? If, however, the drought damage should be larger, then the 650,000 bales surplus stock will assist an in-

creasing consumption. If an early frost should not much curtail this year's production, no fear ought to be felt for a full supply all throughout the next season, and thereby a moderate scale of prices prevail.

In reference to the figures published last week, on the subject of the increase in the new crop of cotton, we may observe that from an error on the part of the printers the estimate was set down at 100,000 instead of 800,000 bales, the latter being the nearest increase.

Messrs Volkart Brothers, of Bombay, writing on the 24th ult., observe :—

No change of importence has occurred in the position of cotton; buyers for Europe are doing next to nothing, and prices would no doubt have gone down considerably if the finer qualities had not been in some demaod for the China market. Notwithstanding the dull accounts received by last steamer, the natives continue shipping to that market, and as our stocks contain very little good cotton, holders naturally show more firmness. Thus the few lots of finer quality which were purchased, fetched higher prices than those last quoted, whilst on the other hand common descriptions have been quoted 5 to 6 rs below our former quotations. Some speculation has shown itself latterly, and purchases were made at full prices, but the influence of such transactions will only be temporary as long as the Europesn and Chinese advices remain of the same tenor as the last. Advices from the cotton districts speak well of the young plant: ample rains have fallen, though rather later than usual, and the natives expect to make a good crop. Stocks on the spot amount to about 15,400 candies, or say 31,000 bales. The sales of the fortnight amount to 2,100 candies, of which 1,900 candies for China.

The public sales of tea held this week have gone off heavily, and prices have given way 1d to 2d per lb. By private contract, very little is doing, and the quotations have a drooping tendency.

For good and fine raw sugars, there has been a moderate inquiry, on former terms; but other kinds have sold heavily, at barely stationary prices. Refined goods are very dull.

We have no change to notice in the value of any kind of coffee; but dealers, generally, have purchased for immediate wants only. The Dutch Trading Company's sale of 557,022 bags Java and Padang, held at Amsterdam on Thursday, is reported by telegraph to have gone off at the full valuations, especially for the qualities under 40c, those above that price selling more moderately; good ordinary 39½c, the price of which at the spring sale was 38½c to 39c.

DISTRIBUTION of the CEYLON COFFEE CROP EXPORTED from CEYLON, from 1st October, 1859, to 15th August, 1860.

	Plantation. cwts.	Native. cwts.	Total. cwts.

Total	447,402	154,195	601,597

The upward movement in the value of wheat has produced considerable activity in the rice market. Prices have advanced 3d to 6d per cwt, with a good consumptive inquiry.

Public sales of wool commenced at Liverpool on Wednesday. Their progress is thus reported by Messrs Ronald and Son:—"There is a good attendance of both home and foreign buyers. The English wools went on the average a little lower than at the last sale in July. For East India there is a fair competition, and prices have opened about on a par with our last sales' rates, except for greys of all kinds, which show an advance of from ½d to 1d per lb."

Hemp, flax, indigo, and saltpetre have changed hands slowly, on former terms.

Most descriptions of fruit have met a dull inquiry, on easier terms, new Valentia raisins having sold at 31s and 30s per cwt.

Scotch pig iron is steady, at 51s 6d to 51s 9d cash, mixed numbers. Manufactured parcels support previous rates.

"The excitement and feverishness which characterised the money market at the close of last week and the commencement of this," observes the New York *Shipping List* of the 8th inst., "have quite subsided, and things appear to be returning again to their old level. We learn that the leading banks are favouring the policy of moderate contraction, and in so doing there is no doubt they are acting in perfect accordance with the views of the great majority of the commercial community. Outside of bank the best selections of double-name paper, having from 60 days to 4 months to run, are done at 6½ to 7. Dry goods paper is sparingly offered at 7 per cent., while single-name produce paper is reported "done" at say from 7½ to 8 per cent. The quotations below, however, must be considered the best criterion of the general market:—

	Per cent. per annum.
Loans on call, stock securities	6 to 6½
Do. other good securities	6½ 7
Prime endorsed bills, 60 to 90 days	7 7½
Do. 4 to 6 months	7½ 8
First class single signatures	6½ 7½
Other good bills	9 9½
Names less known	10 10½

Foreign imports continue moderate for the season—and probably not to any considerable extent either in advance of the prospective necessities of the country, or of its ability to pay for what it purchases. The following table shows the dry goods movement for the week, compared with the corresponding period last year:—

FOR THE WEEK.

	1859 dols		1860 dols
Entered at the port	2,097,925	.....	2,005,720
Thrown on market	2,094,724	.....	2,144,607"

Linseed oil has become less active, at 30s 6d per cwt on the spot. The transactions in other oils have not been extensive. The tallow market has continued steady. To-day, P.Y.C. on the spot has changed hands at 52s 6d; October to December, 52s 6d; January to March, 53s; March only, 53s 6d per cwt.

The market for this staple remains without noticeable change. A little more business has been done, however, but prices still tend in favour of the purchaser. The sales for the three days' aggregate 5,300 bales, closing quietly. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	7	7	7	7¼

In the early part of the week the cotton market was quiet, and prices were perhaps a little in favour of the buyer. During the last few days, however, a very good amount of business has been transacted, both by the trade and by speculators, and any slight concession has been again withdrawn by holders. We make little or no change in our quotations for American. Egyptians of medium and better quality have been more saleable and somewhat firmer. Brazil maintain last week's rates. East India have been in fair supply, but have been bought freely by consumers at steady prices. The sales to-day are 10,000 bales. A firm market The reported export amounts to 6,580 bales, consisting of 2,880 American, 150 Brazil, and 3,550 East India. Vessels arrived and not reported—1 from North America, 1 from Bahia, and 1 from Bombay.

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for goods for shipment to India still continues limited; and, in some instances, prices have had a drooping tendency. For China and the Continent, however, a fair business has been passing, and the home trade generally continues remarkably healthy, at full quotations. The stocks in warehouse are only moderate for the time of year. Hardware has commanded rather more attention, and the market for iron has shown some signs of improvement. Coals keep up in price; but the transactions for home use have not increased.

MANCHESTER, Sept. 20.—The market has been firm, but less has been done. The chief sales have again been on speculation for China, and for 16's to 24's and 30's water large orders have been given out. Shirtings for the same market have also been considerably wanted, but pre-engagements in this department, along with the India accounts, have rather restricted business comparatively with yarns. The severe depression reported from India has prevented buyers from following up their purchases of the preceding fortnight, and sellers are generally quoting higher prices than could be obtained. A rally, however, is now currently expected ere long from the East. Demand for other quarters has been less active, but to no very appreciable extent.

COMPARATIVE STATEMENT OF THE COTTON TR[illegible]

BRADFORD.—There is again a good deal of business doing in the wool trade. Prices are still quite firm—some say a shade firmer. The market for yarn just now exhibits considerable animation. Spinners are already well employed on orders for Russia, &c., which will not expire till beyond the middle of next month. There is a little more life in the piece trade than was the case a few weeks ago, but not that animation usual at this season of the year. Goods, however, can be bought for quite as little money as last week.

HALIFAX.—A considerable quantity of wool has changed hands within the last few days. While the yarn trade can hardly be said to be brisk, yet a fair amount of business is doing. The piece trade continues dull, but with slightly improved prospects. The carpet trade here is also rather slack at present.

HUDDERSFIELD.—We have had a very quiet market. Prices about the same.

LEEDS.—The woollen markets in both the Cloth-halls have been rather quiet. The general condition of the trade of the district continues satisfactory, and there is no lack of employment. Stocks of goods are not in excess of what is usual at this period of the year, but they are fully to an average extent. Prices both of wools and cloths remain firm at late quotations.

ROCHDALE.—The wool market has been dull. The flannel trade continues steady, the manufacturers being well employed, and having a fair amount of orders on hand. Fine Saxonies are more plentiful in the warehouses, and constitute about the only exception to the general lowness of stocks. Yorkshire goods sell well, and prices are firm.

LEICESTER.—The hosiery trade continues quiet, there not being much doing for home consumption. In the country districts trade is extremely dull. Yarns are selling at late prices, and the wool market continues firm at high prices for good qualities.

NOTTINGHAM.—There is a little more doing this week in some branches of the cotton lace trade. Several buyers are in the town, and some orders have been given. The Germans are operating more liberally. In the home branch there is no reaction, and matters remain very dull. There continues to be very little demand for plain stiff goods; a little is doing in Mechlin edgings, and in the cotton fancy trade orders are being executed for muslins and plaits. Manufacturers are working up their stocks, and finishing as little as possible. In hosiery there is no improvement to note; nearly every branch is quiet.

GLASGOW.—The wool market has shown great steadiness, and more inquiries have been made for the various classes than for some weeks back. Spinners appear more inclined to supply themselves, and prices are in favour of the seller. Laid Highland is in good demand, first-class lots especially being easily saleable. Cheviot is in better request this week than at any time during the season. Some good orders have been taken for the best qualities.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*; and all other sorts in proportion. Welch bars, 5*l* 10s to 5*l* 12s; rails, 5*l* 5s.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, SEPT. 8.—FLOUR AND MEAL.—The active movement in State and Western flour, mentioned in our last review, continued on Wednesday, when transactions were moderately heavy at an appreciation in values of about 5 cents per bbl. The European advices, subsequently received, were considered very favourable, and led to an active demand for export, when the sales were very heavy at a further advance of 10 to 15 cents per bbl

There was some abatement in the inquiry yesterday, however, though prices again advanced, and the market was very firm at the improvement. Transactions since Tuesday comprise 70,000 bbls, including 18,000 yesterday, the market closing buoyantly. Canada flour has also been very active, at an advance of 15 cents per bbl on the lower grades; the sales aggregate 3,300 bbls, of which 1,300 were placed yesterday, at 5.65 to 7.50 dols per bbl. Southern flour has likewise been actively sought after, and nearly all kinds are from 10 to 20 cents per bbl higher. Transactions have been heavy, comprising 14,000 bbls.

EXPORT, from 1st to 31st August.

	1860 barrels	1859 barrels
Wheat Flour	338,571	75,006

EXPORT, from 1st January to 31st August.

	1860 barrels	1859 barrels
Wheat Flour	918,441	395,498

GRAIN.—The demand for all kinds of wheat has been unusually active during the past three days, and transactions have been on a very extensive scale, amounting in the aggregate to nearly half a million of bushels, notwithstanding the fact that sales have been somewhat restricted by the limited supply offering, and the extreme firmness of holders. A good inquiry has come from the local millers, who have bought pretty freely, but by far the greater portion has been taken for shipment. The sales since Tuesday, reported on 'Change, amount to 450,000 bushels, of which 152,200 changed owners yesterday, including 49,000 winter red Western at 1 dol 36c to 1 dol 40c; 18,000 unsound ditto, 1 dol 32c to 1 dol 34c; 6,800 white Michigan, 1 dol 56c to 1 dol 60c; 43,000 unsound white Ohio and Indiana, 1 dol 30c to 1 dol 40c; 27,000 Chicago spring, 1 dol 23c to 1 dol 27c; 2,800 unsound white California, 1 dol 10c; and 5,600 common white Canada, on board Liverpool steamer, at 1 dol 36c—freight 16d. The market closed quietly with a limited demand. The demand for corn has also been active, and the sales are heavy at an advance of 2c to 3c per bushel on Southern, and 3c to 5c on Western; transactions for the three days comprise 292,000 bushels, including 65,000 yesterday, closing heavily at 72c to 74c for Southern yellow, 68c to 69c for mixed ditto, 73c to 74c for round ditto, 70c to 75c for ditto white, 68c to 69c for Western mixed, afloat, 70c for ditto in store, 73c for Western yellow, and 67c to 68c for unsound.

EXPORT, from 1st to 31st August.

	1860 bushels	1859 bushels
Wheat	1,742,864	14,184
Corn	147,371	16,729

EXPORT, from 1st January to 31st August.

	1860 bushels	1859 bushels
Wheat	4,604,897	45,126

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Only moderate supplies of home-grown wheat have been on sale in the leading markets of consumption held this week, and the new qualities have mostly appeared in very poor condition. Old samples have changed hands steadily, at an advance in the quotations of fully 1s per quarter; but new have moved off heavily, at 2s to 3s per quarter less money. Millers have purchased foreign wheat somewhat freely, on rather higher terms. New barley has moved off steadily, and prices have had an upward tendency. The malt trade has become rather heavy; nevertheless, no quotable change has taken place in value. Oats have commanded rather more money, with a good consumptive inquiry. Both beans and peas have realised previous rates, and the flour trade may be considered steady.

The changeable state of the weather has materially interfered with the progress of harvest operations. This week, the quantity of grain secured has been very moderate, especially in the North, and some ten days must yet elapse ere the whole of the wheats are secured. For the most part, the crop is in very damp condition. The bulk of the Spring corn crops is now secured, and, on the whole, the produce is reported as a fair average one. In Ireland and Scotland, there are no indications of further progress in the potato disease.

Most of the continental markets have become much less active for wheat at drooping currencies. Barley and all other articles, however, have moved off steadily at full prices. The latest advices from the United States are to the effect that immense quantities of produce were in progress of shipment to England, and that the quotations generally were on the advance.

In Ireland, the transactions in wheat have been somewhat restricted; nevertheless the quotations have been supported. All other articles have moved off slowly at very full prices.

The Scotch markets have been steady, but by no means active, for wheat at full currencies. Otherwise the trade has been in a healthy state.

The supply of English wheat in to-day's market was very limited. Fine dry samples sold at 1s per quarter above Monday's rates, and the value of other kinds was well supported. Foreign wheat moved off freely at 1s per quarter more money. Spring corn commanded extreme rates, and there was a fair average demand for flour.

The state of the floating trade is reported by Mr E. Rainford, as follows:—Since the 12th inst. there have been 76 arrivals off coast for orders, consisting of 48 cargoes of wheat, 2 rye, 18 maize, 4 barley, 1 oats, 3 beans, viz.:—Wheat, 11 from Odessa, 7 Marianople, 10 Taganrog, 8 Berdianski, 1 Trieste, 2 Leghorn, 1 Philadelphia, 4 New York, 1 Galatz, 1 Constantinople, 2 Alexandria; rye, 1 Reni, 1 Galatz; maize, 7 Ibraila, 1 Yiazit, 4 Galatz, 2 Sulina, 1 Ordon, 3 Constantinople; barley, 2 Ibraila, 1 Taganrog, 1 Sulina; oats, 1 Odessa; beans, 2 Mazagan, 1 Darel-Kaider. Of these 18 were previously disposed of. A good business has been done in floating cargoes since this day week at the following improving prices:—Wheat, arrived, Marianople at 55s 6d to 58s; Berdianski at 56s 10½d to 57s; Taganrog Ghirka at 53s to 55s 3d; Odessa Ghirka at 55s, and 51s (imperfect); hard Azoff at 53s, all per 492 lbs; Galatz at 50s, and Danube at 49s 6d per 480 lbs; Saide, 44s 9d per imperial quarter; on passage, Taganrog Ghirka at 53s and 55s, and hard ditto at 52s 6d per 492 lbs; Sandomirka at 54s and 55s per 480 lbs; Saide, 3,000 qrs at 43s per imperial qr; now shipping, Taganrog Ghirka at 54s 6d per 492 lbs. Rye, arrived, Reni (damaged) at 30s per 480 lbs. Maize, arrived, Galatz at 34s 3d to 35s 3d; Galatz and Racova at 34s 3d; Racova at 34s 9d; Ordon, at 34s, all per 492 lbs; Ordon (much discoloured and heated) at 32s per 480 lbs; Ibraila, 9 cargoes, at 32s 6d to 33s 10½d per 480 lbs; on passage, Galatz at 35s 6d per 492 lbs; Ibraila at 33s; ditto 12,000, qrs at 33s 9d per 480 lbs. Barley, arrived, Galatz (imperfect) at 27s 3d; just shipped, Egyptian at 28s per 400 lbs. Oats, arrived, Odessa at 20s 6d; Ibrail (imperfect) at 18s per qr. Beans, on passage, Mazagan, 36s 6d, and Barbary equal to 36s 6d per 480 lbs.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—There has been an entire absence of activity in the market this week, and prices have rather tended downwards; upon the whole, however, little change was perceptible at the public sales up to yesterday. Transactions in West India reached 1400 casks. 250 casks Barbadoes by auction found buyers at 36s 6d to 42s for brown to middling yellow, and 42s 6d to 46s 6d for good middling to fine; grainy Berbice brought 40s to 46s per cwt. The deliveries last week were 5,025 tons, making a total increase for consumption of 11,925 tons from the commencement of the year to this period. Present stock 72,100 tons, against 80,350 tons in 1859 and 77,000 tons in 1858 at the same period.

Mauritius.—8,830 bags found buyers as follows: grey, 38s 6d to 41s; brown, 32s 6d to 38s; grainy, low to fine, 42s 6d to 47s 6d per cwt.

Bengal.—550 bags soft grainy yellow sold at 41s to 42s per cwt.

Madras.—3,715 bags were about two-thirds sold: native brown to good yellow, 32s 6d to 36s 6d; pasty brown, 30s to 31s; dark Jaggery bought in at 31s per cwt.

Foreign.—Of 2,200 bags Siam, rather more than half sold: soft to fine yellow, 42s 6d to 46s. 7,834 bags Manilla were bought in at 38s to 39s. 3,270 bags China partly sold at 39s to 41s 6d for low to good middling yellow. 332 bags Natal: brown, 33s to 36s 6d; yellow, 38s 6d to 42s. 410 hhds 164 barrels Porto Rico went from 38s 6d to 40s for brown, and 41s to 46s 6d for low to fine yellow, part only being sold. 350 casks Cuba were partly realised at 37s 6d to 42s 6d. Of 3,443 boxes Havana, about 1,000 sold at 37s 6d to 43s 6d for brown and yellow; the grainy kinds bought in ranged from 41s to 48s 6d; one lot white, 18s 4d duty, at 52s. A floating cargo of low white Havana has sold for Russia at 32s 3d; one yellow, No. 13½, at 30s, for the Baltic; one, No. 7½, at 26s, for a near port; one, No. 9, 26s 6d, for Liverpool. A cargo of Cuba muscovado for the United Kingdom is reported at 26s 6d. On the spot, 2,000 boxes of Havana have changed hands, and 1,400 baskets Java; the latter at 44s per cwt for strong grey.

Molasses.—A good demand prevails for West India at the recent advance. Barbadoes and fine Antigua sold at 20s; other kinds, 18s to 19s. A floating cargo of Cuba muscovado is reported at 18s 9d per cwt for the United Kingdom.

Rum.—Several sales have been made at previous rates for West India, and 450 casks Bengal brought 1d advance, viz., 1s 7d. Good Demerara sells at 1s 10d to 1s 10½d; Leewards, 1s 7d to 1s 7½d proof, and Jamaica continues in steady demand.

Cocoa.—No transactions of importance have taken place in West India this week.

Coffee.—There has not been any change in the market, and the mode rate supplies brought forward obtained former rates. The Netherland Trading Company's sale at Amsterdam yesterday was reported to have gone off at the valuations to a ½ cent above. The 121 casks plantation Ceylon offered here on Wednesday sold at 69s to 73s for fine fine ordinary to middling. 1,028 cases 64 casks East India partly sold: Neilgherry, 66s to 72s 6d; Wynard plantation, 70s 6d to 72s 6d. A cargo of Rio has sold for a near port at 60s per cwt.

Tea.—The public sales have been the chief feature of interest to notice this week, and at these lower prices ruled in many instances, particularly for red leaf and Kalsow congous, which were ½d to 1d cheaper. Oolong and scented orange pekoe showed a decline of 1d to 1½d per lb. Of 30,627 packages in the catalogues, 19,230 were printed without reserve. About 16,000 had passed to yesterday (Thursday), leaving 6,300 packages for this morning. Subsequently the demand showed greater animation.

Rice.—A very large business has been done, partly on speculation, at fully 3d to 6d advance, but yesterday the demand was scarcely so animated as at one period during the week. On the spot, soft grain kinds have sold freely at 9s 9d to 10s 9d for old; 11s 3d for new Necrancie Arracan; white Bengal, 12s to 15s 3d; and pinky Madras, at 11s to 11s 3d. Seven floating cargoes of Necrancie Arracan have sold latterly at 11s 3d to 11s 6d, new conditions, without guarantee of quality, and two of Rangoon, at 11s 3d to 11s 6d per cwt.

Imports and Deliveries of Rice to September 15, with Stocks on hand.

	1860. tons	1859. tons	1858. tons	1857. tons
Imports	21000	17700	70000	48800
Deliveries for home use	45220	20200	26230	22820
Exported	8400	14450	16000	33250
Stock	43100	69000	91110	47300

Sago.—A small parcel of fair medium grain realised 16s per cwt.

Sago Flour.—169 bags went at 15s 6d to 16s for good quality, being a decline of 1s per cwt. 7,000 bags are declared for sale next week.

Spices.—316 cases brown nutmegs sold at full prices: low small to good bold brown, 1s 3d to 2s 5d; a few lots extra bold, 4s to 4s 1d. 47 cases mace brought the previous value: more or less worm eaten, 8d to 1s 3d; sound, middling to very good, 1s 4d to 1s 9d. 29 cases Penang cloves, 1s 2½d to 1s 4½d. 10 casks Amboyna, 4½d to 4¾d. 578 bags white pepper: Singapore, common to fine, 6d to 6½d; good white Penang, 6½d. 402 bags pimento partly found buyers at easier rates: from 3½d to 3¾d. 2,038 bags Sumatra black pepper realised 4¼d to 4½d. 107 packages Alleppy realised 4¼d per lb. 900 cases 700 bags Cochin ginger: ordinary to very good bold, 44s to 75s; wormy, 39s to 51s, being again rather cheaper. 483 bags African sold steadily at 35s to 35s 6d; and 446 barrels Jamaica went 3s to 5s cheaper, from 62s to 131s for ordinary to good. 13 cases cassia buds realised 9*l*. Cassia lignea is firmer at 85s to 90s per cwt.

Saltpetre.—A few small parcels of Bengal have sold at previous rates, but the market is now flat. By private contract, refraction 11¾ to 2¼ realised 39s 6d to 44s. 1,075 bags at public sale were taken in: refraction 6¼ to 3¾, 43s to 44s. 570 bags Bombay realised 38s per cwt, refraction 4½ to 4¼ per cent.

Imports and Deliveries of Saltpetre to September 15, with Stocks on hand.

	1860. tons	1859. tons	1858. tons	1857. tons
Imported	9700	13570	7300	13100
Delivered	9200	12660	10300	8750
Stock	4300	3860	3160	6350

Cochineal.—The market remains without change. 95 bags chiefly found buyers as follows:—Teneriffe silver, 3s 1d to 3s 2d; black, 3s 4d to 3s 6d; Honduras silver, 3s to 3s 3d per lb.

Other Dyestuffs.—570 bags Cutch were bought in at 27s. Gambier sells slowly at the previous quotations. 88 bales Bengal safflower were bought in above the value: middling to good, 7*l* to 10*l*; but since partly sold. 450 bags Bengal turmeric were held at 14s per cwt.

Dyewoods.—Two cargoes of St Dominge logwood have been sold at 5*l* 10s. By auction, 36 tons Cuba were bought in 9*l* 10s, and 90 tons Brazil at 55*l* to 85*l* per ton for second and first piles.

Lac Dye.—163 chests partly sold: fair to good marks, 1s 2d to 1s 6d; ordinary to middling, 4d to 11d per lb.

Rubber.—A small parcel of good East India in public sale realised 2s 1½d. Privately, 2s 1d has been paid for a moderate quantity, and 1s 11d per lb for arrival.

Jute.—The market remains quiet, and there is very little business reported by private contract this week.

Metals.—The sales in most descriptions have been of very moderate extent, but general quotations remain unchanged. Scotch pig iron, however, closes firmer at 51s 6d to 51s 9d for mixed numbers. No business is reported in spelter, but the market remains firm. Other metals have been quiet. Tin remains firm, but the transactions are limited: Straits, 132s; Banca, 136s 6d to 137s. British steady. The recent advances in copper have rather unsettled the trade.

Turpentine.—4,350 barrels rough turpentine sold during the week at 9s ex *ship* for new. Spirits remain dull, and American can be obtained at 31s 6d per cwt.

Linseed.—The market has been rather active. On the spot good Bombay sells at 57s 6d; Calcutta, 55s 6d to 56s. Large sales have been effected afloat, including Bombay off the coast at 58s 6d; Odessa and Taganrog, 54s 9d to 55s: Calcutta, 55s per quarter.

Oils.—Very limited sales have been made in olive this week: Gallipoli, 60*l*; other kinds 55*l* to 57*l* 10s per tun. Nothing of interest has transpired in sperm or common fish oils. Linseed at one time this week commanded 31s, but has since receded to 30s 6d in all positions. Rape has sold to a moderate extent at rather lower prices: foreign refined, 45s 6d to 46s; brown, 43s. Palm finds ready buyers at 45s to 45s 6d for really fine parcels of Lagos. The market for cocoa-nut is exceedingly firm: good Cochin, 49s; Ceylon, 47s per cwt.

Tallow.—Rather a firmer tone has pervaded the market, and prices of foreign have advanced about 3d. The market is, however, entirely free from excitement. This morning 1st sort Petersburg Y.C. may be quoted 52s 3d to 52s 6d on the spot and to the end of the year; 53s per cwt for January to March.

Particulars of Tallow.—Monday, September 17.

POSTSCRIPT. Friday Evening.

Sugar.—There was not any change in the market to-day. West India sold rather slowly by private contract, but 196 casks Barbadoes at public sale went off with spirit at 38s to 43s. Week's transactions, 1,820 casks. 553 bags Mauritius brought the valuations, and 3,972 bags Madras Jaggery, 31s 6d. A cargo of Havana, No. 12 to 12½, has sold for the United Kingdom at 28s per cwt.

Coffee.—675 cases 131 casks 71 bags East India went at full prices: Neilgherry, fine, 84s 6d to 88s 6d; pale to middling, 68s to 73s 6d; Wynard plantation, 69s to 72s; the latter partly sold. 99 casks 67 brls and bags plantation Ceylon brought the full valuations.

Cocoa.—118 bags Trinidad partly sold at 90s to 93s 6d per cwt for fine.

Tea.—The sales concluded to-day. Of 6,400 packages which passed, 5,925 sold at better prices than previously obtained for congous.

Rice.—By auction, 1,389 bags old white Bengal sold from 12s 6d to 14s for middling to good, rather broken. A cargo of Rangoon sold at 11s 6d, and 5,000 bags pinky Madras at 11s 9d per cwt.

Saltpetre.—700 bags Bengal sold privately at 6d decline, including fine at 43s 6d per cwt.

Cochineal.—295 bags only partly sold at rather lower rates. Honduras silver, 3s to 3s 7d; black, 4s 6d to 4s 11d per lb.

Cutch sold at 26s to 26s 6d per cwt, being cheaper.

Lima Wood.—820 tons were taken in at 11*l* 10s to 12*l* per ton.

Oil.—724 casks palm partly sold at 45s to 46s 3d. Several parcels cocoa-nut went rather dearer: Cochin, 47s to 49s 6d; Ceylon, 47s to 47s 6d; Sydney, 42s 3d to 49s per cwt. Sperm partly sold at 104*l* 15s to 105*l*; Southern, 32*l* to 34*l* per tun.

Tallow closes without further alteration.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been neglected; prices show a downward tendency. Lumps dull at 49s. Treacle scarce and in good demand. For export, some sales of 6 lb loaves have been made at 39s in tierces. Several parcels of Dutch crushed have been sold this week of B & H, No. 1, at 32s 10d; V O, 32s 9d; and S & T superfine, at 33s 3d, all in barrels f. o. b. in Holland.

GREEN FRUIT.—Little business doing; stock of all kinds light. The invoice of Malaga lemons and grapes is likely to be high, owing to the great demand for America. Some parcels of pears, peaches, grapes, and filberts, from France, were sold at public auction, by Keeling and Hunt, and brought prices in character with condition and quality.

DRY FRUIT.—The supply of new currrants keeps increasing without corresponding demand, as the season for great consumption has not yet commenced. Forced sales this week have caused another decline in new fruit of 2s or more, new Filiatra selling at 25s; best Vortizza, 30s to 32s; good Patras, 28s to 29s; which is on the average 30 to 35 per cent. below the opening price. Old fruit is lower, and also new Valentia raisins, now selling at 30s. New figs are in, via Liverpool, but no sales yet effected. Further arrivals next week.

ENGLISH WOOL.—Rather more business doing, and at little better prices.

COLONIAL AND FOREIGN WOOL.—The market is without change. At Liverpool the public sales have opened firmly.

FLAX unaltered.

HEMP quiet; to our quotations holders are firm.

COTTON.—Sales of cotton wool from Friday, 14th Sept., to Thursday, 20th, inclusive—4,000 bales Surat at 3⅜d to 3¾d for fair to good fair Comptas; 4¼d and 4½d to 4½d for fair to good fair Dhollera and Oomrawattee; and 4⅝d for good sawginned; 700 bales Madras at 3½d to 5d for very middling to good fair Tinnevelly; and 3½d for fair Western. The market continues very steady, and a fair amount of business has been transacted, at the full prices of last week. Yesterday, 420 bales Madras were offered at public sale, of which about 250 bales were sold at 3⅝d for fully fair to good fair Northern kiod: the remainder which were middling Western, were bought in above the market value. P.S.—Market very firm. Sales to-day, 700 bales Surat at 3 11 16d to 5⅛d per lb.

SILK.—Little or no alteration this week. Trade is quiet, waiting for fresh importations daily expected. Prices without change.

TOBACCO.—The market has assumed a firmer appearance in consequence of continued unfavourable accounts of the growing crop received by last mail from the United States. The trade having purchased rather freely during the last two months, have not been influenced to increase their stocks, except to a very limited extent.

LEATHER AND HIDES.—The transactions in leather during the past week have again diminished by the continuance of the sales of the bankrupts' stocks; but they have been quite as extensive as could be expected under such circumstances. At Leadenhall, on Tuesday, there was a good supply of almost all articles, but a small attendance of buyers; the transactions were consequently limited. Prices remain nearly unaltered. At the public sales of raw goods on Thursday, a large amount of business was done. The following goods were sold:—816 salted Buenos Ayres light ox hides at 7d, 180 dry River Plate hides, 398 dry Buenos Ayres horse hides, 600 salted horse hides, 6,000 salted Cape hides, 900 dry Cape hides, 8,178 salted Australian hides, 1,299 Mogadore kips, 3,177 East India buffalos, 3,511 tanned East India kips, 122 bales Australian leather, 110,000 East India kips. These sales were generally made at, as nearly as possible, former rates. The only particular feature was the absence of demand for horse hides. By private contract, the sales consist of 881 salted Buenos Ayres heavy ox, 59 lbs, at 7½d to 7¾d; 1,800 ditto cow at 6¾d; 700 first light Australian at 4½d, 300 seconds at 3¾d. London market hides are now improving in quality, and are rather lower in price.

METALS.—The metal markets this week have been very quiet, with less than an average business doing, the advance in copper having checked the business which was previously doing in that article.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	0
Fat by ditto	2	9½
Yellow Russian	54	0
Melted stuff	41	0
Rough ditto	24	6
Greaves	20	0
Good dregs	7	6

Imports this week 2,516 casks.

PROVISIONS.

Fine brands still maintain their price. Inferior very slow of sale. Friesland 2s higher, and the quality nothing to praise.

METROPOLITAN CATTLE MARKET.

THURSDAY, Sept. 20.—Although the supply of beasts in to-day's market was by no means extensive, the demand for all kinds ruled heavy, and in some instances prices gave way 2d per 8 lbs. Sheep, the show of which was only moderate, moved off slowly, and inferior kinds declined 2d per 8 lbs. Lamb is now out of season. We were well supplied with foreign calves, and the veal trade was very inactive, at 4d per 8 lbs less money. The top figure did not exceed 5s per 8 lbs.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	0	Prime Southdown sheep	5	2	5	4
Second quality ditto	3	2	3	6	Large coarse calves	4	0	4	6
Prime large oxen	3	8	4	4	Prime small ditto	4	8	5	0
Prime Scots, &c.	4	6	4	10	Large hogs	4	0	4	5
Coarse and inferior sheep	3	4	3	8	Small porkers	4	8	5	2
Second quality ditto	3	10	4	4	Suckling calves...each	19	0	23	0
Prime coarse-woolled do.	4	6	5	0	Quarter old store pigs	23	0	30	0

Total supply—Beasts, 1,060; sheep and lambs, 8,100; calves, 520; pigs, 330.
Foreign supply—Beasts, 530; sheep, 2,200; calves, 335.

NEWGATE AND LEADENHALL.

FRIDAY, Sept. 21.—The supplies of each kind of meat are seasonably good, and the trade generally is very inactive, as follows:—

Per 8 lbs by the carcass.

	s	d	s	d		s	d	s	d
Inferior beef	2	6	3	0	Mutton, inferior	3	2	3	6
Middling ditto	3	2	3	6	— middling	3	8	4	2
Prime large	3	8	4	0	— prime	4	4	4	6
Prime small	4	2	4	4	Large pork	4	4	4	8
Veal	4	4	5	0	Small pork	4	10	5	4

Lamb, 4s 4d to 5s 0d.

HOP MARKET.

BOROUGH, Friday, Sept. 21.—The accounts come worse and worse from the hop plantations, and where picking has commenced it is said the crop comes down half-short of estimate. About 40 pockets of the new crop have arrived at market, but, being very unripe, are not sought after. 1859 and all fine old hops in demand at improved prices. Duty, 45,000*l*.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 17.—Moderate supplies of potatoes have come to hand since our last report, coastwise and by railway. The demand generally is steady, as under:—Kent and Essex Regents, 105s to 160s; York Regents, 110s to 160s; Scotch Regents, 100s to 120s; Bedfords, 120s to 150s per ton.

WATERSIDE, Thursday, Sept. 20.—The arrivals of home-grown potatoes coastwise and by rail have been moderate since our last report, and trade rules tolerably active at the subjoined rates:—York Regents, from 120s to 150s; Kent and Essex ditto, from 120s to 140s; Scotch ditto, from 120s to 130s per ton.

COAL MARKET.

FRIDAY, Sept. 21.—Wall's-end Hetton 20s—Lambton 19s 6d—Haswell 20s—Stewart's 20s—South Hetton 20s—Hartlepool 19s 6d—Braddyll's Hetton 18s 9d—South Hartlepool 18s 9d—Kelloe 19s 3d—Main 18s 6d—Hetton Lyons 17s 9d—Tunstall 18s—Belmont 17s 9d—Durham 17s 3d—Byron 18s 3d—Hedley 18s—Brandon 17s 6d—Thorpe 19s—Wylam 16s 6d—Holywell 16s 6d—Tanfield Moor Butes 13s 6d—Cowpen 16s—Bebside Hartley 16s—Davidson's Hartley 16s—Hasting's Hartley 16s—Howard's Hartley 16s—Lambert's Hartley 15s 9d—Clark's 15s 6d. 13 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 21.—The public sales in progress here since the 19th inst. have attracted an average number of home and continental buyers. East Indian woods, which as usual form the bulk of these sales, command most attention, and prices rule very much the same as at the June-July series.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 21,—Grain market active, and all articles exceedingly firm. Wheat in good demand, at 1d advance. Indian corn 6d dearer. Mixed American and Ibrail, 35s; Galatz, 35s 6d. Beans, barley, and oatmeal very firm. Weather fine. Samples of new wheat very bad.

The Gazette.

TUESDAY, Sept. 18.

BANKRUPTS.

E. C. Walker, Brewhouse yard, St John street, Clerkenwell, annatto manufacturer.
S. Luckcuck, Whitehorse yard, Liverpool road, Islington, livery stable keeper.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic returns of railways in the United Kingdom for the week ending Sept. 8 amounted to 582,910*l*, and for the corresponding week of last year to 541,980*l*, showing an increase of 40,930*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 253,537*l*, and for the corresponding period of 1859 to 243,197*l*, showing an increase of 10,340*l*.

MIDLAND GREAT WESTERN.—The report of the directors of this company states that the receipts on the line from Dublin to Athlone, and the Longford and Cavan branches, amounted for the half-year ending the 30th of June last to 85,272*l* against 78,183*l* for the corresponding period of last year, showing an increase of 7,089*l* from every department of the traffic. The receipts from the incorporated railway and canal amounted to 96,922*l*, and the disbursements to 57,188*l*, leaving a balance of 39,734*l*. To this was added 5,821*l*, the surplus from the preceding half-year, making a disposable sum of 45,555*l*. From this amount the directors recommended a dividend at the rate of 5 per cent. per annum, free of income tax, leaving a surplus of 6,462*l* for the next half-year's account.

SCOTTISH CENTRAL.—The report of the directors states that during the past half-year 20,000*l* had been received on account of debenture stock, and applied in extinction of mortgage debt. Of the total debenture debt of 440,000*l*, 208,425*l* had been extinguished, and converted into a perpetual fixed 4 per cent. stock, or funded debt. There still remained 232,062*l* to be converted.

NORTH BRITISH.—The directors of this company state in their report that in all respects the position of the railway at the end of the half-year on the 31st of July last had been improved as compared with the corresponding date in 1859. A considerable increase in receipts from traffic, which amounted to 149,940*l*, as contrasted with 140,923*l*, had enabled the directors to recommend a dividend similar to that of last year, notwithstanding a very liberal expenditure upon the maintenance and renewal of rolling stock and permanent way; and a larger surplus, viz., 1,434*l*, as compared with 676*l*, remaining to be carried to the credit of the succeeding half-year's balance sheet.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Sept. 17.—The railway market was very inactive to-day, and in most of the leading stocks a decline of ¼ to ½ per cent. took place. In colonial descriptions there was a recovery in Great Western of Canada shares, while Grand Trunk stock remained without change at 29 to ½. Foreign railways were little dealt in, and the only change of importance was a rally in Lombardo-Venetian to 1½ to 1⅝ dis. In American securities, the shares of the New York and Erie improved. A fair demand prevailed for British mines at former prices to an occasional advance.

TUESDAY, Sept. 18.—The railway market was rather dull at the opening, but subsequently improved, especially after official hours, and closed firmly at a nearly general advance. Lancashire and Yorkshire and Midland were most in favour, the former leaving off 1 per cent. higher and the latter ¾. In other descriptions the rise was ¼ to ½ per cent. South-Western exceptionally receded. In the colonial department a further improvement took place in Great Western of Canada shares, the final price this afternoon being 13⅛ to ¼. Grand Trunk stock remained at 29 to ½. Foreign descriptions were inactive.

WEDNESDAY, Sept. 19.—In the railway market there was little business, the few transactions being chiefly on provincial account, but in most cases another advance took place. York and North Midland improved 1½ per cent., Sheffield and Midland 1, Berwick and Caledonian ¾, and other descriptions ¼ to ⅝. London and North-Western and South-Western were comparatively dull. The only important movement in foreign descriptions was a recovery in South Austrian and Lombardo-Venetian to 1⅜ to 1½ dis. In American securities a further rise took place in the shares of the Illinois Central and New York and Erie. Mines were dull, and slightly flatter.

THURSDAY, Sept. 20.—The railway market opened with a firmer appearance to-day, and remained steady until just before the close, when there was a sudden and nearly general decline. In the colonial market, Indian guaranteed stocks slightly improved. In foreign descriptions, South Austrian and Lombardo-Venetian advanced to 1½ to 1⅝ dis. Brazilian shares were steady, Pernambuco leaving off at 3 to 2½ dis.; Bahia, ¾ to ⅞ dis.; and San Paulo, ⅝ to ¾ dis. No change of importance occurred in American railway securities. Mines were again rather flat.

FRIDAY, Sept. 21.—The railway share market improved to-day. London and North-Western stock rose ⅝ per cent.; Midland ½ per cent.; South-Eastern, ⅝ per cent.; and Lancashire and Yorkshire and Great Western, ¼ per cent. Other descriptions were firm. Lombardo-Venetian Railway shares were quiet, at 1½ to 1⅝ dis. The Canadian and Indian lines were steady.

ON SPINAL AND OTHER DEFORMITIES.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

London: John Churchill and may be had of al booksellers.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

Free for Six Stamps.

ENGLISH, FRENCH, AND AMERICAN MODE of TREATING DISEASE.—Proving the fallacy of the former, the non-success of the other, and the unequalled efficacy of the latter, as demonstrated in thousands of cases, whereby the sufferer can easily cure himself privately, safely, and at a trifling cost, without the aid of the Faculty with their mineral poisons. The New Mode has been recently introduced into Great Britain by an eminent practitioner, who has studied in the three kingdoms, and holds from each distinguished Titles and Diplomas, including that of the National Academy of Sciences, Paris, who approve the new Self-Cure Discovery, which is sent free to any address on receipt of six stamps by the Doctor's private secretary, Wm. Hill, Esq., M.A., 27 Alfred place, Bedford square, London, W.C.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

MR CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London.

MEDICAL ADVICE.

DR LA'MERT, HONORARY Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., may be CONSULTED on the Functional Derangements of the Nervous and Reproductive System, and on the various forms of Local and Constitutional Debility, from Eleven till Two, and from Six till Eight, at his residence,

37 BEDFORD SQUARE, London.

The 71st Edition—SELF-PRESERVATION: An Essay on the Secret Infirmities of Youth and Maturity, price 6d, or sent free, in an envelope, by Mann, 39 Cornhill, or by the Author, for Seven stamps.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, Social, and Physical Relations—Happy and Unhappy Unions—Conjugal Anticipations and Disappointments—How to secure Healthy Offspring.

SECTION V.—Spermatorrhœa, or Chronic Impotence—Its History, Causes, and Moral Consequences—The Sterility of Age.

Dr La'Mert is the only registered and legally qualified medical practitioner who has been engaged exclusively, for upwards of 20 years, in the treatment of these special disorders.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer,

Mr WHITE, 228 Piccadilly London.

Price of a single Truss 16s, 21s, 26s 6d an 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to ohn White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases o WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price rom 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER, 228 Piccadilly, London

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacoba, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Hidlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 5 lbs, 11s; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HOLLOWAY'S PILLS.—Pure Blood.—As this vital fluid, when in a healthy state, sustains and renovates every part of the living system, but when it becomes impoverished or impure exerts a precisely contrary effect, it is abundantly manifest that any medicine which does not reach the circulation can never exterminate the disease; but any preparation capable of exercising a sanitary influence over the blood, must with it be carried to every living fibre of the frame. The lungs, heart, liver, kidneys, and skin, all receive benefit from its more wholesome condition. Holloway's purifying pills operate directly, powerfully, and beneficially upon the whole mass of blood, whether venous or arterial. They strengthen the stomach, excite the liver and kidneys, expel disease, and prolong existence.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

FIRST-CLASS EDUCATION, at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary, according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vellère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

Just published, price 1s; by post, 1s 1d; sealed, 1s 6d,
DR BRIGHT'S MANUAL ON SPERMATORRHŒA, &c. With Cases and Drawings from Life, &c., &c. Licentiate of the College of Physicians, Member of the Royal College of Surgeons, &c., &c.
Contents:—Modern Treatment of Diseases of the Kidneys, Bladder, Prostrate Gland—Desire for Solitude—Groundless Fears, &c.; showing how these supposed incurable maladies may be effectually eradicated by the most simple means. Published and sold by J. Allen, 20 Warwick lane, Paternoster row, London.

DINNEFORD'S
PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.
Prepared by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

MODERATE PRICES WITH GENERAL EXCELLENCE.

And Bradford and Sheffield, Yorkshire.

IMPORTANT NOTICE.
GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.
And as some unprincipal Parties are now making and offering for Sale an Imitation of the
GLENFIELD STARCH,
we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.
WOTHERSPOON and CO., Glasgow and London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London Bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

HARVEY'S FISH SAUCE.—Notice of Injunction.—The admirers of this celebrated Fish Sauce are particularly requested to observe that none is genuine but that which bears the back label with the name of WILLIAM LAZENBY, as well as the front label signed "Elizabeth Lazenby," and that for futher security, on the neck of every bottle of the Genuine Sauce will henceforward appear an additional label, printed in green and red, as follows:—"This notice will be affixed to Lazenby's Harvey's Sauce, prepared at the original warehouse, in addition to the well-known labels, which are protected against imitation by a perpetual injunction in Chancery of 9th July, 1858."
6 Edwards street, Portman square, London.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. and B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their Manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable oilmen, grocers, &c., and wholesale of Crosse and Blackwell, 21 Soho square, London.

HUNT'S APERIENT FAMILY PILLS.
Prepared by qualified Medical Men, and have now been in use with the Public for more than 50 years.
The testimonies to their salutary qualities have been most numerous and decisive. They require no confinement from ordinary business, and, indeed, exercise promotes their good effects.
As a mild and effectual remedy in those various forms of disordered health that are sure to occur occasionally with every one, and indicated by Pains in the Head and Limbs, Influenza, Disordered Stomach, Fever, Bilious Attacks, Indigestion, Heartburn, and the like, this Medicine has proved, to persons of all ages and both sexes, most convenient and timely, and a truly valuable means of warding off those attacks of sickness and disease that are the cause to individuals and families of so much suffering and expense.
Prepared by Messrs Hunt, 47 Pulteney street, Bath, and may be obtained at medical establishments throughout the kingdom at 1s 1½d a box, or at 2s 9d, which contains three boxes.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the most unexceptionable testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

DR KAHN'S MUSEUM, Opposite the Haymarket, OPEN DAILY from twelve to five, and from seven to ten. Popular Lectures at three and eight. Admission 1s. Dr Kahn's "Treatise on the Philosophy of Marriage," sent post free for 13 stamps from the author's address, 17 Hanley street, Cavendish square.

PROSPECTUS.

The object of this Company is to purchase the leases of, or take on lease or underlease, and to work upon an extended scale, three first-class slate quarries, in North Wales, known by the names of Rowlin and Penlon Quarry, Gaewern Quarry, and Hillsborough Quarry, or any or either of them. Two of these are now in active operation, and the produce of them is well known and esteemed in the London and Provincial markets.

These two quarries, namely, the Gaewern and the Hillsborough, which produce both slates and slabs of the largest dimensions, are situate near Abercorris, in the county of Merioneth, whilst the third, the Rowlin and Penlan, is at Caerhyn, in the county of Carnarvon.

The enormous profits derived from slate quarries fully attest that, when properly selected and managed, these undertakings are most safe and lucrative channels for investment. It is confidently anticipated, from the estimates of competent authorities, that so soon as the works are in full operation, a steady and regular dividend of at least 30 per cent. will be realised.

The demand for slate very far exceeds the supply; and it is well known that all the best quarries in North Wales are generally far behind in the execution of the orders on hand. It may, in fact, be said that the sale of slate is unlimited.

The scarcity of really good slate rock in workable positions is the cause of the limited supply; hence the value of a slate quarry, having the advantages which these possess, is invariably great.

The before named two quarries (Gaewern and Hillsborough), upon which upwards of £30,000 have been expended, in order to bring them into their present forward and profitable state, have been subjected to the closest inspection by competent persons, and their value fully attested and approved. They possess every advantage of position whereby their working would be facilitated; most ample water power on the spot for all purposes of machinery, thereby dispensing with that expensive auxiliary the steam engine; unlimited fall for the refuse for centuries, by which the ruinous cost of "drawing no" of both waste and produce is entirely avoided; and as short a distance of land carriage as most similar works in the Principality. A tramway to the shipping is now on the eve of completion, and in a very short time will be opened for traffic.

They have every essential requisite to constitute a lucrative undertaking of the first order, and from which immediate and profitable returns will be derived. Their advanced position makes manifest their great value, and renders it superfluous to dilate upon their capabilities further than by stating that in their present incomplete state they are able to raise about 5,000 tons per annum, which, at the average profit of 20s per ton on the working cost, would give a dividend of nearly 7 per cent. upon the whole capital of the Company. With the small further outlay of £10,000, the produce could readily be increased to 20,000 tons per annum, whilst there would still be space left to increase the works to double the extent. These quarries have ample machinery, water wheels, mill houses, smiths' and carpenters' shops, stores, inclined planes, waggons, and several miles of iron tramway laid. There are also about fifty cottages for the workmen, besides stabling, sheds, and various other buildings, the whole of which are of the best description and in excellent order.

Although the quarry (Rowlin and Penlan) at Caerhyn has not yet been brought into regular work, it has been opened to some extent, and has been fully proved, by raising a quantity of very superior slates and slabs, the latter of very large dimensions, from the unprecedented shallow depth of four yards from the surface.

The quality of the vein is of the first description, and is solid nearly to the top block, and it is believed to be the only quarry at present discovered where the slate will cleave after it has been raised for years, and has become quite dry and hard.

Its position, its ends and joints—the latter of the utmost importance in quarrying—are all that can be wished for. Nature has been most bountiful in affording every means for economic working; and for the shipment of produce it has the advantage over every other, the most favoured, in Wales, of having only about one-fourth the distance of land carriage.

From its unequalled position and natural resources, it can be brought into extensive working within an unusually short period, and with a comparatively small outlay.

Within one year from the opening of this quarry it is confidently believed that it will be in a position to yield at least 2,000 tons, which in the following year might be increased to 5,000 tons, and this might be so rapidly increased that in a very few years a maximum of 100,000 tons could be raised.

Upon the property are also two first-class veins of stones, which cannot fail to produce highly lucrative results, inasmuch that they will be the only veins of note in work in that country.

Two of these quarries will be almost equal to freehold, on account of the leases being for the unusually long term of 84 years, whilst the third will be for the residue of a term of between 30 and 40 years unexpired.

The Directors have entered into a provisional agreement for the purchase or taking of leases, which includes the plant, buildings, machinery, cottages, tramways, &c., upon the most favourable conditions to the Company, namely, for the sum of £40,000; half of which the Directors have the option of paying in shares. The purchase-money may, if required, be paid by instalments extending over a period of years. A royalty of one-twelfth is reserved to the lessors.

Should it be deemed undesirable to take up any or either of the three quarries, the price to be paid for each separately will be as follows:—for the Gaewern, £20,000; for the Hillsborough, £14,000; for the Rowlin and Penlan, £6,000.

So soon as, in the opinion of the Directors, a sufficient number of shares are subscribed for, they reserve to themselves the right of commencing the works, either together or separately, and of concluding the purchase of the lease or leases for the whole or any or either, or of such other slate properties as they may consider most advantageous.

Applications for shares to be made at the offices of the Company, or of the brokers, in the form annexed. No application will be entertained unless a deposit of 5s per share, on the number applied for, be previously paid to the Bankers of the Company, in exchange for which a receipt will be given; and on allotment, a further payment of 15s per share on the number allotted must be paid. In the event of the Directors allotting less than the whole number applied for, the amount paid in to the bankers will be applied towards the further payment on the number allotted.

Prospectuses, reports, forms of application, &c., may be had at the brokers, and at the Company's offices

---

THE ANGLO-SPANISH SMELTING and SILVER MINING COMPANY (Limited).

Registered pursuant to the Joint Stock Companies Acts 1856-7, by which the liability of Shareholders is limited to their subscriptions.

Capital, £360,000, in 72,000 shares of £5 each.

Deposit on application 10s per share, £1 10s on allotment, and the remainder by instalments not exceeding £1, with an interval of not less than three months between each call.

DIRECTORS.

S. E. Balleras, Esq., Philpot lane, and Madrid, merchant.
* Senor Don Segundo Colmenares, Madrid.
J. Chaldice, Esq., M.D., Southwark.
J. H. Dillon, Esq., Albany, Piccadilly.
* His Excellency Senor Don Joaquin de Hysern, Inspector of Public Institutions, &c., Madrid.
* Senor Don Amalio Maistre, Engineer of Mines in Chief of the 1st Class, Madrid.
* His Excellency Senor Don Alejandro Olivan, Vice-President of the Chamber of Senators, &c., &c., Madrid.
Francis Trueman, Esq., Bush lane, merchant, and Oxford terrace.
Ralph Walters, Esq., Director of the Eastern Counties Railway, Eaton square.

* Council of Superintendence in Spain.

BANKERS—Bank of London.

SOLICITORS—Messrs Tucker, Greville, and Tucker, St Swithin's lane, London.

BROKERS—Messrs Cope and Scott, 7 Lothbury, E.C.

SECRETARY PRO TEM.—W. Ferch, Esq., 5 Scott's yard, Bush lane, E.C.

TEMPORARY OFFICES.

London—5 Scott's yard, Bush lane, Cannon street.
Madrid—9 Calle de Hortaleza.

ANGLO-SPANISH SMELTING AND SILVER MINING COMPANY (Limited).

ALLOTMENT.

No Application for Shares will be received later than Friday, the 28th inst., immediately after which day the Directors will proceed to the allotment.—By order,

WILLIAM PERCH, Secretary.

PENNSYLVANIA CENTRAL RAILROAD SIX PER CENT. CONVERTIBLE STERLING BONDS.

The Dividend Warrants, due on the 1st October next, on the Pennsylvania Central Railroad Six per Cent. Convertible Sterling Bonds, negotiated through T. Wiggin and Co., will be Paid on the 1st of October, or any succeeding day (Friday excepted), between the hours of 10 and 2, at their counting-house, 15 Old Jewry, where lists may be obtained as usual. The warrants must be left two clear days for examination.

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

RECIPE FOR SUMMER FRUIT PIE.

—Boil the flour with milk for four minutes, then pour it over the stewed fruit, and brown it in the oven or before the fire. This is very lightsome and much preferred to the ordinary pie crust.—BROWN and POLSON, Manufacturers to Her Majesty the Queen, Paisley, Dublin, Manchester, and 23 Ironmonger lane, London.

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

ARMY CONTRACTS.—FORAGE.

The Tenders for the Supply of Forage for the use of Her Majesty's Land Forces stationed at Aldershot Camp, and within the Command, will be received at the undermentioned Office until noon on the 10th of October next, instead of the 20th, as stated in Deputy Commissary-General Davenport's advertisement, dated South Camp, Aldershot, 1st September, 1860.

ALFRED SALWEY, Assistant Commissary-General.
Deputy Commissary-General's Office,
South Camp, Aldershot.

CONTRACT FOR IRON TANKS, &c.

Department of the Comptroller for Victualling and Transport Services,
Somerset place, 18th September, 1860.

The Commissioners for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give Notice, that on Thursday, the 11th October next, at Half-past One o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Victualling Stores at Deptford, all such Iron Tanks for Oil, and Bread, and spare articles, and articles for Repairs of Water Tanks, as shall from time to time be demanded, under a contract for three years certain, and afterwards until the expiration of three months' warning.

Patterns of the Tanks and articles may be seen at the Victualling yard at Deptford.

No tender will be received unless made on the printed form provided for the purpose, and which, together with the conditions of this contract, may be obtained on application at the said office.

No tender will be received after half-past one o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for Tanks," and must also be delivered at Somerset House.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant, WM. BLACK.

S. W. SILVER AND CO., OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Clothing for Gentlemen's Home Use,—viz., Naval and Military Uniforms and Civilian Dress of the best Materials and Workmanship. Shirts, Hosiery, Gloves, &c. Ladies' Outfits. Furniture for Camp, Barrack, Cabin and Colonial use, embracing every variety of Cabinet Work, Canteens, Trunks, Portmanteaus, &c., portable and suited to all climates.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

POMMERY'S CHAMPAGNE.—

Extra Sorts Creaming and Sparkling.—Agents in London, A. Kniep and Co., 22 Basinghall street; Paris, 18 Boulevart des Italiens.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

LONDON	61 King William st. City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 24 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

The Political Economist.

We feel that a fuller Memoir of the Right Hon. James Wilson than can be given within the limits of an article is due to the readers of the journal which he founded. We therefore intend to publish, as soon as possible, *a Supplement to the* ECONOMIST *containing a brief account of his career, and a short sketch of his character, derived from authentic sources. Due notice will be given of the precise date at which this Supplement will appear.*

GARIBALDI'S ATTITUDE TOWARDS PIEDMONT.

THE asserted Russian intimation of a proposed intervention on the part of the Eastern European Powers—Russia, Prussia, and Austria—in Italy may turn out to be fabulous; or, what is perhaps more likely, interference may be prevented by the resolute refusal of England and Prussia, as well as of France, to permit it. But, in any case, it is a sharp warning to Garibaldi to finish the work of revolution and replace the present provisional state of things in Naples and Sicily by the constituted authorities of the Sardinian Government. If this is not soon done, the difficulties of his enterprise will increase on all sides. He will be embarrassed by civil disorders which only prompt military aid can check,—and by threatenings of foreign intervention to which the complete suppression of all civil disorder would be the only effective answer. Instead of being able to challenge Austria on the Venetian territory, he will be scarcely strong enough to suppress reactionary plots in Naples. His difference with Piedmont will paralyse the only really efficient Italian army,—for the Piedmontese troops will be distracted between their allegiance, and their admiration for the deliverer of Italy; in short, every element of difficulty will accumulate round him at once. On the other hand, if Garibaldi would but throw all his strength into the final conflict with the King's army at Gaeta, and then at once surrender the administration of Naples and Sicily into the hands of the Piedmontese, he would safely harvest the fruits of his victories, defeat those whose policy it is to cry out that revolution and anarchy are identical, and pave the way both for the evacuation of Rome by France, and for that great final struggle which, if Austria be not warned in time to part peacefully with Venetia, must, in the end, wrest from her the menacing position on Italian soil which she still occupies.

But for this end it is absolutely necessary that Garibaldi should make up his mind to act cordially with, or even *under* the Piedmontese Government, so soon, at furthest, as the army at Gaeta has been vanquished. We have said before, and we repeat, that we see no reason why General Fanti should not take the initiative against the King of Naples as he has done already against the troops of the Pope. William III.'s invasion of England was an act of audacity far more startling than such a proceeding. The King of Piedmont has in fact been invited almost by acclamation in Naples to put an end to the iniquities of the Bourbon dynasty. And were Victor Emmanuel to accept the invitation, all who glory in the great results of the English revolution would applaud the courageous informality of the step. Yet, no doubt, if the means at Garibaldi's disposal are equal to the defeat of the King's army without dangerous delay, it would be far more satisfactory that he should complete his own work. It would be a fitting conclusion to his marvellous exploits, and it would be less jarring to the amiable sensitiveness of European diplomatists.

But the great difficulty is to persuade Garibaldi that the moment has come for giving up the direction of ulterior events to the Piedmontese Government. His distrust of Cavour, and his rash wish to go straight to Venice, are both obstacles that we fear will be, to him, all but insurmountable to such a course. And yet we believe that if he would not immediately betray the cause he has gained, there is none other open to him. Consider first the state of things in his rear, which loudly calls for the intervention of a regularly disciplined army. Not only are the men of influence in the provinces of Naples and Sicily bitterly dissatisfied, and in some cases even disposed for reaction by their discontent with the class of men set over them,—but human life and property in the province of Naples are entirely unsafe. Let us listen to the following testimony which, we may say, is fully confirmed by all that we learn from private sources:—

I met soon after (says the *Times* correspondent, *himself* evidently unfavourable to permanent annexation) with another man of high character and education, a Neapolitan just returned from exile. We will complain loudly (he says) to Garibaldi that we are not a conquered people. His progress through the country has been a triumphal march, and the Calabrese have done everything on the Continent. We have Governors of provinces with unlimited power, and the country, instead of being united, is split up into so many proconsulates. And then the kind of men! There is a De Cesario appointed Governor of Aquila (now of Chieta), a man who in print has recommended the most violent measures; and Matteri, Governor of Potenza, in the Basilicata, who has brought the country almost into a state of counter-revolution. If care is not taken, we shall have a cry raised for Francis II. "*Caro mio!*" says a third, "I have just come up from the provinces, and Heaven knows how I have arrived in safety. I travelled with my revolver on my knee; passed sometimes by Reactionist and sometimes by Liberal piquets. There is no law nor government; all is confusion; assassinations are committed with impunity; and if regular troops are not sent into the country districts we shall have confusion worse confounded." I give you the opinions of others, but offer none myself, except it be that a regular settled Government is necessary, and that immediately, for the salvation of society, and that—though I never abandon my principles, which I believe will ultimately triumph—the only mode of restoring order is to put the country under the protectorate of Piedmont, and the sooner the better.

Who can wonder that a country in which 100,000 soldiers have recently been disbanded should be in this condition? Yet it is a state of things which cannot endure. Unless a settled Government assume the command, and send regular

forces to tranquillise the provinces, Garibaldi will quickly have more formidable opponents in his rear than he has before him.

But, in the next place, a coalition with Sardinia is absolutely essential to Garibaldi for the fulfilment of any of his plans, and a coalition with Sardinia means and can only mean deference to the orders of the King and the express wishes of the Sardinian Parliament. The King and the Chamber rule Piedmont, and it is simply impracticable for Garibaldi to get the 30,000 troops for which he asks without their approval. Even he now sees that no further military step is practicable without the adhesion of Piedmont, and yet since he justly fears the refusal of the Piedmontese King and Parliament to concur in his rash movement against either the French or the Austrians, he is apparently anxious to borrow the troops without contracting any engagements as a condition of their loan. This, we need not say, is entirely impracticable.

And now what is the ground of his strong objection to an immediate fusion with Piedmont? We believe that—apart from his personal indignation against Cavour—all that was substantial in his reasons for delaying annexation holds good no longer. We upheld him against the wrath of the diplomatists, the reproaches of the English Government, and the displeasure of Count Cavour, when he refused the immediate annexation of Sicily to the Piedmontese Crown. We held and held still that he was justified in acting independently. Had he not done so he could not have revolutionised Naples. Sardinia could not have permitted it—France would not have permitted Sardinia to permit it. Only an unauthorised volunteer could have shown to the world the rottenness of the Neapolitan Government,—and had Garibaldi annexed Sicily to the Sardinian Crown, he could not have prepared in Sicily his expedition against Naples without either committing the Sardinian Government or drawing down upon himself its veto. But this reason for deferring annexation holds good of course only so long as there is any revolutionary work to be done, which can best be done, if at all, without the consent of Sardinia. When there is no such work left, then on every account it becomes most important to terminate this provisional stage, and to prove to the world that revolution has given place to tranquil constitutional order. And this is just the crisis at which Garibaldi has now arrived. His independent mission is consummated, or all but consummated. What remains to be done for Italy cannot be done by any revolutionary force. If diplomacy does not succeed in getting the French out of Rome, nothing can succeed. To challenge the military power of France were sheer insanity. If again force succeeds against Austria, it must be the force of a powerful, completely-disciplined, well-appointed army, perfectly served with artillery and siege trains,—such an army, in fact, as Piedmont does not at present possess,—much less Garibaldi. The time may come when here, too, his great military genius may be turned to account. But it is not yet.

The only true impediment then to the highest service which Garibaldi can now render to Italy is in himself. He detests, not without some reason, the double-dealing of Count Cavour with regard to the cession of Nice. We do not believe that for the cession itself Cavour is to be blamed. It was the price he was obliged to pay for the first step in a great enterprise, and it was a cheap price. But the denials and subterfuges connected with the transaction were certainly far from creditable to him. Still Garibaldi is doing a wrong to himself and his country when he pushes his personal feeling against Cavour so far as to make it a reason for delaying a step which is every day becoming more and more essential to the salvation of Italy. His letter to Bruseo, in which he publicly and officially expresses his inextinguishable resentment against Cavour is not worthy of him. Count Cavour is not Sardinia. Garibaldi is not responsible for Count Cavour. If Cavour still have the confidence of the Sardinian Chamber, then he has that very sanction of popular right which Garibaldi is fighting to give to the rest of Italy. He is too clear-sighted a man to quarrel with the results of freedom because they do not answer his own expectations. We believe he need fear no more concessions to France. Cavour knows that not even he could venture, in the present state of public feeling, so much as to *propose* to give up another inch of Italian ground. And this being so, it will be almost a blot on the pure and noble disinterestedness of the Dictator's career, if he hesitate to lay down his power at the fitting moment, out of mere vindictiveness to the Minister whom, whatever his faults, his King and fellow-countrymen can still best trust.

SIR JOHN LUBBOCK'S PROPOSAL TO REMOVE THE DEPOSITS OF THE LONDON BANKERS FROM THE BANK OF ENGLAND.

Sir John Lubbock has published a tract which is something of a curiosity among banking pamphlets. He has endeavoured to apply the mathematical theory of probabilities to the operations of the London Clearing House. He has computed "the accurate value of the probability of a banker paying "in or taking out any particular sum," and the answer is, as might be anticipated, a slightly formidable array of formulæ. If the whole of the pamphlet were occupied with similar investigations, we should not have thought it expedient to devote an article to it. Such inquiries are, we think, little more than scientific curiosities,—illustrative examples of a refined theory which are instructive as well as interesting to professed students of that theory, but which have little value for other persons. At any rate the knowledge that is requisite to follow mathematical inquiries of this nature is rare, and our readers would by no means thank us for writing upon them. We notice Sir John Lubbock's pamphlet because at the conclusion he puts forth a suggestion which well deserves discussion, even if there should be found to be considerable practical objections to its adoption.

At present, as is well known, the London bankers settle their daily differences with each other at the "Clearing House." This House is now, in consequence of a somewhat recent improvement, a mere office of account. No money is ever seen there. A certain number of bank notes used to be employed, but that is no longer the case. The whole of the balances payable by one London banker to another are settled by cheques on the Bank of England. Of course this system requires that the bankers should keep large deposits at the Bank, and we know that they do so. Of these deposits the Bank has the use, and consequently the profit. Sir John Lubbock suggests, not unnaturally for a private banker, that the London bankers should endeavour to make use of this money for themselves, and not give the Bank the profit or advantage. Our readers will, perhaps, prefer to read the outline of Sir John's scheme in his own words rather than in ours:—

"At present the London bankers are compelled to keep very large sums of money unemployed, in order to provide for the possible results of each day's operations. It is, of course, impossible to ascertain the amount of notes kept in the tills of the several banks, but the returns presented to Parliament give, for each week, the total amounts of the balances kept by the bankers with the Bank of England, up to the end of 1857.

"A large amount might, therefore, safely be employed by the bankers collectively, and a considerable profit obtained, if the Clearing could be worked out of a common fund, so as to assimilate the position of the banks to what it would be if they were all united in one establishment.

"In 1839, the actual transfer of money, or *difference of the sides*, was not, upon the average, more than 200,000*l*, and now, probably, 500,000*l* would be sufficient to provide for this payment. Although, however, the average difference is so small, the uncertainty is so great, that the London bankers are compelled to keep at the Bank of England a balance which varies between 2,500,000*l* and 4,000,000*l*, and, probably, never falls below the smaller amount.

"It is somewhat remarkable, that during the panic at the end of 1857 the balances of the London bankers exceeded 6,000,000*l*.

"It is probable, also, that independent of the actual profit, the collateral advantages of a combination of the bankers, and the working the payments in the Clearing out of a joint account, instead of thirty-three separate accounts at the Bank of England, would be by no means inconsiderable. Although the London bankers enjoy the confidence of the public, still they would, if united, be able more effectually to provide against any panic, and to prevent the recurrence of a state of events such as that which in November, 1857, endangered the whole of our monetary system."

The position of the London bankers is undeniably a peculiar one. They save a large reserve for certain objects of their own, and then they lend it, and lend it without interest, to one of their competitors. The Bank of England, we must remember, is for this purpose simply one of their competitors. We have nothing to do on the present occasion with the Issue Department, but only with the Banking Department. In that department the Bank receives deposits, just as other bankers do, except that it never allows interest, and uses them just as other bankers do. A portion of these deposits are the reserves of the London bankers. With that portion of its money, as with the rest of it, the Bank of England goes into the discount market, competes with the other bankers there, and by its competition tends to reduce the rate of interest. With the money of the London bankers, therefore, the Bank reduces the profits of the London bankers. We are not saying or implying that she should not do so; we are but saying that it is at first sight singular that the London bankers should accumulate a large reserve, and should not only give up all its profits, but even lend it to a rival and competitor.

As Sir John Lubbock's plan would not lessen the fund in the money market, it would not tend to raise the rate of interest. But the change would be this. *Now* the Bank of England enjoys the profit of the bankers' money,—*then* the bankers would enjoy themselves the profit of *all* their money. The advantage to the bankers is an evident and plain one:—are there any counterbalancing disadvantages to them or to the public?

We believe that, practically, there would be this difficulty:—in a time of panic the bankers would not like to lend their reserve at all. Bankers hold very large sums of money payable on demand. They accumulate unusual reserves in a time of uneasiness to meet possible demands. It would be contrary to their motive for so doing—it would be contrary to the nervousness of human nature, if they liked to lend those reserves themselves. At present they place them in the Bank of England, and they fear nothing. The credit of the Bank is the best that exists in the world—the best that the world has ever seen, or is likely to see. And, in practice, no one ever thinks of any calamity to the Bank. "*If* the "Bank of England stop, then we all stop," is the unexpressed assumption in a thousand arguments. Accordingly, the London bankers place their reserves in the Bank of England without hesitation, in implicit reliance upon its credit; and the Bank of England lends those reserves to the public. We cannot believe that in a time of anxiety the London bankers would ever themselves venture to do so. They might do so in a time of quiet, but they would be too nervous to do so in a time of panic. There would be, if Sir John Lubbock's scheme were adopted, a "Lending Committee" of the "Clearing Bankers," and at all committees the cautious, the hesitating, the objecting voice is very powerful. One member might say: "This is an awful time—such a time "as I have not known in fifty years' experience. We ought "to keep ourselves strong. *I object to lending this money.*" And though all the other members of the Committee might disagree with him, yet they might not venture to act in opposition to his warning. They might "postpone" the matter till the "next meeting," and, in the meantime, the money would be locked up unlent.

It is, perhaps, an extraordinary development of our system of credit, that a banker's reserve should be lent at all. A mere theorist would have expected nothing of the kind. It might be very plausibly argued that every banker should keep his own reserve; that, instead of the Bank of England keeping the sole bullion reserve of the country, every banker should keep his own. But this is not the system which has grown up in this country, nor is it the system which Sir John Lubbock proposes to substitute. He would lend a "safe portion" of the reserve of bankers, just as a "safe "portion" is now lent; he only proposes that the bankers, whose money it is, should do it instead of the Bank of England. We believe that if the money is to be lent at all, an intermediate agency is necessary. Nobody except the Bank of England would take the responsibility in moments of emergency,—and it is in moments of emergency that the bankers' reserves are the largest, and that their sudden withdrawal from the money market would be most likely to cause a needless and vexatious stringency.

HOUSE OF LORDS-STATESMEN.

THE DUKE OF NEWCASTLE IN CANADA.

The Duke of Newcastle's administration of the War Department during the Crimean campaign was not in public estimation a successful one. Great administrative qualities are not, perhaps, the *forte* of the class of aristocratic statesmen. The capacities for a successful organisation of a wide-spread system of business are at all events best called out and educated in other spheres of life; and where they are native, as no doubt they often are, in English noblemen, they are rarely to be found in that perfect state of efficiency which the habits and modes of thought of a different class of society better tend to maintain. On the whole, perhaps, the business classes may with some justice complain that the peculiar powers which their modes of life ripen best have not been turned to as much account as is desirable in the higher departments of the public service. But whatever may be said on this head, it is impossible to deny that many of our aristocratic statesmen have displayed in a remarkable degree the qualities which we naturally expect from an aristocracy,—impartiality of vision, and temperate firmness of purpose, in the face of an excited popular opinion. And these qualities have been more remarkable in proportion as the habit of appealing to popular opinion for support has been less habitual. Statesmen of the widest and most liberal sympathies,—who, like Lord John Russell, for example, have earned a deservedly popular name,—frequently pay something for their habitual leaning to the popular side. In the famous *Durham* letter, and on occasion of Mr Roebuck's motion for a Committee to inquire into the mismanagement of the Crimean campaign, we have seen in Lord John Russell something of a disposition to shrink from a popular storm. A parliamentary statesman of really popular sympathies can hardly avoid this. But it is the great advantage of our constitution that we have at our command both classes of statesmen,—those who in the atmosphere of the Upper House acquire habits of thought and judgment a little too independent of the national mind,—and those also who, from habitual study of the temper of a popular assembly, are a little too much disposed to fall in with the temporary and changing currents of the national will. We can command the service of men whose leaning may perhaps be rather to look down upon the eager impulses and urgent popular interests of the moment,—such a man, for instance, as Lord Grey,—and also of men whose bias is certainly to accept and express the eager popular feeling of the moment,—a class of statesmen of whom there are now many examples on both sides of the House,—Mr Disraeli himself being perhaps one of the most conspicuous. And both classes are very useful in their turn. There are services for which the education of a calm unsympathetic atmosphere is by far the most effective. Such, for instance, is the great service which Lord Canning has recently rendered us in India,—when he stood almost alone, with steady impartial judgment and undaunted fixity of purpose, between the native population of India, and the not unnaturally savage cry of the Anglo-Indian caste for more summary vengeance. And such, too, on a very small scale and in a crisis of trifling intrinsic magnitude, but perhaps, on that very account, only the less likely to be seen in its true and really important aspects by a man of ordinary temperament, is the service which the Duke of Newcastle has just rendered to the Crown in Canada, by withholding the Prince of Wales from lending any countenance to the fierce sectarian partisanships of the province.

There are few political situations in which it is more difficult and more essential to act at once with firm impartiality and with genial courtesy than that of the representative of the English monarchy in a colony split into contentious parties. The tenure by which England holds together a great part of her Colonial Empire is almost entirely moral; and though it is not on that account the less sound, yet anything which should convey the impression either that the Crown was indifferent to the interests of the colony, or that it was disposed to espouse any one party in the colony, would go far to break the force of the Imperial tie. While the Imperial Government keeps far above the strife of colonial politics, and yet responds warmly to the loyal feeling of the colonists, it may keep its ascendancy undiminished; but

should it be mixed up with local jealousies, or seem to slight the public opinion of the country, its authority would rapidly decline. No position, therefore, could be more delicate than that of the responsible adviser of the Prince of Wales on his first visit to his future subjects.

Our readers are well aware that the Duke of Newcastle has actually experienced the full tide of these difficulties, and has encountered them with foresight, courage, and tact. When first the vague rumour reached him that the Orange party in Canada had some notion of connecting their party-manœuvres and displays of sectarian feeling with their expressions of loyalty to the Prince, and before any step had been taken by the Roman Catholics to deprecate such a proceeding, the Duke of Newcastle saw at once the duty of instantly taking firm ground in opposition to it. There was much temptation to pass over as lightly as possible slight excesses of political sectarianism in their connection with proceedings so loyal. There would have been much excuse at all events for delaying any formal protest till the Roman Catholics should have raised their voice in remonstrance. But the Duke saw at once that here was a great opportunity for giving a fresh pledge of the strict impartiality of the Imperial Government to all the various forms of religious faith under its control, and he knew that in the present condition of our Empire, at home, in our colonies, and in India, there was no point which it is more important to place entirely beyond suspicion. Accordingly, he took the initiative in a firm but courteous declaration that he should feel it his duty to advise the Prince of Wales to give no countenance to any expressions of loyalty which were not entirely separated from the invidious emblems of party strife. As the Duke afterwards explained to the Town Council of Kingston: "What is the sacrifice which I asked the Orangemen to "make? Merely to abstain from displaying in the pro- "sence of a young Prince of 19 years of age, the heir to a "sceptre which rules over millions of every form of Chris- "tianity, symbols of religious and political organisation, "which are notoriously offensive to members of another "creed, and which in one portion of the Empire have re- "peatedly produced not only discord and heartburning, but "riot and bloodshed.....I did not ask them to sacrifice a "principle, but to furl a flag and abstain from an article of "dress. I wished the Prince to see *them*, but not to give "countenance to a society which has been disapproved in "the mother-country by the Sovereign and Legislature of "Great Britain."

Nothing could be better considered than the Duke's early and emphatic protest. We know how ill at first it succeeded, —how the Prince had to wait 24 hours at Kingston to give the Orangemen of that town time to reconsider their inhospitable and unmannerly behaviour,—how he was finally compelled to leave without landing or receiving the loyal addresses of the municipal authorities,—to undergo the same affront at the next town in his route, Bellville,—and, finally, to be unconsciously entrapped at Toronto into the snare of an Orange triumphal arch. All these direct collisions with the public feeling of loyal colonial towns, the majority of whose population were eager to see and welcome their Prince, were not pleasant necessities for the adviser of the heir apparent. The occasion was scarcely great enough to call out into play the highest principles, and yet it was quite great enough to make resolute action a positive duty. The Duke of Newcastle deserves the highest credit for vindicating by the firmness of his conduct the complete religious impartiality of the British Government, at a moment when to have made some compromise with the vehement popular opinion he had to encounter would have seemed at least excusable. It seems to us to prove that, whatever may be his merits or shortcomings as an administrative statesman, he has those qualities which are most likely to be perfected in the political atmosphere of a calm unpopular assembly like the House of Lords;—clear foresight, fine unbiassed judgment, presence of mind at the right moment for impressing public opinion, a purpose not liable to be warped by the currents of popular feeling, and that easy tact belonging to a mind which had never for a moment lost its evenness, and which stood him in good stead, so soon as the difficulty to be surmounted was removed. There may be other and at times more important work for our statesmen to do than that for which such qualities best qualify,—but it is well to note that moral qualities so valuable in an English minister have been actually tested in any one of our living statesmen. Trifling as the Canadian difficulty has been, it may not prove unimportant if it impresses the public mind with this clear certainty.

THE RESOURCES OF AUSTRIA.

At a time when Austria is making vigorous and, we are inclined to believe, sincere exertions to reform her internal administration and develope her latent strength, to restore her shattered finances, and draw out the resources which she undoubtedly possesses, by means of railways and other encouragements and facilities to commerce and productive industry, it may be interesting to many of our readers to glance over some statistics which have been supplied to us from an original and authoritative quarter, and which we believe may on the whole be relied on. We give them without comment, observing only that the figures relate to the entire Empire of Austria, as it at present stands,—exclusive, that is, of the territories ceded to Piedmont.

I.—Population.

In 1818	28,190,000
— 1830	32,250,000
— 1846	34,920,000
— 1857	35,063,000

The unproductive land in the Austrian Empire is stated at 33,000,000 of acres, and the productive land at 192,000,000 acres,—which last quantity is thus apportioned:—

II.—Extent of Soil.

	Acres.
Arable	70,000,000
Forests	61,000,000
Pasturage	31,000,000
Meadow-land and gardens	27,500,000
Vineyards	2,500,000

III.—Principal Articles of Agricultural Produce.

Wheat.....quarters	10,000,000	Indian corn ...quarters	8,500,000
Oats	20,000,000	Potatoes	24,000,000
Barley	10,000,000	Hemp and flax	600,000
Rye	13,000,000	Tobacco	200,000
Millet and buckwheat	2,000,000	Podware	1,000,000
Vegetables	3,000,000	Hay.....cwts	694,000,000
Wine.....gallons	328,000,000	Beetroot sugar—1841	100,000
Beer	102,000,000	— 1851	350,000
Halbfrucht* ...quarters	3,000,000	— 1859	1,000,000

* Unknown in English markets.

IV.—Domestic Animals.

Horses	3,466,000
Mules and asses	112,000
Cattle	14,258,000
Sheep	16,964,000
Goats	1,518,000
Pigs	8,152,000

V.—Agricultural Valuations.

	£
Aggregate value of productive soil	1,050,000,000
— — domestic animals	105,000,000
— — products of ditto ditto	47,000,000
— — chase and fisheries	5,000,000
Entire agricultural capital	1,310,000,000
Gross annual produce thereof	200,000,000

VI.—Mineral Produce.

Gold .....marks	4,941	Quicksilver .....cwts	4,850
Silver	103,717	Sulphur ore	29,000
Iron ore .....cwts	15,170,000	Grafit	88,000
Copper ore	700,000	Alum, &c	1,215,000
Lead ore	425,000	Coal	32,173,000
Tin ore	65,000	Peat	26,000,000
Zinc, &c	151,000	Rock salt	4,165,000

Entire value of mineral produce..... £1,920,000

VII.—Many manufactures are carried on in the Austrian dominions, especially those of wool, flax, cotton, silk, porcelain, and glass. The entire aggregate value of the manufacturing produce is estimated at 140 millions sterling. The number of spindles employed in the cotton trade increased from 988,250 in 1841 to 1,450,000 in 1857. Those in woollen mills were 39,000 in 1854 and 50,000 in 1859.

VIII.—The following table shows the aggregate value of the foreign trade of Austria. The reliability of the progressive figures, especially during the later years, is, however, greatly impaired by the fact of the depreciation of the currency, which has been varying, increasing, and at times excessive. We are quite unable to give any authentic measure of its amount in different years.

	Imports. £		Exports. £
1831	7,246,000		8,346,000
1836	10,370,000		10,143,000
1841	11,155,000		11,793,000
1846	13,860,000		11,703,000
1851	16,973,000		14,413,000
1857	31,306,000		25,376,000

IX.—The following are the official figures which have been furnished to us of the annual receipts and expenditure of the Imperial Treasury. The value of them, as a *progressive* statement, is, however, greatly diminished by those fluctuations and depreciations in the currency to which we called attention in the preceding table.

NET RECEIPTS INTO THE EXCHEQUER.

Years.	Direct Taxes. £	Indirect Taxes. £	State Property and Coinage. £	Miscellaneous. £	Total. £
1845	4,680,000	9,430,000	470,000	1,470,000	16,050,000
1846	4,770,000	9,550,000	550,000	1,550,000	16,420,000
1847	4,800,000	9,400,000	410,000	1,360,000	16,170,000
1848	3,320,000	6,940,000	510,000	1,440,000	12,210,000
1849	5,990,000	7,170,000	250,000	1,520,000	14,930,000
1850	6,540,000	9,560,000	520,000	1,600,000	18,220,000
1851	7,050,000	10,920,000	650,000	1,580,000	20,200,000
1852	7,950,000	12,240,000	500,000	1,790,000	22,480,000
1853	8,470,000	13,030,000	270,000	1,820,000	23,590,000
1854	8,550,000	13,330,000	720,000	1,930,000	24,530,000
1855	8,800,000	13,920,000	950,000	2,180,000	25,850,000
1856	9,210,000	14,890,000	940,000	1,880,000	26,840,040
1857	9,480,000	15,240,000	700,000	2,170,000	27,390,000
1858	9,450,000	15,880,000	450,000	1,670,000	27,450,000

X.—STATE EXPENDITURE.

Years.	Civil Administration. £	Naval and Military. £	Debt. £	Total. £
1845	5,540,000	5,330,000	4,520,000	15,990,000
1846	5,770,000	5,920,000	4,620,000	16,310,000
1847	5,930,000	6,290,000	4,650,000	16,870,000
1848	5,050,000	7,230,000	4,440,000	16,720,000
1849	5,590,000	16,510,000	5,460,000	27,560,000
1850	7,300,000	12,660,000	5,060,000	25,110,000
1851	9,220,000	12,810,000	6,140,000	28,170,000
1852	10,000,000	11,600,000	6,380,000	27,980,000
1853	10,350,000	11,950,000	7,090,000	29,390,000
1854	10,090,000	20,890,000	7,620,000	38,600,000
1855	10,610,000	21,600,000	8,050,000	40,260,000
1856	12,080,000	12,390,000	9,080,000	33,550,000
1857	12,380,000	12,300,000	9,400,000	34,080,000
1858	11,500,000	10,580,000	9,820,000	31,900,000

Thus it will be seen by a comparison between the two last tables, that since 1846 the revenue has never equalled the expenditure. In 1849, there was a deficit of 12 millions; in 1854 and 1855, one of 14 millions. In 1856, 1857, and 1858, the deficit was 6¾, 6½, and 4½ millions respectively. In all these calculations we have taken the Austrian florin at its nominal value of *two shillings*.

THE BOARD OF TRADE RETURNS.

THE Board of Trade Tables for the month of August show a considerable increase in the value of our exports over the same month in the two last years; and even for the eight months ending with August the increase is considerable, though not by any means proportionate.

VALUE of EXPORTS of BRITISH and FOREIGN PRODUCE.

August. 1858. £	1859. £	1860. £
11,134,763	12,117,275	13,535,205

Eight Months ending 31st August. 1858. £	1859. £	1860. £
75,596,564	86,405,885	88,077,892

It will be observed that while the value of our exports averaged in 1859 about 10,800,000*l* a month, this year it averages at present more than 11,000,000*l* a month, being an increase of rather more than 2 per cent. The increase, however, is due to the last two months;—previously our exports had shown a falling off on the year before. The month's increase may be traced in a great measure to the fresh impulse in the trade to the United States which seems to have taken place within the last month or two. The increase on the eight months, on the other hand, is due chiefly, as we have formerly shown, to the increased exports to the Hanse Towns (especially in worsted and woollens), and to the increased exports to China and Hong Kong which are no doubt in part attributable to the wants of the large European force now in China. But for the last month (August) it is clear that the demand for our woollens, worsteds, and linens, in the Hanse Towns had slackened,—since scarcely any of the large increase during the eight months belongs to the month of August. It is well to note this as a sign that the supply has for the present probably reached the limits of the demand. The exports to China of the month also show no increase on last year.

On the other hand, the United States trade, which even during the earlier part of this year had been rather languishing, seems to be taking a decided start. More than one-third of the advance of nearly a million and a half sterling on the exports of the same month in 1859, may be accounted for by the United States trade. For example: in cotton fabrics alone sent to the United States we find an increase of value of 230,000*l* on the same month in last year; in linen cloths of above 105,000*l*; in woollen mixed stuffs, flannels, &c., of 137,000*l*; and in most other articles there is a considerable though a less striking advance in the value of our exports thither. At least half the remainder of the increase is due to our smaller customers for cottons, linens, and woollens, in which trades the chief increase has taken place. Thus we have:—

DECLARED VALUE of COTTONS, LINENS, and WOOLLENS EXPORTED. MONTH of AUGUST.

	1858. £	1859. £	1860. £
Cotton fabrics	2,926,982	3,384,516	3,891,993
Cotton yarn	851,316	843,165	894,898
Linen cloths	344,575	339,165	469,024
Linen yarn	163,750	131,067	132,384
Woollen cloths	235,962	282,609	316,912
Mixed stuffs, flannels, &c.	380,108	408,713	596,094
Worsted stuffs	379,271	417,063	445,864
Woollen and worsted yarn.	307,344	297,214	353,744
	5,589,308	6,103,512	7,100,913

With regard to imports, we may mention that the imports of raw cotton, which had fallen off considerably last month, have again increased considerably. Wheat is also beginning to come in in larger quantities, and of wheat meal there are very large receipts from the United States. The quantities both of tea and sugar entered for home consumption for the month are large. The quantity of French wine entered for home consumption does not show so large an increase as in many previous months; and in spirits, also, the quantity entered for this month shows a less rate of increase,—indeed, as regards brandy, there is a decided decrease on the same month in last year. The receipts of wool continue to be large.

COTTON CROP OF THE UNITED STATES.

THE New York *Shipping List*, of the 15th inst., publishes the following statement of the cotton crop of the United States for the year ending August 31, 1860:—

1857	3014000	1854	3000000	1851	2450000	1848	2357000

The quantity of new cotton received at the shipping ports to the 1st September was—in

	bales		bales		bales		bales
1860	51600	1853	6716	1846	200	1839	no account
1859	12369	1852	5125	1845	7500	1838	no account
1858	8031	1851	3200	1844	7500	1837	no account
1857	100	1850	255	1843	300	1836	970
1856	1800	1849	575	1842	3000	1835	3424
1855	26079	1848	3000	1841	32000	1834	small
1854	1890	1847	1121	1840	30000	1833	large

The very large quantities of cotton now being shipped from the South-west, by the various inland routes of the country to the seaboard, has attracted much attention of late; the amount thus received having swollen within the short period of seven years from a few hundred bales (then esteemed too insignificant to enter into the account) to *over one hundred thousand bales* the past year, as will be seen by reference to another portion of this statement. It will also be observed that, instead of depending upon the reported quantities received at the various termini of railroads, &c. on the seaboard, we have introduced a heading of "Tennessee, &c.," under which the shipments thence are arranged, and added to the crop of the country, after making the usual and proper deductions. By this new arrangement we shall attain much greater exactness in our statement, and feel assured it will give entire satisfaction.

It may be well to observe, that the preceding statement of the crop is that of the United States, *as a whole*, and does not purport to give the crops of the *States*, though the shipments, stocks, &c. are necessarily arranged under the different leading shipping ports or States as the case may be.

Agriculture.

NOTES AND PROSPECTS.

FREE FARMING.

ANOTHER fortnight of stormy weather, accompanied during the pa week by deluges of rain, has considerably diminished the farme hopes of coming out of this wet season without serious loss. The is still much wheat in the field, and in some districts there a large breadths of both wheat and barley to be cut, and where t

wheat has been carried it is found to be damp and out of condition, and in many cases has been injured by heating in the stack. There seems to be some effort making by the press, local as well as metropolitan, to represent the consequences of the bad season on the crops as less injurious than farmers know them to be, but when we remember the almost uninterrupted series of rainy months we have experienced for the past twelve months, and that we are now at the end of September with our harvest far from completed, it will require something more than assertion to satisfy the public that a serious deficiency in quantity and quality will not be found in the grain crops of this year. The grass land has again become so saturated with wet that our cattle are treading into the mud that keep which it was hoped might carry them on into the winter. Apprehensions of shortness of provender, now pretty certain to be realised, have operated to reduce the prices of store stock and to render all kinds of cattle and sheep, except fat stock, difficult to sell. One benefit must arise from the wet season in the great impulse which will be given to draining next winter. The difference between drained and undrained land, especially grass land, was never so conspicuous as now.

Amongst the noticeable rural events of the past week is the appearance of Mr Disraeli at the annual meeting of "The Royal Buckinghamshire and Central Bucks United Agricultural Association," held at Aylesbury. This Association, which seems to be the result of an amalgamation of several local societies, is about to be further amalgamated, and, judging from Mr Disraeli's speech, the prospects of such societies in Buckinghamshire do not appear to be very bright. The Society originally confined its efforts to rewarding agricultural labourers for long services and the like, to which of late years it has added a show of live stock, roots, and so forth. Mr Disraeli appeared to be conscious of the absurdity of the first branch of the Society's business, for he overstrained his eulogies on its behalf, while he "frankly" confessed his disappointment with the stock show. Just imagine the straits to which so practised a speaker must have been driven when he said the associations for giving labourers prizes "have elevated the tone of this country with the labour of the land," and that they have brought about a result "which those connected with the labour have shown they highly appreciate." Then these 30s and 10s prizes are sought by the labourers "because they have looked upon them as a public recognition of their private virtues." Had the Right Honourable Gentleman any practical acquaintance with the rural labourers, he might have found it difficult to preserve a due amount of gravity while uttering such sheer nonsense. Then he illustrated his position by the case of a man who, having worked on one farm for forty-five years, had become entitled to the Society's reward, but he refused "to come forward and claim it until he had completed his fiftieth year of service." After all, long service on one farm or with one master is but an equivocal test of merit in an agricultural workman. Sometimes it is accidental, sometimes because the man is content to go on without any attempt to better his condition, and at best only assimilates his position to that of the labourer by law tied to the soil. In any case it is a matter between master and man. With regard to the live-stock show, of which the present is only the second, the Right Honourable Gentleman said:—"I did not see, with regard to horned cattle, or even sheep, that promise fulfilled which last year even was so prominently made; and though it may be accounted for to some extent by the unfortunate weather which has occurred at the period of our union, preventing some of our best friends from exhibiting, still we must never for a moment forget that it is by progress—by constant efforts at excellence—that societies like the present can alone be maintained with spirit and advantage." Therefore the Society is to undergo another amalgamation. Perhaps a general county association might produce a show of stock and thrive, for it must be borne in mind that it is only as stock shows these societies can sufficiently enlist the commercial interests of farmers on their behalf to give them permanent vitality.

At a recent agricultural meeting at Burton-upon-Trent, Mr Bass, the great brewer, referred to a topic of some interest to farmers:—"He wished to speak to another important branch of their (the farmers') business. The brewers of Burton were large buyers of hay and straw. He cut up for his dray horses alone eight tons every week; and it was of course of great importance that he should be able to buy it at moderate prices. At this time he had to pay 6*l* or 7*l* per ton for hay, and he must tell them he could not go on at this rate—they must lower their prices. Instead of using their hay and clover to feed sheep, cattle, and oxen, which only produced 3*l* per ton, he would be very glad to give them 5*l* for it. He had the authority of the 'Journal of the Royal Agricultural Society' for this. In the number just published there was a paper by Mr Evershed, who said that a ton of hay would only produce beef worth 50 shillings, and a ton of straw beef or mutton worth 25 shillings—so that they were throwing away 35 shillings a ton, when they might sell it him for 3*l*." It may be all very well to lecture the farmers thus, but are they not expressly forbidden to sell hay and straw? The advantages to farmers of free liberty to dispose of their produce in the best market may be as great as Mr Bass states or greater, but what of that? Their landlords won't trust them to follow the mercantile principle of self-interest in the management of their business, lest some possible or contingent detriment may thereby happen to the land. Yet this is very short-sighted, for a landowner may be assured that the farmers who make most money from their farms will manage their land the best.

Literature.

COMMERCIAL LITERATURE.

On the Rate of Wages in Lancashire. By David Chadwick, F.S.S. W. H. Smith and Son, 186 Strand, and at all the Railway Book Stalls.

Mr Chadwick has collected with much labour (which those who ever made the attempt before will duly appreciate) the rate of wages in 200 trades and branches of labour in Manchester and Salford and in the manufacturing district of Lancashire during the twenty years from 1839 to 1859, with statistical tables illustrating the progress of the cotton trade, the cost of provisions, increase of population, &c., which he has condensed into a pamphlet of thirty-six pages.

We hardly know of anything more useful to the political and social world than a thorough insight into the condition of the industrious classes, the more especially as these classes, from their growing wealth and intelligence, will naturally some day have great weight in the State and Legislature through their representatives; for that, sooner or later, they will, in some form, be included in the franchise we have no more doubt than we have of the spread of knowledge and truth. It is, therefore, above all things necessary that we should be well acquainted with their condition, socially, morally, and financially, for on correct data on these heads may possibly depend the stability of our present institutions.

We make these preliminary observations as intimately connected with the subject before us, and perfectly agree with Mr Chadwick, that it would form a very interesting inquiry to continue the investigation, with a view of ascertaining, as far as practicable, how far the advance in the rate of wages generally, and the improved condition of the working classes, may be due respectively to the introduction of the principles of free trade, to the extraordinary importations of gold from Australia and California, to the improved means of transit by railways and steam ships, to the introduction and extension of machinery in aid of hand labour, and to the general improvement in the education and intelligence of the people. That all and every one of these circumstances have conduced to the improved condition of the industrious classes, no doubt whatever can exist; for the increase of "everything," makes "everything" more attainable; the saving of time is to a working man an increased means of obtaining money, and also one of extending his knowledge by education and the cultivation of his mind.

Mr Chadwick's paper treats of—1. Cotton manufactures—2. Silk and other trades—3. Building trades—4. The Brickmaking trade—5. Mechanical and other trades;—and the inquiry has been extended, where practicable, over a period of 20 years, and the results are recorded over three decennial periods of 1839, 1849, and 1859. The number of hours of labour per week has been stated, in order to facilitate a comparison of the actual remuneration in each trade; but it must be borne in mind that in some trades it is not possible for the workman to make a full week's work *every week* in the year.

For the tabular statements prepared by Mr Chadwick we must refer to the book itself. They will well repay the attentive study both of the politician and political economist, and indeed of every one interested in the condition of the industrious classes. We may observe, however, that the results are extremely satisfactory as regards their present condition, since they are receiving more wages at the present time than they have done for the last 20 years, and there appears good reason to expect that the prosperity now prevailing is likely to be more than usually permanent; for *low prices of provisions* and *high wages*, together with increased mental cultivation, have as a natural result placed more comforts within the reach of the industrious classes. Within 20 years, *i.e.* between 1839 and 1859, the advance in the rate of wages has been as follows:—

1. In the cotton trade from 10 to 25 per cent.
2. In the silk trade 10 per cent.
3. In the calico printing, dyeing, and bleaching, and in silk and fustian dyeing, a decline in wages has occurred; especially in those branches which no longer require any special or peculiar skill, and also with the higher class of skilled workmen such as "machine printers," but the wages in this class now range from 25s to 50s a week, the average rate being 38s.
4. In the building trades the increase has averaged from 11 to 32 per cent.
5. In the mechanical trades there has been a general advance, in some instances as much as 45 per cent. A reduction has occurred in the high wages formerly paid to brass moulders (now 30s), and to engravers to calico printers, though the wages of the latter now range from 25s to 48s per week.
6. In the miscellaneous trades, including upwards of 80 classes of workmen, the rate of wages has generally been maintained, and in some cases considerably advanced.

These results of Mr Chadwick's investigations are highly satisfactory, and we only hope that he or some other labourer will be induced by the success which has attended Mr Chadwick's researches to prosecute them, until we learn from every county as much as Mr Chadwick has taught us of Lancashire. These statistics have paved the way for other statisticians, since Mr Chadwick has achieved the most difficult task of any, inasmuch as Lancashire itself contains one-ninth of the population of England. If we have to express a regret, it is that Mr Chadwick has omitted the wages paid to domestic servants. That alone would form a most instructive chapter, for we suspect that no class of the working community has progressed, as regards comfort and wages, so greatly as they have. We could extract much more of instructive matter from Mr Chadwick's work, but as every one can become possessed of it for one shilling, we must, although with regret, refer them to it. It is a model of condensation and industry admirably worked out.

We cannot, however, refrain from the pleasure of giving the following summary of Mr Chadwick's opinion of the condition of the industrious classes. "As a body, they are now much better educated and are much less addicted to the sin of drunkenness; they have much greater self-respect and intelligence; and, if they have not more political privileges, they have more real independence, and are in every respect elevated and improved as compared with their position twenty years ago."

GENERAL LITERATURE.

CURIOSITIES OF CIVILIZATION. Reprinted from the "Quarterly" and "Edinburgh" Reviews. By ANDREW WYNTER, M.D. London: Robert Hardwicke, 192 Piccadilly. 1860.

THIS is a miscellaneous collection of essays which (with one exception) have appeared in the "Quarterly Review" during the last six years. Five of them are on subjects more or less professional to the writer, viz.: Food and its Adulterations, The London Commissariat, Lodging, Food, and Dress of Soldiers, Mortality in Trades and Professions, and Lunatic Asylums (a long and valuable essay). Two amusing articles are devoted to natural history, and treat of Rats, and the Zoological Gardens. Papers on Woolwich Arsenal, Shipwrecks, the Electric Telegraph, Advertisements, Fires and Fire Insurance, and the Police and the Thieves, complete the "Curiosities of Civilization." The style is that of a sensible, shrewd, kindly man of the world, who knows how to present much useful knowledge in a telling and interesting form. He usually gives full and minute statistics which contribute much to the reader's comprehension of the subjects treated. There is, however, one instance of a contrary procedure which is sufficiently important to call for notice. In the very interesting essay on Fires and Fire Insurance, Dr Wynter says:—

It is commonly imagined that the introduction of hot water, hot air and steam pipes, as a means of heating buildings, cuts off one avenue of danger from fire. This is an error. Iron pipes, often heated up to 400°, are placed in close contact with floors and skirting-boards, supported by slight diagonal props of wood, which a much lower degree of heat will suffice to ignite. The circular rim supporting a still at the Apothecaries' Hall, which was used in the preparation of some medicament that required a temperature of only 300°, was found, not long ago, to have charred a circle, at least a quarter of an inch deep, in the wood beneath it, in less than six months. Mr Braidwood, in his evidence before a Committee of the House of Lords, in 1846, stated that it was his belief that by long exposure to heat, not much exceeding that of boiling water, or 212°, timber is brought into such a condition that it will fire without the application of a light. The time during which the process of desiccation goes on, until it ends in spontaneous combustion, is, he thinks, from eight to ten years.

Now comes the question, what temperature is indicated by the terms "not much exceeding 212°"? Dr Wynter goes on to quote a case mentioned by Mr Hosking in his "Guide to the proper regulation of buildings in towns," which, he says, "completely confirms Mr Braidwood's opinion, and explodes the idea that heat applied through the medium of pipes must be safe." Yet Mr Hosking's account of this fire (at Day and Martin's, in 1848,) distinctly states that "it was understood that the temperature of the water in the pipes *never much exceeded* 300°: a very different thing from "not much exceeding 212°." The fact is, that so long as the temperature of hot water pipes does not exceed 212°, the wood with which those pipes come in contact is perfectly safe from all tendency to combustion; and nothing can be easier than to check the temperature by means of a self-registering thermometer, which keeps a constant record of the maximum heat attained. Of course, however, the lower the temperature, the greater quantity of pipes is required to warm the building; hence there is a temptation, for economy's sake, to keep up the temperature to a high degree. How far above 212° may be justly relied upon as absolutely safe, is a point yet to be ascertained; and it would be most useful to know exactly what temperature Mr Braidwood meant to indicate by the expression he used, and upon what evidence he formed his opinion. When the question is wholly one of degree, it is worse than useless to write in the loose style quoted above, which only tends to confuse the subject; and it is the positive *duty* of every one who has the opportunity of throwing light upon these matters, to give his evidence in the most exact language possible.

On of the pleasantest of the essays is that on Advertisements. The writer traces their history from their commencement in the days of the Commonwealth to the present day, showing how they reflect the political, industrial, and moral characteristics of the period, often throwing light upon them which is very useful to the historian. Here, for instance, is an advertisement of Milton's:—

On the 8th of March, 1660—that is, while the sway of Charles's sceptre had already cast its shadow from Breda—we find the following advertisement in the *Mercurius Politicus*:—"The ready and easie way to establish a free Commonwealth, and the excellence thereof compared with the inconveniences and dangers of readmitting Kingship in this Nation. The Author, J. M. Whereto, by reason of the Printer's haste, the Errata not coming in time, it is desired that the following faults may be amended. [Here follows a list of Errata.] Sold by Livewel Chapman, at the Crown, in Pope's-head Alley."—The calmness of the blind bard in thus issuing corrections to his hastily printed pamphlet on behalf of a falling cause, excites our admiration, and gives us an exalted idea of his moral courage.

As a pendant to this, take the following, which appeared in the same journal a few months later, and which, says Dr Wynter, "looks as though it had come from the King's own hand":—

☞ We must call upon you again for a Black Dog, between a Greyhound and a Spaniel, no white about him, only a streak on his Brest, and Tayl a little bobbed. It is His Majesties own Dog, and doubtless was stoln, for the Dog was not born nor bred in England, and would never forsake his Master. Whosoever findes him may acquaint any at Whitehal, for the Dog was better known at Court than those who stole him. Will they never leave robbing His Majesty? must he not keep a Dog? This Dog's place (though better than some imagine) is the only place which nobody offers to beg.

There is an occasional tinge of Toryism in Dr Wynter's way of looking at many subjects, although it appears more in a passive than in an active form. His amusing essay on the Police stands in characteristic contrast to the short but excellent paper on the same subject in the late Mr Roscoe's Essays, which, manifesting quite equal respect for public order, combined therewith a strong sense of impartial justice which is not to be found in Dr Wynter's article. For the most part, however, our author writes upon subjects that bring out the best characteristics of his mind, and we recommend our readers to make acquaintance with his entertaining and instructive volume.

ETHICA; or, Characteristics of Men, Manners, and Books. By ARTHUR LLOYD WINDSOR. London: Smith, Elder, and Co., 65 Cornhill. 1860.

THIS thick volume contains seven chapters (of which the first, fourth, and seventh are reprinted from the "British Quarterly Review,") on the following subjects:—The Mental History of Montaigne; Milton; Dryden; Defoe; Pope and Swift, Bolingbroke and Harley; Goldsmith; Ancient and Modern Orators. The book is a disappointing one. Many of the observations are above the average, but there is a great want of coherence in their arrangement. There is neither the sparkling play of imaginative insight into personal character, nor the clear presentation of comprehensive outlines of general history. The author is perpetually diverging from his main subject to some other which only touches the first incidentally. He crams his pages with innumerable allusions to celebrated names in history and fiction, and is evidently ambitious of being considered a philosophical critic of men and books; but there is no largeness of view or peculiar felicity of discrimination in his book which can substantiate his claim to that character. Moreover, we are uncomfortably reminded of other writers by some of his remarks. The essay on Montaigne (which is more able and less rambling than most of the series) is, we suspect, considerably indebted to the admirable essay on the same subject by Mr Church, in the "Oxford Essays" for 1857, for the view taken of Montaigne's religious opinions, and of his general moral indifferentism. And the essay on "Ancient and Modern Orators" reminds us, in its remarks on the character of Thucydides, of Mr Sellar's interesting essay ("Characteristics of Thucydides") in the same volume of Oxford Essays,—a work to which Mr Windsor makes a distant allusion (p. 21) which implies that he is aware of its existence. But there is this difference between that work and the one before us,—that while in the Oxford Essays we have vigorous thoughts expressed in consummate language, with a freshness and felicity that testify to their having proceeded straight from the writer's living mind,—in "Ethica" we have similar ideas in a half-mutilated condition, recast by a mind not capable of originating them, and presented in a mediocre and disjointed style. It is possible that Mr Windsor may not be aware how much he is indebted to the thoughts of earlier writers. Some of his speculations are sensible and readable. The following, from the essay on Milton, are among the best. He is commenting on the Restoration:—

The greater part of the nation—as Milton indignantly acknowledges—was ready, and even anxious, for the revival of the old forms. Constitutionally, the national mind is unfavourable to fundamental revolutions. Its changes—always made with reluctance—are always introduced by slow degrees.....Our provisions for the future are always founded on our experience of the past. Our reforms follow the abuse as the rebound follows the blow. We act only because we are compelled to act. We complain only because there is a grievance that prompts the complaint. Our activity is only a counter-activity; our resistance only a retaliation. The speculatively deontological, to speak in the Ben-

thamese tongue, does not enter into the considerations of our chartism. This characteristic of it, making our legislation more deductive than inductive, has at least this advantage, that though we forfeit in some degree the benefit of theory, we reap the benefit of experience; and though it discourages the discoveries of science, it holds out no flattery to the empiriciem of the sciolist. Hence the neglect which constitutional models, framed on *a priori* principles, however attractive, have always experienced among us. And hence, at this particular crisis, the fotility of the still-born speculations of Milton and the Rota Club.

There is another feature, too, in the national character, which co-operated strongly in producing a reaction against Cromwell's successor in favour of the dead King's heir. The English people, of all people in the world, are least impulsive in choosing their favourites, and least capricious in discarding them. They are slow to love, and slow to hate. In their revolutions—on those occasions when the gravity of their calmer moments yields to the pressure of an hysterical excitement—a certain sobriety of demeanour has never forsaken them. Their enthusiasm has never been divested of a natural phlegm. Impulse, however irresistible its proposals, has, in action, been always subdued, by the solemn observance of forms and ceremonies, into a seeming deliberation. Passion, with them, if it has not always been guided by the dictates of reason, has always affected a logical apology. The occasions where either impulse or passion has roused them to vengeance or requital, are rare. But when they have been moved to visit with their displeasure, or to make an offer of their esteem, their emotions have in neither case taken the form of paroxysms. Slow to anger, they have been slow to avenge. Thus, in their recent rising up to vengeance, they vented their indignation with the calmness of judges, rather than with the fury of executioners.....Again, years after, they adopted another king, with the same punctiliousness that they rejected his predecessor. They gave their allegiance with the same decorum that they withdrew it. And, as it was their interest to withdraw it, so it was not without an eye to interest that they gave it. Thus their gifts have always had the mercenary air of bargains. As they never hate without a cause, so they never love without an equivalent. And thus, both their love and their hate are never too deep to be interrupted. (pp. 87-90.)

THE NATIONAL MAGAZINE for August and September. Kent and Co.

THESE two numbers of the "National Magazine" sustain its artistic character. The woodcuts are tolerably well executed, the subjects generally well chosen, and, considering the price of the periodical, the number of illustrations is unusually large. But the literary contributions, at no time very striking, are beginning in some instances to fall quite below criticism. The tales are not devoid of merit, but some of the miscellaneous matter and poetry have attained a degree of weakness and inanity that render them remarkable in their way. We need but refer, in order to support our remark, to several contributions in the numbers before us. In the August number there is a woodcut of "The Prodigal's Return," and on the opposite page a short explanatory notice of it. In the latter we are told nothing of the picture from which the engraving is taken, and nothing of the painter,—but we are indulged in a short string of reflections on prodigal sons in general, in which we may learn that "every year we see the same old story realised," and that "happy indeed are those prodigals who have a home to go to; many wake from their dream too late." The interest of this little moral treatise culminates in the following remark:—"The young man may depend upon it that his father and mother are the truest friends he can have." There is also half a column entitled "Babes and Children," which carries domestic twaddle to a most audacious length. We do not mean that the blank left by the departure of a joyous child is not a subject worthy of being treated, either in prose or poetry, but it is one of those subjects which must always owe their literary interest to the power or delicacy with which they are handled. A short extract will give some idea of the workmanship we are criticising:—"In truth, by his absence my boy has left a void the world can never fill, and yet, after all, what is he? A mere child, unable to hold rational conversation,—*with no settled principles*,—as ignorant as any benighted Hottentot—I repeat, a mere child,—

'Pleased with a rattle—tickled with a straw.'"

The September number is better on the whole than the previous one. The papers are more sensible, and the woodcuts equally interesting. It contains, however, a short poetical effusion called "Eugenie," which is less excusable than anything we have yet noted in the magazine, for it is disagreeable and vulgar, as well as miserably weak.

THE ART-JOURNAL. August and September, 1860. Arthur Hall, Virtue, and Co.

THE two numbers of the "Art-Journal" before us contain engravings of unusual interest. In the August number we have Ruben's portrait of his wife from the Royal Collection, and Turner's "Rain, Steam, and Speed," besides a very pleasing little pastoral piece, called "Going to Labour," by J. T. Ibbertson. The engraving gives with remarkable truth and beauty the wonderful atmospheric effects which Turner succeeded in transferring to canvas in his picture of the Great Western Railway at the Abingdon viaduct over the Thames. The Companion Guide in South Wales, a biographical chapter of Richard Ansdell, giving woodcuts of several of his most pleasing productions, and a very entertaining chapter on "Mediæval Manners," complete the illustrated portion of the number. The September number is no less interesting, and contains an engraving of Copley's picture of "The Royal Princesses: Children of George III.," a charming composition; another of Turner's, "Peace—Burial of Wilkie," the poetry and beauty of which are well known by this time to the public; and a third of Gibson's "Preparing for the Bath." "South Wales," "The Hudson," "Rome and her Works of Art," containing some of Raffaelle's most renowned works, and "Routledge's Illustrated Natural History," form the subjects of the wood-engravings. In artistic excellence, and judicious choice of pictures and topics, this periodical more than sustains its well-established reputation.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

I have been favoured with the perusal of the proof sheets of the evidence taken in the latest sittings of the Superior Council of Commerce on the commercial treaty with England, and jot down a few of the notes which I made *en passant*. The President of the Chamber of Commerce of Verviers, in Belgium, proved, in contradiction of certain assertions of the Sedan (French) manufacturers, that the reduction effected some time ago in the import duties on English cloth in Belgium has not done any injury to the trade in that country, and that in fact the Belgians export largely through England. Some of the manufacturers of the same town of Verviers declared that they are in favour of complete commercial liberty in Belgium, even though the Germans, their neighbours and rivals, can confessedly make certain descriptions of articles cheaper than they. People from St Quentin (France), who comb, spin, and weave merino wool, stated that the English cannot possibly compete with them, and yet they asked for protection from fear of the future! The manufacturers of Roubaix asserted that the cost price of their goods is 25, 30, or 40 per cent. higher than in England, and they accordingly claimed excessive protection, namely, 3f the kilogramme on the inferior qualities of fabrics of pure wool, or of wool mixed with silk, cotton, alpacas, goat's hair, &c., and 30 per cent. *ad valorem* on other sorts; they also demanded the adoption of strict Customs' regulations in estimating the value. The makers of cotton velvets at Amiens asked for 30 per cent. protection; and the manufacturers of *dentelles de laine* of the same city called for the same sum, though they admitted that the article is only made in France, and that they export it to England! M. Kœnig, of Sainte Marie aux Mines, a great personage among the protectionist fraternity, claimed 30 per cent. on woollen and cotton and on pure cotton fabrics. Some carpet makers solemnly declared that 30 per cent. was not sufficient protection for them, and they represented that not only do they possess an enormous stock (30,000,000f worth), but that the demand is declining. A gentleman named Gallerad, however, who is largely engaged in the trade, represented that in his opinion no protection is necessary, and in proof of it he stated that he makes to the United States exports of common carpets worth from 200,000f to 300,000f annually, and that he has just entered into a contract to send abroad every year for some time to come 2,500,000f worth of such articles. The means by which he is able to do this are, he said, simply that he employs the best machinery and the latest discoveries, whereas his competitors follow routine. A representative of the hosiery trade declared that articles of hosiery cost 40 per cent. dearer to make in France than in England; but the Minister of Commerce expressed reluctance to believe that such a thing could be true, and observed that if it were, it is highly discreditable to the manufacturers. Though hosiery is in such universal demand, it was stated that no French makers have taken the trouble to introduce the improvements made in English machinery, nor even to employ steam! The shawl makers declared that they do not need any protection; but the Chamber of Commerce of Nimes, which is their representative, said that if, in spite of that declaration, the Council should think fit to give protection, it might adopt the figure of 15 per cent. *ad valorem*. The leather trade asked for protection for different articles, and especially for soles for shoes: this trade was stated to be in a very backward state compared with that of England, but nevertheless it entertains greater fear of the Germans than of the English; among other things it asked for a protection of 20 per cent. on morocco leather against the Germans. A large commission agent declared protection on goat, sheep, lamb, and kid skins, in whatever form they may be, quite unnecessary. The glove makers also admitted that they need no protection, but prayed that skins for making gloves may be admitted free of duty. The dealers in ready-made boots and shoes, and in men's and women's garments, also stated that they do not want to be protected. (How the shoemakers can do without protection when the leather makers cannot was not explained.) The makers of caoutchouc articles asked for 25 per cent. The makers of billiard balls and other articles in ivory also claimed protection, though boasting of the superiority of their wares to those of England. Carriage makers tried to show that wood and iron and steel and most other things are dearer in France than in England, and will remain so in spite of the treaty;

also that French workmen are not so skilful as English; and they therefore claimed protection of at least 30 per cent. But it was shown that the superior sorts of carriages are *dearer* in London than in Paris, that any advantage which English makers may have as regards iron and steel is counterbalanced by the high wages they have to pay, and that the French have actually, by the quality and cheapness of their productions, driven the English from the markets of South America, Cuba, the East Indies, Spain, Morocco, and Portugal. The sugar refiners had the incredible assurance to ask for protection of from 50f to 64f the 100 kilogs against the English, and yet it was affirmed that they export 60,000 to 65,000 tons annually, when the English only export 6,000! The shipbuilders, in a truly pitiable manner, maintained that they cannot possibly carry on competition with the English unless largely protected, because they have not the same machinery, the same facility in obtaining materials, or the same skilled workmen, and because they are subjected to a host of vexatious Governmental regulations from which the English are exempt; and they attempted to frighten the Council by stating that their industry is of national importance, inasmuch as without it France cannot get shipwrights or ships in a naval war. But they could not agree among themselves as to whether the protection of 30 per cent., which was the figure most of them asked for, is necessary for all, or only for certain descriptions of vessels; whether or not it should be imposed on old as well as new vessels, or vary according to the age or service of each; or lastly, whether it should be imposed *ad valorem* or on the tonnage.

You will, perhaps, be struck by the fact that so many representatives of different trades should ask for the same amount of protection, 30 per cent. *ad valorem*. This, however, is only owing to that sum being put down as the maximum in the treaty: if the maximum had been fixed at ten times as much they would have demanded it as a matter of course, and would have laboured to convince the Council that they could not possibly exist with less.

In answer to the letter of your correspondent, the Brazilian merchant, on the subject of the paragraph in my last letter, relative to the production and consumption of coffee, I have the honour to state that he will find the matter very fully treated in the *Borsen-halle* of Hamburg, of August last, and also in some commercial circulars of merchants at Rotterdam and Amsterdam, which cities are, as he knows, two of the greatest coffee markets on the Continent. It was from a Rotterdam circular, dated the 11th, that I took the figures quoted in my last. Undoubtedly, as your correspondent remarks, it is not possible for the present to say with "reliable certainty" what the production of coffee "next year" will be; but it is not at all impossible from a comparison of the production of preceding years to estimate what it will *probably* be, and the *probable* production of 1860 and 1861 was alone mentioned. In my quotations, I only took the great totals, but now give the details of them—premising that, as noticed by your correspondent, the last figures in the paragraph were, by a misprint, reversed, representing the production of 1861 to be the consumption, and *vice versa*:—

	Production.			Probable.
	1859.	1860.		1861.
	tons.	tons.		tons.
Brazil	165,000	42,000		158 to 165,000
Java, Sumatra	63,000	54,000		55 60,000
Ceylon, Madras, Penang	29,000	28,500		28 30,500
Manilla, Arabia	2,000	2,000		2,000
Cuba, Porto-Rico	9,000	9,000		9,000
Côte-Ferme	13,000	8,000		10 12,000
Saint Domingo	24,000	23,000		23 26,000
Costa Rica	5,000	5,000		5 6,000
French West Indies & Reunion	500	500		500
Dutch ditto	500	500		500
English ditto	1,000	1,500		1,500
Total	312,000	274,000		293 to 313,000
	Consumption.			
In Europe	230,000	235,000		240,000
In the United States	100,000	102,500		105,000
Total	330,000	337,500		345,000

The following table, setting forth the marked increase which has taken place in the consumption of coffee since 1832, is very interesting, and will suffice to show that the estimates made of the quantity likely to be consumed this year and next, are not exaggerated:—

	1832.	1847.	1859.	Average. 1857-59
	tons.	tons.	tons.	tons.
Great Britain	11,000	16,000	16,000	15,500
France	10,500	16,500	30,500	29,000
Belgium	15,500	18,500	22,000	21,500
Holland	14,000	15,000	17,000	16,500
Germany, Zollverein, &c.	30,000	54,000	76,000	74,300
Austria, Hungary, &c.	12,000	15,000	19,500	19,200
Switzerland	4,500	6,000	9,000	9,000
Italy, Greece, Levant	9,000	13,000	17,500	17,000
Sweden, Norway, & Denmark	5,000	8,000	11,000	11,000
Russia	2,000	3,000	5,000	5,000
Spain, Portugal	3,500	5,000	7,000	7,000
For Europe	117,000	170,000	230,000	225,000
United States	22,000	70,000	100,000	95,000
Total	139,000	240,000	330,000	320,000

It was mentioned in a recent letter that the Comptoir d'Escompte (Discount Bank) of Paris was about to extend its operations to China, beginning with Shanghai. It has already, it appears, despatched agents to that place to form a branch establishment, and the announcement is made (not officially however) that it is making preparations for forming other branches at Calcutta, Bombay, Madras, and Pondicherry.

Business on the Bourse has not been very active during the past week, but quotations have improved:—

	Thursday, Sept. 20.	Thursday, Sept. 27.

The following is an account of the markets:—

Flour at *Paris* has risen: yesterday the price was 57f to 62f the sack of 159 kilogs; four marks, 59f to 59f 25c for the present month and October.

Wheat.—At *Paris*, an advance has taken place in quotations: yesterday the sack of 120 kilogs was 35f to 37f. Of the provincial markets, 61 present a rise of from 25c to 2f the hectolitre, 33 a fall of from 15c to 1f 88c, and 27 have undergone no change.

Cotton.—The sales at *Havre*, in the week ending Friday, were 9,877 bales, and the arrivals 5,150. The closing prices were 1f higher for the very low, and the low New Orleans and Mobile, and for the very ordinary of all sorts, other qualities remaining unchanged. Low New Orleans was consequently 84f the 50 kilogs, and very ordinary ditto 94f. This week, business was active on Monday, but on Tuesday and yesterday was calmer: prices unchanged.

Sugar.—At *Havre*, in the beginning of the week ending Friday, some sales of French West India were made at 49f 25c and 49f 50c the 50 kilogs; but in the latter part of the week the demand fell off, and prices declined to 49f and 48f 50c. The total sale of the week was, however, only about 700 hogsheads. In foreign, 815 casks Havana went at 37f to 37f 50c the 50 kilogs in bond. The arrivals were upwards of 1,500 hogsheads French West India, and upwards of 2,700 Havana. This week, sales have been unimportant: French West India, 48f 50c and 49f. At *Nantes*, last week, the large quantity of 43,591 sacks Reunion were sold at prices varying from 45f to 53f 25c the 50 kilogs. Some small lots of French West India were also disposed of at 48f 50c to 51f 50c. This week, 1,273 sacks Reunion "gros grain" have been sold at 56f 50c. At *Bordeaux*, last week, the sales were unimportant, and prices fell; French West India being 48f; Reunion, 52f. This week, a small lot of French West India has been sold; price not stated.

Coffee.—Business at *Havre*, in the week ending Friday, was very active, and prices were firm. 1,100 sacks Hayti Port-au-Prince went at 79f the 50 kilogs in bond; 950 ditto Jacmel and Cayes, 78f 50c; 1,700 Cape, 82f; 200 Gonaives, 82f 50c; 1,370 ditto for delivery, 82f 50c to 83f; 120 Rio not washed, 75f; 700 ditto washed, 82f 50c to 84f 50c; 620 Porto Rico, 90f to 93f; 1,250 Porto Cabello, 85f to 88f; 2,630 Ceylon triage, 108f 50c to 110f 50c duty paid; 800 ditto for delivery, 109f; 200 Macassar, 112f 50c; 1,030 sacks Malabar for delivery, 112f. The arrivals were nearly 1,700 sacks. This week, sales have been numerous: Malabar, 109f duty paid; Ceylon plantation, 123f; Gonaives, 84f in bond; Rio, 75f 50c to 76f 50c; ditto washed, 91f; Hayti, 79f 50c; Porto Cabello, 85f 50c. At *Nantes*, last week, 311 sacks Port-au-Prince went at 81f and 81f 50c; 4,000 sacks Porto Cabello, 85f 25c; and 200 Reunion, prices not stated. This week, there have been no sales. At *Bordeaux*, last week, business was not important: a small lot of Santiago at prices kept secret; 40 sacks Rio washed, 90f; 20 sacks Java at price previously established; 600 Virginie, 115f 50c. This week, large sales have been made of Guayra, part at prices kept secret, part at 90f; some quantities of Mysore and San Yago have also been taken at prices kept secret.

Indigo.—At *Havre*, last week, the sales were 30 cases Bengal and 4 Madras, at different prices not stated. The arrivals were 70 cases from England. No sales have been made this week. At *Bordeaux*, last week, 38 cases Bengal, 2 Madras, and 7 Kurpah were sold. Quotations were: Bengal, 12f 50c to 25f 50c the kilogramme; Madras, 6f to 13f; Kurpah, 10f to 21f. This week, some small quantities of Bengal, Kurpah, and Guatemala have been sold; prices not stated.

Hides.—The demand at *Havre*, in the week ending Friday, was regular: 1,400 Monte Video salted, at 72f to 82f the 50 kilogs duty paid; 1,000 Rio Janeiro saladeros, 62f 50c; 200 Minas dry, 122f; 900 Pernambuco drysalted, 96f; 930 ditto salted, for delivery, 67f 50f; 788 Valparaiso salted, 72f 50c for ox, and 69f for cow; 323 Gaudeloupe salted, 61f 25c; 500 New Orleans ditto, 54f 50c; 500 New York ditto, 56f. The arrivals exceeded 20,000. This week, business has been active: Monte Video salted, 81f 25c; Buenos Ayres, 81f ox, 77f cow; Rio Grande dry, 125f; New York salted, 55f and 56f; Valparaiso salted —prices kept secret; Pernambuco drysalted, 96f to 105f; horse Buenos Ayres dry, 8f 50c each; 400 ditto salted, 101f 25c the 100 kilogs.

WOOL.—At *Havre*, last week, the sales were 75 bales La Plata unwashed, at 1f 80c to 3f the kilog; and 4 sheepskins Buenos Ayres, 97½c. The arrivals were about 900 bales. This week, some sales of Buenos Ayres unwashed have been made at 2f to 2f 80c the kilog.

TALLOW.—No sales were made at *Havre*, last week, but 158 pipes and 725 casks arrived. This week, nothing has been done. At *Paris*, yesterday, the 100 kilogs were 143f 70c,—a rise on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. was 102f the hectolitre; Montpellier, of 86 deg., 135f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 130f; and beetroot, first quality, 108f.

FRANKFORT, Sept. 24.

The autumn fair in this city is the worst that has been known for some time past. Very few sales were made, and payments for previous transactions were effected with difficulty. The cause of this state of things is the political situation.

AMSTERDAM, Sept 25.

A public sale of several thousand bales of coffee has just been effected here: prices very firm.

Correspondence.

CONSUMPTION OF COTTON.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The importance attached to the views expressed by your journal is deservedly so great, that you will, I am sure, in the interests of truth, pardon me in bringing to your notice some misapprehensions into which I think you have fallen in your valuable article entitled "Cotton Supply of Great Britain," which appeared in your issue of the 15th Sept. You have fairly stated the general fact that since the year 1849 (previous to which a range of low prices had checked increase of coltivation) a gradual rising price has greatly stimulated the production of cotton in the United States, and led to larger importations from the East Indies and other countries. And there can be no doubt that the prices now current for American descriptions are highly remunerative to the grower, and will lead to still further increased cultivation, if the labour can be found. You justly state that we are practically dependent upon America for the great bulk of our supplies; she furnishes a *quality* of cotton which India does not, and perhaps cannot produce, although at a remunerative price India *could* furnish an inexhaustible *quantity* of her own indigenous growths. It, therefore, becomes a matter of the first importance that we should be able to form some reliable estimate of the capabilities of America with respect to the extension of her growth.

In order to form an accurate idea of what the ratio of increase per annum has hitherto been, it is necessary to go back one year before the commencement of your table, viz., 1848-49. The crop was then 2,728,596 bales; the increase thereupon in four years was exactly 20 per cent., or at the rate of 5 per cent. per annum, viz., in 1853, 3,262,882 bales. At the same ratio of increase the crop of 1858-59 was due in 3,900,000 bales: it proved to be 3,851,000 bales. In 1859-60 a crop of 4 millions of bales was due, and has been exceeded by half a million of bales. Such a disproportionate increase is not uncommon; for whereas in 1854-55 the crop was 2,847,000 bales only, in the following year it was 3,528,000, while in 1856-57 it again fell to 2,940,000. A very favourable season such as the last undoubtedly was, with the stimuli of high price and guano, to the use of which latter you refer, will readily account for an increase of 12 per cent. in place of 5 in the ordinary estimate of yield.

To the introduction of guano you would appear to attribute the increase of "a million and a quarter of bales of cotton" "beyond the average;" but when it is considered that the quantity of cotton land under cultivation is certainly over seven millions of acres, and probably not less than eight millions, the quantity of this manure required to increase the yield of even one million of acres is so enormous as almost to preclude the possibility of its general use. Moreover, it would appear from a return of the American Government issued in 1852, that there were then available upwards of thirty millions of acres of virgin land in the Southern States suitable for cotton cultivation.

The question of average extension of the United States crop would appear, then, to resolve itself into one of labour supply, dependent also upon the continuance of a remunerative price.

The number of slaves estimated to be employed in cotton cultivation in the States in 1852 was 800,000 out of a slave population of four millions. To what further extent the supply of labour for cotton culture is available appears to be a matter of uncertainty.

The effect of the abundant supply of American cotton has been to reduce greatly the consumption of East India, which has decreased from 6,500 bales per week in 1857 and 1858 to something over 3,000 in 1859, and so ruinous has been the depreciation in price, that *export** from India for the time being has almost ceased. This discouragement is the more to be regretted, as great pains have been taken of late in India to effect improvements, and the great bulk of the cotton is now shipped perfectly free from adulteration of any kind, in most excellent condition. The fact remains that American cotton will be used in preference when it can be obtained, and our dependence upon the States is rendered the more striking.

The average weekly consumption of cotton for the United Kingdom since the 1st of January last has been 60,000 bales.* The consumption is now increasing all over Europe, and, with the ordinary progression of trade, we must look to America for a continuance of her efforts, and it would be highly interesting to know how far our confidence in doing so is justified.—Yours obediently, E. I.

* Our correspondent is mistaken in speaking of the *export* of cotton from India as having decreased. He refers only to the consumption in England. The export to England has largely increased, but the mass of Indian cotton is re-exported. The consumption of East India cotton in this country has been as follows:—

	bales.
1856	281,485
1857	362,136
1858	322,580
1859	177,813
1860 (Six months)	96,693

COMMERCIAL AND MISCELLANEOUS NEWS.

Jamaica advices are to the 8th inst. *Cordova's Mercantile Intelligencer* states that there had been almost a total stagnation in trade during the fortnight, and the sales which had been made were reported as having been forced, with but few exceptions. From Trinidad also our reports inform us that the fortnight had been marked by extreme dulness in every branch of trade. The following is a return of produce shipped from Trinidad from the 1st of January, 1858, to date:—

Year.	Sugar. Hhds.	Trcs.	Brls.	Molasses. Puns.	Trcs.	Rum. Puns.
Sept. 5, 1858	35,258	5,091	3,632	10,435	278	2,586
Sept. 5, 1859	38,333	6,013	3,335	11,821	271	2,112
Sept 5, 1860	38,825	5,117	2,894	8,038	1831	1,063

Year.	Cocoa Pounds.	Coffee. Pounds.	Cotton. Bales.	Sers.	Indigo. Str.
Sept. 5, 1858	4,599,800	89,400	156	...	3
Sept. 5, 1859	4,356,400	53,100	295	22	9
Sept. 5, 1860	4,213,830	6,660	...	26	1

The quantity of crops shipped from Antigua to the 31st of August was reported to be—11,351 hhds sugar, 4,725 puncheons molasses, and 550 puncheons rum.

The operations of the United States Branch Mint at New Orleans, for year ending July 31, 1860, were as follows:—

DEPOSITS.	dols
Gold and silver	1,472,446
Previous year	3,145,880
Decrease in 1860	1,673,434

COINAGE.	No. Pieces.	Value. dols
Gold	11,800	154,000
Silver	4,675,000	1,438,000
Silver bars		29,209
Total value		1,621,209
Previous year		3,578,996
Decrease in 1860		1,957,787

Statement of the deposits and coinage at the United States Mint in Philadelphia, for the month of AUGUST, 1860:—

DEPOSITS.	dols	c
Gold from all sources	132,133	41
Deposits and purchases of silver	22,741	20
Total deposits	154,874	61
Copper cents (o.a.) received in exchange for new cents	5,765	0

In consequence of repairs going on, there was no coinage at the mint during the month of August.

The annexed report shows the state of the Albany lumber market during the week ending the 12th inst.:—The receipts of lumber are comparatively light, and the reported shipments from the West are small. The stock in market is ample as yet, though considerably reduced by the heavy shipments of the week. Prices of all kinds of lumber are firmer; common pine and hard woods have advanced, and all descriptions show an upward tendency, and the outside figures in our prices current exhibit the nearest figures to the present market prices, as shown by recent sales by the leading dealers. Vessels for Eastern ports are much wanted, and there is a large amount of lumber sold, waiting shipment. The receipts by the Erie and Chaplain canals, during the first week in September, in the years named, were as follows:—

	Boards and Scantling, ft.	Shingles. M.	Timber. C. ft.	Staves. lbs.
1858	8121293	1180	2000	5552500
1859	10699000	944	2875	4818000
1860	11291000	800	...	10279690

The receipts of boards and scantlings show a very slight increase over the corresponding week of last season, but the great bulk of this was shipped, or contracted to be brought to this city, previous to the advance in canal freights. The receipts in staves have been very large, being more than double the amount received during the corresponding week of last year. The receipts by the Erie and Champlain canals, from the opening of navigation to September 8, in the years named, were as follows:—

	Boards and Scantling, ft.	Shingles. M.	Timber. C. ft.	Staves. lbs.
1858	178856369	19698	81159	91832442
1859	189305762	36823	58993	85049503
1860	209532600	33301	31959	85065777

The receipts thus far show an excess over last season of boards and scantling equal to 20,226,838 feet, which may be entirely lost before the close of the season, on account of the advance in canal freights, if a corresponding advance is not speedily realized in lumber. In shingles and staves there is no material change to note from those of last year.

The following return shows the state of the note circulation in the United Kingdom during the four weeks ending August 25, 1860, compared with the previous month:—

	July 28, 1860.	Aug. 25, 1860.	Increase.	Decrease.
	£	£	£	£
Bank of England	22039963	21677669	...	362294
Private Banks	3466581	3350069	...	116514
Joint Stock Banks	2993615	2927249	...	66366
Total in England	28500161	27954987	...	545174
Scotland	4059686	4114195	54509	...
Ireland	6303192	6187709	...	115483
United Kingdom	38863039	38256891	...	606148

* The entire weekly consumption up to July 1 was under 50,000 (viz., 49,868).

And, as compared with the month ending the 27th of August, 1859, the above return shows a decrease of 145,356*l* in the circulation of notes in England, and a decrease of 138,416*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,054,866*l*, the English joint stock banks are below their fixed issue 375,108*l*,—total below fixed issue in England 1,429,974*l*; the Scotch banks are above their fixed issue 1,364,924*l*, the Irish banks are below their fixed issue 166,785*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 22nd of August was 15,634,753*l*, being a decrease of 528,351*l* as compared with the previous month, and a decrease of 1,477,403*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 25th of Aug.:—Gold and silver held by the Scotch banks, 2,476,332*l*; gold and silver held by the Irish banks, 2,267,820*l*; total, 4,744,152*l*; being a decrease of 111,866*l* as compared with the previous return, and an increase of 163,269*l* when compared with the corresponding period last year.

COTTON.

New York, September 15.

The market has been somewhat depressed during the past three days, and transactions are moderate. Some holders manifest a willingness to accept of slightly lower rates, but, in the absence of a positive reduction, we re-insert our previous quotations. The sales aggregate 3,500 bales, closing quietly. We quote:—

New York Classification.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	7	7	7	7¼
Good ordinary	8¼	8¼	8¼	8¼
Middling	10¼	10¼	11	11¼
Good middling	12¼	12¼	12½	12⅝
Middling fair	12½	12½	12⅞	13⅛

The arrivals have been from New Orleans, 1,122 bales; Georgia, 182; South Carolina, 483—total, 1,767 bales. Total import since 1st inst., 6,407 bales. Export from 1st to 11th September, 3,422 bales against 5,592 bales in 1859.

LIVERPOOL MARKET.—September 28.

A good business has been done in cotton this week, speculators in low American and East India having been the most active buyers. A slight hardening has taken place in the value of American, but our quotations will not bear alteration. Cottons of good character and staple are by no means abundant. Egyptian have been in fair demand, but do not realise any advance. Brazil are firmly held, and not in free supply. East India command full prices. The sales to-day are 10,000 bales. The market is healthy. The reported export amounts to 8,130 bales, consisting of 2,580 American, 270 Brazil, and 5,280 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for cotton goods for shipment to India still continues on a very moderate scale; but, on the whole, the China trade is tolerably healthy. For the Continent, the inquiry is firm, and there is a large business doing for home use. Woollens have mostly sold at extreme rates; but the inquiry for iron has fallen off, and several furnaces have been thrown out of blast in the midland counties. The reduction in the make of iron will, of course, reduce present stocks to some extent. The coal trade is very active, and prices continue to rule high.

Manchester, Sept. 27.—The market has fully sustained previous quotations. A considerable business has been done in our leading staples, which are now in the main very much engaged to order. The ordinary qualities of water twist for China and Bombay, the medium qualities of cop twist and weft for home manufacture, and the chief makes of shirtings from 6 lbs to 9 lbs, have been specially stiffer in price, spinners and manufacturers of these having in many cases contracts till almost the end of the year. For other articles there is a general though hardly so animated an inquiry, confidence being in the meantime based rather on the hardening tendency of cotton with the easy money market, than directly on consumption. Though accounts from India are still adverse, those from China to-day have given a decisive impetus in the way of improvement.

Comparative Statement of the Cotton Trade.

Bradford.—Wool—There has been less done, though some staplers report a good business. Prices are quite firm, and their stocks not pressing so heavily as a few weeks ago, staplers show less anxiety to force sales. In noils and brokes there is no quotable alteration. Yarns—There is a steady business doing for export, and spinners continue well engaged to order. The home manufacturers are still flat, and are not taking nearly their usual quantity. Prices are firm, with a hardening tendency. Pieces—The American houses are displaying a little more activity, and several orders have been placed.

Leeds.—Prices rule steady, and from the quantity of goods in course of delivery direct, the stocks are kept in moderate compass, and the mills continue well employed. Business has been rather brisker in the warehouses, the transactions being to about an average extent.

Halifax.—For worsted yarns some good orders for the Russian and Leipsic markets have been received, but the home demand is not very brisk. The carpet, woollen, and cotton trades are all moderately active, but none of them are brisk. Wools are firm in price, and some kinds have an upward tendency.

Huddersfield.—Quietness is still the term most characteristic of our market. The few buyers who have been about the Cloth Hall and the warehouses have been intent only on the supply of their immediate wants. Prices are still well supported.

Leicester.—The home demand for worsted and woollen hosiery is dull for the season. The shoe, fancy, and elastic trades are flat, and less is doing in them.

Nottingham.—A little more is doing in the lace trade, and this week a few good orders have been received. Plain goods meet a better demand, and more is expected to be done in this branch shortly. The fancy trade is as quiet as it has been for some time past; plaits are in fair request. In the silk lace trade there is no improvement visible.

Glasgow.—The market for all classes of wool has continued good. Prices have a tendency in favour of the seller, and extreme rates have been obtained.

Belfast.—Flax found a ready sale in the various country markets during the past week. From the county Armagh district we continue to receive favourable reports as to the quality and yield of the new crop. The reports from Cookstown are of a less satisfactory nature. Very little of prime quality is appearing in that market. The supply on last Saturday was of inferior quality to any that had been previously presented during the season. Yarns—Although the demand for home consumption continues to be limited, still the transactions of the past week were of a more extended character than those of the week preceding. Some slight improvement in continental demand has been exhibited; still, on the whole transactions have been comparatively small. Stocks have not undergone much change. Light line warps have slightly increased. Medium numbers of wefts are scarce.

Rochdale.—Trade has a tendency towards improvement, though there is no very material increase in the actual business transacted. Prices both of flannels and other goods are well maintained, and are likely, if anything, to be rather stiffer, as the Government have invited tenders for a large supply of goods, serges and flannels. It is said that no less than about 14,000 pieces altogether will be required. The Yorkshire trade continues satisfactory, and stocks are low.

Wolverhampton.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; best native hydrate pigs, 3*l* 10*s* to 3*l* 17*s* 6*d*; first-class All Mine Grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; good mine pigs, with a modicum of flue cinder, 2*l* 17*s* 6*d* to 3*l*; mine pigs, deteriorated by cinder, 2*l* 10*s* to 2*l* 17*s* 6*d*; Cleator Moor hæmatites, 3*l* 7*s* 6*d* to 3*l* 8*s* 9*d*; Workington hæmatites, 3*l* 7*s* 6*d* to 3*l* 8*s* 9*d*; Kirkless Hall hæmatites, 3*l* 7*s*. 6*d* to 3*l* 8*s* 9*d*; Barrow hæmatites, 3*l* 12*s* 6*d* to 3*l* 15*s*, none in the market; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6*d*. Melters, Nos. 1, 2, and 3, 2*l* 12*s* 6*d* to 2*l* 15*s*; superior makes of All Mine melting iron, 3*l* 7*s* 6*d* to 3*l* 17*s* 6*d*., according to make and quality. Favourite Shropshire and Forest of Dean brands, 4*l*; northern hæmatites from 3*l* 7*s* 6*d* to 3*l* 12*s* 6*d*, according to brand and quality. The preliminary meeting of the Ironmasters' Association was held on Thursday. It was agreed that the prices that have ruled in the past and some previous quarters should be the prices for the next three months. These prices are—bars, 7*l* 10*s*, and sheets and plates, 9*l*.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 12.—FLOUR AND MEAL.—The present week opened with a fair demand for consumption and shipment, and State flour again advanced 5c per bbl. Western brands were more or less heavy. The market opened heavily yesterday, and the lower grades depreciated 5 to 10c per bbl, at which, however, there prevailed a tolerably active inquiry, and transactions were to a fair extent. Shipping brands of round hoop Ohio have been in steady request and prices remain firm. The sales for the three days aggregate 51,000 bbls, the market closing heavily. Canada flour has also been in steady, fair demand, and all grades have been pretty fairly dealt in. The total sales are 3,200 bbls. The market for Southern flour has undergone no material change since Friday last, the demand having been moderate for all grades, which have been taken at about former prices, except for Georgetown and Brandywine, which have advanced somewhat, the sales having been at 6.15 dols to 7.40 dols for the former, and 6.50 dols to 6.75 dols for the latter. The sales comprise 7,500 bbls.

EXPORT, from 1st to 11th September.

	1860 barrels		1859 barrels
Wheat Flour	59,541		45,168

GRAIN.—The market remains steady and firm for all kinds at about previous rates. The sales since Friday amount in the aggregate to 540,000 bushels, including 23,000 Chicago spring at 1.19 dol to 1.26 dol; 5,500 white Kentucky, 1.55 dol to 1.60 dol; 8,500 unsound and soft white Ohio and Indiana, 1.30 dol to 1.40 dol; 39,000 winter red Western, 1.36 dol to 1.39 dol; 26,800 Milwaukee Club, 1.25 dol to 1.32 dol; 17,600 unsound winter red Western, 1.30 dol to 1.35 dol; 4,000 red State, 1.40 dol; and 14,000 white Michigan, 1.43 dol to 1.61 dol—the market closing heavily, at somewhat irregular prices. Corn has been in moderately active request for the most part, and the advance established on all kinds previous to our last has been fully sustained, except for Western mixed, which declined 1c per bushel yesterday, the market closing heavily at 68c to 69c; the sales comprise 168,000 bushels, of which 21,000 were placed yesterday.

EXPORT, from 1st to 11th September.

	1860 bushels		1859 bushels
Wheat	341,137		none
Corn	51,404		9,811

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The supplies of English wheat on offer here this week have been on a very moderate scale, and mostly in poor condition. For good and fine samples the demand has ruled steady at a further improvement in the quotations of from 1s to 2s per quarter. Low and damp parcels, however, have moved off slowly at about previous rates. Although the imports of foreign wheat have continued on a liberal scale, the inquiry for all kinds has been somewhat active, at 1s to 2s per quarter advance. Fine barley has produced 1s above late rates, and the value of other kinds has been well supported. The malt trade, however, has ruled very inactive on former terms. There has been a good consumptive inquiry for oats, and sound corn has commanded rather more money. Both beans and peas have sold readily, and a full average business has been passing in flour. The country markets have been somewhat active for good and useful wheats at 1s to 2s per quarter above last week's currency. Barley and all other articles have changed hands at very full prices. Throughout the Continent, wheat has commanded more inquiry on English account, at extreme rates to a slight advance. All other articles have moved off freely on former terms. In the United States, large quantities of produce still continue to change hands for London, Liverpool, and Glasgow, at slightly enhanced rates. The supplies coming forward were extensive.

Owing to the unfavourable change in the weather, harvest-work has made very little progress this week. There is still rather a large quantity of wheat and other produce in the fields, and it is apprehended that future samples will prove very deficient in quality. On the Continent, nearly the whole of the crops have been secured in, for the most part, fair condition.

Judging from the poor quality of most of the new samples of the new crop as yet disposed of, we are of opinion that good dry wheat will rule high in price for some time; and further, that it will be necessary to import largely to meet our deficiencies. In Ireland, wheat, oats, and barley, as well as Indian corn, have sold on rather higher terms. The general demand, however, has not been to say active.

The Scotch markets, almost generally, have been scantily supplied, and prices have had an upward tendency. The harvest has not suffered any serious interruption.

The few samples of English wheat on sale here, to-day, were disposed of at a further advance in the quotations of 2s per quarter dearer. All spring corn was very firm, and somewhat higher in price. The flour trade was steady, and the currencies had an improved tendency.

Mr Edward Rainford reports the state of the floating trade as follows:—There have been 48 arrivals at ports of call for orders since the 20th inst., consisting of 19 cargoes of wheat, 20 maize, 2 barley, 2 oats, and 5 beans, viz.:—Wheat, 5 from Berdianski, 2 Alexandria, 1 Trieste, 7 Taganrog, 1 Marianople, 1 New York, 2 Galatz; maize, 6 Constantinople, 4 Ibrails, 1 New York, 1 Galatz, 6 Sulina, 1 Fatza, 1 Odessa; barley, 1 Constantinople, 1 Odessa; oats, 1 Alexandria, 1 Ibraila; beans, 2 Casabianca, 1 Mazagan, 2 Alexandria. About one-third of these had found buyers before arrival. The business in cargoes afloat continues animated at improving prices, especially Indian corn. Since last Friday the following prices have been paid:—Wheat, arrived, Berdianski, 57s 6d to 58s 6d; 1 ditto, imperfect, at 57s 3d, with option to reject 10 quarters; Taganrog Ghirka, at 54s 6d to 55s 3d; Odessa, imperfect, 51s 9d, all per 492 lbs; Galatz, 54s 6d per 480 lbs; on passage, Taganrog Ghirka, 56s and 56s 6d, and old Benat 56s 6d per 492 lbs; Polish Odessa, 2 cargoes at 54s 6d per imperial quarter B. L. quantity, and 1 at 55s per 480 lbs, August shipment; Egyptian Saide, 43s 6d per imperial quarter; shipping or shipped, 2 small cargoes Taganrog Ghirka at 56s 9d; to be shipped end of October, Taganrog Ghirka, 55s 6d per 492 lbs. Maize, arrived, Racovaz 35s 7½d, Galatz 37s, and Foxanian at equal to 36s 10½d per 492 lbs; Ibraila, according to condition, &c., 34s to 36s per 480 lbs; American mixed, 34s 9d per 480 lbs, shipped, B. L. quantity; on passage, Galatz at 36s per 492 lbs; Ibraila, June shipment, 33s 9d; July shipment, about 13,000 quarters at 33s 9d to 34s 6d; August shipment, 1,900 quarters at 35s 6d, condition guaranteed; September shipment, 35s 6d; a cargo passed Gibraltar at 35s 9d; to be shipped in September or October, 5,000 quarters at 35s, all per 480 lbs. Barley, arrived, Ibraila, imperfect, 27s 6d per 400 lbs. Beans, arrived, 2 cargoes at 36s 3d per 480 lbs; on passage, Mazagan, 35s 9d net, and a cargo (direct to London) at 35s net per 480 lbs.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of September, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,957,085	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	15,482,085
		Silver Bullion	...
	29,957,085		29,957,085

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,663,511
Rest	3,790,286	Other Securities	19,569,349
Public Deposits (including Exchequer, Savings Banks Commissioners of National Debt, and Dividend Accounts	7,092,681	Notes	9,133,595
Other Deposits	12,973,222	Gold and Silver Coin	773,866
Seven Day and other Bills	721,132		
	39,130,321		39,136,321

Dated the 27th September, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,544,622	Securities	29,144,860
Public Deposits	7,092,681	Coin and Bullion	16,255,951
Private Deposits	12,973,222		
	41,610,525		45,400,811

The balance of Assets above Liabilities being 3,790,286*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£65,347
An INCREASE of Public Deposits of	127,215
A DECREASE of Other Deposits of	206,712
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	15,729
A DECREASE of Bullion of	123,807
An INCREASE of Rest of	5,308
A DECREASE of Reserve of	89,797

The Bank returns of this week present no important features, but such as they do are not of a favourable nature. Notwithstanding the great abundance of money during the week, and notwithstanding the rate of discount charged by the Bank was from ½ to ¼ per cent. more than in Lombard street, the other securities have only fallen off 15,729*l*; and notwithstanding the near approach of the dividends, the increase in the public deposits only amounts to 127,215*l*; whereas the decrease in other deposits amounts to 206,712*l*, and in bullion to 123,807*l*. This decrease in bullion may be accounted for in some measure by the remittance to India being principally in gold. There is also a decrease in the reserve of 89,797*l*.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 20,280,784	£ 19,931,234	£ 21,295,913	£ 22,030,294	£ 21,544,622
Public deposits	10,854,230	8,464,993	8,886,870	9,268,239	7,092,681
Other deposits	8,877,696	9,190,690	11,543,876	13,096,415	12,973,222
Government securities	14,453,230	10,593,653	10,980,684	11,220,018	9,663,511

Bank rate of discount	2½ p. c.	5½ p. c.	3 p. c.	2½ p. c.	4 p. c.
Price of Consols	96⅞	90¼	96⅛	95⅝	93⅛
Average price of wheat	42s 8d	56s 9d	44s 2d	41s 10d	58s 3d
Exchange on Paris (shrt)	25 25 30	25 20 25	25 15 20	25 10 15	25 15 20
— Amsterdam ditto	11 12⅛ 12⅜	11 16	11 15 16	11 14⅛ 15	11 13⅛ 14
— Hamburg (3 months)	13 9⅞ 10	13 8½	13 8¼ 8⅜	13 5½ 6	13 5½ 6

In 1850, the Bank for the first time had printed their returns in their present form. Money was rising in value, from anticipations of increased trade. Railways were also rising, and increased business was anticipated in them, in consequence of the New Stamp Act coming into operation, which reduced the scale of charges for transfer stamps from 20s to 2s 6d, with a proportionate diminution on larger sums. It is curious to draw attention to the prices of some of the railway shares at that date compared with the present. Midland Stock was then 45, now 129; Brighton 83, now 110; South-Eastern 35, now 85, &c.

In 1857, attention was concentrated upon the progress of the mutiny in India. News had been received that the British in Lucknow had not yet been relieved, and that the rebels still held possession of Delhi. The critical position of Havelock's reduced force gave rise to fresh apprehensions in many quarters. The attitude of the native troops in the Madras and Bombay Presidencies was watched with extreme anxiety. Consols were only a fraction above 90.

In 1858, Sir Hope Grant and other Generals were engaged in the pursuit of detached bodies of insurgents in Oude. A reduction in the Bank rate to 2½ was looked for, but it did not take place until some months afterwards. Consols had reached 98¼, being the highest price known for years, and most other classes of securities were at the same time advancing, a considerable degree of speculative animation being observable on the Stock Exchange. The new Turkish loan issued at 80 was at ½ pm., and the Brazilian loan commanded nearly 1 pm.

In 1859, the Bank rate of discount was 2½. Large arrivals of bullion were announced, and the abundance of capital was demonstrated by the fact of 3,500,000*l* of the new Indian loan of 5,000,000*l* being paid up before the second instalment was due.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 4,108,147*l*; in 1857, a deficiency of 10,529,010*l*; in 1858, a deficiency of 3,690,615*l*; and in 1859, a deficiency of 6,338,092*l*. In 1860, the deficiency is 6,586,127*l*.

DISCOUNT AND MONEY MARKET.—It is impossible even for the most experienced to predict the probable course of the money market. The fact is our commercial transactions are so enormous, and the ramifications of our trading and credit system so complicated, that even a day's transactions change the rate of money. For the first three days of this week, Lombard street was actually groaning under a plethora of money; first-class bills of exchange having a short time to run were sought after at 3½ per cent. Money in the Stock Exchange was difficult to lend at 2 per cent. Such was the state of money up to Wednesday. Yesterday, however, a considerable demand sprung up, and to-day the rate of discount may be quoted 3¾ to 4 per cent., and the rate in the Stock Exchange is 4 per cent.: indeed, 4½ has been paid on a moderate amount, but, of course, as the Bank of England is open to lend at 4 per cent., the rate of 4½ is exceptional, and we merely mention the circumstance to show how the rate of money has fluctuated.

The reasons given for this sudden demand for money are various, but it may be traced to the following causes:—

1. Large sums being withdrawn from the bankers to be paid into the Exchequer.

2. The bankers, in consequence, call on the discount houses for money lent at call.

3. Large payments are due to-day and to-morrow on the East India and Scinde Railways. Notwithstanding a large amount of these calls have been paid by anticipation, still the balance is said to amount to 400,000*l*.

4. The bankers and the discount houses have called in loans to a very considerable amount, say 700,000*l*, which had been lent from day to day in the Stock Exchange.

5. This being the last day of the quarter, a desire exists on the part of commercial houses to make their accounts look well at their bankers'. We think these causes are sufficient to account for the demand for money which has suddenly arisen, especially on the Stock Exchange. On the other hand, although there has certainly been an active demand for money to-day for discount, both at the Bank of England and in Lombard street, it must be borne in mind that until *yesterday and to-day* very little has been borrowed of the Bank in anticipation of the dividends, consequently the money market will have the full benefit of their payment. We may mention as another cause for the demand for money, and that is the calling on the public to pay a quarter's income tax, instead of collecting it half-yearly as formerly. A report was current to-day that Messrs Rothschild had called in a large sum of money from the Stock Exchange to purchase some of the silver brought by the Tasmania, but this is not the case. The principal sums called in are by the London and Westminster, and London and County Banks, and Messrs Overend, Gurney, and Co.

It is very possible, however, that preparing money to purchase this silver has had an influence.

It will be seen that our announcement last week of the arrival of 1,200,000*l* by the Tasmanian is substantially correct, the amount being 1,074,265*l*, but had the amount of dollars for the Mexican dividends which was confidently expected not been retained in Mexico, contrary to the expectations and greatly to the disappointment of the bondholders, the amount would have exceeded 1,200,000*l*. We must not omit to mention that the continued bad weather has a depressing influence on the money market, fears being entertained that that portion of the harvest which is yet out will be seriously damaged, and that the consequence will be large importations of corn, and exportations of bullion to pay for it. This certainly seems the most serious feature as regards the future of the money market. If to these we add loans for India, and possibly for fortifications looming in the distance, we cannot be surprised at the extreme sensitiveness of the money market as displayed during the last two days.

English Funds.—The transactions in the English funds have been very limited, and the price has remained during the week at 93⅜ to ¼ for money, and 93¼, alternately buyers and sellers, for the account. The last price this afternoon is 93¼ sellers. Exchequer Bills par to 3s premium. There has been but little doing in Indian securities. The question of the double income tax acts in a detrimental manner until it is settled. It would be well that the opinion of the law authorities should be taken; but it would appear that the Bill provides that the duties be deducted for and in respect of the annual profits arising to any person whatever, whether a subject of her Majesty or not, *although not resident in India*, from any property whatever in India, or any profession, trade, or employment carried on within India. And for and in respect of all interest of money, annuities, and other annual profits arising to any person residing in India, or accruing and payable in India to any person, *whether residing in India or not*, not charged by virtue of any other schedule of this Act. For and in respect of all profits arising from interest, annuities, or dividends payable in India to any person, *whether residing in India or elsewhere, out of any public revenue of India.*

The French funds close to-day at 68.45, being ¼ per cent. lower.

Foreign Funds.—The transactions in the foreign funds have been rather limited, the principal feature being a depression in Turkish Bonds, notwithstanding the announcement of the dividend due on the loan of 1854 in October being duly advertised. The bonds of this loan have not been materially worse, the fall being principally in the new bonds, which were done as low as 55½.

The cause of the fall has been a telegraphic announcement that the payment of the interest on the Treasury Bonds of Constantinople had been postponed; but this we are informed is an irregularity not uncommon in Turkey, and is not likely to affect the payment of the dividends on the foreign debt for which duties have been specially hypothecated.

Mexican Bonds had risen to 22½, but have since receded, on its being ascertained that the accumulations of dollars for the dividends still remained in Mexico, notwithstanding the safe arrival of a conducta with large remittances at Tampico and Vera Cruz, which have duly arrived in this country. The Mexican bondholders are the most long-suffering and patient of mortals, or they would "know the reason why" their dividends are retained by their agent. Some demand continues for Spanish dividend certificates. In other foreign funds the transactions have been limited, with very little variation in price.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

	Consols. Money. Lowest.	Highest.	Account. Lowest.	Highest	Exchequer Bills.

Railways.—There have been considerable fluctuations in railway shares, but the account in them has passed off in a satisfactory manner, the rates of continuation being very moderate, in consequence of stock being taken off the market with borrowed money by the speculators for a rise. Lancashire and Yorkshire, Midland, and Great Western have been the favourite stocks dealt in. South-Eastern has been heavy. As for several accounts a great deal of stock has been "pawned," it is not improbable, should any real pressure for money arise, that it will be suddenly thrown on the market.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

Railways.	Closing prices last Friday.	Closing prices this day.

Bullion.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—We have no Australian arrivals to announce this week; the following amounts have, however, come to hand:—77,500*l*, per City of Baltimore, from New York; 70,000*l*, per Africa, from New York; 53,500*l*, per Tasmanian, from the West Indies. Only 8,000*l* has been sent to the Bank since our last circular; 20,000*l* has been withdrawn from the Bank. An active demand for gold has existed, chiefly for Bombay; the Peninsular and Oriental Company's steamer, which sails from Southampton this day, having 179,422*l* on board for that port, and 1,000*l* for Alexandria. The Dover Castle left Melbourne for London on 23rd June, with 228,000*l*; the Malta (steamer) left Melbourne on 18th June, with 91,000*l*; the Orwell left Melbourne for London on 11th July, with 151,000*l*; the Red Jacket left Melbourne for Liverpool on 17th July, with 152,000*l*; the Norfolk left Melbourne for London on 25th July, with 140,800*l*. The two first named vessels are now due. The Swiftsure, the Water Nymph, and the Sussex, as stated in our last circular, would probably leave Melbourne at the dates specified.

Silver.—Our market has been inactive of late. The arrivals have been the Tagus, from the Peninsula, with 3,340*l*; Tasmanian, from the West Indies, with 1,074,265*l* in silver and Mexican dollars. The Peninsular and Oriental Company's steamer of this day, from Southampton, has 48,918*l* in silver for Bombay. The last price for standard bar silver was 5*s* 1⅛*d* per ounce. Should any demand, however, arise for the East, per steamer of 2nd October, we should look for an increased rate, as the amount arrived this morning at Southampton from the West Indies will not be delivered in time

Mexican Dollars.—No transactions in dollars have taken place this week; the India and China letters being overdue, buyers have been unwilling to operate. The large arrival alluded to in our last as being due the end of this month, is announced this morning from Southampton. The Tasmanian, from the West Indies, brings the unprecedented amount of 1,074,265*l* in silver and dollars—chiefly

the latter. The price of Mexican dollars will doubtless be lower, though it is at present impossible to say to what extent.

Exchange on India is without change. Banks' 60 days' sight drafts on Bombay and Calcutta remain 1s 11¾d to 2s; bills with documents, 1s 11d to 1s 11¼d; Madras bank drafts 60 days' sight, 1s 11⅞d.

India Government Loan Notes are rather better in tone, owing to a conviction that the double income tax cannot be maintained, but there is no improvement in prices. The double tax question continues to occupy attention, and a very indignant feeling prevails on the subject; such a feeling cannot but be injurious to the success of any future loan for India, and the attempt therefore is impolitic, if not illegal. A meeting is shortly to be held, to elicit an expression of public opinion, and it is understood that very influential support has been already promised. We quote prices—102 to 102½ for 5½ per Cents., and 96 to 96½ for 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 76s 3d to 76s 6d per oz, last price; South American doubloons, 74s 3d to 74s 6d per oz, last price; United States gold coin, 76s 3d per oz, last price. Silver—Bar silver, 5s 1⅝d per oz std, last price; bar silver, containing 5 grs of gold, 5s 1⅞d per oz std, last price; fine cake silver, 5s 6¼d per oz, last price; Mexican dollars, 5s 2⅝d per oz, nominal; Spanish dollars (Carolus), 6s 2d per oz, last price.

Failures.—Formal notice is given that a petition for the winding up of the General Discount Company (limited) is expected to be heard in the Court of Bankruptcy on the 4th October.

At a meeting of the creditors of Messrs Smith, Sinclair, and Co., linen factors and agents, of Pancras lane, who failed on the 5th inst., a balance sheet, showing about 7s in the pound, was presented by Mr C. F. Kemp, the accountant. The firm commenced business in December, 1856, with a capital of only 1,200*l*, and have since entered into operations of great magnitude. The transactions from the date named up to June, 1857, amounted to 33,533*l*; during the next half-year to 101,000*l*; in 1858, to 185,284*l*; in 1859, to 457,508*l*; and during the present year to 329,686*l*. The connection between the firm and Messrs John Duncan and Co., of Dundee, was referred to at length; it was argued that operations of such magnitude could not have been conducted had it not been for the artificial credit afforded by the latter firm, who now claim 15,556*l*, although it is at the same time alleged that they have overdrawn their account to the extent of about 30,000*l*. This statement was denied by their legal representative, who insisted that his clients have had no complicity in the reckless trading carried on by the failed firm. In December, 1858, Smith, Sinclair, and Co., took stock, when their gross profits appeared to be 6,362*l*. Since that period 2,130*l* has been lost on bad debts; 3,302*l* stands as loss on doubtful debts; 3,933*l* on bills receivable; 1,367*l* on "adventures;" 10,323*l* on jute; and 4,855*l* on the manufactory. The expenses have also absorbed 4,061*l*; discounts, 5,290*l*; and the partners drawings (four years), 8,018*l*. The consignments have been to Australia, Monte Video, Algoa Bay, &c., but it appears to be somewhat problematical whether the surplus (6,461*l*) taken credit for on this account in the balance sheet will be realised. The books were kept with regularity up to a certain period, but have since been allowed to fall in arrear. It was mentioned that the partners are not prepared to make any offer, not being able to get any friends to guarantee the payment of a composition. In the event of the estate being wound up out of the Court of Bankruptcy, it was added, it would probably realise 5s or 6s in the pound. The adoption of bankruptcy proceedings, however, was advocated by a gentleman representing Messrs John Duncan and Co., as well as by another, who proposed a resolution to this effect. The show of hands being in the same sense, an adjudication was made in the Bankruptcy Court.

According to some of the advices from Rio by the French steamer, the house of Mr Mello e Souza, which has stopped for nearly 500,000*l*, has presented a balance sheet showing a surplus of about 140,000*l*. It is not stated, however, if this is nominal or the result of an actual estimate.

Messrs William Archer and Son, corn factors and millers, of Upper Thames street, an old and respectable house, have stopped payment. Their liabilities are estimated at about 45,000*l*. A dividend of about 7s 6d in the pound seems to be expected. Several country millers will suffer by this failure. The firm hold contracts for the supply of various workhouses and prisons.

At a meeting of creditors of Mr S. J. Wood, cement manufacturer of Poplar, the debts were stated by Mr Kemp, the accountant, at 9,202*l*, and the assets at 3,590*l*. A composition of 7s in the pound in cash was accepted.

Mr T. Nokes, miller, of West Thurrock Mills, near Grays, Essex, has stopped payment, with liabilities amounting to about 20,000*l*, and assets sufficient, according to his own showing, to pay 7s 6d in the pound. His books have been placed in the hands of Messrs Coleman and Co.

The estate of Mr Peter Brown, carpet warehouseman, of Basinghall street, shows 15s in the pound, and he hopes to pay in full.

The stoppage was announced to-day of the old and respectable firm of Thomas Smith and Co., gin distillers, of Buck's row, Whitechapel road. The liabilities are believed to be considerable, but the estate is expected to show a surplus; and in the circular issued to their creditors the firm express a belief that they shall be able to pay in full. The business was at one time a very large one, but has become contracted of late years through the competition of other houses, combined with the generally depressed state of the trade. The accountant employed is Mr S. Lowell Price, of Gresham street. Messrs J. S. Smith and Co., of the Phœnix Distillery, Mile-end, have no connection with the house that has stopped.

Messrs Henry Brooks and Co., who have carried on a considerable business as veneer merchants and makers of pianoforte "actions," at Cumberland market and the Hampstead road, have also stopped. The amount of their liabilities has not transpired. The accountant engaged is Mr C. F. Kemp, of Gresham street.

Miscellaneous.—The Atlantic and Great Western Railway Company have announced an issue of 200,000*l* 7 per Cent. Debentures, with dividend from the 1st of July last, at 80. This line is in course of construction to connect the New York and Erie with the extensive railway system of the West and South. It will be 378 miles in length, and will open up an unbroken route of 1,200 miles from New York to St Louis. Apparently it is likely to command a large share of the most important traffic in the States, while it will also possess an active local trade, since it passes through some of the best agricultural districts of New York, Pennsylvania, and Ohio. The contract cost is to be 7,400*l* per mile, and a peculiar feature of the undertaking is that Senor de Salamanca, the Spanish banker, appears as the principal contractor. The bonds now to be put forth are secured by a first mortgage on that section of the work which passes through the State of New York, and which has just been finished and opened, and the holders are to enjoy until the 1st of January, 1864, the option of having them converted into shares. To the Erie Company the undertaking is obviously of vital importance, since its effect must be to change their road from a local into a grand trunk line. They have accordingly agreed to pay to the Atlantic and Great Western Company a bonus of 10 per cent. on all the traffic to be derived from the connection during five years from the completion, and of 5 per cent. for five years thereafter. The bonds are to be issued at 80 per cent., redeemable in twenty years. Allowing for the coupon due on the 1st of January next, the price becomes really about 77. The interest is payable in London. The four coupons first maturing will bear the guarantee of the Bank of London, duly endorsed, thus guarding the investment against any possibility of default during the construction of the lines in Pennsylvania and Ohio.

With reference to the market for American securities, Mr E. F. Satterthwaite reports as follows:—

There has been a steady market in London during the past week in American securities, without any fluctuation of moment. United States Five per Cent. Bonds are rather weaker, being sellers at 93¾. We note an inquiry for Detroit and Milwaukee Bonds. Illinois shares close 17 sellers. Erie shares are firm at 31½ buyers. Considerable excitement has been produced by information per telegraph that the Illinois Central Directors had arranged to give the holders of options expiring in February, 1861, the privilege of having them extended during a period of three years, on a holder of ten shares paying up 80 dollars on one share. As there are 64,000 options out, it follows, if parties accepted the offer, that on 8,000 shares 80 dollars would be paid, thus giving the Company 512,000 dollars additional funds with which to redeem debt, if any, or to purchase Construction Bonds.

The Victoria Government has not yet paid off the share-

holders of the Geelong and Melbourne Railway, although the Act vesting the undertaking in the hands of the Government passed the Colonial Parliament and received the Royal assent in June last. Great disappointment continues to be felt at this continued delay, more especially as the premature closing of the London office in May last has prevented the registration of sales, and virtually deprives the proprietors of an open market. It has been suggested that if the approaching mail does not bring a final and satisfactory settlement, it will become expedient to appoint an agent from this country to reopen the question on its former basis, and to prosecute the claims of the English shareholders under legal and special powers.

At the meeting of the shareholders in the Chartered Bank of India, Australia, and China, an *ad interim* dividend at the rate of 7 per cent. per annum, free of income tax, was declared, the profits of the half-year being more than sufficient to justify this payment. The chairman, Mr Mitchell, M.P., stated that the Board will think it necessary at the end of the year to propose a considerable addition to the present reserve fund of 5,000*l*; and he described the general position of the bank as highly satisfactory.

The United Kingdom Electric Telegraph Company has been successfully formed, and the mercantile and general public have the prospect of being able to transmit messages at a lower charge. The wires of the new Company will be carried alongside the towing-paths of the canals, and the entire cost of constructing a main or trunk line from London to Liverpool, fitting up stations, instruments, &c., necessary to put the line in complete working order, is at present estimated at only 35,000*l*.

At the meeting of the London Assurance Corporation, the dividend usual at this period of the year—viz., 5s per share—was declared.

The Dover Castle, from Melbourne in 95 days, arrived off Portsmouth yesterday. She landed the mails, &c., and proceeded for the East India Docks with 57,036 oz of gold.

The Government of the Cape of Good Hope have intimated, through the agent for the Crown lands, that they are prepared to receive tenders for 200,000*l* in 6 per Cent. Debentures. 100,000*l* will be paid off in twenty, and the remainder in thirty years.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about at par, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 424½ per mark, and the short exchange on London is 13.4 per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 3-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 109¾ to 109⅞ per cent., which, when compared with the Mint par between the two countries, shows that the exchange is slightly in favour of England; and, after making allowance for charges of transport and difference of interest, the present rate leaves a small profit on the importation of gold from the United States.

Imports of the week ..... 248,043 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

A very limited supply of English wheat was exhibited at Mark lane, to-day, chiefly in poor condition. Both red and white qualities sold freely at 2s per quarter above the rates current on Monday. Although the imports continue on a large scale, foreign wheats moved off briskly, at 2s per quarter more money, and of which some quantity was taken for inland consumption. There was a firm trade for barley, the value of which had an upward tendency. Malt was quite as dear as last week, and oats improved 6d to 1s per quarter. Beans and peas commanded quite previous rates, and rye was 2s dearer. The flour trade was steady, and American parcels commanded an advance of from 1s to 2s per barrel. The present position of the trade, viewed in reference to our own crop, is indicative of higher prices for wheat. It is now fully ascertained that a very large quantity of the new wheat will not be fit for grinding for several months, without a large admixture of dry foreign; hence, the latter must of necessity continue in somewhat active demand, and no doubt we shall be compelled to import largely during the remainder of the year.

At Liverpoool, this morning, the wheat trade was active, at 1d to 2d per cental more money. All other produce commanded extreme rates. The latest advices from New York state that large quantities of grain and flour were in progress of shipment to this country. The demand, however, was less animated. Our report of the 15th inst. says:—"On the receipt of less favourable intelligence from the European markets, per last two steamers, the market for State and Western flour lost the buoyancy which has characterised it for some considerable time past, and prices declined 10 to 15 cents per barrel, mainly on the lower grades. The sales for the three days aggregate 40,000 barrels. The market for wheat is unsettled. Holders lowered their pretensions 2 to 3 cents per bushel, when there sprung up an active demand, and transactions were heavier than for any previous day during the season. The receipts continue heavy, but are nevertheless insufficient to meet the requirements of the trade, and transactions have accordingly been somewhat restricted. The total sales since Tuesday last amount to 447,000 bushels."

A large business has again been transacted during the past week in the Liverpool cotton market, the total sales amounting to 80,500 bales, and include 54,000 bales to spinners, 18,500 on speculation, and 8,000 bales for export. There has been some little excitement in Surats, which have attracted attention, owing to their comparative cheapness to the low American qualities, and prices are ⅛d per lb dearer for the former than on Friday last. The market closes firm, with sales to-day of 12,000 bales. The American accounts received this week are not more favourable regarding the crop than those hitherto received, but a fact worthy of notice is, that all the American markets, instead of being, as might be expected, brisk, are inactive and drooping, thus giving ground for the opinion that the damage to the crop is not generally so much believed in in America as reported. However, much will depend upon the lateness of the season, and if an early frost occurs, prices may advance, but should a long season allow of a second growth being gathered, then a moderate range of prices may be looked for throughout the season. In this market there has been an active demand during the week: sales 5,800 bales at ⅛d per lb advance upon last Friday's prices.

Mr Maurice Williams, whose communication is dated Liverpool yesterday, thus writes in reference to the American cotton crop:—"The enormous yield, 824,289 bales in excess of that of last year, and 1,561,808 bales in excess of that of two years ago, has nearly all been disposed of by the United States at an average price of 10¾ cents per lb; last year's at 11⅝ cents; and that of 1857-8 at 11½ cents. Adding the amounts taken each year for American consumption without being received at the ports, to the amounts so received, the following figures will show the total quantity raised each year, and the average price and estimated value received for the same, by the American planters:—

	Amount Received at Ports.	Consumption South & West of Virginia.	Total Yield.	Average Price. Cents.	Total Value. £
1859-60	4,675,770	... 154,000	... 4,829,770	... 10¼	... 48,350,528
1858-59	3,851,481	... 143,000	... 3,994,481	... 11⅛	... 43,140,330
1857-58	3,113,962	... 125,000	... 3,238,962	... 11½	... 34,920,059

It will thus be seen that, although the crop this year shows an increased growth of 21 per cent. over that of last year, the average price realised for it by planters shows only a decrease of a little over 7 per cent. Compared with the yield of 1857-58, this year's crop presents an increase of 50 per cent., whilst the average price is only 7 per cent. less. It must, consequently, be apparent that the amount paid the United States planters for the past two crops of cotton has been far above their legitimate value."

We have to report a very quiet market for all kinds of tea; nevertheless, no change of moment has taken place in the quotations. The show of samples is by no means extensive.

Most descriptions of raw sugar have changed hands slowly, at about last week's currency. Importers have somewhat freely supported the market. Refined goods have met a dull inquiry, and, in some instances, the currencies have ruled in favour of buyers. The Dutch Company's sale of 30,409 baskets Java held at Rotterdam has gone off at an advance of ¾ guilder on the July sales for the brown and yellow qualities of which there were 5,670 baskets, Nos. 14 and 15 4,800 baskets, and No. 16 and upwards 15,700 baskets.

On the whole, the coffee trade has continued firm, at about previous quotations. The quantities of coffee brought to the hammer have not increased. Cocoa has sold to a fair extent, at full prices.

The improvement in the value of wheat has had very little influence upon the rice market, which has ruled very inactive on former terms. Fruit has met a dull sale, and several parcels submitted to public sale have been withdrawn.

Saltpetre, hemp, flax, and indigo have commanded very little attention; nevertheless prices have ruled steady.

Scotch pig iron has declined to 51s 3d, and 51s 6d three months for mixed numbers. In the value of other metals very little change has taken place.

A considerable business has been passing in rum: brown Leewards at 1s 7½d to 1s 8d per gallon proof. Brandy and grain spirits are steady in price.

The oil market has been in a very inactive state, and linseed oil has declined to 30s per cwt. Turpentine has ruled lower in price.

The demand for tallow continues firm. To-day, P.Y.C., on the spot, has sold at 53s; October to December, 53s; December, 53s 6d; January to March, 53s 6d; and March only, 53s 9d per cwt.

	87558	45841	44524

"The money market maintains the easy position noticed in our last," says the New York *Shipping List* of the 12th inst. "Lenders are freely supplied at 5½ to 7 per cent. on call. Discounts are steady at the figures below. The demand is moderately active. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5½ to 7
Do. other good securities	6½ 7
Prime endorsed bills, 60 to 90 days	7 7½
Do. 4 to 6 months.....	7½ 8
First class single signatures	6½ 7½
Other good bills	9 9½
Names less known	10 10½

The weekly statement of the City banks establishes the fact that contraction is and is to be the policy most in favour with most of the leading institutions. The decrease in the loans is more than a million and a half, while the specie tells quite as well as could be expected, in view of the still large export movement to Europe. The loans, we may remark, are now down to a lower point than at any time since July. There is a heavy falling off in the deposits, the natural result of the decreased loans. There is little of interest to note in the dry goods trade, the demand for most articles of domestic manufacture continuing moderate, and prices are without noticeable variation. Transactions are light with the South, as is usual at this season of the year, but with the West a healthy trade is being carried on, and the business of the season promises to be on an extensive scale. Buyers have made their appearance in market this season who have not been seen for several years past, and who are making preparations for a good fall and winter trade. Foreign goods are steady, with a fair demand for all desirable patterns and style."

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has not shown any improvement this week, but prices cannot be quoted lower. On Tuesday, the Netherland Trading Company's Java sale went off with spirit at rather higher rates, which did not, however, influence the article here. 1,750 casks West India changed hands to yesterday, including Barbadoes at 37s to 44s; crystallised Demerara at 43s 6d to 45s 6d; grainy Berbice, 41s 6d to 45s per cwt. The deliveries for home use show an increase of 12,530 tons over the preceding year's. There is a relative deficiency in the stock, amounting to 9,450 tons.

Mauritius.—There have not been any public sales, and a limited business is reported by private contract.

Bengal.—1,800 bags low brown Bengal have found buyers at 32s per cwt.

Madras.—1,088 bags native have found buyers at 33s to 37s per cwt.

Penang.—9,810 bags nearly all sold: low soft to fine yellow, 39s to 43s 6d; brown, 35s to 38s 6d.

Foreign.—1,050 bags Manilla were bought in at 37s to 38s. 4,794 bags Pernambuco part sold at 37s to 39s 6d for soft brown and yellow. 4,020 bags Bahia were partly disposed of: brown and yellow, 35s 6d to 39s. 998 boxes Havana brought 38s to 45s for brown to good yellow. 276 casks Cuba were taken in at 36s 6d to 44s. Privately, 10,000 bags clayed Manilla have sold at 37s 3d to 38s 3d. Two floating cargoes of Havana, Nos. 12 and 13, are reported at 28s to 28s 3d for the United Kingdom; two for near ports, Nos. 10 to 14½, 27s 6d to 29s 6d. 700 boxes on the spot have sold at above quotations.

Refined.—A limited business has been done at the recent decline. Low goods may be quoted at 49s to 49s 6d; crushed lumps, 47s to 48s per cwt. Dutch crushed has been unaltered since the Netherland Trading Company's sale.

MOLASSES.—Few parcels can be obtained even at the advance lately noticed.

RUM.—The market is much firmer. Demerara proof, 1s 0½d to 1s 10½d; Leewards, 1s 7d to 1s 8d; E. I., 1s 6½d to 1s 7d. Fine Jamaica continues to attract partial attention. The stock amounts to 28,300 puns 4,450 hhds, against 20,450 puns 6,660 hhds in 1859 at the same period.

COCOA.—240 bags Trinidad were partly sold at 65s to 75s for grey to good red. 146 bags Surinam partly sold at 69s to 71s. 50 bags Para realised 64s per cwt.

COFFEE.—There has been a firm market this week, the various parcels brought forward finding purchasers at full rates, including 1,300 cases 280 barrels 65 bags East India: Neilgherry Hills, 70s to 80s 6d; Wynaad plantation, 70s 6d to 72s 6d; Naidoobatum, 84s to 98s; Kotigberry Ghaut, 73s 6d to 76s. Native Ceylon, of good ordinary quality, is quoted 64s to 65s. 116 casks 183 barrels and bags plantation Ceylon sold steadily at previous rates, from 68s to 79s per cwt for fine fine ordinary to good colony.

TEA.—A limited business has been transacted by private contract this week, and the new season's teas were hourly expected yesterday. Common congou, 1s 3½d per lb.

RICE.—This article is steady, but scarcely so active as of late. 5,134 bags white Bengal by auction sold as follows: old grain, including broken Dacca and low middling white, 10s 6d to 12s; good Ballam, 11s to 11s 6d. 476 bags old pinky Madras, 10s 6d to 11s. A moderate business has been transacted privately: pinky Madras, 11s to 11s 6d; old Necrancie Arracan, 10s 4½d; good new white Bengal, 14s 6d. A cargo of pinky Madras now landing, is reported at 11s 6d, and a floating cargo of Arracan at 10s 1½d per cwt.

SAGO.—4,160 boxes Borneo kind were partly sold at 17s to 21s, the greater proportion being taken in.

SAGO FLOUR.—7,750 bags only partly sold at 15s to 15s 6d per cwt.

SPICES.—The public sales being again rather large, prices occasionally showed some slight reduction on Wednesday. 3,040 bags black peppee partly found purchasers: fair Sumatra, 4½d to 4¼d; Penang, 3¾d to 3¾d; good from Bangkok, 4½d; rather dusty, 4d, being barely previous rates. 572 bags Singapore and Penang white partly met with buyers at 6d to 6¼d. 37 chests Tellicherry went dearer: good to fine, 1s 1½d to 1s 5d; coriander kind, 10½d to 10½d. 26 cases mace brought full rates, ranging from 1s 1d to 1s 10d for ordinary to very good; and 66 cases brown nutmegs 1s 1d to 2s 7d for low small to good bold. 470 bags pimento partly realised 3½d to 3¾d per lb. 36 cases Cochin ginger: good to fine scraped, 65s to 98s; small, 50s. Of 60 cases 2¼ mats cassia vera, a portion sold at 52s to 53s for good, and 20s to 23s for ordinary 174 boxes cassia lignea were taken in at 86s to 92s per cwt for second and first piles.

COCHINEAL.—There is more inquiry for this article, and 238 bags in the sale went at former prices: Honduras silvers, 2s 11d to 3s 6d; Teneriffe, 3s 1d to 3s 2d; black, 3s 3d to 3s 9d per lb.

SHELLAC.—Fine orange has realised 11*l* 12s 6d per cwt.

DYESTUFFS.—Gambier has sold upon easier terms, viz, 16s 6d to 17s; heated, 16s 3d to 16s 6d; but further purchases cannot now be made on the same terms. The market for Cutch is quiet.

DYEWOODS.—Red Sanders is in demand at 5*l* 15s to 5*l* 17s 6d per ton.

DRUGS.—At the sales, yesterday, few changes occurred, and the demand for most kinds of goods was inactive. Castor oil, however, met with steady buyers, and China rhubarb was taken in at an advance on previous terms.

JAPAN WAX.—A large quantity has been sold at lower prices: block, 56s to 57s; cake, 61s 6d to 63s 6d per cwt.

METALS.—Few sales of magnitude are reported, yet quotations remain tolerably steady. The last sales effected in spelter were at 20*l* 5s on the spot and afloat. Foreign tin is quiet: Straits, 131s to 132s. No change can be quoted in British. Copper dull at the smelter's quotations for English, and about 107*l* per ton for Barra Burra. Scotch pig iron closes at 51s 6d per ton for mixed nos.

IMPORTS and DELIVERIES of SALTPETRE to September 22, with STOCKS on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons

Stock	4550	3720	2940	6600

HEMP.—All kinds have been inactive: clean Petersburg quoted 29*l* to 29*l* 10s. At the jute sales, on Wednesday, 2,050 bales only partly found purchasers on previous terms, ranging from 14*l* 15s to 17*l* 17s 6d per ton according to quality.

OILS.—No alteration of importance can be noticed in common fish oils, but sperm has again declined, the last sales being at 104*l*. Olive remains firm: Gallipoli, 60*l*; other kinds 55*l* to 58*l*. Moderate transactions have taken place in rape at the recent quotations: foreign refined, 45s 6d to 46s; brown, 42s 6d. The market for palm remains firm, fine Lagos obtaining 45s to 45s 6d. Cocoa-nut is dearer: Cochin, 49s to 50s; Ceylon, 47s to 48s, according to packages. Linseed has declined to 30s per cwt.

LINSEED is very firm, and the few parcels offering have realised higher rates, viz., 56s to 56s 6d for Calcutta, 58s 6d for Bombay. The latter afloat has realised 55s per quarter.

TURPENTINE.—A large business has been done in American spirits at 31s per cwt.

TALLOW.—The market has become more steady, and prices of foreign have recently advanced 3d. This morning first sort Petersburg Y.C. is quoted 53s; the same to the end of the year; and 53s 6d to 53s 9d per cwt for the first three months of next.

PARTICULARS OF TALLOW.—Monday, September 24.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was quiet to-day, but not lower. There have been 2,843 casks West India sold during the week. 2,684 bags Mauritius, 2,464 bags Bengal, and 3,000 bags low Madras, by auction, partly sold on previous terms. Privately, 300 casks Surinam brought 39s 6d. Several hundred boxes Havana and a cargo for Antwerp, Nos. 11½ to 12, at 27s 9d per cwt. 224 casks Cossipore treacle were taken in at 21s per cwt.

COFFEE.—The sales passed off steadily. 2,743 bags Costa Rica sold from 60s 6d to 72s; fine, 82s 6d. 171 casks 135 barrels and bags plantation Ceylon, 70s to 82s for fine ordinary to good. 100 casks superior native were bought in at 65s 6d. 53 cases Malabar brought 67s to 71s 6d. 377 bags Singapore, 59s 6d to 63s 6d. 58 cases other East India, 72s.

TEA.—New season's congou opened at 1s 11d to 2s 3d per lb.

RICE.—3,200 bags pinky Madras of old import found buyers, chiefly at 11s. Privately, good quality has sold at 11s 6d per cwt.

COCHINEAL.—132 bags went off without material change in prices, and about half sold: Mexican silvers, 3s; black, 3s 3d to 3s 4d; Honduras black, 4s 3d to 4s 4d; silver, 3s 1d; Teneriffe silver, 3s 1d to to 3s 2d; black, 3s 6d to 3s 11d per lb.

OIL.—Cochin cocoa-nut sold by auction at 48s to 50s; Ceylon, 47s 6d to 47s 9d. 560 casks palm went at 45s to 45s 9d per cwt for good to fine. 65 tuns seal, 31*l* to 33*l* per tun.

TALLOW.—Foreign unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains neglected; no alteration to note with respect to prices. Treacle in less demand for export. From Holland, the prices of crushed sugar remain steady, but here the demand has suddenly ceased. We have no transactions to report worth noting.

GREEN FRUIT.—Market improved. A parcel of green and black grapes, from Lisbon, sold by Keeling and Hunt, realised a high figure. Lemons advanced in price. Stock of all kinds short. Some Madeira oranges—the first arrival of the season—will be offered at public sale in a few days. More inquiry for Barcelona nuts.

DRY FRUIT.—Considerable quantities of currants (old and new) have been offered at public sale during the week, but though the advance of last week has been sustained, there has not been the pressing demand that was then experienced. Old currants are flat, very large quantities

having been brought forward. New figs have arrived in the Brenda, and have been sold privately and by auction at 39s to 79s, according to package and quality. Sultanas are lower, 48s being paid for very fine; 45s refused for large parcels.

ENGLISH WOOL.—Very little doing in Down wool; prices firm.

COLONIAL WOOL.—Market quiet, but firm.

FLAX unaltered.

HEMP.—Market firm, and a very fair amount of business done this week.

COTTON.—Sales of cotton wool from Friday, Sept. 21st, to Thursday, 27th inclusive:—4,000 bales Surat at 3 11-16d for fully fair Compta; 4¼d to 4¾d for middling fair old to good fair new Dhollera; and 5d to 5⅛d for good fair to good new Broach; 1,800 bales Madras at 3⅞d to 4¾d for very middling to fully fair Tinnevelly; 3½d to 3¾d for middling fair to fully fair Western. The market has been very firm throughout the week, and yesterday the demand was active, and about 2,600 bales were sold at decidedly higher prices, particularly for Western Madras and good fair new Dhollera, prices of which have advanced fully ⅛d per lb; other qualities readily obtain the extreme rates of last week. Active demand at advancing prices. Sales to-day, 1,200 bales Surat, 4d to 4¾d; 300 bales Tinnevelly, 3½d to 4¼d.

SILK.—Trade steady at a decline of 6d to 9d upon the rates established a fortnight ago, the demand being for both home and foreign consumption.

TOBACCO.—The market continues steadily and firm. The trade not being inclined to purchase at the recent advance, very little business has been transacted. Accounts still report unfavourably of the crop.

LEATHER AND HIDES.—The leather market remains without any improvement. The prolonged sales under the estates in bankruptcy no doubt continue to interfere with the more regular demand, and to maintain a depressing influence on the market. There was not a large supply of fresh leather at Leadenhall on Tuesday, but sales were difficult unless at some little concession in prices. The articles most scarce were prime heavy English butts and good heavy harness hides.

METALS.—No change of consequence has taken place in our markets Copper has been in but small request since the last declared advance in prices of English, but ores and foreign copper keep high in quotations. Iron still continues in limited demand, but prices are unchanged. Tin keeps steady at late rates. Spelter has been neglected this week without change in quotations. Lead is in fair demand. Tin plates move off slowly.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	55	0
Fat by ditto	2	9½
Yellow Russian	54	6
Melted stuff	42	0
Rough ditto	25	0
Greaves	20	0
Good dregs	7	0

Imports this week 1,076 casks.

PROVISIONS.

Bacon market very dull and nothing coming forward. 74s f.o.b. the highest price made.

Friesland 110s, quality inferior.

METROPOLITAN CATTLE MARKET.

THURSDAY, Sept. 27.—Our market to-day was but fairly supplied with beasts in but middling condition. All kinds met a dull inquiry, at Monday's decline in quotations. Prime sheep were scarce and in fair request at full prices, but long-wools were a dull sale at previous currencies. The top figure for Downs was 5s 2d per 8 lbs. We were fairly supplied with calves, which moved off slowly at last week's prices—viz., from 4s to 5s per 8 lbs.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	8	3	0	Prime Southdown sheep	5	0	5	2
Second quality ditto	3	2	3	6	Large coarse calves	4	0	4	6
Prime large oxen	3	8	4	4	Prime small ditto	4	8	5	0
Prime Scots, &c.	4	6	4	8	Large hogs	4	0	4	6
Coarse and inferior sheep	3	4	3	8	Small porkers	4	8	5	2
Second quality ditto	3	10	4	4	Suckling calves...each	19	0	23	0
Prime coarse-woolled do.	4	6	4	10	Quarter old store pigs	23	0	30	0

Total supply—Beasts, 1,100; sheep and lambs, 7,800; calves, 420; pigs, 312.
Foreign supply—Beasts, 380; sheep, 1,200; calves, 250.

NEWGATE AND LEADENHALL.

FRIDAY, Sept. 28.—These markets continue to be well supplied with all kinds of meat, for which the demand rules somewhat heavy, as follows:—

Per 8 lbs by the carcass.

	s	d	s	d		s	d	s	d
Inferior beef	2	6	3	2	Mutton, inferior	3	2	3	6
Middling ditto	3	4	3	8	— middling	3	8	4	0
Prime large	3	10	4	0	— prime	4	2	4	6
Prime small	4	0	4	2	Large pork	4	4	4	10
Veal	4	4	4	8	Small pork	5	0	5	4

HOP MARKET.

BOROUGH, Friday Sept. 28.—The accounts come very much worse generally; fly and lice are said in many places to be rapidly increasing, and a general complaint prevails that hops come down much short of expectation. Duty 30,000*l*. with but few in favour. About 300 pockets of new have arrived, and are selling from 14*l* to 22*l* per cwt.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 24.—Moderate supplies of potatoes continue to reach us coastwise and by land-carriage. Generally speaking the demand rules steady, as follows:—Kent and Essex Regents, 105s to 160s; York ditto, 110s to 160s; Scotch ditto, 100s to 120s; Bedfords, 120s to 150s per ton.

WATERSIDE, Thursday, Sept. 27.—The supplies of home-grown potatoes are more plentiful at this market, which are principally from Yorkshire and Scotland. The disease, we are sorry to report, has shown itself very much. Trade is dull, at the subjoined quotations:—York Regents, from 100s to 130s; Kent and Essex ditto, from 90s to 130s; Scotch ditto, from 100s to 110s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 10s to 5*l* 15s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 10s to 1*l* 18s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 15s to 5*l* 15s; clover, 3*l* 10s to 6*l*; an straw, 1*l* 10s to 1*l* 18s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 10s to 5*l* 15s; clover, 3*l* 16s to 6*l* 6s; and straw, 1*l* 10s to 1*l* 18s per load. Supply good.

COAL MARKET.

FRIDAY, Sept. 28.—Walls-end:—Hetton 19s 6d—Lambton 19s—South Hetton 19s 6d—Tees 19s—Hartlepool 19s 3d—Braddyll's Hetton 18s 6d—South Hartlepool 18s 6d—Cassop 18s 9d—Kelloe 19s—Eden Main 18s—Tunstall 18s 6d—Byron 18s 6d—Whitworth 16s 6d—Wylam 16s 6d—Holywell 16s 3d—Tanfield Moor Butes 13s 6d—Craghead 15s—Buddle's Hartley 16s 3d—St Cuthbert 15s 3d—Clark's 15s 9d—Davidson's Hartley 16s 3d—Howard's Hartley 16s—Lambert's Hartley 16s. Ships at market, 56.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 28.—Our public sales are progressing satisfactorily, and the prices for East India are well supported, notwithstanding the quantity brought forward on this occasion is unusually large,—a conclusive proof that this trade is in a very healthy position.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 28.—Grain market very firm. Wheat in good consumptive demand at 1d to 2d advance. Flour firm. Maize 6d dearer Ibrail and mixed American, 36s; Galatz, 36s 6d. Oats, oatmeal, and barley, very firm. Weather fair.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 28.—There is little or no change to note in the market for manufactured iron, the best brands of which maintain their value, while inferior descriptions are difficult of sale. In Scotch pig iron there have been some slight fluctuations in price during the week, and the market closes quietly for speculative parcels. Copper is firm since the last advance. Little doing in lead. Most other metals remain almost unchanged.

The Gazette.

TUESDAY, Sept. 25.

BANKRUPTCY SUSPENDED.

J. Corbett and H. W. Corbett, Liverpool, merchants.

BANKRUPTS.

O. A. Seagood and H. W. Smith, Wellington road, Holloway, builders.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic returns of railways in the United Kingdom for the week ending Sept. 15 amounted to 574,470*l*, and for the corresponding week of last year to 550,400*l*, showing an increase of 24,070*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 248,950*l*, and for the corresponding week of 1859 to 247,333*l*, showing an increase of 1,617*l*.

CAPE TOWN.—The directors of this company state in their report that since the last meeting arrangements have been entered into with the contractor to open the railway for public traffic from Cape Town to Stellenbosch, a distance of 28 miles, on the 5th of April next, and to complete the whole line on the 5th of October, 1861. The capital account showed that 173,736*l* had been received to the 30th of June, in Cape Town, and to the 31st of August, in England, and 136,143*l* expended, leaving a balance of 35,129*l* at the bankers, and 2,463*l* on security.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Sept. 24.—In the railway market there was a general absence of business, but prices were fairly supported, and in several cases a fractional advance took place. In colonial descriptions the statement, apparently unfounded, of the Grand Trunk of Canada having fruitlessly applied for financial assistance to the Government caused a decline in the stock to 27 to 28. Buffalo and Lake Huron and Great Western shares were also heavy, the latter leaving off at 13 to ¼. The principal change in foreign descriptions was a recovery in South Austrian and Lombardo-Venetian to 1 to ⅛ dis. In American securities Illinois Central shares were dull. Mines were again firm. There was no alteration of importance in joint stock banks. In miscellaneous securities the shares of the Madras Irrigation and Peninsular and Oriental Steam were quoted lower.

TUESDAY, Sept. 25.—The railway market was rather dull at the opening, but afterwards improved, and closed firmer than yesterday. Several of the heavier stocks were quoted higher, especially London and North-Western, Midland, Lancashire and Yorkshire, and Great Western. Berwick, on the other hand, Caledonian, and Eastern Counties were flat. The original stock of the London, Chatham, and Dover also experienced a further relapse. In colonial descriptions, Grand Trunk of Canada stock marked 27, but subsequently went to 27½ to 28, showing only a fractional recovery. Great Western shares, and Buffalo and Lake Huron improved. French descriptions were occasionally quoted at an advance. In American railway securities the shares of the Illinois Central declined, while those of the New York and Erie were higher. Mines were quiet, but steady. Joint stock banks showed no change of importance.

WEDNESDAY, Sept. 26.—In the railway market the preparations for the settlement exercised a favourable influence, the floating supply of stock remainnig limited. There was no change of importance in colonial or foreign railways. Grand Trunk stock remained at 27½ to 28; South Austrian and Lombardo-Venetian shares, 1 to ⅛ dis.; Pernambuco, 3¼ to 3 dis.; and Bahia, ¾ to ⅞ dis. In American securities, from the heavy speculative account in the shares of the Illinois Central, the rates paid for carrying over purchases were as high as 7 to 15 per cent. The "optional rights" of the latter improved to 4¾ to 5, and New York and Erie shares to 31½ to 32. Mines were firm, and in some instances, particularly St John del Rey, an advance took place. No material alteration occurred in joint stock banks or miscellaneous securities.

THURSDAY, Sept. 27.—The railway market remained intrinsically firm, notwithstanding the high prices of yesterday were not maintained. In the colonial market Cape Town shares improved, and Great Western of Canada closed firmly at 13¼ to ½. Grand Trunk remains at 27½ to 28, and East Indian at 100 to ½. Foreign descriptions were dull. In American railway securities the bonds and shares of the New York and Erie advanced. Mines were quiet, but generally steady. In joint stock banks' Ottoman receded to 16¼ to 17. In miscellaneous securities, Victoria Dock stock and Van Diemen's Land shares were quoted higher. Victoria Debentures, new, left off at 109½ to ¾; Canadian Five per Cents., 102¾ to 103.

FRIDAY, Sept. 28.—The railway share market to-day was dull. In several instances, including South-Eastern stock, prices were quoted ⅛ to ¼ per cent. lower than yesterday. North-Eastern stocks were well supported. The Canadian railway shares were quiet. Antwerp and Rotterdam were inquired for. Lombardo-Venetian shares were rather flatter.

DEATH.

Died, on the 26th instant, John Pratt, Esq., formerly of Mincing lane, aged 82.

Free for Six Stamps.

ENGLISH, FRENCH, AND AMERICAN MODE OF TREATING DISEASE.—Proving the fallacy of the former, the non-success of the other, and the unequalled efficacy of the latter, as demonstrated in thousands of cases, whereby the sufferer can easily cure himself privately, safely, and at a trifling cost, without the aid of the Faculty with their mineral poisons. The New Mode has been recently introduced into Great Britain by an eminent practitioner, who has studied in the three kingdoms, and holds from each distinguished Titles and Diplomas, including that of the National Academy of Sciences, Paris, who approve the new Self-Cure Discovery, which is sent free to any address on receipt of six stamps by the Doctor's private secretary, Wm. Hill, Esq., M.A., 27 Alfred place, Bedford square, London, W.C.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by Piper and Co., 23 Paternoster row and Mann, 39 Cornhill, London.

MEDICAL ADVICE.

DR LA'MERT, HONORARY Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., may be CONSULTED on the Functional Derangements of the Nervous and Reproductive System, and on the various forms of Local and Constitutional Debility, from Eleven till Two, and from Six till Eight, at his residence,

37 BEDFORD SQUARE, London.

The 71st Edition—SELF-PRESERVATION: An Essay on the Secret Infirmities of Youth and Maturity, price 6d, or sent free, in an envelope, by Mann, 39 Cornhill, or by the Author, for Seven stamps.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, Social, and Physical Relations—Happy and Unhappy Unions—Conjugal Anticipations and Disappointments—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence—Its History, Causes, and Moral Consequences—The Sterility of Age.

Dr LA'MERT is the only registered and legally qualified medical practitioner who has been engaged exclusively, for upwards of 20 years, in the treatment of these special disorders.

RUPTURES.—BY ROYAL LETTER S PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly London.

Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to ohn White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases o WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price rom 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER, 228 Piccadilly, London

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wuzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.—— Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. H. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps, Address, Treasurer, Royal Institute, 369 Oxford street, London.

HOLLOWAY'S PILLS.—Depression of Spirits—Debility.—Some defect in digestion is generally the cause of mental depression; on rectifying the disordered stomach the long list of gloomy thoughts retire, and are succeeded by more hopeful and happier feelings. Holloway's Pills have been renowned for effecting this desirable change. They remove all obstructions, regulate all secretions, and correct depraved humours by purifying all the blood and invigorating the stomach. Their medicinal virtues reach, relieve, and stimulate every organ and gland in the body; whereby the entire system is renovated. No medicine ever before discovered acts so strictly and beneficially upon the blood and circulation as Holloway's celebrated Pills, which combine the rare merits of efficiency and harmlessness.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

SHIRTS.—FORD'S EUREKAS.—

Patterns of the new coloured Shirtings to select from, on receipt of Six Stamps.

The Illustrated Catalogue, free per post.

Richard Ford, 38 Poultry, London.

The best quality, Six for Forty-two Shillings.

The Illustrated Price List, containing every particular and mode of self-measurement, post free.

Richard Ford. 38 Poultry, London.

EAU-DE-VIE.—THIS PURE PALE

BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery

TRADE MARK.

BROWN AND POLSON'S
PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

RECIPE FOR SUMMER FRUIT PIE.

—Boil the flour with milk for four minutes, then pour it over the stewed fruit, and brown it in the oven or before the fire. This is very lightsome and much preferred to the ordinary pie crust.—BROWN and POLSON, Manufacturers to Her Majesty the Queen, Paisley, Dublin, Manchester, and 23 Ironmonger lane, London.

DINNEFORD'S

PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for acidities, heartburn, headache, gout, and indigestion. As a mild aperient it is admirably adapted for delicate females, particularly during pregnancy; and it prevents the food of infants from turning sour during digestion. Combined with the Acidulated Lemon Syrup, it forms an effervescing aperient draught which is highly agreeable and efficacious.

Prepared by DINNEFORD and CO., Dispensing Chemists (and General Agents for the Improved Horse Hair Gloves and Belts), 172 New Bond street, London, and sold by all respectable Chemists throughout the empire.

FIRST-CLASS EDUCATION,

at the Royal Continental Collegiate Institution, Bushey heath, Herts.—In addition to all its qualities as a first-rate classical (preparatory to Harrow and Eton) and commercial school, it is also highly recommended for a thorough French education, and as preferable to going abroad. Some of the parents who are continually visiting France, and whose sons have scarcely been two years at this school, are most happy to assure those parents who are desirous that their children should acquire a thorough knowledge of the French language, without wishing them to neglect their English and classical education, that their sons speak far better and more grammatically than any of the sons of their friends who have spent two or three years in schools in France merely for the purpose of acquiring that language. No corporal punishment. Terms inclusive, and vary, according to age and requirements, from £40, £50, to £60 per annum. Not one case of illness has occurred since the school has been established.—Address, stating age and requirements, Professor Vallère (late of the Harrow Preparatory School), Bushey heath, Herts. The pupils wear a uniform very elegant and becoming, but optional to parents.

Just published, price 1s; by post, 1s 1d; sealed, 1s 6d,

DR BRIGHT'S MANUAL ON

SPERMATORRHŒA, &c. With Cases and Drawings from Life, &c., &c. Licentiate of the College of Physicians, Member of the Royal College of Surgeons, &c., &c.

Contents:—Modern Treatment of Diseases of the Kidneys, Bladder, Prostrate Gland—Desire for Solitude—Groundless Fears, &c.; showing how these supposed incurable maladies may be effectually eradicated by the most simple means. Published and sold by J. Allen, 20 Warwick lane, Paternoster row, London.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution. 113 Strand.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE

ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

TO VOLUNTEERS AND THE PUBLIC.

WILSON'S BREECH-LOADING RIFLE.

Mr THOMAS WILSON begs to call the attention of Volunteers and the Public to his New BREECH-LOADING RIFLE, and to state that he has committed the management of the patent to Messrs Rabone Brothers and Co., of 47 Broad street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's service, and is pronounced by the highest authority to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading or otherwise is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly for firing without the aid of tools. This facility would be occasionally valuable in rendering the gun useless to an enemy or mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr Lancaster's, No. 151 New Bond street, and at Mr Pritchett's, No. 86 St James's street, London, as well as at Messrs Rabone Brothers and Co., 47 Broad street, Birmingham. Every information as to cost and other details can be obtained at either of the places named

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in
HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

AT HAMBLY HOUSE ACADEMY,

Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

25 Clement's lane, Lombard street, E.C.

PROSPECTUS.

This Company has been formed for the purpose of purchasing leases, and for working upon a greatly more extended scale than is at present the case, certain well-known and productive slate quarries in North Wales, whose produce is of the best description. In their present incomplete state they are able to raise about 5,000 tons per annum, which, at an average profit of 20s per ton, would give a dividend of nearly 7 per cent. upon the whole capital of the Company. From the estimates of competent authorities, it is confidently believed that so soon as these works are in full operation, a steady and regular dividend of 30 per cent. will be realised. Applications for shares to be made to the brokers, or at the offices of the Company, where prospectuses, reports, forms of application, &c., can be obtained.

CONTRACT FOR IRON TANKS, &c.

Department of the Comptroller for Victualling and Transport Services,
Somerset place, 18th September, 1860.

The Commissioners for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give Notice, that on Thursday, the 11th October next, at Half-past One o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Victualling Stores at Deptford, all such Iron Tanks for Oil, and Bread, and spare articles, and articles for Repairs of Water Tanks, as shall from time to time be demanded, under a contract for three years certain, and afterwards until the expiration of three months' warning.

Patterns of the Tanks and articles may be seen at the Victualling yard at Deptford.

No tender will be received unless made on the printed form provided for the purpose, and which, together with the conditions of this contract, may be obtained on application at the said office.

No tender will be received after half-past one o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for Tanks," and must also be delivered at Somerset House.

POMMERY'S CHAMPAGNE.—

Extra Sorts Creaming and Sparkling.—Agents in London, A. Kniep and Co., 22 Basinghall street; Paris, 18 Boulevart des Italiens.

General Manager—Mackintosh Balfour, Esq. (in India).

Official General Manager—William Shipman, Esq.

Current or Floating Accounts (balanced half-yearly, on the 30th June and 31st December) opened with Individuals and Firms, bearing interest when the minimum monthly balance at credit is not less than £100 at the rate of two per cent per annum. When the balance falls below £100, a moderate Commission is charged, according to the nature of the account.

Deposits in sums of not less than £100 are received, repayable on 10 days' notice, at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith.

Deposits for Fixed Periods are received at Interest, particulars of which may be obtained at the Bank.

Sales and Purchases effected in British and Foreign Securities, in East India Stock and Loans, and Army, Navy, and Civil Pay and Pensions realised.

Bills issued at the Exchange of the day, and free of any extra charge, on the Branches of the Bank.

Approved Bills drawn against Funds, or upon Parties in India, purchased.

Bills payable in India sent out for collection.

Circular Notes, payable at the principal Cities of Europe, granted.

Interest on Indian Government Securities drawn, and the equivalent paid to parties interested, without charge.

—By order of the Board,

WILLIAM SHIPMAN, Officiating General Manager.

Hours of business, 10 to 4; Saturdays, 10 to 3.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 500,000*l.*

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court,

73 Cornhill, E.C. HENRY MOULES, Secretary.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

Capital £500,000. Reserve fund £50,000.

Head Office, 52 Threadneedle street.

Agencies and Branches at Bombay, Calcutta, Madras, Colombo, Singapore, Penang, Hong Kong, Shanghai, and Mauritius.

The Bank, at its Head office in London, grants Drafts on its various Agencies and Branches; issues Letters of Credit; purchases approved Bills on India, China, Ceylon, and Mauritius; undertakes the purchase and sale of Indian Government and other Securities, and the collection of Private and Mercantile Bills, at the ports and places at which its Agencies are established; receives Deposits at Interest for Fixed Periods, the terms of which may be ascertained on application; and transacts generally all Indian Banking business, including the receipt of Pay, Pensions, and Dividends on Stock of all kinds.

Office hours, 10 to 3; Saturdays, 10 to 2.

UNION BANK OF AUSTRALIA.

London Office, 38 Old Broad street.

The Directors of this Bank grant LETTERS of CREDIT and DRAFTS on its Branches as under, viz.:—

New South Wales.		
Sydney		Orange
Bathurst		Goulbourn
Queensland.		
Brisbane.		
Victoria.		
Melbourne	Sandhurst (Bendigo)	Ararat
Geelong		Portland
Ballarat	Castlemaine	
South Australia.		
Adelaide		Port Adelaide
Tasmania.		
Hobart Town		Launceston
New Zealand.		
Auckland	Nelson	Lyttelton (Canterbury)
Wellington	Christchurch (Canterbury)	
Napier (Hawke's Bay)		Dunedin (Otago)

They likewise negotiate approved Bills on the Colonies, and send out Bills for collection, the terms for which may be obtained on application at the offices of the Bank.

N.B. Letters of Credit and Drafts may also be procured of Messrs Glyn and Co., 67 Lombard street.—By order of the Board, H. W. D SAUNDERS, Secretary.

NATIONAL DISCOUNT COMPANY (LIMITED), 35 Cornhill, London.

Subscribed Capital, £2,000,000. Paid up, £385,345.

Approved mercantile bills discounted for parties properly introduced.

Money received at interest on deposit, repayable on call or at fixed periods.—By order of the Board,

RICHARD PRICE, Secretary.

Cornhill, September, 1860.

THE TRUST AND LOAN COMPANY of UPPER CANADA.

Incorporated by Royal Charter. Capital £1,000,000.

Directors.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

William Chapman, Esq., Deputy Chairman.

James Hutchinson, Esq.	Matthew Uzielli, Esq.
Charles Morrison, Esq.	T. M. Weguelin, Esq.
William G. Thomson, Esq.	

Bankers—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

65 Moorgate street, London

THE YORKSHIRE BOTTLE COMPANY (ALEXANDER, AUSTIN, and CO.,)

have Removed to their new commodious Warehouses, Victoria Wharf, Earl street, Upper Thames street, near Blackfriars bridge, where all orders for Flint, Pale, and Black Glass Bottles, &c., will receive prompt attention

IMPERIAL AND ROYAL AUSTRIAN DANUBE STEAM NAVIGATION COMPANY OF VIENNA.

TABLE OF DEPARTURES FOR 1860.

From LINZ, in correspondence with the Bavarian steamers from RATISBON, daily, at 7 a.m.

From VIENNA to PRESBURG and PESTH, daily, at 6.30 a.m.

From VIENNA to SEMLIN, BELGRADE, and intermediate stations, Sunday, Tuesday, Thursday, and Friday, at 6.30 a.m.

From VIENNA to ORSOVA, Tuesday and Friday, at 6.30 a.m.

From VIENNA to the Lower Danube, GALATZ, ODESSA, and CONSTANTINOPLE :—

BY EXPRESS BOAT.

From VIENNA, every Sunday, at 6 a.m.
From PESTH, every Monday, at 7 a.m.
From ORSOVA, every Wednesday morning.
Arrival at GIURGEVO, every Wednesday morning.
Arrival at GALATZ, every Wednesday morning.
Arrival at ODESSA, every Saturday noon.

BY ORDINARY BOAT.

From VIENNA, every Friday, at 6.30 a.m.
From PESTH, every Saturday, at 6 a.m.
From ORSOVA, every Monday morning.
Arrival at GALATZ, every Wednesday.
Arrival at ODESSA, every Saturday morning.
Arrival at CONSTANTINOPLE, the following Saturday at noon.

N.B. For further particulars apply to
Messrs PIETRONI and DRAPER,
81 London Wall London, E. C.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., viâ Egypt—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and her Majesty's mails. The following, or other vessels, are appointed to sail from Liverpool:—

ARABIA, for BOSTON, Saturday, Oct. 6.
ASIA, for NEW YORK direct, Saturday, Oct. 13.
EUROPA, for BOSTON, Saturday, Oct. 20.

Passage money, including steward's fee and provisions, but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.

For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; O. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

STEAM SHIPS.—

The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday morning. Chief cabin, 2*l*; fore, 1*l* 5s.

HARBURG—Every Sunday.

ROTTERDAM—Every Tuesday, Thursday, and Saturday, at 11 morning. Chief cabin, 1*l* 10s; fore, 17s 6d. Cologne, 35s 6d or 19s 9d.

ANTWERP, BRUSSELS, and the RHINE—The Moselle and Dolphin every Tuesday and Thursday, at 12 noon. Chief cabin, 1*l* 7s; fore, 20s. Brussels, 22s 3d. Cologne, 35s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, and the RHINE—Every Wednesday and Saturday morning. Sept. 29 at 12 noon; Oct. 3 at 3; 6 at 4. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 13s; fore, 14s, Brussels, 20s 3d. Cologne, 34s.

HAVRE—From St Katharine's Wharf, every Thursday. Oct. 4 at 2; 11 at 8. Chief cabin, 14s; fore, 10s. London to Paris, £1.

PARIS, via CALAIS, direct—From London Bridge Wharf, every Wednesday and Saturday morning. Sept. 29 at 12 noon; Oct. 3 at 2; 6 at 5. Chief cabin, 14s; fore, 10s. London to Paris, 17s 8d.

BOULOGNE—From London Bridge Wharf, every Tuesday, Thursday, Friday, and Sunday morning. Sept. 30 at 1; Oct 2 at 2; 4 at 3; 5 at 4; 7 at 5. Chief cabin, 14s; fore, 10s. London to Paris, 16s.

EDINBURGH—From St Katharine's Wharf adjoining the Tower, every Wednesday and Saturday; at 10 morning. Fares: chief cabin, 25s; return, 37s 6d: fore, 15s; return, 22s 6d; deck, 10s; which fares include all pier dues at London and Granton.

HULL—From London Bridge Wharf, every Wednesday and Saturday, at Eight morning. Chief cabin, 6s 6d return, 10s; fore cabin, 4s; return, 6s.

NEWCASTLE—From Newcastle Steam Wharf, 272 Wapping, every Wednesday and Sunday, at 10 morning. Chief cabin, 8s; return ticket, 12s: fore, 5s; return, 7s 6d.

YARMOUTH—From London Bridge Wharf, every Wednesday and Saturday, at Four afternoon. Saloon, 8s; return, 12s: fore cabin, 5s; return, 7s 6d.

MARGATE, and RAMSGATE—From London Bridge Wharf, daily, at 10 morning, Sundays excepted; calling at Blackwall and Tilbury piers.

Offices 71 Lombard street, 37 Regent circus, and 35 Leadenhall street; and St Katharine Wharf.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

Dear Sirs,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant, WM. BLACK.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

The Political Economist.

We feel that a fuller Memoir of the Right Hon. James Wilson than can be given within the limits of an article is due to the readers of the journal which he founded. We therefore intend to publish, as soon as possible, a Supplement to the ECONOMIST *containing a brief account of his career, and a short sketch of his character, derived from authentic sources. Due notice will be given of the precise date at which this Supplement will appear.*

ITALY'S POSITION.

LAST week the aspect of affairs in Italy was complicated, menacing, and somewhat gloomy: this week the horizon is much brighter. Every one has spoken; and if all have not spoken wisely, all at least have spoken with tolerable clearness. The "situation" is much more intelligible than it was. The King of Sardinia has declared that to attack Venetia would be the very height of madness, and to attack Rome would be the very blackness of ingratitude; since the first would probably kindle a European war, and the second would involve hostile collision with France, the ostensible benefactor of Piedmont, and the virtual, if not altogether the intentional, liberator of Italy. The Emperor has, it is true, sent additional troops to Rome, and has extended his military posts to some little distance from the city; but he has declared this extension to be purely strategic; and, while announcing his determination to defend the Pope in his despairing grasp on the "Patrimony of St Peter," he has pretty plainly intimated that he understands this "Patrimony" to consist of Rome, Civita Vecchia, and Viterbo—that is to say, of the Eternal City, its only available seaport, and a small strip of territory lying along the Mediterranean coast, not much above fifty miles in any direction, with a barren soil and a spiritless and scanty population. The Pope has issued an "Allocution," almost pitiable in its impotence and anger; expressing his indignation at Sardinia and his distrust of France, and calling on the other Powers of Europe to intervene for the sake of upholding, not his spiritual supremacy, which is no way threatened, but his position as a temporal Ruler, which he has so criminally and so pertinaciously abused. Garibaldi, too, has spoken out both in word and deed:—in a proclamation to his troops he renews the assurance of his unflinching loyalty to Victor Emanuel, announces the probable advance of the Sardinian army across the frontier, and promises that they shall be received by himself and his followers with open arms. At the same time we learn by yesterday's telegraph that he has gained a decided victory over the Neapolitan forces—a statement, however, which as yet needs confirmation; while the facts, almost as important, are undoubted, that the Mazzinian Saffi has resigned or refused the Pro-Dictatorship of Sicily, and that the semi-Mazzinian Bertani has also resigned, and that their places are to be filled by more moderate politicians and more capable administrators. Finally, Mazzini and his friends have issued a manifesto, explaining that, though hostile to *immediate* annexation, as probably involving and apparently sanctioning and acquiescing in an *incomplete* kingdom of Italy,—incomplete, because including neither the City of Rome nor the State of Venice,—they are yet quite prepared to surrender any republican predilections they may entertain, if only they can obtain a united and independent nation, under whatever form of government and under whatever Head.

Under these circumstances we cannot but feel sanguine of the result. Continued firmness and resolution on the part of our Government, and returning good sense on Garibaldi's part, will, we believe, suffice to see Italy safely through the crisis, and land her in a position of security and comparative repose. We are especially anxious, we confess, that Garibaldi should complete his own work, and should do no work but his own. There are things which he can do better than Cavour, and things which Cavour can do better than he. Or rather, there are things which each *can* do, and which the other cannot do at all. Garibaldi is a conqueror—not an administrator. He is an earnest, enthusiastic liberating Hero, admirably calculated to arouse the courage and patriotism of a trampled people, and lead them on to sudden and incredible victories, which are moral rather than military ones; but he has little insight into the characters of men, and no experience in the art of government. He is a consummate guerilla chief, not a practised or sagacious statesman. He is the very model of an emancipating invader; but Cavour's is the genius of compromise and consolidation. There is a time for the one, and a time for the other. Hitherto, and for a few steps further—as far as the Garigliano and Terracina—Garibaldi has been in his appropriate vocation, and has been quite right to decline all interference:—if he goes beyond these limits, and takes measures which would bring him into collision with either French or Austrian troops, he will be obviously and deplorably in the wrong. For, as we have said, and as he himself ought to be well aware, his victories hitherto have been far more moral than military; he has conquered because he has been received by a delighted people, and opposed only by heartless, demoralised, or friendly troops; his progress has been less a contested campaign than a triumphal march; his miscellaneous and half-disciplined levies have never yet come face to face with resolute, well-appointed, well-led forces; and it is impossible not to tremble for the probable issue of such an encounter.

Let us, however, do full justice to this admirable and pure-hearted patriot. He has done what Victor Emanuel could not have done, and would not, and indeed ought not, to have attempted. When Garibaldi first went to Sicily, nearly every one condemned his enterprise, and deemed it hopeless and wild. He has proved that he understood the state of affairs better, and calculated chances more surely than his critics. To him, to his resolu-

tion, to his determination in turning a deaf ear to all discouragements, as to all exhortations to compromise, imperfect workmanship, or premature annexation, Victor Emanuel owes the Crown of Southern Italy. It is to him, and to him only, that the liberation of Sicily, Naples, Umbria, Perugia, and the Marches, is due. If he had not gone to Sicily, the miserable insurgents would have been mowed down, and the incipient emancipation quenched in blood. If he had listened to the Powers who dissuaded and almost forbade him to cross the Straits, the mainland of Naples would still have groaned beneath the stupid brutality of the Bourbons. If he had not overrun and taken possession of the Neapolitan territory as he did, those insurrections in the Roman States,—which made it a clear duty, if not an absolute necessity, for the Sardinians to intervene and prevent wholesale massacres like those of Perugia from desolating and disgracing nearly every town,—would not have broken out; not, at least, at present. To the new Italian Kingdom, which may now be considered to embrace the entire Peninsula except Venetia and the country immediately round Rome, Garibaldi has contributed far the largest share. Louis Napoleon gave Lombardy; Tuscany, Romagna, and the Duchies annexed themselves; Garibaldi has added actually or virtually Naples, Sicily, and half the States of the Church,—comprising a population of not less, certainly, than 12,000,000 souls.

We have said that though we would on no account imperil the freedom of Southern Italy for such a consideration, we yet earnestly desire that Garibaldi should complete his work of defeating and expelling the King of Naples in time to spare the Sardinian forces from the necessity of entering that territory. Hitherto the liberation and constitution of the new Italian State have been effected without violating any of the *rightful* provisions of the Public Law of Europe—any provisions which wise or good men, who are not mere pedants, would desire to see respected. Lombardy was the prize of a regularly declared and lawfully conducted war between three of the established Powers of Europe—a war which, if not wholly irreproachable in its origin, was at least less unjust and less avoidable than wars generally are. Tuscany, Parma, and Modena, by the flight and virtual abdication of their Princes, were left free to choose their form of government; and they chose to annex themselves to Piedmont, though much influence was used to persuade them to a contrary course. Romagna, or that portion of the States of the Church usually known as "The Legations," had long been held and governed, not by the Pope, but by Austria in the name of the Pope; and the voluntary withdrawal of the Austrians left it without any Government at all. The Pope could neither defend it nor control it; according to all natural and legal right, it was entitled to provide for its own administration, and it did so by annexing itself to Piedmont. Naples and Sicily revolted of their own accord against an incapable and sanguinary tyranny—a tyranny so bad that France and England had found themselves repeatedly called upon to warn the tyrant of the inevitable retribution he was drawing down upon his head. The King, no doubt, might lawfully have hanged Garibaldi and his followers, as well as his own revolted subjects, if he could have seized them;—but no one can say that a Sovereign at the head of a hundred thousand regular troops, who cannot resist his own insurgent people aided by a few hundred ill-armed volunteers, deserves either pity or assistance. If he cannot maintain himself, his subjects have an unquestionable right to dethrone and discard him. If the King of Sardinia had invaded Naples in aid of the insurrection, and had expelled Francis and seized his crown, this would have been an undoubted breach of international law;—but the enterprise of a private adventurer like Garibaldi was simply a breach of *municipal* law, for which, as we have said, he might, if caught, have been legitimately hanged or shot. The recent Sardinian invasion of the Papal States was, it may not be denied, a violation of the ordinary law of nations, for the Pope was still on the throne and the nominal Ruler of those territories;—but Sardinia had two conclusive pleas to justify her course. In the first place, the Pope was kept upon his throne only by a foreign force:—he was there only owing to a previous violation of the law of nations; the presence of Sardinian troops at Ancona and Perugia was rendered necessary only by the presence of French troops at Rome, and was a far more legitimate proceeding—inasmuch as the former was in conformity with the wishes of the people, and the latter was in notorious opposition to those wishes. And, in the second place, it would have been simply *impossible*, as well as impolitic and wrong, for Sardinia to have abandoned the revolted subjects of the Pope to his vengeance: humanity forbade it, sympathy precluded it, and her future position as head and leader of Italian unity and independence would have been fatally compromised by so standing aloof. Europe did not require it—Italy could not have forgiven it. Her intervention was an essentially righteous, even if a formally illegal, proceeding.

Our space precludes us at present from commenting on Count Cavour's masterly programme and defence of his policy, just delivered at the Chambers at Turin. We may return to it next week. Meantime we can only say that we believe England will be resolute in approving the issue which seems imminent and inevitable, and that France neither feels nor will offer any real objection, so long as Rome and its immediate vicinity is left untouched. The fate of Venetia and of the Pope must necessarily be left to future Diplomacy;—but when all the rest of Italy is free and consolidated under one rule, Diplomacy will find her task comparatively easy and quite unshirkable.

RAILWAY ENTERPRISE IN CANADA.

THE POSITION OF THE "GRAND TRUNK RAILWAY" IN THAT PROVINCE: AND THE NATURE OF THE REMEDIAL MEASURES REQUIRED.

We believe that we shall, in some degree, perform a public service in directing the serious attention of the commercial public in this country to the subjects stated in the heading of this article. The fate of 14 Millions sterling of capital which during the last seven years and in the midst of many difficulties has been vigorously and persistently expended in constructing the 1,000 miles of railway which composed the Grand Trunk system in Canada, is, in itself, not a small or passing question. But the fate of even so large a sum is by no means the most important feature of the case. There are connected with it large questions of general policy touching the obligations of the Canadian Government to the promoters of and subscribers to the Grand Trunk scheme; and there are also connected with it several interesting questions bearing upon the reception which ought to be given to future invitations from Colonial dependencies to the capitalists of this country to embark largely in enterprises designed to accelerate the material progress of those dependencies.

It is hardly necessary for us to say that we shall discuss these questions in no sense in a partisan spirit, and that our chief aim will be to separate the real, from the imaginary, facts and circumstances of the case.

For the last fifteen years there have been in Canada two great problems affecting in the most marked manner the material progress and prosperity of the Province, and these problems have been—*first*, the rapid creation of some efficient and permanent means of rendering Canada the undisputed highway over which the trade of the vast regions which seek the outlet of the ports on Lake Michigan may flow in ever-increasing volume between West and East; and *secondly*, the rapid creation of similar efficient and permanent means for developing the infinite resources of the tract of Canadian territory which stretches from the Westward to the Atlantic by Lakes Erie and Ontario and along the line of the St Lawrence. We say that for the last fifteen years these have been the two great material problems in Canada. We do not in the least degree ignore or undervalue the large number of political, municipal, and social reforms which during the same period have filled so honourable a share in the public debates of the Province, and generally with results solid and satisfactory as regards both the Legislature and the constituents of that Legislature. Still, below and at the root of every part of the political superstructure which has been thus beautified and strengthened, there has lain constantly the assumption that by means of *material devices* Canada would be enabled to sustain with increasing success the rivalry of the neighbouring American States.

It has been the constant, as it has been the manifest policy of Canada from the earliest period of its active history as a settlement, to contend for the command of the Western Trade.

The command of that Western trade is to Canada a source of power and wealth as vast and undeniable as was the command of the avenues of the Indian trade to the rival commercial States of two hundred years ago. And nature seemed to have amply secured to Canada possession of the prize,—for the waters of the St Lawrence and the Lakes which prolong its course into the interior are the natural outlet to the sea of the higher inland portions of the North American Continent. But unhappily the channel of the St Lawrence is filled at certain points with rapids and cataracts, and the necessities of a growing trade soon superseded the rude appliances which met the exigencies of a ruder, smaller, and earlier traffic. The remedy which presented itself was of course an extensive and costly system of *Canals*. Lord Sydenham obtained for the purposes of the Welland Canal in 1841 an Imperial guarantee for a loan of 1½ millions sterling; and between that date and 1846-7 a sum of 5 Millions sterling was spent by the Province in completing what has been justly called the most magnificent series of Canals in the world—a series so magnificent that vessels of 800 tons could navigate from the ocean to Lake Ontario, and vessels of 400 tons could ascend the more inland waters to Lakes Erie, Huron, and Michigan.

But these great efforts and this onerous expenditure were barely completed, when it was found that the march of discovery had been so rapid as to threaten the Province with the entire failure of its policy and its anticipations. "Until "the introduction of *Railways*," we quote from the pamphlet* by Mr Galt, the Prime Minister of Canada, published only a few months ago, "it was confidently believed that the com- "pletion of the Canal system of Canada would secure to her "a large share of the Western trade; but not only did *Rail-* "*ways* tend to retain the trade in existing channels, but "their immediate effect was to *divert from the St Lawrence* "*a large proportion of the trade of Western Canada itself.* It "became evident that the facilities thus afforded for rapid "and uninterrupted intercourse with the Atlantic cities "would more than counterbalance the greater cheapness of "the St Lawrence during the season of navigation, and that "*unless Canada* could combine with her unrivalled inland "navigation a *railroad system connected therewith* and "mutually sustaining each other, *the whole of her large outlay* "(of 5 millions on canals) *must for ever remain unproductive.*" (Page 28).

Here then was the difficulty—the Province had involved itself most deeply in improving the water navigation from the ocean to Toronto (on Lake Ontario),—and in a lesser degree from Toronto to the leading interior ports of Detroit, Chicago, and Milwaukie. But while Canals had been forming in Canada, Railroads had been constructing on the American side of the boundary,—and against the rapidity, cheapness, certainty, and ease of the railway transit, the canals were little better than rushlights compared with a profuse gas illumination. The crisis was a radical one, and required a corresponding remedy, and the Canadian Legislature did not hesitate to apply that remedy. "In 1849," says Mr Galt, "an Act was passed pledging *a six per cent. per annum guarantee* "by the Province on one-half the cost of *all railways of* 75 "*miles in extent*, and under this Act the Great Western, the "Northern, and the St Lawrence and Atlantic (now part of "the Grand Trunk), were commenced."

In 1849, then, and the years immediately subsequent, the Province of Canada, acting in obedience to what was little less urgent than motives of self-preservation, were anxious to find parties who would construct lengthy lines of railway, "combined with and mutually sustaining the lines of water "communication" (to use Mr Galt's words), in return for a six per cent. per annum guarantee of half the actual cost.

In 1851-2 the scheme of the *Grand Trunk Railway* was first brought before the English public. Few schemes have been presented under circumstances so well calculated to obtain a favourable reception. The names of the London Board were among the weightiest and most distinguished in the financial circles of this country. The engineering portions of the scheme were under the care of Robert Stephenson. The scheme itself was on the face of it simple and complete, and for a time at least exhaustive of the field to be occupied. The capital required was 9½ millions sterling—the length of line promised was 1,100 miles, including the Great Bridge at Montreal, or say 9,000*l* per mile—and the traffic put down as fairly to be expected over the completed scheme was 25*l* per mile per week, or 1½ millions sterling (gross) per annum. Towards this scheme the Province of Canada engaged to contribute 3,000*l* per mile *by way of loan* (*i.e.*, one-third of a fixed cost) as the works advanced—a stipulation far more favourable to the Province than the offer of 1849 to guarantee six per cent. per annum on half the actual cost of any line not less than 75 miles long.

It is the especial peculiarity of the Grand Trunk Line that it supplies to Canada in the most efficient and permanent manner the means of maintaining and increasing the command of the Province over the Western Trade.

The extreme Western termini of the line are at Detroit and Sarnia on Lakes Erie and Huron, but with collateral feeders stretching as far West as Chicago and Milwaukie. Pursuing its course as closely as possible by the side of the water-way, *via* Toronto and Kingston, to Montreal (first throwing off a branch to the new metropolitan region of Ottawa), it there crosses the great internal barrier of the St Lawrence, and thence on the South side of the stream reaches Quebec; and beyond Quebec the Rivière du Loup, a point on the St Lawrence 100 miles lower down—an extension rendered desirable with a view to the complete clearance of all impediments to navigation. Quebec is the natural terminus of the *Summer* trade; but the nearest and most eligible haven in *Winter* is Portland, and accordingly the Grand Trunk carries a branch to the tidal margin of Portland harbour. Mr Galt shall himself describe the general features of this extensive system:—"Of this Company," he writes, "it "may be truly said that, comprising 1,112 miles of rail, "of which no less than 1,092 are strictly a *trunk* line, "constructed in the most permanent manner, and connecting "the American railway system *West of the great Lakes* with "the ocean at Portland in *Winter*, and at Montreal, Quebec, "and Rivière du Loup in *Summer*, it presents probably the "most complete and comprehensive railway system in the "world; and taken in conjunction with the unequalled inland "navigation of the St Lawrence, it cannot fail to attract *a* "*large share of the vast and increasing traffic of the West*, while "it affords to the *whole* Province of Canada the greatest "possible facilities for intercommunication." (Page 31).

It is clear, then, from these statements of Mr Galt's, that one positive result at least has been secured by the construction of the Grand Trunk system of lines, and that positive result is the placing of Canada in the fullest possession of effectual and permanent means for solving in its own favour both the great problems which for the last twenty years have pressed so constantly upon the policy and prospects of the Province—we mean as we said at the outset, *first*, the command of a predominant and increasing share of the Western trade; and *second*, the rapid and profitable development of the fertile regions of the St Lawrence.

And not only has Canada been thus placed in possession of a system of trunk lines of railway without a parallel in any other part of the world, but she has come into the possession of this magnificent endowment on terms more easy and in a space of time far shorter than have had to be submitted to even in the most favourable analogous cases. In 1849-51, Canada was a suppliant to the promoters of railway enterprise, and eagerly sought to win their favour by the offer of a high rate of guaranteed dividend At that time Canada stood on the same level and put forth the same temptations to English capitalists which then or subsequently were offered by India, Ceylon, Brazil, and the Cape. But, more fortunate than any of these competitors, Canada has not only distanced them by ten or fifteen years in the construction of the needful trunk arteries of traffic, but she has obtained the completion of the works at a cost to herself, as we shall presently show, which throws into densest shade the measure of success upon which India, Ceylon, Brazil, and Australia gratefully pride themselves, namely, the construction of trunk lines within their respective territories in return for absolute guarantees of five, six, and seven per cent. per annum upon actual cost.

This is a part of the case into which it is desirable to look somewhat closely.

As we have said, the Grand Trunk scheme was first launched in this country early in 1853, or a little more than seven years ago—the length proposed was 1,112 miles—the

* Canada 1849 to 1859. By the Hon. A. T. Galt, Finance Minister of Canada. Hardwicke, 192 Piccadilly. 1s.

capital required 9½ millions sterling—and the striking feature of the scheme the Great Connecting Bridge across the St Lawrence at Montreal. The aid of English capitalists was invited and obtained, upon the strength of an assurance of 25*l* *per mile per week of gross traffic* over the entire scheme whenever it should be completed. A traffic of that amount would have yielded upon the *share* portion of the proposed total outlay a dividend of about 10 per cent. per annum. At the head of this prospectus of 1853 we find the names of no less than six of the then holders of the highest official employments in Canada. We find the names of the Prime Minister of the Province, of the Solicitor-General, of the Receiver-General, the Postmaster-General, the President of the Executive Council, and the Speaker of the Canadian Parliament. Among the English directors were two of the greatest names in the City of London, entered in the prospectus "as Agents of the Province of Canada, and directors of the "Company on behalf of the Canadian Government."

The scheme, therefore, came before English capitalists as a scheme proposing to raise 9½ millions sterling for a comprehensive system of railways in Canada, urgently needed by the Province,—as a scheme fortified by an advance by the Province (*by way of loan*, be it observed, not by way of subvention) of 3,000*l* per mile, or one-third of the estimated (not the actual) cost; but above all—and this is one of the main points it seems to us in the whole question—as a scheme regarding which the Province of Canada, by its highest official personages, deliberately and categorically declared that when completed there would be at once secured a gross traffic equal to 25*l* per mile per week—in other words, a traffic adequate to pay a fair dividend upon an investment so distant and speculative.

We are quite justified in affirming that nothing less than this official pledge by the Province of Canada of the *certainty* of a traffic of at least 25*l* per mile per week would have given so large a scheme a moment's chance of success. It is wholly inconceivable that it could have been otherwise. Why in 1852 should the English public run inordinate risk in spending money on railways in Canada, when from India and half a score other countries railway securities were offered in abundance, backed by absolute guarantees of the most undeniable character?

The truth of the matter was shortly this, and this only:—the English subscribers read the prospectus in good faith,—they saw the figures—and they saw the array of unimpeachable official names which guaranteed the reliability of those figures. They believed what they read, and they promptly and liberally advanced the funds required to start the gigantic enterprise put forward for the advancement of the Province. With what result we will now state.

The Victoria Bridge was opened nearly a year ago, and with that opening the entire scheme of say 1,100 miles was completed in little more than *six* years.

The actual expenditure during those six years may be stated in abstract as follows:—

	£
Lines originally laid out	9,396,000
Lines and works subsequently determined upon	1,482,000
	10,878,000
Sundry contingencies	517,000
	11,395,000
Interest paid to share and debenture holders	2,282,000
	13,677,000

If we consider the magnitude of the undertaking, and if we remember the succession of difficulties which between 1852 and 1859 visited this country—the Russian war, cholera, dear food, and repeated financial distress—we can scarcely withhold from the figures just given the praise of tolerably close conformity to the promises and estimates put forward at the outset. The large item of 2,282,000*l*, it must be recollected, does not represent the cost of works, but represents *interim revenue* paid over to those interested as share and bondholders.

Towards this total expenditure of say 13¾ millions sterling, the Province of Canada has advanced, *by way of loan*, 3,111,000*l*, or considerably less than one-fourth. Under the original statutes the advances by the Province were to have *priority* of claim for payment of interest thereon at the rate of 6 per cent. per annum. But when the difficulties arising out of the Russian War of 1853-5 had rendered it quite plain that the needful capital could not be raised in this country unless some further concessions were made by Canada, it was at length conceded, after prolonged discussions, that the Province would postpone its claim for interest (at 6 per cent.) upon the amount of its advances until after the ordinary bond and shareholders had respectively been paid interest and dividend equal to 6 per cent. per annum.

The present component parts of the bond and share capital is as follows, arranging them in the order of *priority* of claim to be paid interest and dividend:—

	£
1. First preferential 6 per cent. bonds	2,000,000
2. Second ditto ditto	1,111,500
	3,111,500
3. Ordinary 6 per cent. bonds	2,423,800
4. Bonds bearing 7 per cent.	1,500,000
	7,035,300
5. Share capital	2,781,600
	9,816,900
6. Advances by Province	3,111,000
	12,927,900

To pay 6 per cent. upon the *bond* capital of 7 millions sterling would require about 15*l* per mile per week total traffic, reckoning working expenses at somewhat less than half the gross receipts. To pay 6 per cent. per annum upon the (say) 10 millions of *bond* and *share* capital would require about 25*l* per mile per week.

But the actual working of the entire line during the first eight months of the present year 1860 has not yielded a better result than about 12*l* 10s per mile per week. The corresponding result in 1859 *prior* to the opening of the Montreal Bridge was about 10*l* per mile per week; the unbroken transit, therefore, as a matter of fact *has* raised the weekly rate of gross earnings by one-fourth.

In the meantime gloom and apprehension pervades the large body of persons who as bond or shareholders are more or less dependent on or interested in the success of the Grand Trunk line. The Bond interest due in July last was not paid, and the interest falling due in the course of this month is also likely to become in arrear. The 100*l* paid-up shares are quoted at 27, the 100*l* First Six per Cent. Preference Bonds at 86, the Second Six per Cent. Preference Bonds at 65, the Ordinary Six per Cent. Bonds at 52, and the Seven per Cent. Bonds at 60; in other words, the whole 10 Millions of British capital which has been expended in this Canadian public work would at present market prices be amply represented by about *two-thirds* of its amount.

But to conceive for a single moment that the intrinsic value of the investment is at this time fairly indicated by any such disastrous discount is, we are firmly convinced, a view of the case wholly destitute of foundation.

It can be shown that in reality the enterprise has in it all the elements of rapid recovery and solid progress, and it can also be shown that there are no very formidable difficulties to be overcome in order to arrive at these agreeable results,—and in a second paper we will point out the path to be pursued.

THE LIMITS OF COMPETITION.

MR EDWIN CHADWICK.

The diatribes of such a writer as Mr Ruskin against free trade may be safely disregarded. The irritable language in which they are couched shows that they express an inconsiderate dislike rather than a considerate dissent. Mr Ruskin has always shown a tendency to be vexed at received ideas, and as free trade is now very generally received, it is natural that he should hate it very much. But though we may safely set aside dogmatic execrations such as his, it is right we should consider all reasonable suggestions for the improvement of our industrial system. That system has certainly produced wonderful results, and it may not be likely to be much altered in our time; still it contains many defects which will never be cured if we do not listen to the careful arguments of patient thinkers.

No one can deny Mr Edwin Chadwick's claim to be heard on any industrial question. He has been well known to the public for very many years as a most painstaking statist and a most active administrator. When, therefore, he proposes a substitute for our present system of unlimited competition,

we are at least bound to hear what he says. After the manner of a statist, he begins with a table. He tells us that our railway system—which he takes by way of example—is more dangerous to life, dearer to the travellers, and yet less profitable to the shareholders, than the Continental system, and he cites he following figures in evidence :—

Country.	Average Fares per Mile.			Average Payment per Cent. o Original shareholders	Proportion of Accidents and Injuries to Persons Carried.	Number of times less dangerous than in England.
	1st Class.	2nd Class.	3rd Class.			
	d	d	d			
England, 1857...	2·01	1·41	·87	{3·88 / 4·26}	1 in 183,903	...
France, 1854...	1·55	1·16	·84	6·58	1 in 1,375,092	7 times
Belgium, 1856...	1·33	1·0	·65	5·48	1 in 1,611,237	9 times
Prussia, 1857...	1·4	1·15	·77	7·44	1 in 3,294,075	16 times
Austria, 1857...	1·4	1·1	·83	6·75	...	...
Germany, 1857...	...	...	...	5·52	...	...

And he traces the cause of these variations to what he describes—we are not now concerned with the precise accuracy of the facts—as the different procedure of our Government and of Continental Governments in permitting the establishment of railways,—our Government allowing competition between railways, and the Continental Governments giving the *concession*, the exclusive privilege of establishing the railway, to the Company which bids highest for it. He has invented appropriate words to mark the contrast between these two systems of economical policy. Our system he calls "competition *in* the field,"—the Continental system "competition *for* the field." In a similar strain he speaks of the waste of competition in England. "The "bakers," he rather naively says, "with whom I have "spoken in England on the economy of their trade, are "unanimous in their declaration that the public might be "better and cheaper supplied by one-half their present "number." And we have little doubt that everybody in every trade would be desirous of getting rid of some of his competitors. "I recognise," says Mr Chadwick, "as a fact "of common experience, that where a single tradesman is "permitted to have the entire and unconditional possession "of a field of service, as in remote rural districts, he gene-"rally becomes indolent, slow, unaccommodating, and too "often insolent, reckless of public inconvenience, and un-"progressive. To check these evils, competition of a second "is no doubt requisite; and where the two combine, the "intrusion of a third. But experience should be consulted, "and the public intelligence must be exercised against "hounding on a competition, which consideration would "show involves palpable waste,—as where two or three "capitals may suffice for the performance of a service mode-"rately well, the intrusion of a fourth, fifth, or sixth com-"peting capital eventually leads to its being performed im-"moderately ill." In a word, Mr Chadwick would remedy the evil of waste in trade,—say in baking, it is his own instance,—by limiting the number of bakers to such a number as the "field" will maintain, and expects in that way to get better bread than now, because an excessive competition will not then, as now, "drive" the bakers to adulterate it.

We are afraid that this theory will seem, when stated simply and apart from the various interesting facts which Mr Chadwick has accumulated in its support, to be not only intrinsically erroneous, but palpably absurd. How many bakers would Mr Chadwick permit in the borough of Southwark, and what is to be the price of bread there? How will he prevent the bakers in the City sending loaves into the Borough, and the bakers in the Borough sending loaves into the City? Many years ago a celebrated theory of colonisation was founded on the precept that land was to be sold at a "sufficient price," but no one to this day has found the test of sufficiency. In the same way Mr Chadwick has enjoined on the bakers to limit the number of bakers, but he has not told us, and we cannot conjecture, how he would fix his criteria of limitation. It is not enough to tell us that the number should be sufficient, and only just sufficient. The number must be settled in one of three ways,—either by the bakers, in which case the consumers would never be satisfied; by the consumers, in which case the bakers would never be satisfied; or by the police, in which case no one would be satisfied at all.

The truth is, that Mr Chadwick has not perceived that what he calls the "waste" of competition is a natural and, to some extent, an incurable consequence of the division of labour. So long as a man is producing for his own wants, there is no great fear that the supply of any article will ever outstrip the demand for it. The producer knows what he requires, and will only produce what he requires. But when, under the very complex system of indefinitely divided labour, each man produces for the wants of very many others—of very many others, no one of whom he sees and knows,—it is impossible that he can be sure of producing exactly the right amount. There is no mode of finding the right amount out except by trial. For example, how would any one determine how many newspapers will be read daily in London, except by the stupid, tentative, "wasteful" process of letting any one publish a newspaper who wishes to do so, and ascertaining by mere experience whether it will be read or not? Nothing short of omniscience would enable any one to say whether any article of any kind will hit any one's fancy till it has been seen in the market; and no one can tell how many fancies it will hit except by continual approximation,—by taking too many to market one day, and taking some of them home again,—by taking too few another day, and not having them to sell when they were asked for. The waste of which Mr Chadwick speaks is simply the miscalculation of what is wanted, which inevitably arises when we begin to provide for the wants of others. Mr Chadwick says ten capitals are frequently employed in England where nine would be enough : exactly so, because there was no means of finding that nine would be enough, except by finding that eight were not enough, and that ten were too many.

The reason why Mr Chadwick makes so strange a proposal is that he has only looked at a certain class of cases. He tells us—"I may, perhaps, best expound the principle "by which the differences in result presented in this one "table, and others from different branches of service are "governed, if I relate the circumstances under which that "principle was presented to me. From 1838 to 1841, "whilst examining the sanitary conditions of town popu-"lations, I found urban districts in England, where there are "two or three sets of water-pipes carried through streets "which might be as well or better supplied under one esta-"blishment, and competitions ending in strict monopolies, "bad and deficient supplies at high charges to the public, "with low dividends to the shareholders, and an almost im-"practicability of improvement in their separate condition "without augmenting the already excessive charges of the "ratepayers or further reducing the low returns to the "capitalists. These competitions are what I then desig-"nated as competitions 'within the field of service.' As "opposed to that form of competition, I proposed, as an "administrative principle, competition '*for* the field,' that is "to say, that the whole field of service should be put up on "behalf of the public for competition,—on the only condition "on which efficiency, as well as the utmost cheapness, "was practicable, namely, the possession, by one capital or "by one establishment, of the entire field, which could be "most efficiently and economically administered by one, "with full securities towards the public for the performance "of the requisite service during a given period."

In such cases as these there are two peculiarities. First, the number of competitors is always limited. The licensing a gas company, like that of a railway company, always depends on the public authorities; and very reasonably, as it would be impossible to have any speculator any day tearing up the public streets under the pretence of laying down the usual apparatus. Some limitation is, therefore, necessary, and Mr Chadwick is right in saying that when the number of competitors is limited there is always a virtual monopoly. Gas companies and water companies have always therefore combined, and will always combine. As a monopoly is a necessity, it is probable that the monopoly of one good company is much better than the monopoly of several bad ones. Secondly, it is possible to intrust the supply of water or gas to a single company. If Mr Chadwick had proposed to entrust the supply of bread, say in London, to a single company, we should have had a more definite proposal to discuss, but his good sense has withheld him from an idea so monstrous. He knows, and well knows, that such a plan would ensure starvation one day and excessive supply the next. No human calculation could achieve an accurate estimate of the supply needful for such a field. We wonder that he did not perceive that the cases which seem to have most attracted his attention were very peculiar ones; that

free trade was in them impossible, and that it is, therefore, waste of time to discuss its expediency; that in them it was possible for the monopolists to make some approximation to the demand to be supplied, whereas in the great fields of industry no such approximation could be fancied even by a sanguine theorist.

THE FRENCH TARIFF.

It will be remembered that by Articles I., II., XV., XVI., of the Commercial Treaty between England and France, the Government of the latter country contracted to reduce the duties levied on British produce and manufactures in the following manner, to the following degree, and at the following dates:—

1. On *coal* and *coke*, from July 1, 1860, to 15 centimes the 100 kilogrammes, or about 15d per ton.

2. On *pig iron*, *bar iron*, and unprohibited *steel*, specific duties (to be afterwards fixed by a commission) not exceeding 30 per cent. *ad valorem*, from October 1, 1860, and not exceeding 25 per cent. from October 1, 1864.

3. On *worked metals*, *machines*, *tools*, &c., specific duties not exceeding 30 per cent. from December 31, 1860 (or sooner if it could be managed), and not exceeding 25 per cent. from October 1, 1864.

4. On *flax* yarns and manufactures, specific duties not exceeding 30 per cent. from June 1, 1861, and not exceeding 25 per cent. from October 1, 1864.

5. And on all other articles similar rates of duty from October 1, 1860, and October 1, 1864, respectively.

The reduced duties on coal and coke came into operation at the specified date. Since that period, as our readers will be aware, conferences have been carried on in Paris between Mr Cobden on one side, and M. Rouher, French Minister of Commerce, on the other, assisted by two or three practical officials of both nations, for the purpose of fixing the *specific* rates of duty which should be charged upon the various articles of import referred to in the treaty—those specific rates to be kept within 30 per cent. *ad valorem* in the first instance, and 25 per cent. afterwards. The French have a great objection to the system of *ad valorem* duties, as giving rise to much trouble, constant disputes, and occasional fraud—an objection which is shared more or less decidedly by the Customs' authorities of every country; and it was, therefore, determined to fix specific duties in every case where no peculiar or insurmountable objection presented itself. The aim of the French Commissioners, as a rule, was naturally enough to fix these specific duties as near the maximum of 30 per cent. as possible;—that of the British Commissioners was of course to fix them as much *below* this limit as their French colleagues could be persuaded to agree to. From all we have been able to learn, the French Minister of Commerce manifested throughout the whole inquiry and discussion much fairness and liberality; and, judging by the results, the representatives of English manufacturing interests must have conducted their part of the conference with great ability and firmness. The labour gone through by the Commissioners has, we believe, been very great.

The *Moniteur* of the 30th of September publishes the first portion of the new tariff,—that relating to iron and steel, which, according to the terms of the treaty, was to come into operation on the 1st of the present month. The English Government have not, so far as we are aware, yet made public their version of the tariff; but we may reproduce the official French version as correct and reliable, since it is published with the joint signatures of M. Thouvenel, M. Rouher, Lord Cowley, and Mr Cobden. We here give it rendered, accurately enough for practical purposes, into English weights and money, taking 1,000 kilogrammes to the ton, and 25 francs to the pound sterling. As, however, the various articles are only given with their French technical names, it is possible that we may not always be perfectly correct or precise in rendering them into their English equivalents. We give in a parallel column the duties hitherto chargeable on the same articles, wherever we have been able to ascertain them. It will be seen that in most instances the reduction has been very material, and has usually exceeded—often greatly exceeded—that promised in the original treaty. We cannot charge the Emperor's Government with not having kept faith with us in every particular and in liberal measure.

Description of Article.	Duty per *ton* in *shillings*.		
	Old Duty.	Duty from Oct., 1860.	Duty from Oct., 1864.
Iron ore	Free.	Free.	Free.
Iron dross and refuse	7s 6d	Free.	Free.
Raw iron (*fonte brute*), & fragments of such	38s 4d	20s	16s
Purified raw iron, called *mazée*, and old fragments of such	67s	30s	22s
Cast iron (*fer brut*) and iron in "*prisms*," still containing some dross	Prohibited.	40s	36s
Bar, rail, and rod iron (except as under)	Varying rates, from 96s to 136s	56s	48s
Iron plates and hoops weighing less than 200 kilogrammes	192s	68s	60s
Ditto, of a heavier sort and larger dimensions	192s	76s	60s
Sheet iron	192s	104s	80s
Iron—tinned or coppered (usually called tin)	384s	128s	104s
Iron wire	208s	112s	80s
Steel in bars	208s	120s	104s
Steel, in thick plates	Various.	176s	144s
Steel, in thin plates	480s, 1056s	240s	200s
Steel wire	672s	240s	200s

As to the extent to which these duties will permit or facilitate the admission of iron and steel into France, we can offer no opinion. This is a matter for the decision of practical men.

We observe that a discussion has arisen in the columns of the *Times* as to the alleged difference of 10 per cent. in the duties levied at the French Custom House, according as the articles are imported in French or in foreign ships. The City article on Wednesday mentioned this differential duty in favour of the French flag: a letter signed "F." in Thursday's impression declares that this difference ceased in consequence of a treaty bearing date in 1826. We are by no means clear upon this point; but it well deserves immediate attention. By Art. X. of the Treaty of January 23, 1860, all differential *local* dues are abolished; but the document is silent as to the special privileges of merchandise imported in French bottoms.

MR GLADSTONE AND THE REVENUE.

The interest of the usual Revenue Returns, which we publish elsewhere, mainly consists in the possible evidence which they may afford us of the real effects of Mr Gladstone's Budget. All that theory can suggest, whether true or untrue, has probably been said on that now celebrated financial effort, and nothing but trial remains to give us instruction. As to the Excise, we are even yet without *any* adequate means of testing Mr Gladstone's calculations by experience. The retention of the paper duty by the House of Lords, and the anomalous periods at which the malt duty has been collected, render it impossible usefully to compare the actual yield of the half-year's revenue with the calculations of the Chancellor of the Exchequer on the revenue of last year. We must wait for a longer period before, on this part of the subject, we can judge at all. And even with regard to the Customs, there are many circumstances which forbid us to take our experience of the period which has elapsed since the 5th February, when Mr Gladstone proposed his original Budget, as an exact criterion of the ultimate effects upon the income of the entire financial year. We cannot at once know the precise effects of such a complex accumulation of changes as Mr Gladstone this year made. Still it is worth while to compare the estimate with the result.

	£
Mr Gladstone calculated that if there had been no treaty with France, the Customs revenue for the year ending April 1, 1860, would have been	24,750,000
But that in consequence of the treaty it would be only	24,110,000
Leaving a loss of, previous to April 1, 1860	640,000
He again calculated that—	
The duties he abolished would have yielded	2,771,000
But that consumption would increase in consequence of their abolition by	671,000
Thus leaving an ultimate loss to the revenue of	2,100,000

And if we add these two sums together we have—

	£
Estimated falling off in the Customs revenue before the 1st of April, 1860	640,000
Ditto after ditto	2,100,000
Total	2,740,000

Now, what are the facts as yet? The Customs revenue actually yielded before the 1st of April 24,460,902*l*. And, deducting this from what would have been the yield if there had been no reductions of duty, viz., 24,750,000*l*, we have a reduction of only 290,000*l*, instead of 640,000*l*, as Mr Gladstone calculated.

During the half-year which has passed since the 1st of April last, there has been a diminution in the Customs revenue of 1,064,507*l*, and if we double this by way of hypothesis, we have for the whole financial year 2,129,014*l*, which is almost exactly Mr Gladstone's estimate of what it would be. On the assumption that the next half-year will be similar to the past, the account stands—

	£
On Customs Revenue—Loss before 1st of April ...	290,000
Loss after 1st of April.....	2,129,000
Total	2,419,000

which is more than a quarter of a million better than Mr Gladstone estimated it, although he deducted so large a sum as 671,000*l* for a hypothetical augmentation of consumption.

If, again, we look at the last quarter only, our readers will see that the Customs duties of the quarter have fallen off by 688,866*l* as compared with the corresponding quarter of 1859. But something like 180,000*l* of this apparent falling off is not real. It will be remembered that it was in July, 1859, that the Chancellor of the Exchequer proposed his long-deferred Budget. It was feared that he might increase the tea duties, and the consequence was that large quantities paid the duty in anticipation of the dreaded rise. How considerable this extra duty was is shown by the import tables for last July, which give 11,319,917 lbs of tea as having paid duty in July 1859, as against about six millions and a half in the same month in 1858 and 1860. Diminishing the decrease on Customs duties for the quarter by (say) 180,000*l* from this cause, we shall have the real decrease about 500,000*l*. Mr Gladstone calculated the annual decrease on Customs duties at 2,100,000*l*, which gives as near as possible a decrease of 500,000*l* quarterly. His calculation is therefore very near the mark.

Of course we give these calculations only for what they are worth. We are well aware that many causes may be assigned which will affect the actual yield of the Customs revenue during the next half-year, some unfavourably and some favourably. Still we should look at the facts which we have before us. And they certainly prove that we need not fear any such collapse of our whole indirect revenue as some persons anticipated a short time since. That Mr Gladstone's Budget entails a serious addition to the income-tax we have never doubted; it means an additional twopence or threepence in the pound on our incomes, and we would not underrate for a moment the importance of this effect. We know the unpopularity of direct taxation, and we are alive—perhaps nervously alive—to the possible consequences. But, on the other hand, it is of great importance that the actual state of our revenue should be correctly understood, and that we should not imagine our national income to be irreparably injured when, in fact, we are collecting, with unprecedented ease, a revenue larger than we ever before collected in a year of European peace.

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom, in the undermentioned periods, ended September 30 1860, compared with the corresponding periods of the preceding year.

Agriculture.

THE UNFINISHED HARVEST.

A week of dry weather will mitigate, but cannot, in any material degree, repair the loss and injury sustained by the English farmers during the present disastrous season. Various efforts are made by the daily press to make things pleasant commercially, by means of statements that no serious mischief has been done to the corn crops, that the yield of wheat will be scarcely under an average, and that, after all, the season of 1860 will not prove a bad one. There is no warrant in facts for any such general results, and the separate data on which they are professed to be founded have only a minimum basis of truth. Upon the very light and dry soils there were some crops of wheat larger than usual on such soils. The wet weather, in spite of the low temperature and absence of sunshine, suited them. There early sowing is practised, and when the fortnight of dry weather, which commenced on the 29th or 30th of August, set in the wheat was ripe, and could be carried after standing in the field for a short time. Such wheats, where stacked before the rain recommenced, will be dry and fit for immediate use. On such soils the barley crops, which were later, have suffered more than the wheat. But even in these more favoured localities the interval of dry weather was too short to enable the farmers to stack all their wheat, and consequently considerable breadths remained in the field throughout the latest rains, and are pretty much in the same state as the wheats on the stronger lands.

On the strong and loamy soils the wheat crops, generally, were not ripe enough to cut on the 30th of August, and before any important quantity could be cut and carried the rain returned, and put a complete stop to all harvest works. What has been stacked is in a condition so damp that, without kiln-drying, it will be quite unfit for present use, and many millers are so drying the damp wheats they buy. It is said the quantity of wheat will not be so deficient as the quality, which is undoubtedly true; but though the crops vary a good deal, according to the condition of the land on which they have grown, as a rule the weight will be light, and the quantity per acre less than an average.

This view is confirmed by all the authentic reports we have met with. In the general agricultural report of the *Mark Lane Express*, for September, it is stated "that, with some few exceptions, the aggregate growth is a deficient one, even though we hear of five and even six quarters to the acre having been produced on well-farmed land." As to the condition of the new wheat, it is said "the crop has seldom turned out worse." The bulk of the samples offered for sale during the last two or three weeks have "proved wholly unfit for millers' purposes, without a very large admixture of dry foreign." Fortunately there will be great quantities of dry foreign wheat to be used for mixing. But nothing can be more absurd than to mistake the actual position of our own crops. With the world open to us, we have no fear that the nation will suffer anything like scarcity, though prices of food must necessarily be comparatively high. Farmers, however, will suffer, and, in many cases, severely; the poorer and small occupiers faring the worst.

The Cambridgeshire report of the same paper says (September 29)—"There is probably one-third of the wheat, and about half the barley still in the field, while some of our farmers have harvested scarcely anything."

The report from South Hertfordshire says—"Many stacks of oats and wheat, hastily put together, have had to be moved—oats especially—from the straw being green, having heated extensively. Very little wheat has yet been carted in good order for grinding." Spring wheat is a good deal sprouted. Beans are good on well-tilled land, but they "will be weeks before they are fit to stack."

The last week has, however, been very favourable, as there has been both sun and wind.

In Buckinghamshire, on the 29th of September, the report says—"Three-fourths of the wheat out in this district; indeed, many have not carted any description of corn." A fortnight's dry weather was deemed necessary to clear the fields.

In Warwickshire the wheat was carried in a damp state, but little of it had sprouted.

The South Nottinghamshire report says of the wheat already housed (29th September), that "even that proportion secured under the most favourable circumstances, when submitted to the thrashing-machine, turns out in very many instances unfit for grinding." The produce is also stated to be less than an average.

In Scotland, the weather has been much better than in England, and though the harvest has been late, it will not prove a bad one. The potatoes, too, are turning out well in that part of the island. One farmer in Berwickshire is recorded to have sold 75 acres of potatoes at 5*l* 10s per acre.

In England, the potatoes, as well as the turnips and mangold wurtzel, are almost universally bad. In Herefordshire and other counties, hay is selling already at 6*l* and 7*l* per ton.

IRISH AGRICULTURAL STATISTICS.

The abstract of the Statistical Returns for Ireland, showing the average crops and the number of live stock in the year 1859-60, has just been issued, and some of the facts disclosed possess considerable interest. As might have been expected, from the extreme scarcity of fodder by which the Irish farmers were afflicted during last winter and spring, there has been some diminution of stock this as compared with last year. "It is, however," says the Registrar-General, "satisfactory to find that the decrease in cattle and sheep is not so great as might have been expected, when the *extraordinary* prices of hay and all feeding for farm stock are taken into account." The changes are as under:—

	In 1859.		In 1860.		Decrease.
Horses	629,075	.....	620,938	.....	8,137
Cattle	3,815,598	.....	3,599,235	.....	216,363
Sheep	3,592,804	.....	3,537,846	.....	54,958

Pigs, on the contrary, have increased in 1860 by 2,839, or from 1,265,751 to 1,268,590.

There has been a total decrease in cereal crops in 1860 of 15,223 acres, which arises from the smaller number of acres of oats, bere and rye, and beans and peas grown, for there has been an increase in wheat of 5,467 acres, and in barley of 3,070 acres. There has also been a total decrease of all green crops (including potatoes) of 28,949 acres. The decrease of land under flax crop also in 1860 is 7,838 acres. Against such decreases there is an increase in meadow and clover of 157,375 acres, showing an *increase* of land under crops in 1860 of 105,365 acres. This seems to be the prevailing tendency of Irish cultivation, for from 1856 there has been an almost continuous decline of cereal crops, and of turnips and cabbage, while, during the same period, potatoes, mangel, carrots, vetches, rape, flax, and clover and meadow crops have increased. There can be no doubt that Ireland is essentially a country of grass and green crops, and as farms become consolidated and enlarged, we shall expect to find an increase of acres under green crops and some diminution of the grain crops.

Comparing the numbers of live stock in 1855 and 1860, we find that between those years horses increased 64,651, while cattle increased 34,835 only. Sheep during the same period decreased 64,496. Pigs increased 90,985. Thus taking the decrease of 216,363 cattle which has occurred between 1859 and 1860, the number of cattle is now considerably less than in 1855, while sheep have not maintained during the same period a greater increase than about 9,000. The value of all kinds of live stock, except pigs, has decreased between 1859 and 1860, but as between 1855 and 1860 there has been a considerable increase in value on all kinds of stock save sheep wherein the decrease amounts to 70,946*l*. By far the greatest increase of value is on horses, amounting to 517,208*l*. The decreased value of cattle last year reaches the serious sum of 1,406,359*l*.

The Registrar-General again refers to the evil caused by weeds which are allowed to seed on the land in Ireland, and hopes that "a Bill to provide for the destruction of certain weeds in Ireland," which was last session introduced by Sir Wm. Somerville and Mr Bellew, may be passed in 1861. We fear weeds will only be extirpated after the farming has been more generally improved. In reference to emigration, we learn that the total number of persons—of both sexes and all ages—who emigrated from the 1st of May, 1851, to the 1st Sept., 1860, was 1,140,982. In the year 1860 the number was 62,185 against 59,409 in 1859. This applies to the first eight months of 1859 and 1860.

Literature.

COMMERCIAL LITERATURE.

The Levant Quarterly Review of Literature and Science. Edited by R. F. Foote, M.D. No. I. July, 1860. Constantinople: Printed for the Proprietor, at No. 1, Rue de la Banque, Galata. London: Saunders and Otley.

This is a publication of considerable interest. Its outward appearance is not in its favour, the typography being wretched, and defaced by countless misprints. But there is a vigour and good sense in the writing, which show it to be the work of energetic men, who will persevere till all the petty obstacles are overcome which must attend the editing of an English Review in a foreign city, where, as Dr Foote tells us, there are "no English compositors to be had, and every letter of manuscript must be written like copper-plate." The Review is divided into three parts; (1) Original Communications and Reviews; (2) Report on Social Economy; (3) Miscellany. The best articles are the opening paper by the Editor, "On the Necessity of a Levant Quarterly Review of Literature, Science, and General Information,"—a review of Heuschling's "Empire de Turquie," and the valuable "Report on Social Economy: Cotton Growing in Turkey and Syria," by Mr W. Sandford. From this paper we extract the following passages, which are well worthy of attention:—

Abuse of authority, committed by officials entrusted with the collection of taxes on land in Asiatic countries, has depressed cultivation, and has been undoubtedly one of the principal causes in India and Turkey of much land lying waste, which might have largely participated in the golden harvests derived from the cotton trade. Of vital consequence

is this question of the mode of raising taxes from the cultivator, whose welfare affects the sources of so many branches of industry. No subject more earnestly demands the solicitude of Governments, and attention is now especially rivetted to investigation and reform on this essential point, both in British India and in the Ottoman Empire. * * *

Great difficulties undoubtedly attend the rigorous exaction of the tithes on some articles of produce, which are subject to great variation in quantity, and require prompt removal and careful treatment on arriving at maturity. The presence of the tithe collector in all parts of his districts at the critical moments is an impossibility. Inspection of the crop before it is removed from the ground, even with the best intentions on the part of the collector, cannot be satisfactorily carried out; and the right to such inspection enables an extortioner to exact sacrifices from the cultivator, or to afflict him by delays, which destroy a portion of the fruits of his industry. The evils of the system may be aggravated by sale of the tithe to speculators, who have no permanent interests in the locality, and who by exorbitant pretensions and ruthless abuse of temporary power impoverish a district and destroy the roots of its future productiveness. The practice of selling tithe to the highest bidder, be he Turk or Christian, Infidel or Jew, appears to be a greater stretch of Government prerogative in the case of a tax levied under a religious sanction than would be enacted by the exemption of a single article for a limited period from liability to its payment. Yet such exemption of a single article is considered to be impossible, or at least difficult, though a stimulus would be given to the cultivation of cotton, the magnitude of the results of which it is difficult to foresee, were Government to remit in favour of the cultivator for a limited period all claim for tithe from that one article, and to give protection and encouragement to the extension of its culture.* Some mitigation of the evils of the present pernicious system is earnestly to be desired in the interest both of Government and people, and some relief might be afforded (if the temporary concession be impossible), by the publication of a tariff, to be adopted at the option of the cultivator in lieu of tithe, fixing a certain sum per acre as a maximum on different articles, say 25 piastres per acre for cotton, the acceptance of which, when offered, should be compulsory on the tithe collector; and the payment of which should render the agriculturist perfectly free as to the time and manner of the gathering and the removal of his crop.....A lot consisting of 1,000 cantars of selected cotton from an Egyptian estate of his Highness Il Hami Pacha was sold in February last at Alexandria on board ship at thirteenpence a pound. Great care is at present bestowed on cotton on some estates in Egypt, and in consequence Egyptian cotton now sells in England for a halfpenny a pound on the average higher than American cotton. The quantity exported last year was 140,000 bales, and the cultivation is extending. No less than 7,000 bales were from the estates of his Highness Il Hami Pacha. Several Pashas have now entrusted large estates to the management of eminent European commercial firms..... The tithe is superseded in Egypt by a rent or land tax, assessed according to the quality of the land and the facilities for irrigation which the land enjoys. * * *

No fiscal obstacles exist on the side of France or of England to unlimited importation of cotton to their markets. The article is duty free. The Turkish impediments to development, viz., the tithe, the 9 per cent. and the 3 per cent. duties, amounting to 22 per cent., are under the absolute control of the Ottoman Government, and that Government can have little hope that the Turkish cultivator can compete with his American rival and pay those taxes.....Uniformity of rate of taxation can only have for result the annihilation of many useful branches of industry, and in some other cases the unnecessary sacrifice of revenue; and yet Turkey is subjected partially to such a system by her treaties with friendly Powers. All her exports are subjected to payment of 12 per cent. in addition to tithe, which amounts practically to the exclusion of some articles from foreign markets, and acts as a death-blow to their cultivation. Her duties on imports are bound down to 5 per cent. on all articles alike, by which her power of raising revenue is in some instances injuriously contracted, and every branch of Turkish production and industry is placed at 7 per cent. disadvantage in competition with all foreigners on her own soil and in her own ports. That liberty should be accorded to her to adopt modifications which would improve her own financial position, without detriment to the legitimate interests of other parties to the treaties, appears so just and reasonable a proceeding, that it is difficult to suppose that the great Powers of Europe would allow opposition from any quarter to counteract such a policy. Ten per cent. duties on manufactured goods and yarns imported, instead of 5 per cent. as at present, would inflict no injury on trade, Turkey would still remain the nation by which European manufacturers are the most favoured, and the small increase would supply an amount of revenue which would compensate the Ottoman Exchequer for complete remission of tithe and export duties on cotton and grain, and some other raw products, by the liberation of which Turkish agriculture would be enabled to enter into competition on fair terms with any other countries, and the consuming capabilities of the population would be considerably augmented.

From the Miscellany we learn that several active societies for literary and scientific purposes are established at Constantinople. Proceedings are reported, at more or less length, from the following:—The Imperial Medical Society; The Constantinople Committee on Railways; The Sub-Committee on Quarantine for the Levant, of the National Association for the Promotion of Social Science in England; The Constantinople Mechanics' Institution at Haskeui; The Malta Protestant College; The Levant Quarantine Association; and The British Literary and Scientific Institution at Pera.

The only drawback which we feel called upon to notice in this Review (except the insertion of some trashy verses) is its occasional faultiness of composition. The portions which appear to be Editorial are frequently interspersed with Continental idioms, and an article by Mr C. Raffaelli, on the Archæology of Asia Minor, is so entirely un-English that it should have been thoroughly revised before publication. The facts which he has to tell are so interesting, that such a labour would have been quite worth going through.

* Hay and straw are tithe free in Turkey.

The Bankers' Magazine. Groombridge and Sons.

There is nothing particularly striking in the October number of this periodical. An article on "The Conditions and Prospects of Trade" has not inspired us with any clear notion of what its "conditions or prospects" are. Another paper contains a violent attack "On the Taxation of Indian Rupee Securities." All taxation is odious. As for the Indian Government mulcting a portion of their creditors, we think it will be found that the income tax will be impartially levied on all income paid by the Indian Government: the clause in the new Act is plain enough. The object of levying an income tax is to make Indian income and expenditure meet, and, before it is condemned as unjust, at least some other plan ought to have been suggested by which this chronic deficit in Indian finance can be arrested. It may be very hard to subject the owner of Indian securities to pay an income tax in India and one in England; but unless it can be proved that the finance of England and India are one and the same thing, which all British statesmen have laboured so hard to keep distinct, we suspect that the holder of Indian securities *residing in England* is by law subjected to pay Indian income tax in India, and likewise English income tax in England. The case may be hard—it may be impolitic; but it is, as we believe, the law. But it strikes us that the holder of Indian securities had better pay a double income tax than have no income at all, for Indian finance is fast drifting towards bankruptcy.

There is an article on the General Indian Administration, evidently emanating from an "Old Indian," condemning Lord Canning's administration as "governing India for the Indians," because "no one pretends that Englishmen go to Hindostan for the purposes of giving the Hindoos the blessings of a mild government," &c. Alas! England knows now what "Old Indians" did for India politically and financially. Other articles, carefully compiled from the *Times* and *Morning Chronicle*. Mr Travers's remarkable criticism on Mr Wilson is reproduced with general assent; and the "Great Meeting of Creditors," originally contributed by Mr J. Hollingshead to "All the Year Round," constitute, with the Banking Statistics the most instructive and interesting portion of the present number.

The Assurance Magazine and Journal of the Institute of Actuaries. Layton, Fleet street.

This Magazine is by far too deep for the general reader, but is most valuable for actuaries and those studying to become actuaries, and indeed for all interested in life assurance, the statistics of mortality, and the doctrine of probabilities in the ordinary affairs of life. The present number contains a portion of a very learned paper "On the Construction of Life Tables, illustrated by a new life table of the healthy districts of England," by Dr Farr. It also contains, as illustrating the doctrine of probabilities, Sir John Lubbock's paper on the Clearing of Bankers, which formed the subject of a leading article in our last number; and there is a very able paper by Mr Porter, the assistant-actuary of the Alliance Insurance Company, discussing how far the inordinate mortality in this country, as exhibited by the annual reports of the Registrar-General, is controllable by human agency. Mr Porter arrives at the conclusion that in consequence of phthisis, fever, small-pox, infantine diseases, and accidental death, the five principal causes of death, an unnecessary amount of mortality takes place annually, inasmuch as these causes are greatly within human control; and the Registrar-General is also of opinion that 100,000 deaths take place annually which might have been prevented. In order to legislate effectually on these points Dr Farr proposes a scheme for the establishment of a statistical board; for, as Mr Porter somewhat eloquently observes, "as truly as the magnetic needle guides the mariner through the pathless ocean, so would the digest of the great masses of facts we possess direct the Government through the wide sea of legislation, and point out the course that must most surely be taken if we wish to improve the resources of the country, if we wish to diminish sickness, and to increase health and longevity, to lessen poverty, and to promote learning, to take away the incentives that lead to the commission of crime, to ameliorate the condition of a great people, and to further their social and religious progress." We believe, however, that legislative interference in these matters may easily be carried too far.

GENERAL LITERATURE.

The National Review. No. XXII. October, 1860. Chapman and Hall.

This is a particularly good number of the "National." It opens with a very spirited and interesting article on "The Franks and the Gauls," the object of which is to show, by tracing the historical antecedents of the country now called France, the utter fallacy of the pretexts on which the modern French policy of "*revendication*" is based. The writer begins by describing ancient Gaul, when, as

a province of the Roman Empire, it included "the modern states of France, Switzerland, and Belgium, the lately plundered duchy of Savoy, and portions of the kingdom of the Netherlands, and of the German states of Prussia, Bavaria, and Hesse." Then came the great Teutonic migration, which sent the Franks into Gaul. They settled, to a certain extent, in the country north of the Loire, but the lands to the south of that river were but nominally conquered by them, and "never really became part of the true Frankish territory."

The zenith of the Frankish power was attained in the reign of Charles the Great.....but it was a glory in which the modern Frenchmen can claim no share. Celtic Parisian France had as yet no being. Its language was as yet the unformed patois of a conquered province. Paris was a provincial town which the lord of Rome and Aachen once visited in the course of a long progress amongst a string of its lowly fellows.

Not until nearly 200 years later, when, in 987, the Capetian dynasty superseded the Carlovingian, do we come to the "establishment of the kingdom of France in the modern sense," and even then it "contained six great principalities besides the Royal domain," and "a crowd of smaller potentates, holding either of the Crown or of these great vassals."

The subsequent history of France is the history of two processes: first, the conversion of a nominal feudal superiority into a direct sovereignty over the whole kingdom; secondly, the annexation of divers states which formed no part of the kingdom at all. The two are not accurately distinguished in popular imagination, and, of course, the Parisian phrase of "réunion" greatly tends to confound them. To talk of the "réunion" of Normandy or French Burgundy is not absolute nonsense, because Normandy and French Burgundy were, at all events by a fiction of feudal law, grants proceeding from the Crown of France, which were afterwards reincorporated with the Royal domain from which they had been severed. But a "réunion" of Provence, Lorraine, or Savoy is absolute nonsense, because those provinces never formed any part of the Capetian monarchy. These two processes, of internal consolidation and external aggression, have now been going on side by side for 600 years.

Of both these processes the reviewer gives a brief sketch. One source of confusion in the minds of spectators, which we do not remember to have seen noticed before, is indicated as follows:—

Another means by which a false light is thrown upon the successive aggressions of France arises out of the familiar and almost universal use of the French language. We are so much more familiar with French than with any other tongue, French has become to so great an extent our medium of communication with other nations, that we have got into a way of speaking of half the cities of Europe, not by their own names, but by French corruptions. The custom is quite recent; in the sixteenth century, Englishmen spoke of a German, Flemish, or Italian town either by its real German, Flemish, or Italian name, or else by some corruption of their own making. Now our habit of calling all places by French names greatly softens the ugliness of French aggression. *Alsace sounds as if it had been a French province from all eternity; the Teutonic Elsass suggests ideas altogether different. The "réunion" of Nice may, a generation or two hence, sound quite natural; but that of Nizza would retain its native ugliness to all time. Cologne, Mayence, and Trèves sound as if they positively invited annexation; so do Liège, Malines, and Louvain; and it is no wonder that people think that Charles the Great was a Frenchman when they find his tomb at such a French-sounding place as Aix-la-Chapelle. But Köln, Maloz, Trier, Lüttich, Mecheln, Löwen, and Aachen would, by their very names, stand up as so many bulwarks against Parisian aggression. For at least eight hundred years past Frenchmen have been incapable of spelling rightly any single name in any foreign language; but it is not at all unlikely that the incapacity may now and then not have been without a sound political motive.

And the result of the whole history is thus summed up:—

We have thus done our best to show that Parisian France in no way represents ancient Gaul or Carolingian Francia. France and the French are a modern power and a modern nation, of which we see the first glimmerings in the ninth century, and which attain something like a definite and lasting position in the tenth. France is essentially an artificial, advancing state, just like Sardinia and Prussia in more recent times. When mayors and bishops hail Louis Napoléon as the "successor of Pepin and Charlemagne," they are asserting a palpable untruth. Modern Europe contains no real successor of either; but least of all is the successor of the elected King of Aachen, the crowned Cæsar of Rome, to be looked for in the upstart usurper of Paris. The work of Charles was to make Italy and Gaul alike subject to a German monarch. No work could less call forth our sympathies at the present moment; but no work could be more alien to the process of extending the frontiers of the City of Paris over Italian, Burgundian, and Teutonic lands. Italy, in the eighth century and in the tenth, invoked a German King as her deliverer from her intestine troubles. No such remedy now is needed. She can now work her deliverance for herself, and she no more needs the hypocritical friendship of the Gaul than the open enmity of the Austrian. Before our eyes is growing up an Italian kingdom truer and freer than that of Charles and Otto, than that of Berenger and Hugh of Provence; and, with a slight change of name and style, we may apply to the first and chosen sovereign the words of the papal benediction to Charles himself. Not altogether for his own sake, not forgetting the tortuous and faithless policy which bartered away the old cradle of his house, still, as to the representative of Italian unity, we may say with heart and voice, "Victori Emmanuell, a Deo coronato, magno et pacifico Italorum Regi, Romanorum Imperatori futuro, vita et victoria!"

There is another historical article,—"The Middle Ages in England,"—and another political one,—"Baron Ricasoli and his Political Career,"—each good of their kind. The article on "Builders' Combinations in London and Paris" gives a resumé of the pecuniary statistics of the late Builders' Strike, contrasting it with the published accounts of a working-class firm of builders (masons, stone-cutters, and sawyers) in Paris, with whom the co-operative principle is not confined to the supplementary purposes of benefit societies, but is applied to the carrying on of their trade, and apparently with a large measure of success. The writer does not, however, seem to feel sanguine as to the introduction of such a plan among working-class builders in England, and his paper is, on the whole, rather disappointing.

Of purely literary articles we have several. "The English Translators of Homer" is nominally devoted to the recent versions of the Iliad by Professor Newman and Mr I. C. Wright; but it ranges through the earlier translations also with discriminating and impartial criticism. The reviewer looks upon all the translators "but as the suitors who strove in vain to bend the mighty bow of Odysseus," yet he has a genial eye for the beauties to be found in the separate attempts of each.

"Russian Literature,—Michael Lermontoff," gives us a short sketch of another of the Byronic poets of that half-developed and little-known nation. The descriptions here presented of Lermontoff's narrative poems of "The Circassian Boy" and "The Demon" are full of the painful interest which so often belongs to the lyric utterances of a race whose noblest minds are unable to find a direct expression in actual life. It would be interesting to know in what way the milder rule of Alexander II. has acted upon the literature of Russia. Both Lermontoff and Pushkin died during the reign of Nicholas.

"Nathaniel Hawthorne" is an elaborate criticism of an author who well deserves it. "French Fiction,—The Lowest Deep," is an able exposure of the abnormal productions of the modern French school. "The Natural History of Ceylon" is an entertaining resumé of those portions of Sir Emerson Tennent's "Ceylon" which relate to natural history. And the concluding article,—"Nature and God,"—is a masterly essay on the mutual relations of science and religion. Altogether, this number of the "National" is characterised by greater equality of power than usual, and several of the articles are not only of temporary interest, but of permanent value.

All Round the Wrekin. By Walter White. London: Chapman and Hall. 1860.

We are always ready with a hearty welcome for Mr White's yearly account of his holiday rambles. The present volume is not inferior to its predecessors in animated descriptions of the scenery through which he passed, his thorough and cheerful enjoyment of which leaves a very pleasant impression on the mind of the reader. We feel refreshed as by a breath of real country air after reading one of Mr White's books. The volume before us contains an account of a walking tour round the Wrekin, starting from Birmingham, and visiting the remarkable objects and beauties of several surrounding counties, rich in the peculiar characteristics of English scenery;—the manufactures of each are noticed, and some of the processes are very graphically described. We may instance particularly the making of plate glass at Smethwick, and Minton's china works at Stoke. An observing eye and a power of minutely, and at the same time picturesquely, describing what he sees, are amongst the important requisites which Mr White possesses for making an amusing volume out of his summer rambles. His books are never dull, and in saying this we give them high praise.

The following lively illustration of the loose habits of the North Staffordshire Railway will perhaps remind some of our readers, as it does us, of that very miscellaneous and vagrant-minded line which goes by the name of the "North London Railway":—

A fidgetty line is this North Staffordshire Railway. I have heard it described as all legs and wings; beginning nowhere and ending nowhere; and you may think yourself lucky if you have not to change trains at two or three junctions. In fact, whenever you come within the region where the Staffordshire knot, symbolic of detention, is painted on the sides of trucks and vans, then make up your mind that the trains start "sometimes one time and sometimes another." "Law, Sir! why didn't ye holler? This train ain't so very perkikler," said a station-master as I once ran panting into a little station just in time to hear the engine give its starting snort.

But Mr White is no grumbler; he takes the ups and downs of travelling in the right spirit, and it is for his temperament of hearty and genial enjoyment, and for their complete simplicity of manner that we like his books and most cordially recommend them to our readers.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

An Imperial decree, published in the *Moniteur*, fixes the duties which from the 1st of the present month are, in virtue of the commercial treaty, to be imposed on the iron and steel of Great Britain imported into this country. The duties are to be as follow:—

	In and from 1860. The 100 kilogs. (2 cwts.) f c		From 1864. The 100 kilogs. (2 cwts.) f c	
Iron ore	Exempt.	.....	Exempt.	
Scoria and smiths' dross	Exempt.	.....	Exempt.	
Raw iron in masses, Fragments of old cast iron materials	2	50	2	0
Purified cast iron called mazée, Old iron filings, and fragments of old materials in iron	3	25	2	75
Pig iron in lumps or prisms still retaining dross	5	0	4	50
Bar iron, square, round, or flat, rails of all forms and dimensions, iron in angular and T form, and iron wire, subject to the exceptions hereinafter mentioned	7	0	6	50
Iron in bands of 1 millimetre in thickness or less, Iron plates, flattened or otherwise, of more than 1 millimetre in thickness, in sheets weighing 200 kilogrammes (4 cwts) or less, and of which the width shall not exceed 1 metre 20 centimetres, nor the length 4 metres 50 centimetres	8	50	7	50
Idem, in sheets weighing more than 200 kilogs. or being of more than 1 metre 20 centimetres wide, and 4 metres 50 centimetres long	9	50	7	50
Thin iron plates and black sheet iron of 1 millimetre thickness or less	13	0	10	0
N.B.—Plates of iron or black sheet iron, cut in any way, shall pay one-tenth more than rectangular plates.				
Iron plated with tin, copper, or zinc	16	0	13	0
Iron wire of five-tenths of millimetre in diameter or less, whether plated or not in tin, copper, or zinc	14	0	10	0
Steel in bars of all kinds	15	0	*13	0
Steel in plates of more than 2 millimetres thickness	22	0	18	0
Steel in plates of 2 millimetres thickness or less, Steel wire even if whitened for instrumental cords	30	0	25	0

(N.B.—26 millimetres = 1.024 inches. 1 metre = 3 ft. 3.371 inches. 100 centimetres = 1 metre. 25f = 1/. 100 centimes = 1f.)

* The tariff published in the daily newspapers leaves a blank here, as if bar steel were to pay nothing after 1864; but our contemporaries are in error.

Compared with the old tariff, the new one presents these advantages:—For raw iron, a reduction of about one-half; iron bars of different sorts, also a reduction of one-half, with, however, certain differences, some higher, others lower; sheet iron, common sorts, a reduction of two-thirds; iron wire, not less than four-fifths; steel in bars, more than half, that is from 36f to 15f; flattened metals, a large reduction.

In the course of the present month the other details of the new tariff will be fixed, and part of them will no doubt be somewhat as follows:—On objects in iron used in households and manufactures, which have hitherto been prohibited, the duty will be moderate; cast iron pipes, which have hitherto been virtually prohibited, will be brought within the reach of agriculturists and builders; and pottery, articles in iron for building, locks, nails, anchors, chains, cables, and tubes in forged iron, will also be admitted at reasonable duties. On cutlery, which has hitherto been prohibited, the duty will be moderate. As to machinery, the reduction of duty will vary from one-half to two-thirds; some articles which paid 48f the 100 kilogs will henceforth only pay 15f, and from the 1st of October, 1864, only 10f; others which paid 18f, will only pay 9f, and from 1864 only 6f. On detached pieces of machinery the reduction in some cases is as much as nine-tenths. As to files, scythes, reaping hooks, saws, and other tools, the reduction is to be three or four-fifths, and in some cases five-sixths. Articles in leather, cabinet-ware, and works in ivory and wood are to pay much less. Carriages, which were prohibited, are only to pay 10 per cent. *ad valorem*. What is to be done with regard to cotton and woollen fabrics is not yet stated. The new tariff will be greatly simplified, though not to the extent that is desirable, and many vexatious Customs regulations which have hitherto been in force are to be done away with.

An Imperial decree fixes the import duties on sulphate of soda at 6f the 100 kilogrammes by French vessels, and 8f by foreign vessels or by land; and it abolishes, from the 1st of this month, the drawback on the export of nitric and sulphuric acids.

It is calculated that the sum disbursed in the construction of railways in this country, including the subventions of the Government, is about 4,500,000,000f, the length executed exceeding 5,500 miles; and that a further sum of 2,500,000,000f will be required to complete the lines now in course of execution or projected.

A law authorising the establishment of a new company, under the name of Société de Credit Agricole, has just been promulgated. The new company is founded by the directors of the Credit Foncier (a proof that it will be well conducted), and its object is "to make loans to agriculture and to trades connected therewith; also to promote the improvement of the soil, and the bringing into cultivation of uncultivated lands." The law stipulates that in case the annual profits of the society shall not suffice to give interest of 4 per cent. on the capital, in addition to the expenses of management, the Government shall make up the deficiency, provided, however, it does not exceed 400,000f per annum.

At a meeting of the shareholders of the Graissessac to Beziers Railway, held a few days back, the resolution was come to that a proposition of the directors to wind up the affairs of the company on account of the losses sustained should not be adopted. In consequence of this a new board of directors was elected.

The Engine-building Company of Messrs Cail distributes a dividend equal to 10 per cent. on the paid-up capital, as the profits of the year ending the 30th June last.

The merchants of Bordeaux engaged in business with Senegal are pressing the Government to allow foreign rice to be imported into the colony by foreign vessels at all times, instead of only exceptionally as at present. If this prayer should be granted, English merchants and English shipping will benefit, as it is to them the colonists will trust for their supply. Rice forms the principal part of the food of the population, and the import of it may be expected to be considerable.

The Bank of France informs the persons who subscribed for bonds in the Ardennes, Dauphiné, Eastern, Mediterranean, Southern, Orleans and Western Railways, that a call of 100f is now due and must be paid before the 15th.

The Government has decided that the discount allowed for the immediate payment in cash of import duties, the duties on salt, and on the manufacture of native sugar and of beer, shall from the 1st of this month be 3 per cent.

The Comptoir d'Escompte (Discount Bank), in order to undertake the operations in Asia which have been mentioned, is about to increase its capital by an issue of 40,000 shares at 580f.

The Bourse during the week has displayed considerable firmness, owing partly to the situation of the place, partly to a more hopeful view being taken of the political situation. To-day there has been a slight reaction, occasioned by rumours that the Pope has left Rome. The quotations, however, present a marked improvement, compared with those of last week:—

Subjoined is an account of the markets:—

FLOUR at *Paris* was yesterday at 58f to 62f the sack of 159 kilogs for the superior qualities. Four marks were 59f and 59f 25c for the present month; for after November, 59f 50c to 59f 75c. These prices are the same as those of last week.

WHEAT.—At *Paris*, yesterday, the quotations varied from 34f 50c to 38f the sack of 120 kilogs, an advance on last week's prices. Of the provincial markets, 107 have risen from 11c to 1f 66c the hectolitre, 18 have fallen from 25c to 2f, and 14 have undergone no change.

COTTON.—At *Havre*, in the week ending Friday, the sales were 10,654 bales, and the arrivals only 20. Prices closed without any change in the quotations of the previous week: low New Orleans, 84f the 50 kilogs; very ordinary ditto, 94f. This week, the demand has been active, and prices firm.

SUGAR.—Business at *Havre*, in the week ending Friday, was dull: 440 casks French West India dispensable, 47f 50c to 49f the 50 kilogs duty paid, and 400 for Paris, carriage paid, at (it was said) 51f. The arrivals of West India and Havana exceeded 3,000 sacks. This week, the demand has not been active: French West India, 48f to 48f 75c; Havana, 36f. At *Nantes*, last week, 1,982 sacks Reunion "gros grain" went at 56f to 56f 50c; 25 casks Havana, of very superior quality, 57f; 3,615 sacks Mauritius "gros grain," 57f 25c. No sales have been made this week. At *Bordeaux*, last week, various lots of French West India, and 3,500 bales Reunion were sold: brokers fixed the prices at 47f 50c to 48f for West India duty paid; 51f 50c to 52f for Reunion. This week, a small lot of French West India has been sold at 47f 50c.

COFFEE.—The demand at *Havre*, in the week ending Friday, was regular, and prices were firm: 350 sacks Hayti Port-au-Prince, 79f 50c the 50 kilogs in bond; 50 ditto Gonaives, 84f; 380 Rio not washed, 76f to 78f; 320 ditto washed, 85f to 91f; 750 ditto not washed for delivery, 75f 50c to 76f 50c; 3,973 Porto Cabello *non grages* expected, 85f 50c; 100 Singapore for delivery, 109f duty paid; 75 Malabar disposable same price; and a small lot of Ceylon plantation, 123f. Some lots of damaged were also sold. The arrivals were unimportant. This week, business has not been very active: Hayti, 80f in bond; Ceylon plantation, 123f duty paid. At *Nantes*, last week 73 sacks Java were sold at 120f, and two small lots of Reunion at prices not stated. This

week, some large sales have been made: Hayti at prices kept secret; Padang, 117f; Reunion fève pointne, 131f; some large quantities of damaged Padang and Java have also been disposed of. At *Bordeaux*, last week, business was animated: 8,088 sacks Guayra at prices previously established; 1,469 sacks Rio not washed, 74f 50c to 92f; and a small lot of Santiago at prices not stated. This week, there has been a good demand for Santiago, part at prices not stated, part at 95f to 98f; also for Rio not washed, at prices kept secret.

INDIGO.—At *Havre*, last week, only 14 cases Bengal were sold, at prices kept secret, and the arrivals were only 33 cases from England. This week, only a small lot of Bengal has been sold, at prices not stated. At *Bordeaux*, last week, the sales were 26 cases Bengal, 4 Kurpah, 17 Guatemala,—all at prices previously established. This week a small quantity of Bengal, and a smaller one of Kurpah, have been disposed of—prices not given.

HIDES.—Business at *Havre*, last week, was active: 613 Monte Video dry, 140f the 50 kilogs duty paid; 2,650 salted La Plata, 81f to 81f 25c for ox, and 77f to 77f 50c for cow; 564 Rio Grande dry, 120f to 125f; 1,100 Pernambuco dry, 105f; 1,200 drysalted, 96f; 2,156 Valparaiso salted, at prices kept secret; 517 Lima dry, 85f; 950 New York salted, 55f to 56f; 1,050 horse, dry Buenos Ayres, 9f 50c each duty paid, and 400 ditto salted, 101f 25c the 100 kilogs. The arrivals were about 2,300. Business has not been active this week: Monte Video salted, 75f to (for ox) 85f; Pernambuco drysalted, 96f; Buenos Ayres salted, 78f; horse, salted Monte Video, 97f 50c to 100f the 100 kilogs; ditto Buenos Ayres, 104f.

WOOL.—Business at *Havre*, last week, was calm: 20 bales Buenos Ayres, unwashed, 2f to 2f 80c the kilog; and 3 ditto, washed, of inferior quality, 1f 70c. The arrivals were about 1,500 bales. Only 3 bales of Buenos Ayres, unwashed, have been sold this week, at 1f 80c the kilog.

TALLOW.—There were no sales at *Havre*, in the week ending Friday, and there have been none this week. At *Paris*, yesterday, the quotation was 142f 50c the 100 kilogs, a fall on last week's prices.

COMMERCIAL AND MISCELLANEOUS NEWS.

Advices from Buenos Ayres are to the 27th of August. Trade had been dull in all branches, although imports had been on a considerable scale. In regard to produce there was little to report. The saladeros had been almost inactive, only 1,500 head having been slaughtered, and the inactivity was expected to continue for the next two months. Sales of salted ox and cow hides amounted to 4,000 at 57 to 52 reals, and 3,000 salted Matadero at 44 to 46 reals; prices nominal at quotations when mail left. Of salted horse hides, 13,000 sold at 18 reals, and 12,000 at 15¾ reals, the latter after arrival of the packet. At Rio the coffee market was much more active than it had been for some time past. Assorted lots for United States, quoted on the 24th ult. 6,250 reis to 6,400 reis, have latterly been sold at 6,000 to 6,100 reis. The bulk of arrivals consisted chiefly of Serraacima coffee, and the quality, generally speaking, was good. The sales from the 7th of August to date reached in all to 211,450 bags. In the sugar market all grades of brown had considerably advanced in prices, and white was firmly held. From Bahia we learn that the prospects of the sugar crop, on account of the weather, were much improved, but it would be late; and crops of coffee and cocoa would be small and late. Supplies of coffee were arriving sparingly, and sales had been consequently unimportant at 5,400 to 5,600 per arroba. There had been no supplies of cocoa recently, and quotations were nominal, at 4,600 to 4,900. Stocks of sugar were much reduced, and smaller than they had been for some years past. Browns, of good quality, for Rio Janeiro were inquired after, and purchases effected at 3,050 per arroba, which price was still offering; ordinary neglected.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 22nd day of September, 1860:—

MARKETS IN THE MANUFACTURING DISTRICTS.

In most of the markets held in the manufacturing districts, this week, there has been rather a firmer feeling in the demand for cotton goods for shipment both to India and China, at very full prices. The inquiry for most articles for the Continent has somewhat improved, whilst the trade for home consumption is very healthy. Stocks do not increase. In the iron trade the dealings have been somewhat restricted, notwithstanding that the make has been much reduced. The demand for coals, both for home use and export, is still active, at comparatively high rates.

MANCHESTER, Oct. 4.—Yarns have this week taken a thorough advance, ¼d per lb having been established, especially on medium numbers for the trade, many of which have risen nearly 1d per lb in three weeks. As following the extensive transactions in cloth during that time, the business of this week has rendered both spinners and manufacturers throughout the district quite independent of orders. In several cases, orders for water twist for China already extend into January, and for shirtings into December. Other fabrics have been strengthened indirectly by these purchases, as well as by the speculative tendencies with respect to cotton, and all branches of our market are more or less strong. Besides the present anticipatory Eastern demand, the demand for the Continent has been by no means unimportant.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Wool—Very little change has occurred during the week in any department of the trade. Hogs and wethers may be quoted at 1s 10d and 1s 8d respectively, at which prices they are very firm. Yarns—Spinners are still busy for export, and a few late Russian orders are yet giving out, but the home consumption is languid. Pieces—There is no buoyancy in the piece market. Except for the operations of the American houses, which do something to prop up the market, things would be exceedingly heavy.

ROCHDALE.—There is little noticeable alteration in the trade of this district, with the exception of a slight tending towards dulness. Low goods of all descriptions would sell readily, and probably at an advance, if prompt delivery could be guaranteed; but this is impossible. Prices are unaltered. A fair trade is doing in Yorkshire goods.

LEEDS.—The tone was rather quiet, but the transactions were not below the average of a Tuesday's market, winter goods being principally dealt in.

HUDDERSFIELD.—The amount of business done was comparatively slight both in the Cloth Hall and the warehouses. Prices have, in consequence, a rather downward tendency. The manufacturers show, however, great unwillingness to relax from the terms which have throughout the season been so firm. In wool the buyers operate very cautiously.

LEICESTER.—For the time of the year there is a fair amount of business doing, the hosiery trade generally being in a healthy state. In the country districts business continues flat, but not more so than is usual at this period of the year. High prices are asked for wool, and the market continues firm. Yarns have undergone no change in price.

NOTTINGHAM.—There has been very little doing in the lace warehouses this week, in consequence of business having been impeded by the holidays of the annual fair. There is not much change to note; plain goods are rather more inquired for, and there is fully as much doing in fancies as for several weeks past. The silk trade remains quiet. There is no favourable change to report in the hosiery trade.

GLASGOW.—By private contract several large transactions have been entered into in wool. There is a better feeling regarding laid washed Cheviots, which are selling much more freely than they were. Laid and white Highland are in good demand, quotations being fully maintained. Crosses are in better request.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s, at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*, and all other sorts in proportion. Welch bars, 5*l* 7s 6d to 5*l* 10s. The nominal price of rails in Wales is 5*l* 5s. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; best native hydrate pigs, 3*l* 10s to 3*l* 17s 6d; first class all mine grey forge pigs, 3*l* 5s to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 12s 6d to 2*l* 17s 6d; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 15s; Cleator Moor hæmatites, 3*l* 10s to 3*l* 11s 6d; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Barrow hæmatites, 3*l* 10s to 3*l* 11s 3d, none in the market; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; melters, No. 1, 2, and 3, 2*l* 10s to 2*l* 15s; superior makes of all mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. Favourite Shropshire and Forest of Dean brands, 4*l*; northern hæmatites, 3*l* 7s 6d to 3*l* 11s 3d, according to brand and quality. It must be remarked that there is a difference in the value of different makes of cinder forge pig iron of 5s per ton.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the Gazette.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 3rd day of October, 1860.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,642,405	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	15,167,405
		Silver Bullion	...
	29,642,405		29,642,405

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,663,460
Rest	3,804,588	Other Securities	19,945,221
Public Deposits (including Exchequer, Savings Banks Commissioners of National Debt, and Dividend Accounts	6 832,025	Notes	7,689,470
Other Deposits	12,006,549	Gold and Silver Coin	701,683
Seven Day and other Bills	803,672		
	37,999,834		37,999,834

Dated the 4th October, 1860. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,756,607	Securities	29,530,681
Public Deposits	6,832,025	Coin and Bullion	15,869,088
Private Deposits	12,006,549		
	41,595,181		45 399,769

The balance of Assets above Liabilities being 3,804,588*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An increase of Circulation of	£1,211,985
A decrease of Public Deposits of	260,656
A decrease of Other Deposits of	966,673
A decrease of Government Securities of	51
An increase of Other Securities of	385,872
A decrease of Bullion of	386,863
An increase of Rest of	14,302
A decrease of Reserve of	1,516,308

The present Bank return presents some remarkable changes. The increase in the circulation amounts to 1,211,985*l*, in other securities to 385,872*l*; the decrease in the public deposits to 260,656*l*, in other deposits to 966,673*l*, and in bullion to 386,863*l*, and in the reserve of notes to 1,516,308*l*. It is evident, therefore, that the Government have drawn largely on the Bank, and hold the notes prior to their distribution.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1850:—

At corresponding dates with the present week	1850.	1857.	1858.	1859.	1860.
Circulation, including bank post bills	£ 20,614,011	£ 20,824 714	£ 21,635,717	£ 23,021,406	£ 22,756,607

In 1850, the rate of discount was barely 2½ per cent., and difficulty was experienced in placing money at call at 2 per cent. Railway shares were exciting attention, and the most incredulous began to recognise the discovery of gold in California as likely to turn out enormous, and thereby to exercise a vast influence on the commerce of the world.

In 1857, the money market was characterised by great pressure. A gloomy feeling prevailed in all quarters. On the Continent money was rising, and in America a crash among the banks prevailed. The Bank of England had raised the rate of discount from 5½ to 6 and even 7 per cent. The "other" securities had increased 2,110,000*l* within a week, partly owing to the loan of 1,000,000*l* made by the Bank to the East India Company on deposit of India Bonds. The mutiny in India was at its height. The Emperors Francis Joseph of Austria and Alexandria of Russia had just had an interview at Weimar.

In 1858, French ships of war had been sent to make a hostile demonstration in the Tagus. The Bank of Vienna were collecting large quantities of silver with a view to the resumption of specie payments; and the rate of discount at Hamburg had consequently risen to 5 per cent. The Bank of England held 19½ millions of bullion, and were expected to lower their rate from 3 to 2½ per cent. The subscription list for the second issue of 2,000,000*l* of Messrs Dent, Palmer, and Co.'s Turkish loan of 5,000,000*l* closed on the 8th inst., when it transpired that 1,280,000*l* had been taken, making 4,280,000*l* in all. Notwithstanding this new issue, the Turkish 6 per Cent. loan of 1854 was supported at 97½. The official particulars of the new Lombardo-Venetian Railway concession had at length transpired. The new shares were quoted 4½ premium, and the old 5½ premium. A great sensation had been excited in Scotland by the announcement of another call of 100*l* per share on the unfortunate proprietors of the Western Bank.

In 1859, money was very abundant. The Bank rate was 2½ per cent., and in the discount market a shade under. The bullion at the Bank had increased within five weeks 1,082,836*l*. The rate of money in the Stock Exchange was only 2 per cent. from day to day, and little more than 1½ per cent. from account to account.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 4,490,288*l*; in 1857, a deficiency of 11,833,561*l*; in 1858, a deficiency of 3,207,142*l*; and in 1859, a deficiency of 6,520,918*l*. In 1860, the deficiency is 7,938,662*l*.

Discount and Money Market.—Money has been in very fair demand during the week. The best paper having a month to run has been discounted at 3⅝, but the bulk of the transactions in Lombard street has been at 3¾ per cent., and to-day a very active demand has taken place at that rate; and, notwithstanding the Bank rate is 4 per cent., we understand the Bank has done a very fair amount of business. The fourth of the month has passed over wonderfully well, the Bank not having a single bill returned, and, with some trifling exceptions really too insignificant to mention, the same satisfactory account is given from all quarters. The fact is, the greatest caution is exercised in the discounting of paper. Such is the determination to discourage accommodation paper, that Messrs Overend, Gurney, and Co. will not discount paper unless the transaction for which the bill is drawn is expressed on the face of it. This is a very salutary precaution, and we trust all other discount houses, and especially the Bank of England, and, in fact, every discounter of bills, will adopt the same course. Money has been in good demand in the Stock Exchange at 3½ to 4 per cent., but this arises from the circumstance we mentioned last week of the discount houses and the bankers having called in a large amount of money lent from day to day to the jobbers.

Taking into consideration that the supply of bullion from America is likely to cease in consequence of the large shipments of corn and cotton to this country, and that a large demand for gold exists for the Continent, it is the opinion of the most experienced in the monied world that the present rates will be fully maintained for the present. About 16,000*l* gold has been taken from the Bank.

The following are the rates of discount at

	Bank Rate. Per cent.	Open Market. Per cent.
Amsterdam	3½	3
Brussels	3	3
Frankfort	2	1½
Hamburg	No Bank rate	2
London	4	3¾
Paris	3½	3
St Petersburg	5	5½
Vienna	5½	5½

English Funds.—The fluctuations in the English funds have ranged from 93⅜ to 93½ buyers. There has been more activity this week in consequence of the Italian question taking a more favourable turn; but there has been a considerable supply of money stock. This, coupled with the withdrawal of large sums by the bankers and discount houses, has caused a slight reaction, and Consols close this afternoon at 93¼ ⅜ for money and account, it being rumoured that the Bank return is unfavourable, and that the Government will require large advances on deficiency bills. Exchequer bills are par to 3s prem. The price of French funds is 69.20, after being as high as 69.50.

Foreign Funds.—There has been rather more demand for foreign securities. Mexican Bonds have advanced to 22½, and are to-day 22⅛ to ⅜. It is confidently expected

that the long looked-for remittance of the dividend will arrive by the next packet. Venezuelan Bonds have been rather in demand, in consequence of advices stating that arrangements are on foot to pay the July dividend. There is some idea of a new loan, but any advances to Venezuela from the capitalists of this country is very problematical. Peruvian 3 per Cents. have been well supported, in consequence of about 60,000*l* stock being required by the sinking fund. Turkish Bonds remain steady.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

CONSOLS.

RAILWAYS.—The railway market has been during the week very buoyant, especially Lancashire and Yorkshire, which at one time had advanced 3*l* 10s per share, but has slightly receded. London and North Western advanced 1¼, Midland 2, Berwick 2½; but these shares have since receded to the extent of the rise. York and North Midland advanced 1¾, but since receded ½. There has been a very important rise in Lombardo-Venetian, which rose to par, but close ⅜ ½ discount.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—The arrivals since our circular of 27th September have comprised—The Dover Castle, from Melbourne, with 228,000*l*; the Bavaria, from New York, with 29,000*l*; the City of Manchester, from New York, with 22,500*l*. No portion of the above has been sold to the Bank of England, the demand for export having been active. The exports have been—Per La Plata, for the West Indies, with 6,000*l*; per Pera, overland to Madras, with 3,067*l*. About 16,000*l* has been withdrawn from the Bank. Any immediate arrivals would most probably be taken for export. Mem.—The Malta (str.) alluded to in our last as having left Melbourne on 18th June with 91,000*l* in gold, was bound for Bombay.

Silver.—We have no transactions of moment to report this week. The bar silver ex West India steamer Tasmanian has not yet been sold. We quote the price 5s 1⅛d per ounce standard, but the demand is not great. The Sultan, from the Peninsula, has arrived with 7,000*l*. The shipments have been, per Peninsular and Oriental Company's steamer Pera, which leaves Southampton this day, 86,562*l*, viz.:—To Calcutta, 10,120*l*; to Singapore, 5,000*l*; to Hong Kong, 35,875*l*; to Shanghai, 35,567*l*. The West India steamer, due on the 28th instant, is expected to bring a very considerable amount of silver and dollars.

Mexican Dollars.—The large amount of dollars noticed in our last circular as having arrived per Tasmanian from the West Indies will not be delivered before the 8th or 9th inst. The price has, however, been fixed at 61⅞d per ounce, being a reduction of ⅜d per ounce as compared with the dollars ex La Plata, alluded to in our circular of 30th August. The market is firm, and some few transactions have been effected at 62d per ounce.

Exchange on Bombay and Calcutta for Bank 60 days' sight drafts continues at 1s 11¾d to 2s per rupee; bills with documents, 1s 11d to 1s 11¼d. Bank 60 days' sight drafts on Madras, 1s 11⅜d.

Indian Government loan notes are without much change. In 4 per Cents. more has been doing at 79 to 80; 5½ per Cents. are 102 to 102½; 5 per Cents. 96 to 96½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 76s 3d to 76s 6d per oz, last price; South American doubloons, 74s 6d per oz, last price; United States gold coin, 76s 3d per oz, last price. Silver—Bar silver, 5s 1⅝d per oz std, last price; bar silver, containing 5 grs gold, 5s 1⅞d per oz std, last price; fine cake silver, 5s 6¼d per oz, last price; Mexican dollars, 5s 1⅞d to 5s 2d per oz; Spanish dollars (Carolus), 6s 2d per oz, last price.

FAILURES.—Messrs Dumareille, Simon, and Co., leather merchants, of Thavies inn, Holborn, have stopped payment. Their liabilities are probably under 20,000*l*, while their assets show 7s or 8s in the pound.

Mr A. Allan, miller and flour factor, of King's cross, has suspended payment: his liabilities are stated at 20,000*l*. Messrs Coleman and Co. are the accountants employed.

At the meeting of the creditors of Messrs J. J. Tilley and Co., warehousemen, held for the purposes of obtaining an unanimous opinion, if possible, with regard to the course to be adopted, it was carried by a vote of 13 against 8, to accept a composition of 4s in the pound cash, rather than proceed in bankruptcy.

At the Court of Bankruptcy there was a final examination meeting of William Frances and James Hooper, of Bermondsey, in the leather trade, but no accounts having been filed, an adjournment took place. An approximate statement of their affairs exhibits liabilities to the amount of 69,721*l*, against assets 10,951*l*, showing, therefore, a deficiency of 58,769*l*. A strong effort, which is thought likely will prove successful, is being made to supersede the bankruptcy.

There was also a meeting of the creditors of Thomas Lee, of George yard, Lombard street, and Birmingham, merchant; but an adjournment *sine die* was agreed to, as it was stated there were many matters demanding inquiry. The accounts extend from December, 1856, to May last, and show a total indebtedness and liability of 10,447*l*, against assets 1,631*l*.

In the Bankruptcy Court a dividend was declared on the estate of Messrs Axtell, Knight, and Axtell, tanners, of Bermondsey and St Neots. It will be about 4s in the pound. A proof tendered by the General Discount Company was admitted for 682*l*, on the Company relinquishing their lien on shares standing in the names of the bankrupts. A dispute arose in connection with a proof put in on behalf of the Mercantile Discount Company. The bankrupt Knight carried certain bills to the Company to be discounted, and the Company retained a sum of 1,600*l* against shares allotted to him, and which he agreed to purchase. The assignees contest the right of the Company to retain the 1,600*l*.

A meeting in the Bankruptcy Court for the declaration of dividend and proof of debts under the bankruptcy of Richard F. Pries, merchant, of Crutched friars, who failed in 1853, absconded, was convicted of felony, and sentenced to transportation for life. A large quantity of corn, which was held by the bankrupt, had been obtained by fraud. Sir John Bayley, Q.C., acting as arbitrator in the Chancery suits which have arisen, has awarded out of the 30,000*l* of assets recovered 28,000*l* to the creditors who had been defrauded, and 2,000*l* odd to the assignees of Pries. The dividend, which will be a final one, will be about 2s 6d in the pound.

The intelligence from Rio de Janeiro regarding the failure of Mr Mello e Souza for 500,000*l*, which was announced by

the last packet, is to the effect that his proposal to pay in three years and nine months, without interest, had been agreed to by two-thirds of the creditors—a majority sufficient to give it legal force.

At a meeting of creditors of Messrs H. Brooks and Co., manufacturers of pianoforte actions, &c., it appeared from an approximate statement furnished by Mr C. F. Kemp, the accountant, that the liabilities are about 37,740*l*, and the assets, including 27,840*l* for stock, plant, and furniture, about 36,093*l*. The meeting was called in order to prevent the works being stopped. It was resolved to appoint a committee of investigation and adjourn for a fortnight, the necessary powers being given to carry on the business in the interval.

In the Bankruptcy Court an adjournment was ordered of the certificate meeting in the case of Mr Simon Saunder, merchant, of St Mary-axe, whose debts are 15,407*l*, and assets *nil*. Most of the creditors reside on the Continent.

James Denny Chapman, warehouseman, of Aldermanbury and Whitechapel, who has absconded with considerable property, leaving debts to the amount of 30,000*l*, was proclaimed in the Bankruptcy Court in the usual form.

At a meeting of creditors of Mr Peter Brown, carpet warehouseman, of Basinghall street, the accounts submitted by Mr Coleman showed that the liabilities amounted to 27,762*l* 8s 5d, and the assets to 21,408*l* 12s 11d. Mr Brown also suspended in 1858, when he believed himself to have a surplus of 7,719*l*, and agreed to pay 20s in the pound with interest, an arrangement which was subsequently carried out. The actual surplus, however, at that period, was only 1,083*l*, and from this over-estimate of the assets, and subsequent losses by bad debts of 6,154*l*, the present failure has taken place. An offer of 12s 6d in the pound in instalments extending over 12 months was agreed to.

At a meeting of creditors of Messrs J. J. Tilley and Co., warehousemen, the balance sheet, prepared by Mr C. F. Kemp, showed that their liabilities amounted to 22,910*l* 11s 3d, and their assets to 6,041*l* 7s 4d. It appears that the firm has been insolvent since 1858, and that the trading from that period to the time of the present stoppage has resulted in a deficiency of 7,500*l*, of which 1,500*l* was for private drawings and 6,000*l* for general expenditure. The accounts show that the transactions have been very complicated, and include the circulation of accommodation paper. The deficiency is accounted for by losses on consignments, discounts, salaries, trade expenses, &c. A composition of 4s in the pound in cash was offered, and after a long discussion, in the course of which it was proposed to liquidate under bankruptcy, it was resolved, by a majority of 13 to 8, to accept the offer.

At a meeting of the creditors of Smith and Co., of the Whitechapel distillery, when, according to the accounts presented by Mr S. Lowell Price, the accountant, the liabilities amounted to 33,302*l* 1s 5d, and the assets to 44,050*l* 13s 11d, thereby showing a surplus of 10,748*l* 12s 6d. The estate thus shows more than 20s in the pound, and the assets having been valued at the lowest estimate it is believed that the full amount shown in the balance sheet will be realised. No offer was made by Mr Smith, but it was proposed to wind it up under inspection. After some explanations it was resolved to adopt this course, and a resolution was passed expressing the confidence of the creditors in Mr Smith's conduct.

The petition to wind up the General Discount Company, presented by Mr Lennard, stands over by arrangement.

The bills of Messrs J. and R. Morrison, of Gateshead, in the drapery trade, have been returned. The liabilities of the firm are believed to be insignificant.

The advices by the Brazil mail mention that several small failures had taken place at Rio, and that some larger ones were expected. The general condition of the country, however, owing to favourable crops, especially of coffee, is satisfactory.

MISCELLANEOUS.—Arrangements have just been completed for an amalgamation of the Albert Life Assurance and Guarantee Company and the Medical, Invalid, and General Life Assurance Society, under the title of the Albert and Medical Life Assurance Company. The accumulated fund of the associated companies now exceeds 500,000*l*; the subscribed capital is 447,180*l*; the paid-up capital is 137,000*l*; the annual income from life premiums is upwards of 220,000*l*; and the new business is stated to be progressing at the rate of more than 25,000*l* per annum.

The sum of 124,076*l* has been paid to the Bank of England to the credit of the Secretary of State for India, on account of the share capital of the Punjaub Railway. The sum of 27,900*l* has been also paid to the credit of the Secretary of State for India, on account of the Debentures of the Scinde Railway. The funds on hand of the Scinde Railway Company are sufficient to carry on its various undertakings until next year.

It is officially announced that the interest coupons which fell due on 1st Oct. on the Second Preference and other Debentures of the Grand Trunk Railway Company of Canada will not be paid, the Company not possessing the requisite funds, Their default has produced a feeling of grievous disappointment. The price of the Second Preference Debentures this afternoon was 60 to 65. They were placed on the market by the Company as recently as May last at 80, and the coupon due on the 1st Oct. is the first one.

The following satisfactory intimation has been received by the Stock Exchange from the Great Western Railway Company of Canada:—

Great Western Railway of Canada, Gresham House,
Old Broad street, London, Oct. 3.

Dear Sir,—I am desired to inform you that the 6 per Cent. Debenture Bonds of this Company, falling due on Oct. 15th inst., will be paid at maturity at these offices. The bonds are required to be left here three days previously for examination.—I am, &c.,
BRACKSTONE BAKER, Secretary.

Mihill Slaughter, Esq., Stock Exchange.

The freight receivable by the Royal Mail Steam Packet Company upon the specie by the Tasmanian will exceed 12,000*l*, a sum nearly equal to a dividend of 1*l* per share on the capital of the Company.

With reference to the market for American securities, Mr E. F. Satterthwaite reports as follows:—

A fair amount of business in American securities has been doing in London during the past week. There has been a good demand for States' stocks and first-class railroad bonds, also for Erie shares, which have touched 37⅞. Illinois Central shares, which were a week ago 17 discount, have declined to 21 discount, at which point buyers appeared, and the market for them has much improved in character; they close firm at 18½ discount. A good feature of the concern is the improvement in land sales, which were in the first and second week of September respectively 32,223 dols and 40,368 dols. The inquiry for Detroit and Milwaukee Bonds still continues, but none are at present offering. New York Central Bonds have touched 90, the highest point yet reached in this market, where the exchange is fixed at 4s 6d per dollar.

The London, Chatham, and Dover Railway Company have issued proposals for raising 1,650,000*l* capital for their extension lines to Farringdon street and Victoria Station. The districts accommodated will be Dulwich, Herne Hill, Camberwell, and Walworth, and also Brixton and Battersea. The proposed amount will be represented by 165,000 10*l* shares, to be divided into 82,500 six per cent. preference B shares and 82,500 A shares, the latter not receiving any dividend until after the B shares.

A telegram to-day announces that the submarine cable from Algiers has been successfully landed at the island of Minorca, and that messages are in course of perfect transmission both ways. The distance is 250 miles, and some portion is 2,000 fathoms deep—approaching the general depth of the route of the unsuccessful Atlantic line. The portion from Minorca to Toulon in France will be about another 250 miles, and this is expected to be laid during the present month should the weather prove favourable.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about ½ per mille discount, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in Paris and London.

By advices from Hamburg the price of gold is 424½ per mark, and the short exchange on London is 13.4 per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 3-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 109¾ per cent., which, compared with the Mint par between the two countries, shows that the exchange is slightly in favour of England; and, after making allowance for charges of transport and difference of interest, the present rate leaves a small profit on the importation of gold from the United States.

On the 1st, AMERICA, per steam ship Baveria, via Southampton—New York, 15th ult.

On the 2nd, PENINSULA, per steam ship Sultan, via Southampton—Lisbon, 27th; Oporto and Vigo, 28th ult.

On the 2nd, AMERICA, per steam ship Bohemian, via Londonderry—Quebec, 22nd ult.

On the 3rd, BRAZILS and RIVER PLATE, per steam ship Magdalena, via Southampton—Buenos Ayres, Aug. 27; Montevideo, 31; Rio Janeiro, Sept. 8; Bahia, 12; Pernambuco, 14; St Vincent (Cape Verdes), 21; Lisbon, 29.

On the 4th, MEDITERRANEAN, per steam ship Ceylon, via Southampton—Alexandria, Sept. 21; Malta, 25; and Gibraltar, 29.

On the 4th, UNITED STATES, per steam ship City of Washington, via Liverpool—New York, 22nd ult.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Although only a limited supply of English wheat was on offer at Mark lane to-day, the demand for both red and white qualities was very inactive, and, to have forced sales, lower rates must have been submitted to. In foreign wheat—the show of which was seasonably large—next to nothing was doing, at about stationary prices. Most descriptions of spring corn realised former terms, but the inquiry was much less active. The flour trade was slow. The imports from abroad are liberal, viz., 18,860 quarters of wheat; 2,380 barley; 36,070 oats; 2,680 sacks and 5,370 barrels of flour.

At Liverpool, this morning, most articles of grain commanded Tuesday's currency; but the trade, generally, was less active.

The annexed report of the state of the grain trade at Odessa, to the 21st ult., is furnished by Messrs Pietroni and Draper :—

Corn—The arrivals of new wheats, although considerable, are not so important as the large crop would have led us to expect. Business has been much restricted by the want of shipping, which had caused wheat to decline 75 copecs per chetwert, but, owing to recent advices from the United Kingdom, there has been a slight improvement here. Wheat—Ghirkas of 10 to 10.6 poods here sold at 9¼ to 9¾ roubles; and 9.20 to 9.35 poods at 8¾ to 9¼ roubles. In Polish and Sandomirka wheats nothing has been done, for none of the new crop has yet arrived. Wheat, Polish Odessa, 41s 10d per 480 lbs; ditto, Sandomirka, 42s 10d per 480 lbs; ditto, Ghirka, 45s 1d per 492 lbs; rye, 19s 7d per quarter; maize, 27s 6d per 492 lbs; barley, 18s per 400 lbs; oats, 15s per 300 lbs; linseed, unsifted, 42s 9d per quarter; ditto, sifted, 45s 3d per quarter; Peas, green, 36s 3d per quarter; tallow, 49s 10s per cwt; wool, Donskoi, 7½d per lb, all free on board.

	Exports from Odessa from 1st to 31st August, to United Kingdom.		Total to all parts since January 1.
Wheat	80,278	chetwerts	653,883
Maize	2,047		247,012
Barley	10,280		71,272
Oats	4,945		228,875
Linseed	11,594		79,269
Rapeseed	926		3 459

At Alexandria, on the 20th ult., prices of wheat and some other articles were rather drooping.

There has been a very active demand in the Liverpool cotton market during the week, the total sales amounting to 111,000 bales, and include 68,000 bales to spinners, 33,000 bales to speculators, and 10,000 bales for export, at an advance of ⅛d per lb upon the lower American qualities, and ⅛d to ¼d upon Surats. The prices of the latter have been lately so much enhanced that they are now comparatively dearer than other descriptions. To-day the sales are 10,000 bales, with a steady market. The accounts received from America this week are rather more favourable; the moisture after the drought has given the plant a good stand, so that, with a long season, the prospects are favourable. The American markets are all flat and drooping, showing very little faith there in the reports of damage which are creating at present so much excitement in Liverpool.

"The improvement in crop prospects noted in our last," observe Messrs Neill and Co., of New York, "is confirmed by a week's later advices. The rains have been succeeded by fine weather, and the accounts come more favourable. The new growth continues to do well; and it is now generally conceded that the upland crop may be materially improved by it. On light, sandy soils it promises to do best; but fine weather and a late frost will be essential to its full development everywhere. The early pickings on some of the hilly lands which suffered by drought are found to yield rather lightly, but in other places an average crop will be gathered. From the bottom-land districts there is nothing new to report—the prospects for full crops continuing as heretofore."

For all kinds of tea, owing to heavy shipments from China, compared with last year, the demand has ruled heavy, and prices have been with difficulty supported.

We have received the annexed commercial report from Hong Kong, under date the 10th of August:—

Tea—An extremely limited business has been done in tea. There were, however, symptoms of approaching activity. A few chops of Ping Suey tea had reached the settlement via Ningpo, and it was said a few more of new congous were detained a few miles from market by the cupidity of local mandarins, and that foreigners were about to proceed to the spot for the purpose of bringing them in. The settlements during the fortnight between the mails comprised 590 chests of new Hoochow tea at 26 to 27½ taels. 3,000 chests of congou and 200 packages pekoe remained in stock. A few chests of Japan black teas had also been settled. Of green teas of China growth no settlements were reported; 8,800 packages were in stock. About 780 packages Japan greens had found buyers, leaving 5,600 packages in stock. The prices of black tea it would be impossible to give. There was not a package of Oopack, Ningchow, or Hohow (of country packing) in the market. Prices of green teas must be considered nominal.

Silk—On and after the 18th ult., for financial considerations, an additional transit duty of 11 taels per picul was levied on silk passing into the settlement. This measure being anticipated caused dealers to hurry to market, augmenting the stock very materially, and causing foreigners to forbear from operations. A reduction of 10 to 15 taels on previous rates was the result, and 3,000 bales were settled at the following prices:—

No. 5 Tsatlee ... —	335 to 345		

Foochow dates are to 3rd instant. Tea—The tea market had displayed much activity; the American, Australian, and Continental markets occupying the attention of buyers to the neglect of purchases for England. The arrivals during the fortnight consisted of 25,000 chests congou, 2,000 chests souchong, and 34,000 packages oolong. The sales during the same period amounted to about 30,000 chests congou, 23,000 packages oolong, 2,000 chests souchong, and 1,500 packages scented teas. The trade in Canton seems to have come to a sudden stand in consequence of the renewed hostile measures in the neighbourhood of the city. The forces in the field are said to be numerous, but the exact positions held are uncertain. Several attempts have been made to ascertain their strongholds, but hitherto without success. The transactions during the fortnight are as follows:—New congou, 13 chops; Canton congou, 4,000 half-chests; scented orange pekoe, 16,000 packages; scented capers, 10,000 ditto; gunpowder, 3,000 ditto; pouchong, 12,000 ditto. There is not any material alteration in prices. Our export of tea for this season, from 1st July to 10th August, 1860, is—from Canton, 6,034,900 lbs; Foochow, 3,875,400; Shanghai, 709,900, giving total for the season 1860-61, as far as yet ascertained, 11,520,200 lbs, against 4,775,200 at the same date last year, showing an increase of 6,745,000 lbs. The silk export has been 4,198 bales, against 3,954 last season—the increase being 244 bales.

The reduction in the duty on refined qualities in France has produced some firmness in the market for most kinds of sugar, the prices of which have, in some instances, advanced 6d per cwt. In the value of coffee, very little change has taken place; but the market is in a healthy state.

We have received the following report of the coffee market, dated Colombo, Aug. 30, from Messrs Volkart Brothers:—

The disposal of the present season's crop to date stand thus:—

PLANTATION COFFEE.

To Great Britain ...	cwts 416,695	against last year,	cwts	320,168
Foreign Ports ...	30,391	—	—	38,995
Australia and India ...	10,870	—	—	7,515
	457,956			366,678

NATIVE COFFEE.

To Great Britain ...	cwts 83,939	against last year,	cwts	66,120
Foreign Ports ...	67,269	—	—	117,747
Australia and India ...	3,640	—	—	7,271
	154,848			191,138

Since the date of our last, refreshing showers have fallen, extending to most parts of the interior, in sufficient quantity to prevent any further damage to growing crops, but too late to save the native coffee. Labour is not so abundant as was expected, but, as yet, gathering has commenced only on estates of low elevation. Very little plantation coffee has reached Colombo to date. Plantation coffee, low, per bhl, nominal; ditto, mountain, 11s to 11s 6d; native coffee, unpicked, per cwt, 47s 6d to 48s; ditto, picked and dried, 50s 6d.

The actual distribution of the crop is as under:—

	Plantation. cwts.	Native. cwts.	Total. cwts.
London ...	374,397	78,264	452,661
Liverpool ...	12,724	3,134	15,858

* The stocks in Holland are in first hands only; in all other countries in first second and hands.

There has been a very quiet market for all kinds of rice, at prices about equal to last week.

In saltpetre, hemp, and flax, the transactions have continued much restricted. The wool trade is very inactive, but no change has taken place in the quotations.

The public sales of wool, held at Liverpool, have been brought to a close. Messrs Ronald and Son, observe:—"Of East India, 18,560 bales were brought forward, which is more than has ever been put up at any former series, exceeding even the hitherto large sales of October, 1858, by 2,000 bales, and surpassing the total imports here a few years back (18,090 bales for 1853). Notwithstanding the large quantity, the entire has found buyers at prices on the average pretty much the same that were realised at the

June-July series,—thus proving the sound state of trade generally, and of this branch of the wool business in particular. The alpaca offered, not being of a first-rate character, did not seem to command attention, and were, therefore, withdrawn; there is, however, still a fair inquiry for good alpaca, and buyers are open to contract "for arrival" at late rates. Other kinds underwent very little change. 755 sheets English fleece and skin were put up; they met with fair competition, and the greater portion was disposed of at a slight reduction from the rates obtained at the last series here. There has been, however, an improved demand by private contract during the month, at rather enhanced rates. Scotch—Laid Highland of the better class still continues in good demand, whilst inferior parcels are quite neglected."

The state of the indigo trade at Calcutta to 22nd August, is thus reported by Messrs Meran and Co.:—

We have the pleasure to hand you our estimate of the new crop, which we believe, at all events so far as Bengal and Tirhoot are concerned, will prove pretty nearly correct, the manufacturing having so far advanced as to give us fair grounds for the formation of an estimate. The Kishnaghur factories, we are sorry to say, are falling off in their outturns, and will not make in the aggregate so much as they did last year, whilst those at Jessore have somewhat improved. We are told that the ryots have an idea that when the season closes planters will leave the factories, not to return to them, and that indigo will cease to be grown. On the other hand, we hear many are prepared to take advances for October sowings as usual. The first cuttings in Tirhoot will be completed in a few days, and give a better result than was anticipated, and the district has consequently every prospect of doing better than last year. The news from the Benares provinces continues of the same unsatisfactory character, and the prospects of a bad season there are becoming daily more certain. Last year's Khoonties have died away to a great extent, and the plant from the new sowings will not be ready until the nights become cold, and the result must be bad produce and bad colour. From the Doab, accounts vary to some extent, but we learn from Cawnpore that no one thinks of beginning to manufacture before the end of the month, and that the expectation of planters are of a gloomy nature:—

	1,06,743		1,03,500	—	1,06,500

Exports of indigo from the 1st November, 1859, to the evening of the 20th current:—To Great Britain, 18,913 chests; Havre and Bordeaux, 5,186; Foreign Europe, 64; America, 1,495; Gulf, &c., 1,751; sundry ports, 11—total, 27,420.

Scotch pig iron has sold at 51s 6d to 51s 9d cash mixed numbers. Spelter has given way in price, and other metals have changed hands slowly. Mr Thos. Thorburn has furnished the annexed quarterly report of the Scotch iron trade:—

While the exports, foreign and coastwise, coupled with the local consumption of pig iron, reached 250,000 tons in the last quarter, and show an increase of 5,000 tons when compared with the corresponding period of 1859; the production was 278,000 tons, and exhibits an increase of 48,000 tons when compared with the same quarter of last year. The stocks have consequently increased 27,000 tons in the preceding three months, and are now 368,000* tons, exclusive of Carron. Although the prices have, under such circumstances, shown a declining tendency, still their fluctuation scarcely exceeded four per cent., the highest price having been 53s 3d in July, the lowest, 50s 9d, last month, and averaged 51s 9d in the quarter, so that the fall actually established is not an important one, considering the prospects of a failing harvest, and the chronic mistrust which has so long pervaded the mercantile mind. The malleable and foundry works of the district are generally well employed, and the shipbuilding on the Clyde is increasing in activity. It is satisfactory to observe that in nearly every branch operative labour finds full employment. Though the French Treaty of Commerce has hitherto proved a nullity, as far as regards iron, yet, as in virtue of it, the duty on pig iron will from and after this date be 24 instead of 48 francs per ton, I cannot but think that this, with other facilities given by the new tariff, will lead to an increased demand for the article, and impart an impetus to the industrial energies of both countries. Subjoined are the present prices:—No. 1 Gartsherrie, 55s 6d; No. 1 Coltness and Calder, 53s; No. 1 Glengarnock, 52s; Nos. 1 and 3 G.M.B, 50s; mixed Nos. warrants, 51s 3d. Ayrshire brands, 49s 6d to 51s; East Coast brands, 49s 6d for mixed Nos. Bars, 7l to 7l 10s; plates, 8l 15s; rails, 6l 10s to 7l; railway chairs, 3l 15s to 4l; iron pipes, 4l 15s to 5l 10s per ton.

The following statistics, in reference to the stocks of timber in the public docks in London on the 1st October, are furnished by Messrs Churchill and Sim:—

	1860.		1859.		1858.
Foreign deals .....pieces	1,080,000	...	950,000	...	1,309,000
— Battens, boards, and ends...	697,000	...	561,000	...	469,000
— Fir timber .....loads	24,300	...	57,900	...	29,900
Colonial pine deals and battens. pieces	660,000	...	488,000	...	865,000
— Spruce ditto	862,000	...	1,048,000	...	593,000
— Pine timber.....loads	11,700	...	6,800	...	9,400
United States pitch pine timber	2,700	...	5,800	...	3,500
East Indian teake	2,600	...	7,900	...	10,300

The fruit trade has been very flat, and, in some instances, the currencies have had a drooping tendency. "This year's crop of currants," observe Messrs Witherby and Son, "resembles in quality that of 1851; in quantity it far exceeds it, an inquiries have naturally been made as to the circumstances under which each crop came to market, and the respective capability of consumption. In 1851 the price opened as now at 42s (duty then 15s 9d), fell before December to 31s to 35s, and after the Christmas trade had ceased, to 27s to 30s, whilst old rain-damaged fruit was 18s to 20s, and fit only for export. The Continent had in 1852 such an accumulation of stock, that exports from this market were stopped, and in 1852 and 1853 about 13,000 tons were sent over to this country upon an advance in prices here, whereas the stock on the Continent on the 30th June last is known to have been only 3,000 tons. The stock of currants in London on the 1st inst. was about 9,000 tons, against 4,400 tons last year. Of the 9,000 tons, nearly 6,000 tons must be old fruit."

In alluding to the state of the tobacco trade during the past month, Messrs Grant, Hodgson, and Co. observe:—

The transactions in our market during the past month have been quite of a retail character, buyers having previously freely supplied themselves, and holders either having withdrawn their stocks off the market or demanded an advance of a farthing to a halfpenny per lb. Estimates of the Western crop vary from 40,000 to 50,000 hhds, which would about equal the number raised in 1854; this, together with the Virginia crop 65,000 hhds, the Maryland 45,000 hhds, and the Ohio 15,000 hhds, would give a total of 175,000 hhds, against 244,000 hhds in 1859, 217,252 hhds in 1858, or 238,545 hhds in 1857. Imports—3,492 hhds. Deliveries—889 hhds, against 695 hhds in the corresponding month last year. Stock—20,693 hhds, against 19,385 hhds in 1859; 11,687 hhds in 1858; 10,113 hhds in 1857; and 8,674 hhds in 1856.

Messrs Powell and Co. allude as follows to the state of the leather trade during the past month:—

The leather trade has not shown so much activity as could be desired. The sales of stocks under the estates in bankruptcy that have been in progress privately, have diverted buyers to some extent from the ordinary channels, and as it is only reasonable to presume that some inducement to purchase has been held out in these sales, they have necessarily tended to cause some depression in the market. The lateness and uncertainty of the harvest have also no doubt contributed to the dulness that has prevailed. Under such circumstances, however, the transactions have been quite as large as could be expected, amounting, probably, inclusive of the sales of bankrupts' stock, to an average monthly business. Prices have undergone very little change, but the tendency has been slightly downward. It is satisfactory to observe that the exports of leather of all descriptions show an increase during the present year, and we hope that the caution which buyers have exercised will insure a steady consumptive demand for the future. The diminution in the numbers of hides put into work for some months past, either from necessity or from prudential motives, must also be eventually felt in a falling off of the supplies of leather. In raw goods there is nothing particular to notice: the importation has not been excessive, and sales to a fair extent have been made. A considerable business was done at the public sale of the 13th, but at that on the 27th a small proportion only of the goods offered found buyers, either for home use or for export. Prices in general are nearly unaltered, and salted hides are still much beyond their relative value in comparison with leather.

A full average business has been passing in rum, at fully last week's quotations, and brandy has advanced 2d to 3d per gallon.

Oils have changed hands to a moderate extent. Tallow is firm, at 53s 9d for P.Y.C., on the spot, and 54s 6d for the first three months. The shipments from St Petersburg, to the latest dates, are 106,000 casks.

COTTON.

New York, September 22.

For cotton a better demand has prevailed, and a fair extent of business has been done, but at somewhat irregular prices, and the market closed on the basis of 10⅜ for middling uplands, and 11⅛ for New Orleans. The week's receipts show an increase of 7,000 over those of last year, and an increase of 17,000 over 1858-9, and the exports exhibit the following results:—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year.....Dec.	18000	...Inc. 1000	...Dec. 1000	...Dec. 18000	...Inc. 129000

A very large business has been done in cotton this week. The trade have taken much more than their average consumption, and a fair business has been reported for export. East India cottons and the lower qualities of American have again been largely dealt in by speculators. American of good character steadily improve in value, and nearly all our quotations have been raised ⅛d per lb. Longstapled kinds are firmly held, and Pernam and Maranham have realised an advance of fully ⅛d per lb. East India are again ⅛d to ¼d per lb dearer. The sales to-day are 10,000 bales. The market is firm and healthy. The reported export amounts to 10,240 bales, consisting of 2,620 American, 30 Brazil, and 7,590 East India.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 22.—State and Western flour, which had drooped under the influence of European advices, closed more buoyantly, and a shade firmer in price. State, extra brands, 5.30 dols to 5.50 dols; Ohio, common brands, 5.30 dols to 5.35 dols; Ohio, good and choice extra brands, 5.75 dols to 7.50 dols; and Missouri, 5.80 dols to 7.50 dols. Southern flour had closed dull and dropping at 6.20 dols to 6.40 dols for Brandywine; 5.90 dols to 7 dols for Georgetown; and 5.70 dols to 6.90 dols for Baltimore. Corn meal in moderate inquiry. Grain had also participated in the firm feeling, and closed with more steadiness, with moderately heavy sales. Chicago spring, 1.16 dol to 1.23 dol; Western red, 1.28 dol to 1.29 dol; Milwaukee Club, 1.23 dol. to 1.25 dol. Corn in fair supply, but prices barely maintained at the close. Oats closed at a shade better, having been in fair request. State beans firm, but inactive. Canada peas firm, with sales for new crop at 90c. Freights to London—Flour 3s 10½d to 4s; wheat, 13½d, in ships' bags.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the markets held during the present week have been scantily supplied with wheat. For both red and white qualities, the demand has continued steady, at a further improvement in value of from 2s to 3s per quarter, at which, however, owing to the damp condition in which the samples have come to hand, the business done has been only moderate. At the various outports, foreign wheats have commanded more attention, and prices have further advanced 2s to 3s per quarter. Many of the country millers are now compelled to buy large parcels of foreign wheat to make really good saleable flour. The barley trade has been decidedly active, and 1s per quarter more money has been paid. Malt, too, has commanded somewhat advanced rates. Oats, beans, and peas, from their scarcity, have realised an improvement of 1s per quarter. The flour trade has ruled steady, and the quotations have had an upward tendency.

Throughout the Continent, rather large quantities of wheat have changed hands on English account, at very full prices. Spring corn, too, has commanded more attention, at slightly enhanced rates; but, in the United States, the quotations have ruled somewhat lower. Evidently for some time we shall continue to import very large supplies of foreign produce; but considering the poor condition of our own crops, we believe that the whole will be required for consumption.

The Scotch markets have been steady for wheat, at 2s per quarter advance, and all other articles have commanded more money. The quantity of barley grown this year is unusually large; hence, large shipments will shortly be made to the South.

In Ireland, no change of importance has taken place in the general features of the grain trade. Prices, generally, have advanced; but the business done has not been extensive.

Harvest work in England has progressed slowly. Even now, large quantities of produce, especially of wheat and oats, still remain in the fields, and complaints are general of the poor yield and quality of the new crops.

Mr J. C. Thormann, of Wismar, writes as follows in reference to the crops:—"Wheat in this country—generally sown on heavy clay grounds—suffers most of all our crops from heavy rains. Being soon laid down, it never recovered, and is wanting in the well-formed round grain of last harvest, and it has not been possible to secure the crop everywhere in dry condition. We must be prepared, therefore, to meet with a good deal of inferior quality—part with smut and sprouted grains, but not nearly to the extent that might have been looked for from the continued unfavourable weather, the farmers having hastened as much as possible to house their grain, which has been carried much quicker than usual. Kiln-drying must be resorted to, in part at least, and the weight will not exceed 60 lbs per bushel. Rye having been first gathered in, is less damaged by the weather, but the quality is only middling, the weight 57 lbs. Peas a large crop, but, with few exceptions, the condition is such that shipments cannot be made before winter, and the greater portion must be used for cattle. Barley promised well, but it too has suffered in weight and quality; the fine clear colour is lost. Tares more abundant than last year, but quality inferior. The necessary deduction for inferior weight and quality being made, the grain harvest, on the whole, will no more than reach an average quantity."

The supply of English wheat in to-day's market was limited; nevertheless, all kinds met a dull inquiry, at barely Monday's quotations. Foreign wheat was in good supply, and heavy request, on former terms. All other kinds of produce changed hands slowly, at about previous rates."

The state of the floating trade is reported by Mr Edward Rainford as follows:—Since the 28th ult. 15 cargoes of grain have arrived off coast for orders, consisting of 9 wheat, 5 maize and 1 beans, viz.:—Wheat, 3 from Taganrog, 2 Berdianski, 1 Odessa, 1 New York, 1 Marseilles, 1 Constantinople; maize, 2 Sulina, 1 Ibraila, 1 Constantinople, 1 Odessa; beans, 1 Alexandria. Of these, 5 or 6 cargoes were previously disposed of. The business in floating cargoes since this day week manifests much less animation than has existed for many weeks, but prices keep up and sellers are firm. The following are the only reported transactions up to the close of to-day's market:—Wheat, arrived, Marianople at 59s, Taganrog Ghirka 57s, and Odessa Ghirka (slightly imperfect) 55s per 492 lbs; Galatz, 51s per 480 lbs tale quale; Saide, 45s 6d per imperial quarter; on passage, hard Taganrog, 3 cargoes at 54s, 54s 6d, and about 55s per 492 lbs; old Banat (B. L. September) 57s per 492 lbs; ditto, 54s per 480 lbs; Egyptian, 44s per imperial quarter; to be shipped in November or December, new Odessa Ghirka, 58s 6d per 492 lbs. Flour, arrived from Santander, 47s 6d net per sack. Maize, arrived, Racova, 37s 10½d per 492 lbs; Ibraila (much heated and discoloured) 33s; ditto (slightly imperfect), 35s 6d; ditto (slight warmth), 35s 9d per 480 lbs. Beans, arrived, Egyptian, 35s 6d per 480 lbs for London; on passage, Egyptian, 34s per imperial quarter for London direct.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has become firmer in consequence of the expected removal of the prohibitory duties upon foreign refined in France, and some descriptions show an advance of 6d per cwt. A considerable quantity of West India sold to yesterday (Thursday), viz, 4,600 casks. 341 casks Barbadoes, by auction, ranged from 38s to 42s 6d for brown and yellow, and 43s to 45s for good to fine. 206 casks Jamaica, 38s to 43s per cwt. There was some falling off in the deliveries last week, but the total clearances for consumption exceed those of last year by 12,300 tons. The stock is 74,200 tons, against 83,500 last year, and 77,300 tons in 1859.

Mauritius.—3,980 bags principally sold: brown, 32s 6d to 36s; grainy kinds, 42s 6d to 45s per cwt.

Bengal.—1,256 bags Cossipore ranged from 43s to 45s 6d for middling to fine. Nothing of importance has been done by private contract.

Madras is more inquired after.

Manilla.—12,783 bags clayed mostly sold at 38s to 39s for the sound portion, and some business has also been done by private contract.

Foreign.—1,057 boxes Havana, by auction, sold from 35s to 43s for low brown to good yellow. No public sales of other descriptions were held to yesterday. By private contract, 1,800 boxes have changed hands, besides a few parcels of other sorts. A floating cargo of Havana, No. 13, sold for the United Kingdom at 28s, and one, No. 14, at 29s per cwt for a near port.

Refined.—The market has become firmer owing to the approaching change in the French duties, and prices of dry goods have improved about 6d: common to low middling, 49s 6d to 50s. Crushed and pieces find ready buyers at the quotations.

Molasses.—No sales are reported this week.

Cocoa.—178 bags Trinidad partly sold at 68s 6d to 69s per cwt for common mixed greyish red.

Rum.—The market has still a tendency to improvement, and moderate transactions are reported this week. Demerara proof, good to fine, 1s 10½d to 2s; Leewards, 1s 7½d to 1s 8d; East India proof, 1s 6½d to 1s 7d per gallon. The stock of West India is 24,100 puns against 23,650 puns in 1859. Of other kinds (not including vatted), 2,650 puns 2,200 hhds, against 4,100 puns 3,700 hhds at the same period last year.

Coffee.—There has been less animation in the demand for plantation Ceylon this week, but the better qualities of East India have sold above the general valuations; 222 bags Cannon's Mysore bringing 102s to 115s. 1,223 bags Munzerabad mountain, 70s to 102s. 774 bags Malabar partly sold at 66s to 66s 6d for good ordinary. A few parcels of Mocha have changed hands by private treaty at extreme rates. Former quotations have been barely supported for plantation Ceylon, 499 casks 585 barrels and bags finding buyers at 70s to 75s for low middling to good middling. 120 bags native brought 65s 6d to 66s for inferior. 1,638 bags Costa Rica went at 65s to 73s per cwt. for fine ordinary to middling. A floating cargo of Rio is reported sold for a near port at 59s 9d, and 1,000 bags native Ceylon, to arrive, at 63s per cwt.

Tea.—New season's congous sold rather slowly during the week, at 1s 9d to 2s 3d per lb, and further considerable arrivals have taken place. The market generally is dull.

Rice.—Moderate transactions are reported at previous rates, and the market remains firm, although rather quiet. Privately, new Necrancie Arracan sold at 11s 3d; old, 10s 6d to 10s 9d; good white Bengal, 13s 7½d; Ballam, 11s 4½d; pinky Madras, 11s to 11s 6d. 1,302 bags Padang, at auction, brought 9s 6d to 10s 6d. 3,632 bags old Rangoon were taken in at 9s 6d to 10s. 1,230 bags Bengal, of old import, went at 11s to 12s 6d for low to middling white. Two floating cargoes of Necraucie Arracan have been sold at 11s 3d to 11s 4½d per cwt.

Imports and Deliveries of Rice to September 29, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons
Imports	28200	21720	72500	52800

Spices.—2,287 bags pimento about half sold at easier rates, from 3d to 3½d for low to good. 37 bags Zanzibar cloves were bought in at 3¾d; and 12 cases from Amsterdam at 11d. 64 cases nutmegs brought previous rates, from 1s 4d to 2s for low small to good brown. 480 bags Singapore white pepper brought 6d to 6½d. 3,425 bags Singapore black, 4½d. 681 bags Penang: good, 4d to 4½d; common, 3¾d to 3¾d. 10 cases mace, 10d to 1s per lb for wormy and low. 870 cases Cochin ginger realised 44s to 93s for low to fine bold, one lot 155s. 41 barrels Jamaica part sold at 63s to 68s. 299 packages mouldy cassia vera were bought in at 16s 6d per cwt.

Sago.—389 boxes fine small grain sold at 18s 6d to 19s. 60 boxes bold were bought in at 15s 6d to 16s per cwt.

Saltpetre.—Few contracts have been made by private contract, and the market has still a downward tendency. 202 cases 100bags Bombay, offered in public sale, yesterday, prompt 14 days, brought 38s 6d to 39s 6d, refraction 12¼ to 7¾. 260 bags Bengal on the same terms; refraction 4½ to 3¾, 42s, being for the latter 1s per cwt cheaper. The last transaction in fine Bengal, with full prompt, was at 43s per cwt for fine.

Imports and Deliveries of Saltpetre to September 29, with Stocks on hand.

	1860.	1859.	1858.	1857.
	tons	tons	tons	tons

Deliveries last week 242 tons.

Cochineal.—390 bags about half found buyers at easier rates: low to good silvers ranging from 2s 10d to 3s 6d per lb.

Indigo.—Some partial inquiry exists for fine Bengal, which will be scarce in the ensuing quarterly sales.

Shellac is held for further advanced rates. D C orange was bought in at 12*l* this week; blockey ditto realised 11*l* 15s; livery orange and fine garnet, 11*l* 10s; native liver and red, 11*l* to 11*l* 2s 6d per cwt. The stock in London is only 1,700 tons.

Dyestuffs.—Gambier and Cutch are quiet. 113 bales Bengal safflower partly sold from 4*l* 12s 6d to 7*l* 10s per cwt for low to good middling quality.

Drugs.—No change of interest has occurred in this market.

Metals.—There has been a limited business done this week, and prices in some cases rule slightly lower. Manufactured iron remains quiet. Scotch pig has ranged from 51s to 51s 9d for mixed numbers, closing at the latter price. Sales are reported in spelter at 19*l* 17s 6d to 20*l* on the spot, and 20*l* to 20*l* 2s 6d to arrive. The stock on the 1st inst. was 4,400 tons, against 4,600 tons at the same date last year. Foreign tin is inactive. No change has been made in English. Copper quiet, at the smelters' prices.

Hemp.—Manilla is rather cheaper, and 677 bales by auction brought 20*l* 10s to 22*l* for roping qualities. No further change is perceptible in the jute market. The stock continues heavy, viz., 14,650 tons. On Wednesday, 2,874 bales by auction partly found buyers at 14*l* to 22*l* 5s per ton for common to fine quality. Business is also reported by private contract.

Turpentine.—4,000 barrels of rough have arrived. Spirits are in better demand, at 31s 6d per cwt.

Linseed.—Prices of East India have advanced, owing to the light stocks: Bombay, 59s; Calcutta, 56s to 56s 6d. A large business is reported in the latter (to arrive), at 55s 3d to 55s 6d per quarter.

Oil.—Olive has been in moderate demand, particularly the low qualities for export. Quotations range from 55*l* to 59*l*: Gallipoli, 60*l*. Sperm is in good demand, at 102*l* to 103*l* per tun. Other fish oils have been unaltered. A steady demand exists for palm, fine Lagos commanding 45s to 45s 6d. Cocoa-nut firm: Cochin, 49s 6d to 50s; and Ceylon, 47s 6d to 48s; to arrive, 47s 6d. Linseed is steady at 30s 3d. Rape sells slowly: foreign refined, 45s to 46s; brown, 42s per cwt.

Tallow.—Prices of foreign have further improved to the extent of 6d to 9d, and there has been a steady business done during the week. This morning first sort Petersburg Y.C. is quoted 53s 6d to 53s 9d; to the end of the year the same; and for arrival in the first three months of next, 54s 3d to 54s 6d per cwt.

Particulars of Tallow.—Monday, October 1.
